(1) In reviewing a record in response to a request to amend it, agencies shall assess the accuracy, relevance, timeliness, or completeness of the record. Agencies shall develop tolerances for accuracy and timeliness, giving consideration to whether such tolerances could result in consequences adverse to the individual. Agencies must limit their records to those elements of information which clearly bear on the determination and assure that all those elements are present before a determination is made. Criteria for determining record quality will be published in pertinent chapters in the Federal Personnel Manual.

(2) Agencies shall develop similar criteria for their records systems and publish them in agency manuals.

(e) If the agency agrees with an individual's request to amend a personnel record, it shall:

(1) So advise the individual in writing;

(2) Correct the record accordingly; and

(3) If an accounting of disclosure has been made, advise all previous recipients of the record which was corrected of the correction and its substance.

(f) If the agency, after an initial review of a request to amend a personnel record, disagrees with all or any portion of it, the agency shall:

(1) Advise the individual of its refusal and the reasons for it;

(2) Inform the individual that he or she may request a further review in accordance with § 297.112(c)(2) of this part; and

(3) Describe the procedures for requesting such review including the name and address of the official to whom the request should be directed. The procedures shall be as brief and simple as possible and shall include an indication of where the individual can seek advice or assistance in obtaining such a review.

(g) If an individual disagrees with the initial agency determination, the individual may file a request for a further review of that determination. The review should be made by the agency head or someone he designates in writing who is senior to the officer or employee who made the initial determination, or by the Director, Bureau of Manpower Information Systems, U.S. Civil Service Commission, Washington, D.C., 20415, if the request involves one of the record systems cited in § 293.103(b) of this chapter.

(h) If after the review, the official also refuses to amend the records as the individual requested, the agency shall advise the individual:

(1) Of its refusal and the reasons for it;

(2) Of his or her right to file a concise statement of the reasons for disagreeing with the decision of the agency;

(3) Of the procedures for filing the statement of disagreement;

(4) That the statement which is filed will be made available to anyone to whom the record is subsequently disclosed together with, at the discretion of the agency, a brief statement by the agency summarizing its reasons for refusing to amend the record;

(5) That prior recipients of the disputed record will be provided a copy of any statement of dispute to the extent that an accounting of disclosures was maintained; and

(6) His or her right to seek judicial review of the agency's refusal to amend a record.

(i) If after the review, the official determines that the record should be amended in accordance with the individual's request, the agency should proceed as in § 297.112(e) of this chapter.

(j) A final agency or Commission determination on the individual's request for a review of the agency's initial refusal to amend the record must be concluded within 30 days (excluding Saturdays, Sundays, and legal public holidays) unless the agency head or the Commission determines that a fair and equitable review cannot be made within that time. If additional time is required, the individual will be informed in writing of reasons for the delay and of the approximate date on which the review is expected to be completed.

#### § 297.113 Disclosure of disputed information.

If after an agency or the Commission has refused to amend a personnel record and the individual has filed a statement under § 297.112(h), the agency or the Commission will clearly annotate the record so that the fact that the record is disputed is apparent to anyone who may subsequently have access to, use, or disclose it. When information that is the subject of a statement of dispute filed by an individual is subsequently disclosed, agencies should note that the information is disputed and provide a copy of the individual's statement. Agencies also may include a brief summary of their reasons for not making a correction when disclosing disputed information. Such statements normally will be limited to the reasons given to the individual for not amending the record. Copies of the agency's statement shall be treated as part of the individual's record for granting access; however, it will not be subject to amendment by the individual.

#### § 297.114 Publication of rules and procedures.

(a) The Commission sets forth in this part the rules and procedures for disclosure of personnel records for which it has responsibility.

(b) Agencies shall publish similar rules and procedures consistent with those of the Commission for disclosure of personnel records for which they have responsibility.

#### § 297.115 Fees.

Agencies shall charge no fees for providing the first copy of a record or any portion thereof to individuals to whom the record pertains.

#### § 297.116 Exemptions.

The following systems of records are partially exempt under the Privacy Act of 1974 and these rules:

(a) Personnel records that are specifically authorized under criteria established under an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order.

(b) Statistical personnel records that are used only to generate aggregate data or for other evaluative or analytical purposes and which are not used to make decisions on the rights, benefits, or entitlements of individuals.

(c) Investigatory material maintained solely for the purposes of determining an individual's qualifications, eligibility, or suitability for employment in the Federal civilian service, Federal contracts, or access to classified information, but only to the extent that disclosure of such material would reveal the identity of the source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

(d) Testing or examination material used solely to determine individual qualifications for promotion or appointment in the Federal service the disclosure of which would compromise the objectivity or fairness of the testing or examination process.

UNITED STATES CIVIL SERVICE COMMISSION,

#### ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 180]

[OPP-260007; FRL 378-6]

#### LEPTOPHOS

##### Proposed Revocation of Tolerance

On May 31, 1974, the Environmental Protection Agency published in the FEDERAL REGISTER (39 FR 19208) a regulation (Section 180.345) which established tolerances for combined residues of the insecticide leptophos (O-(4-bromo-2,5-dichlorophenyl) O-methyl phenylphosphonothioate) and its metabolites O-(4-bromo-2,5-dichlorophenyl) O-methyl phenylphosphonate, 4-bromo-2,5-dichlorophenol, and O-(2,5-dichlorophenyl) O-methyl phenylphosphonothioate (calculated as leptophos) in or on the raw agricultural commodities lettuce at 10 parts per million and tomatoes at 2 parts per million. Section 180.3(e) was also amended at that time to include leptophos in the list of cholinesterase-inhibiting pesticides. These regulations were established based on data submitted by Velsicol Corp., 341 East Ohio St., Chicago IL 60611, in connection with a pesticide petition (PP 2F1228) which proposed the establishment of such tolerances.

Subsequent to the establishment of the above tolerances, a reevaluation of the petition and other data confirmed that leptophos is an agent which produces delayed neurotoxicity in hens. Additional information on leptophos is necessary to evaluate the possible hazard to man and other nontarget species from the potential effects of its use.

Based on the above information, there is a reasonable basis to propose revocation of the established tolerances for residues until adequate data are provided by the petitioner to show that the use of leptophos on lettuce and tomatoes will not be detrimental to the public health.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, on or before June 26, 1975, that this proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation to the Federal Register Section, Technical Services Division (WH-

569), Office of Pesticide Programs, Environmental Protection Agency, Room 423, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in reviewing them. The comments must be received on or before June 26, 1975 and should bear a notation indicating the subject (OPP-260007). All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated May 16, 1975.

JOHN B. RITCH, JR.,  
Director, Registration Division.

(Sec. 408 (e) and (m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a (e) and (m)))

It is proposed to amend Part 180 as follows:

#### § 180.3 [Amended]

1. By deleting in § 180.3(e) (5) the sentence, "Leptophos and its cholinesterase-inhibiting metabolites."

#### § 180.345 [Removed]

2. By deleting § 180.345 from Subpart C.

[FR Doc.75-13661 Filed 5-23-75; 8:45 am]

#### FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20401; RM-2363]

#### TABLE OF ASSIGNMENTS, MISSOURI

FM Broadcast Stations; Extension of Time for Comments and Reply Comments

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Jefferson City, Missouri).

1. On March 21, 1975, the Commission adopted a notice of proposed rule making in the above-entitled proceeding. Publication was made in the FEDERAL REGISTER on April 3, 1975, 40 FR 14946. The dates for filing comments and reply comments are presently May 19, and June 9, 1975, respectively.

2. On March 14, 1975, counsel for CLW Broadcasters, requested that the time for filing comments and reply comments be extended to and including June 9 and June 23, 1975, respectively. Counsel states that the additional time is needed to study the availability of other channels for assignment to Centralia, Missouri.

3. We are of the view that the public interest would be served by extending the time in this proceeding. Accordingly, it is ordered, That the dates for filing comments and reply comments are extended to and including June 9 and June 23, 1975, respectively.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and §§ 0.281 and 1.46 of the Commission's rules.

Adopted: May 16, 1975.

Released: May 20, 1975.

FEDERAL COMMUNICATIONS  
COMMISSION,  
[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.  
[FR Doc.75-13700 Filed 5-23-75; 8:45 am]

[47 CFR Parts 81, 83, 87, 91, 93, 95]

[Docket No. 20351]

# **SAFETY AND SPECIAL RADIO SERVICES** **Station Transmissions; Automatic Identifi-** **cation System; Extension for Time to File** **Comments**

In the matter of amendment of Parts 81, 83, 87, 89, 91, 93, and 95 to institute rules regarding a system for automatic identification of station transmissions.

1. Electronic Industries Association (EIA) requests a three month extension of time until August 18, 1975, within which to file comments in the captioned matter. Comments and reply comments were due May 19 and June 2, 1975, respectively.

2. In support of its request, EIA states that the complex issues raised by this proceeding require more time for study before a response can be made. In particular, EIA requires this additional time to study:

- How the quality of on-going communications will be affected by the proposal.
- The technical compatibility problems existing between the ATIS proposal and current standards for certain land mobile equipment.
- How the ATIS requirements may affect on-going products and systems involving mobile data transmission, and
- The economic implications.

Thus, we find that the statements made by EIA constitute a good cause for a grant of its request to extend the time for filing comments in this proceeding. While we are affording EIA and other interested persons additional filing time, we fully expect them to pursue their studies and arrange for needed meetings expeditiously and provide the Commission with meaningful comments.

3. Accordingly, it is ordered, pursuant to §§ 0.131, 0.331, and 1.46 of the Commission's rules that the time for filing comments in the above captioned matter is extended from May 19, 1975, to August 18, 1975, and reply comments from June 2, 1975, to September 2, 1975.

Adopted: May 13, 1975.

Released: May 20, 1975.

## **POSTAL SERVICE**

### **[39 CFR Part 111]**

#### **CITY DELIVERY**

#### **Delivery Policy; New Establishments and Extensions**

Under the provisions of 39 CFR 111.3 the Postal Service proposes to revise its

"City Delivery" regulations in Part 155 (39 CFR 155) of the Postal Service Manual principally by including within this Part a number of rules and regulations as to entitlement to particular forms of postal city delivery which heretofore have been published only as regional instructions of the Postal Service. Because Regional Instructions are generally concerned only with internal operating procedures and guidelines in the postal regions, they are not usually published in Chapter I of the Postal Service Manual, which is incorporated by reference in the Federal Register (see 39 CFR 111.1), or otherwise published in the Federal Register. In this instance, however, incorporation of these regional instructions in Part 155 of the Postal Service Manual appears desirable to facilitate a better understanding of the City Delivery regulations of the Postal Service by concerned members of the public as well as by postal employees.

The proposed regulatory changes would add to § 155.41 a new sentence declaring that purchase, installation, maintenance, and replacement of delivery boxes are not the responsibility of the U.S. Postal Service. This will terminate an experiment under which boxes were supplied by the Postal Service to induce the selection of the most cost-effective form of city delivery.

The revised regulations would delete present § 155.2, authorizing the Regional Postmaster General or his designee to give final approvals for extension of door delivery. Recently, this discretionary authority has rarely been exercised, because of budgetary restraints. Accordingly, the change conforms to what has in fact become operating practice.

In place of § 155.2 the revised regulations would add a new § 155.2 containing detailed rules on entitlement to particular methods of postal delivery in business areas and residential housing (including mobile/trailer homes), which presently are found only in regional instructions. In addition, the new § 155.2 would contain a new § 155.23 to codify an administrative interpretation of regulations as to responses to municipal ordinances.

Minor changes are made in style and form (for example, the changes of "address number" to "street number" proposed for section § 155.62).

Interested persons who wish to do so may submit written data, views, or arguments concerning this proposed change in Postal Service regulations to Assistant General Counsel, Special Projects Division, U.S. Postal Service, Washington, D.C. 20260, at any time before June 30, 1975. After consideration of all comments received, the Postal Service will promulgate the final regulations through amendments to Part 155 of the Postal Service Manual. Accordingly, complying voluntarily with the advance notice requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rule-making, the Postal Service proposes the following amendments of the Manual:

In Part 155 of the Postal Service Manual the following changes are made:

1. Sections 155.1 and 155.2 are revised to read as follows:

#### **155.1 Requirements for delivery service.**

.11 *Establishment.* Establishment refers to initiation of delivery service in a community which currently does not receive mail delivery. Consideration for establishing delivery service will be given when the following requirements are met:

- A population of 2,500 or more within the area to be served, or 750 possible deliveries. (Postal population may vary greatly from the general census population because of different boundary interpretations and designations.)
- Fifty percent of the building lots in the area to be served are improved with houses or business places. Where a house or building and its yard or grounds cover more than one lot, all lots involved are considered completely built up.
- Streets are paved or otherwise improved to permit travel of post office vehicles at all times without damage or delay.
- Street signs are in place and house numbers displayed, where applicable.
- Right-of-ways, turnouts, and areas adjacent to roads and streets are improved so that installation and servicing of boxes will not be hazardous to the public or postal employees.
- Satisfactory walks exist for carriers where required.
- Approved mail receptacles or door slots are installed at designated locations. The requirements are essential to an efficient mail delivery service, and must be met before delivery is inaugurated in a community. In establishing delivery service, a combination of delivery methods should be considered to provide adequate service to all residential and business sections of a community. All establishments of delivery service must have final approval of the Regional Postmaster General or his designee.

.12 *Extension.* Extension refers to new delivery in areas not included in the boundaries of present delivery service. Delivery service extension requirements are the same as those listed in 155.11 with the exception of paragraph a.

**155.2 Delivery policy; new establishments and extensions.**

21 In new establishments and extensions, delivery service should be afforded in areas that meet the criteria in Sections 155.11 and 155.12, Postal Service Manual, and normally will be by motorized carrier to curbside boxes or to central delivery points/receptacles, supplemented as follows:

.211 *Business areas.* The type and design of buildings will dictate the method of delivery service to be implemented. Delivery options are:

a. Vertical Improved Mail (VIM) Program, which may include:

- Call Windows,
  - Lockboxes,
  - Mechanical Conveyors
- (Note: This is available only for high-rise, multiple-tenant buildings, and only if certain conditions are met. For details, consult your postmaster.)

b. Single points/receptacles/door slots provided by business management.

.212 *Residential Housing.—a. General.* For all residential areas, except apartment houses and mobile/trailer homes, delivery options are:

(1) Delivery to boxes located at the curb so they can be safely and conveniently served by the carrier from his vehicle; or,

(2) Central delivery at one or more central points within a residential housing development, community, or area. Requirements are:

(a) Local postal managers must approve mailbox sites and equipment;

(b) There must be a minimum of three mailboxes erected at one site (there is no maximum limit); and,

(c) Customers will not be required to travel an unreasonable distance to obtain their mail, not to exceed 300 feet.

b. *Apartment houses.* See 155.6 for delivery options.

c. *Mobile/trailer homes.* Delivery options for mobile/trailer home developments depend upon whether the development is permanent or transient.

(1) Permanent types are developments consisting of managed mobile home parks or residential mobile home subdivisions where: lots are permanently assigned; streets are maintained for public use; and conditions are similar to those of a normal residential subdivision. For permanent developments, delivery options are:

- Delivery to boxes located at the curb so they can be safely and conveniently served by the carrier from his vehicle;
- Delivery to a single point or receptacle designated by the management for receipt of mail for distribution by its employees;
- Central delivery at one or more central points within the area.

Requirements are:

- Local postal managers must approve mailbox sites and equipment;
- There must be a minimum of three mailboxes erected at one site (there is no maximum limit); and,
- Customers will not be required to travel an unreasonable distance to obtain their mail, not to exceed 300 feet.

(2) Transient types are developments comprising recreational vehicle parks and trailer courts where the lots are temporarily rented and the occupants are transient. Such developments are considered transient, even though some families might live in this type of park for an extended period of time. For transient developments, the only delivery option is delivery to a single point or receptacle designed by the trailer park management for receipt of mail for distribution by its employees.

NOTE: This method is one of three options for permanent developments.

.22 *Exceptions.—221 Fill-In.* New homes built within an existing block of homes receiving delivery service will receive the same level of service afforded other homes in the same block. However, where older homes are replaced with new housing, such as by urban renewal projects, the method of delivery provided the new housing shall be in accord with 155.212.

.222 *Hardship cases.* Door delivery will be considered on an individual customer case bases where service through curbside, lockbox, or general delivery would place an extreme hardship on the customer. Only the Regional Postmaster General may approve delivery exceptions for hardship cases.

.23 Where local, city, county, or state ordinances prohibit the installation of mailboxes at the curb and safe servicing of these receptacles by the carrier from his vehicle, delivery options are:

.231 Central delivery at one or more central points within a residential housing development, community, or area.

Requirements are:

a. Local postal managers must approve mailbox sites and equipment;

b. There must be a minimum of three mailboxes erected at one site (there is no maximum limit); and,

c. Customers will not be required to travel an unreasonable distance to obtain their mail, not to exceed 300 feet, or,

.232 Lockbox or general delivery service at the nearest postal facility where carrier delivery emanates.

#### **155.41 [Amended]**

2. In 155.41 the following sentence is added at the end thereof:

"Purchase, installation, maintenance, and replacement of delivery box equipment are not the responsibility of the U.S. Postal Service."

#### **155.62 [Amended]**

3. In 155.62, strike the words "address" in the section heading and in the first sentence and insert in lieu thereof the word "street".

An appropriate amendment to 39 CFR 111.3 to reflect these changes will be published on adoption of the proposal. (39 U.S.C. 101, 401(2), 403(a), (b), 404(1), 410(a))

ROGER P. CRAIG,  
Deputy General Counsel.

[FR Doc.75-13717 Filed 5-23-75; 8:45 am]

## **VETERANS ADMINISTRATION**

### **[38 CFR Part 21]**

#### **EDUCATIONAL BENEFITS**

#### **Determination of Satisfactory Progress, Conduct, and Enrollment**

It is proposed to amend Part 21, Title 38, Code of Federal Regulations to provide more explicit guidelines for determining satisfactory progress, conduct and enrollment of veterans and eligible persons.

Section 21.4135 is amended to provide new guidelines for determining the point in time beyond which benefits may no longer be paid because the veteran or other eligible person is not enrolled and pursuing the course.

Section 21.4203 is amended to be consistent with the change to §§ 21.4253 and 21.4277.

Sections 21.4253 and 21.4277 are amended to clarify and make explicit that the State approval agency should require educational institutions to maintain and enforce standards and practices for determining progress and conduct of veterans and eligible persons for both accredited and nonaccredited courses.

In addition to the substantive changes, editorial changes are made designed to reflect policy to avoid any appearance of seeming to preclude benefits for female veterans, their dependents and beneficiaries.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271 A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420. All relevant material received before June 26, 1975, will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), during the mentioned 30-day period and for 10 days thereafter. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Assistance Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Cen-

tral Office and furnished the address and the above room number.

Notice is also given that it is proposed to make these changes effective the date of final approval.

It is proposed to amend 38 CFR Part 21 as follows:

1. In § 21.4135, paragraphs (e), (o), (p) (1), (s), and (v) (2) are revised to read as follows:

§ 21.4135 Discontinuance dates.

(e) *Course discontinued—course interrupted.—*(1) *Residence training.* Last date of attendance.

(2) *Correspondence training.* Date last lesson is serviced.

(3) *Flight training.* Date of last instruction.

(4) *Job training.* Last date worked.

(5) *Independent study.* Official date of change in status under the practices of the institution.

(o) *Veteran no longer rated permanent total disabled; or spouse (trainee) divorced from veteran without fault on his or her part; or serviceman or service-woman removed from "missing status" listing; chapter 35 (§§ 21.3041 and 21.3046).* (1) End of quarter or semester if school is operated on quarter or semester system.

(2) End of course or a 9-week period whichever is earlier, if school is not operated on quarter or semester system.

(p) *Error; payee's or administrative.*

(1) Effective date of award or day preceding act, whichever is later, but not prior to the date entitlement ceased, on an erroneous award based on an act of commission or omission by a payee or with his or her knowledge.

(s) *Reduction in rate of pursuit of course (§ 21.4270).* End of month in which reduction occurred except, first date of a term, if the reduction is effective at beginning of the term.

(v) *Remarriage of widow of widower.*

(2) Conduct of widow or widower: Last day of month before inception of relationship.

2. In § 21.4203, paragraphs (c) and (d) are revised to read as follows:

§ 21.4203 Reports by schools; requirements.

(c) *Course changes.* Any changes in the number of credit hours or the clock hours of attendance or instruction or any other modification in the course as certified at enrollment must be reported promptly to the Veterans Administration. In institutions this reporting requirement will be satisfied if the official date of the change of status is reported in accordance with §§ 21.4253(d) or 21.4254(c) (7).

(d) (2) In other cases the school will initiate the certification. Information regarding any changes or an interruption

or termination of training must be reported during or immediately after the end of the month in which the event occurred. In institutions this reporting requirement will be satisfied if the official date of change of status or interruption or termination is reported in accordance with §§ 21.4253(d) or 21.4254(c)(7).

3. In § 21.4253, paragraphs (a)(1), (b), (d), (e) and (f) are revised to read as follows:

**§ 21.4253 Accredited courses.**

(a) *General.* A course may be approved as an accredited course if it meets one of the following requirements:

(1) The course has been accredited and approved by a nationally recognized accrediting agency or association. "Candidate for accreditation" status is not a basis for approval of a course as accredited.

(b) *Course objective.* Any curriculum offered by an educational institution which is a member of one of the nationally recognized accrediting agencies or associations and which leads to a degree, diploma, or certificate will be accepted as an accredited course when approved as such by the State approving agency. Any curriculum accredited by one of the specialized nationally recognized accrediting agencies or associations and which leads to a degree, diploma, or certificate will also be accepted as an accredited course when approved as such by the State approving agency. Approval of the individual subjects, required or elective, which are designated as a part of a degree curriculum will not be necessary. Such approval may include non-credit subjects that are prescribed as a required part of the curriculum. The course objective may be educational (high school diploma or a standard college degree) or it may be vocational or professional (an occupation).

(d) *School qualification.* A school desiring to enroll veterans or eligible persons in accredited courses will make application for approval of such courses to the State approving agency and will submit copies of its catalog or bulletin. The State approving agency may approve the application of the school when the school and its accredited courses are found to have met the following criteria:

(1) Adequate records are kept by the school to show the progress of each veteran or eligible person. The records must be sufficient to show continued pursuit at the rate for which enrolled and the progress being made. They must include final grade in each subject for each term, quarter, or semester; record of with-

drawal from any subject to include the last date of attendance for a resident course; and record of reenrollment in subjects from which there was a withdrawal; and may include such records as attendance for resident courses, periodic grades and examination results.

(2) The school maintains a written record of previous education and training of the veteran or eligible person which clearly indicates that appropriate credit has been given by the school for previous education and training, with the training period shortened proportionately, and the person and the Veterans Administration so notified. The record must be cumulative in that the results of each enrollment period (term, quarter or semester) must be included so that it shows each subject undertaken and the final result, i.e., passed, failed, incomplete or withdrawn. (38 U.S.C. 1775(b))

(3) The school enforces a policy relative to standards of conduct and progress required of the student. The school policy relative to standards of progress must be specific enough to determine the point in time when educational benefits should be discontinued, pursuant to section 1674, title 38, United States Code, when the veteran or eligible person ceases to make satisfactory progress. No student will be considered to have made satisfactory progress when he or she fails or withdraws from all subjects undertaken (except when there is a showing of extenuating circumstances) when enrolled in two or more unit subjects. The policy must include the grade or grade point average that will be maintained if the student is to graduate. For example, a 4-year college may require a 1.5 grade point average the first year, a 1.75 average at mid-year the second year, and a cumulative average of 2.0 thereafter on the basis of 4.0 for an A. The policy may include a probationary period of one quarter or semester when the student falls below the required average.

(4) The school maintains adequate attendance records for veterans and eligible persons enrolled in resident courses not leading to a standard college degree.

(e) *College level.* Under the provisions of paragraph (a)(1) of this section, any course at college level approved by the State approving agency as an accredited course will be accepted by the Veterans Administration as an accredited course when all of the following conditions are met:

(1) The college or university is accredited by a nationally recognized regional accrediting agency listed by the Commissioner of Education or the course is accredited at the college level by a specialized accrediting agency or association recognized by the Commissioner of Education; and

(2) The course has entrance requirements of not less than the requirements applicable to the college level program of the school; and

(3) Credit for the course is awarded in terms of standard semester or quarter hours or by recognition at completion by the granting of a standard college degree.

(f) *Courses not leading to a standard college degree.* Any course in a school approved by the State approving agency will be accepted as an accredited course when all of the following conditions are met:

(1) The course or the school offering such course is accredited by the appropriate accrediting agency; and

(2) The course offers training in the field for which the accrediting agency is recognized and at a level for which it is recognized; and

(3) The course leads to a high school diploma or a vocational objective.

4. Section 21.4277 is revised to read as follows:

**§ 21.4277 Discontinuance; unsatisfactory progress and conduct.**

(a) *Satisfactory pursuit of program.* Entitlement to a program of education is subject to the requirement that the veteran or eligible person having commenced the pursuit of such program, continues to maintain satisfactory progress in accordance with the regularly prescribed standards and practices of the institution in which he or she is enrolled. If the veteran or eligible person is not making satisfactory progress according to those standards and practices, educational benefits will be discontinued. See § 21.4253.

(b) *Satisfactory conduct.* Entitlement to a program of education is subject to the requirement that the veteran or eligible person, having commenced the pursuit of such program, continues to maintain satisfactory conduct in accordance with the regularly prescribed standards and practices of the institution in which he or she is enrolled. If the veteran or eligible person will no longer be retained as a student or will not be readmitted as a student by the institution in which he or she is enrolled, educational benefits will be discontinued, unless further development establishes that the action of the school is of a retaliatory nature. See § 21.4253. (38 U.S.C. 1674 and 1724)

Approved: May 20, 1975.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

### DEPARTMENT OF DEFENSE

Office of the Defense Advisor, United States Mission to NATO

#### DEFENSE INDUSTRY ADVISORY GROUP IN EUROPE (DIAGE)

##### Closed Meeting

The Defense Industry Advisory Group in Europe (DIAGE) will hold a closed meeting on June 17, 1975, in the United States Mission to the North Atlantic Treaty Organization, Brussels, Belgium, on matters which come under the purview of paragraph (4), section 552(b), Title 5 USC.

The agenda topics will be U.S./European Economic Cooperation in Military and Civil Technology, status of NATO projects, and discussion of activities of U.S. defense industry firms in Europe.

Any person desiring information about the advisory group may telephone Brussels 241.44.00 ext. 5728, or write to the Executive Secretary, Defense Industry Advisory Group—Europe, USNATO, HQS NATO, 1110 Brussels, Belgium.

### DEPARTMENT OF JUSTICE

#### Drug Enforcement Administration

#### CONTROLLED SUBSTANCES IN SCHEDULES I AND II

#### Proposed 1975 Revised Aggregate Production Quotas

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On January 20, 1975, a notice of the final aggregate production quotas for these substances was published in the FEDERAL REGISTER (40 FR 3225). Also noted in this notice was that pursuant to Title 21 Code of Federal Regulations, § 1303.23(c), the Administrator of the Drug Enforcement Administration would in early 1975 adjust individual manufacturing quotas allocated for 1975 based upon 1974 end of year inventory figures submitted by applicants, actual use, and

estimates of medical and scientific requirements for the United States to be provided by the Food and Drug Administration.

Based upon consideration of the end of year inventory figures submitted by applicants, the actual use, and the estimates submitted to the Drug Enforcement Administration by the Food and Drug Administration, the Administrator of the Drug Enforcement Administration, under the authority vested in the Attorney General by section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of Title 28 of the Code of Federal Regulations does hereby propose the following changes of the aggregate production quotas for 1975 for the below listed controlled substances, expressed in grams in terms of their respective anhydrous bases:

Basic class	Previously published 1975 aggregate production quotas <sup>1</sup>	Newly revised 1975 aggregate production quotas <sup>1</sup>	Net change <sup>1</sup>
Alphaprodine	34,500	47,000	+12,500
Cocaine	600,000	749,000	+149,000
Desoxyephedrine	1,215,374	1,566,833	+351,459
Dihydrocodeine	721,000	500,000	-221,000
Methaqualone	19,668,335	10,751,000	-8,917,335
Oxycodone	1,769,400	1,540,000	-229,400
Secobarbital	18,450,000	24,918,800	+6,468,800

<sup>1</sup> Expressed in terms of grams of anhydrous base.  
<sup>2</sup> Of this, 1,195,000 g are to be used for the production of 1-desoxyephedrine for use in the manufacture of a non-controlled substance (436,832,000 g more than the previously published quota) and 371,833,000 g are to be used for the production of methamphetamine (85,433,000 g less than the previously published quota).

When establishing the above listed newly revised quotas, the following facts weighed heavily on D.E.A.'s determination to raise or lower the 1975 aggregate production quotas for these substances:

(a) Relative to Alphaprodine—D.E.A.'s initial underestimation of the 1974 usage of this substance.

(b) Relative to Cocaine—Increased export requirements for 1975.

(c) Relative to Desoxyephedrine—Increased domestic usage of a product not controlled under the Controlled Substances Act but which contains the levo-rotary isomer of desoxyephedrine. This product has not shown significant abuse potential in the levo-rotary form.

(d) Relative to Dihydrocodeine—Decreased need at the dosage form manufacturing level.

(e) Relative to Methaqualone—Decreased need at the dosage form manufacturing level.

(f) Relative to Oxycodone—Decreased

need for raw material at the dosage form manufacturing level.

(g) Relative to Secobarbital—Increased export requirements for 1975.

All interested persons are invited to submit their comments and objections in writing regarding this proposal. The comments or objections should state with particularity the issues concerning which the person desires to be heard. A person may object or comment on the proposals relating to any one or more of the above mentioned substances without filing comments or objections regarding the others. Comments and objections should be submitted in quintuplicate to the Office of the Administrative Law Judge, Attention: Hearing Clerk, Drug Enforcement Administration, Department of Justice, 1405 Eye Street NW, Washington, D.C. 20537, and must be received by June 30, 1975. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrants a full adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing (which shall not be less than 30 days after the date of publication).

Dated: May 13, 1975.

JOHN R. BARTELS, Jr.,  
Administrator,  
Drug Enforcement Administration.

[Docket No. 74-21]

#### SAMUEL D. NOVICH

#### Revocation of Registration

On October 25, 1974, the Administrator of the Drug Enforcement Administration (DEA) issued to Samuel D. Novich, D.V.M., of Cherry Hill, New Jersey, an Order to Show Cause as to why the DEA Registration AN0604416, previously issued to him pursuant to section 303 of the Controlled Substances Act (21 U.S.C. 823), should not be revoked pursuant to section 304 of that Act (21 U.S.C. 824) for the reason that on May 15, 1974, in the United States District Court for the District of New Jersey, Dr. Novich (hereinafter "Respondent") was convicted of attempt and conspiracy to unlawfully distribute a controlled substance in violation of 21 U.S.C. 841(a)(1), a felony.

On November 21, 1974, Respondent requested a hearing on the order to show cause and, on January 20, 1975, a hearing was held in Washington, D.C., Administrative Law Judge Lewis F. Parker, presiding. On April 7, 1975, Judge Parker filed, pursuant to 21 CFR 1316.65, his recommended findings of fact and conclusions of law, a recommended decision, and the record of the proceedings in this matter including a transcript of the hearing, the various exhibits, and the proposed findings of fact, conclusions of law and briefs, in reply filed by the Government and the Respondent.

The Administrator, pursuant to 21 CFR 1316.66, hereby publishes his final order in this proceeding based upon the findings of fact and conclusions of law set forth below.

The Administrator finds that Respondent was charged in Counts 2 and 3 of a four-count indictment returned by a grand jury in the United States District Court for the District of New Jersey with conspiring with various other individuals to violate section 401(a)(1) of the Controlled Substances Act (21 U.S.C. 841 (a)(1)); that on May 15, 1974, Respondent pleaded guilty to, and was convicted of, one count of attempt and conspiracy to distribute a controlled substance, specifically methamphetamine; and that on August 14, 1974, the Court sentenced Respondent to pay a fine of \$15,000.

In his testimony and in the briefs filed on his behalf, Respondent attempted to explain the circumstances leading to his conviction and attempted to characterize his violation as being merely technical in nature. The Administrative Law Judge concluded that these contentions were relevant to the question of whether the Administrator should revoke the Respondent's registration as a practitioner under the Controlled Substances Act, especially in light of what the Administrative Law Judge perceived as the Government's failure to present any evidence as to the seriousness of the crime committed.

As the Administrator stated in his final order in Matter of Rosenberg, 40 FR 4024, Vol. 18, it is not the function of an administrative hearing to review the correctness of the Court's judgment in a criminal case upon which the order to show cause is based. The government introduced incontrovertible evidence of Respondent's conviction which stands on its own. Thus, the Administrator finds that the Respondent has been convicted of a felony under Title II of the Controlled Substances Act, that the felony related to the distribution of controlled substances, and that, therefore, Respondent's registration is properly subject to revocation or suspension pursuant to section 304 of the Act (21 U.S.C. 824).

The Administrative Law Judge, in his recommended decision, concluded that the Respondent should be permitted to retain his registration because, *inter alia*, his act was not that of a hardened crim-

inal and because the monetary loss and notoriety resulting from his conviction had caused him sufficient suffering. The purpose of the regulatory sanctions in Section 304 is not to add to an errant registrant's miseries. Indeed, the section is not punitive but rather remedial in nature. Penalties are found in other Sections of the Act, such as 841, 842 and 843. Congress recognized the grave problem of drug abuse when it enacted the Comprehensive Drug Abuse Prevention and Control Act of 1970 and, in section 304, provided a means of dealing with the serious problem of diversion and illicit trafficking in controlled substances. The determination of which sanctions in section 304 will best serve the public interest is left to the discretion of the Attorney General. See *Sokoloff v. Saxbe*, 501 F.2d 571, 576 (2nd Cir. 1974).

The Administrator finds upon consideration of all the facts and circumstances which led to the conviction, that Respondent's actions demonstrate a disregard both for the public health and safety and for his responsibilities as a registrant, and further finds that full revocation of his registration is a reasonable choice of sanctions under the circumstances.

Therefore, under the authority vested in the Attorney General by Section 304 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 824), and redelegated to the Administrator of the Drug Enforcement Administration by § 0.100, as amended, Title 28, Code of Federal Regulations, the Administrator hereby orders that the Certificate of Registration of Samuel D. Novich, D.V.M. (DEA Registration AN0604416) be, and hereby is, revoked, effective May 27, 1975.

Dated: May 9, 1975.

JOHN R. BARTELS, Jr.,  
Administrator.

[FR Doc 75-13697 Filed 5-23-75; 8:45 am]

[Docket No. 74-24]

JOHN R. AMATO  
Denial of Registration

John R. Amato, M.D., was registered as a practitioner under the Controlled Substances Act (21 U.S.C. 801, et seq.) and, pursuant to section 303 of that Act (21 U.S.C. 823), had been issued a certificate of registration. That certificate expired on June 30, 1974. On May 12, 1974, Dr. Amato (hereinafter "Respondent") applied to the Drug Enforcement Administration for a new registration. On November 6, 1974, the Administrator of the Drug Enforcement Administration issued to Respondent an Order to Show Cause as to why his application should not be denied for the reason that his license to practice medicine and surgery in the State of New Jersey, including his authorization to handle controlled substances under New Jersey law, had been revoked by that State's Board

of Medical Examiners. On December 3, 1974, Respondent requested a hearing on the order to show cause and, on February 21, 1975, a hearing was held in Washington, D.C., Administrative Law Judge Lewis F. Parker, presiding.

On May 1, 1975, Judge Parker filed, pursuant to 21 CFR 1316.65, his recommended findings of fact and conclusions of law, a recommended decision, and the record of the proceedings in this matter. The Administrator, pursuant to 21 CFR 1316.66, hereby publishes his final order in this proceeding based upon the findings of fact and conclusions of law set forth below.

The Administrative Law Judge found that on August 14, 1974, the Board of Medical Examiners of the State of New Jersey revoked Respondent's license to practice medicine and surgery in that State; that the revocation became effective on August 19, 1974, the date of service of the order on the Respondent; and that on November 15, 1974, the Appellate Division of the Superior Court of New Jersey, in a per curiam opinion, affirmed the order of the Board of Medical Examiners. The Administrator adopts these findings of fact.

The Administrative Law Judge concluded, as a matter of law, that 21 U.S.C. 823(f), which provides that "(p)ractitioners shall be registered . . . if they are authorized to dispense or conduct research under the law of the State in which they practice," must logically give the Administrator the authority to deny a registration if the practitioner is not authorized by the State to dispense controlled substances. The Administrator concurs in this conclusion. To hold otherwise would mean that all applications would have to be granted only to be revoked the next day under 21 U.S.C. 824(a)(3). This agency has consistently held that where a registration can be revoked under section 824, it can, a fortiori, be denied under section 823.

Judge Parker recommended, therefore, that the Administrator deny Respondent's application for the reason that he is not authorized under New Jersey law to administer, dispense or prescribe controlled substances. The Administrator accepts that recommendation.

Therefore, under the authority vested in the Attorney General by section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823), and redelegated to the Administrator of the Drug Enforcement Administration by § 0.100, as amended, Title 28, Code of Federal Regulations, the Administrator hereby orders that the application of Dr. John R. Amato for registration as a practitioner be, and hereby is, denied. This order shall be effective May 27, 1975.

Dated: May 9, 1975.

JOHN R. BARTELS, Jr.,  
Administrator.

## DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Order No. 149]

DIRECTOR, CINCINNATI SERVICE CENTER

Delegation of Authority

The authority vested in the Commissioner of Internal Revenue by 26 CFR 301.7701-9, 301.6331-1, 301.6332-1, 301.6332-2, and 301.6343-1, to levy on property in the possession of third parties, to issue final demand for enforcement of levy, and to release levy and return property, is hereby delegated to the Director, Cincinnati Service Center.

The authority herein delegated may be redelegated only to GS-1169 series personnel in the Collection Activity not lower than GS-9.

Date of Issue: May 22, 1975.

Effective date: May 22, 1975.

DONALD C. ALEXANDER,  
Commissioner.

Fish and Wildlife Service

DRS. RAY AND FAY

Marine Mammal Permit; Receipt of Application

On April 28, 1975, a notice was published in the *Federal Register* (40 FR 18477-78) that significant amendments had been filed with the Fish and Wildlife Service by Dr. G. Carleton Ray to the Marine Mammal permit issued on July 3, 1974, to Drs. Ray and Fay, to take Pacific walrus for scientific research. Public comment was invited for thirty days.

A determination has been made that this request, as submitted and published, will now be considered as a separate application for a new marine mammal permit for scientific research.

Considering the application is the same as originally published, and the public has had the opportunity to submit comments since the date of publication, the

30-day comment period remains effective through May 28, 1975.

Dated: May 20, 1975.

C. R. BAVIN,  
Chief, Division of Law Enforcement,  
U.S. Fish and Wildlife Service.

National Park Service

APPALACHIAN NATIONAL SCENIC TRAIL ADVISORY COUNCIL

Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Appalachian National Scenic Trail Advisory Council will be held at 9 a.m. d.s.t. on June 20, 1975 at the Holiday Inn, 710 Blowing Rock Road in Boone, North Carolina.

The Council was originally established by Pub. L. 90-543 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the administration of the Appalachian National Scenic Trail, including the selection of rights-of-way and standards for the erection and maintenance of markers along the Trail. It was rechartered by the Secretary of the Interior on February 24, 1975 under the authority of Pub. L. 91-383.

The purpose of the Council is to provide for the free exchange of ideas between the National Park Service and the public, and to facilitate the solicitation of advice or other counsel from members of the public on problems and programs pertinent to the Appalachian National Scenic Trail.

The purpose of this meeting is as follows: (1) to organize the Council; (2) to discuss the progress of state land acquisition programs; (3) to consider policy statements and action proposals concerning trail corridor width, standards for trail design and construction and similar matters relevant to the quality of the Appalachian Trail and its environment; and (4) to consider formal management objectives for National Park Service involvement in the Appalachian Trail.

The meeting will be open to the public. Facilities and space can accommodate members of the public up to approximately 100. Persons will be accommodated on a first-come, first-served basis. Any member of the public may file with the Council a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact David A. Richie, Deputy Regional Director, North Atlantic Region, 150 Causeway Street, Boston, Massachusetts 02114, at area code (617) 223-3769.

Minutes of the meeting will be available for public inspection four weeks after the meeting at the above address. Copies of the minutes will also be available in Room 3308 Interior Building, 18th

and C Streets, NW, Washington, D.C., and at the Headquarters of the Appalachian Trail Conference, Filmore Street, Harpers Ferry, West Virginia.

Dated: May 13, 1975.

DAVID A. RICHIE,  
Deputy Regional Director,  
North Atlantic Region.

## DEPARTMENT OF AGRICULTURE

Economic Research Service

ORGANIZATION, FUNCTIONS AND AVAILABILITY OF INFORMATION

Notice for Guidance of General Public

Notice is hereby given for the guidance of the general public as to the organization, functions and availability of information of the Economic Research Service pursuant to Pub. L. 93-502. This notice supersedes the notice contained in 32 FR 9730 (July 4, 1967).

PART I—ORGANIZATION AND FUNCTIONS

Section 1. General. The Economic Research Service was established by Secretary's Memorandum No. 1446, Supplement No. 1, of April 3, 1961, under Reorganization Plan No. 2 of 1953 and other authorities. The functions of the Economic Research Service are to conduct

economic research and service relating to agricultural production, marketing, and distribution, and to analyze the supply and demand for farm products in foreign countries and their effect on prospects for U.S. exports as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), 7 U.S.C. 1761, and other laws.

**Sec. 2. Organization.** The Service functions through a central office in Washington, D.C., located at 500 12th Street, SW. A small staff is maintained in each of 36 States, principally at the Land Grant Colleges and Universities. Much of the research is carried out in cooperation with State Agricultural Experiment Stations. The organization consists of the following:

Administrator, Food and Fiber Economics  
 Deputy Administrator, Food and Fiber Economics  
 Director, National Economic Analysis Division  
 Director, Commodity Economics Division  
 Director, Foreign Demand and Competition Division  
 Deputy Administrator, Resource and Development Economics  
 Director, Natural Resource Economics Division  
 Director, Economic Development Division  
 Director, Foreign Development Division  
 Chairman, Outlook and Situation Board  
 Director, Information Division

**Sec. 3. Administrator.** The Administrator, under the direction of the Director of Agricultural Economics, formulates current, intermediate, and long-range policies, plans, and programs to carry out the following major activities:

Maintains estimates of current resource use, output, and distribution of food and fiber.

Identifies the interrelationships of economic forces affecting resource use, production and distribution of food and fiber.

Maintains short-term forecasts and long-range projections of resource use, production and distribution of food and fiber for both probable and possible future events.

Evaluates the performance of the food and fiber sector in meeting the needs and wants of consumers and overall societal goals concerning such matters as resource ownership and use, income and income distribution, and quality of life.

Identifies probable and possible structural adjustments in the food and fiber sector and rural America and evaluates their impact on consumers, and overall societal goals.

Maintains current information on the principal social and economic factors affecting life in nonmetropolitan areas and identifies and evaluates alternative public and private actions which impact on these areas.

Provides direct assistance and coordinates the USDA's overall program to aid agricultural development in lower income countries.

Disseminates economic information on a timely basis and in a form that is understandable to the people likely to find the information of value.

**Sec. 4. Deputy Administrator, Food and Fiber Economics.** The Deputy Administrator, Food and Fiber Economics, is delegated authority to perform all duties and to exercise all functions which are now and which may be vested in the Administrator relating to economic research on the entire agriculture industry from farmer to consumer.

(a) **Director, National Economic Analysis Division.** The Director of the National Economic Analysis Division is delegated authority to perform all duties and to exercise all functions which are now and which may be vested in the Administrator relating to: (1) statistical studies and associated service work relating to aggregative economic supply and demand relationships, business functions, and coordinative processes characterizing the U.S. Food and Fiber Sector, including structure and adjustment; (2) performance measured in terms of income, efficiency, returns to resources, food prices and costs of marketing and consumer satisfaction; (3) transportation; (4) history; (5) pricing mechanism; (6) input supply utilization and productivity; (7) finance and taxation; (8) economic projections; (9) distribution systems; (10) market development; and (11) non-commodity programs and policies having influence on the Food and Fiber Sector and other related matters.

(b) **Director, Commodity Economics Division.** The Director of the Commodity Economics Division is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating to the production, processing, and marketing of individual agricultural commodities. Research in each of the crop and livestock commodities includes (1) the organization and performance of production and marketing systems for major commodity subsectors; (2) response of farmers and marketing firms to changing economic, technical, and institutional conditions; (3) costs and returns to farmers and marketing firms; (4) spread in price between farmer and consumer; (5) supply, demand and price situation and outlook; and (6) intermediate and long-range projections.

(c) **Director, Foreign Demand and Competition Division.** The Director of the Foreign Demand and Competition Division is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating to: (1) economic research on foreign economic conditions; (2) market developments; (3) world monetary and trade conditions; (4) trade policies of foreign countries that affect marketing of farm products; and (5) assisting in the formulation of policies and programs to promote exports of farm products.

**Sec. 5. Deputy Administrator, Resource and Development Economics.** The Deputy Administrator, Resource and Development Economics, is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating

to natural resources, economic development, and foreign development.

(a) **Director, Natural Resource Economics Division.** The Director of the Natural Resource Economics Division is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating to economic and social research and analysis, statistical studies, technical consultation, planning assistance, and associated service and staff work relating to natural resources. This includes: (1) supplies, uses, and projected future requirements of land and water; (2) effects of environmental quality improvement measures on agricultural production and agricultural resource use; (3) achievement of environmental goals in rural areas; (4) ownership and control of land and water resources; (5) methods for natural resource planning; (6) evaluation of natural resource plans and projects; (7) technical assistance to SCS in developing or reviewing policies and procedures for small watershed project planning and evaluation; and (8) socioeconomic studies of watershed project performance and contributions to economic development.

(b) **Director, Economic Development Division.** The Director of the Economic Development Division is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating to economic and social research on the development of rural areas. This includes development and maintenance of basic data and analyses of important factors related to (1) changes in rural population; (2) economic activity in rural areas; (3) services and facilities available to rural people; (4) effectiveness of local units of government in providing public services; and (5) evaluation of alternative policies and programs to develop human and community resources, improve public and private opportunities, and provide better housing in rural areas.

(c) **Director, Foreign Development Division.** The Director of the Foreign Development Division is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator relating to direct assistance and coordination of the U.S. Department of Agriculture's overall program to aid agricultural development in lower income countries. This includes (1) training of foreign agriculturalists and potential leaders with new skills and technology; (2) providing technical assistance to developing countries; (3) research in direct support of international technical assistance and training programs in agriculture; and (4) formulation of U.S. international development policy positions.

**Sec. 6. Chairman, Outlook and Situation Board.** The Chairman of the Outlook and Situation Board is delegated authority to perform all duties and exercise all functions which are now and which may be vested in the Administrator re-

lating to the technical review and approval of all economic situation and outlook reports prepared within the U.S. Department of Agriculture.

**Sec. 7. Director, Information Division.** The Director of the Information Division is authorized by the Administrator to provide the necessary services to assure that research results are disseminated on a timely basis and in a form that is understandable to the people likely to find the information of value.

#### PART II—AVAILABILITY OF INFORMATION

**Sec. 8. General statement.** This part is issued in accordance with the regulations of the Secretary of Agriculture in 7 CFR 1.1-1.16 and Appendix A thereto, implementing the Freedom of Information Act (5 U.S.C. 552). The Secretary's regulations, as implemented by the regulations in this part, govern the availability of records of the Economic Research Service to the public.

**Sec. 9. Public inspection and copying.** 5 U.S.C. 552(a)(2) requires that certain materials be made available for public inspection and copying. Members of the public may request access to such materials maintained by the Economic Research Service by writing to the Assistant to the Administrator, Economic Research Service, Room 446-D, 500 12th Street, SW, Washington, D.C. 20250.

**Sec. 10. Indexes.** 5 U.S.C. 552(a)(2) requires that each agency publish or otherwise make available a current index of all materials required to be made available for public inspection and copying. Research results are published in various periodical and special reports. Research of general interest is summarized in the monthly publication, *Farm Index*. The Economic Research Service also publishes monthly a "Checklist of New Reports" of the Economic Research Service, Rural Development Service, and Statistical Reporting Service. This publication lists all reports issued by the above listed organizations during the previous month and permits the recipient to check those he or she wishes to receive. Each year a complete listing of all publications and other documents prepared by the Economic Research Service are listed in the publication "Reports and Publications Issued or Sponsored by USDA's Economic Research Service (Year)." The above cited publications constitute the indexes maintained by ERS and they or other publications of the Economic Research Service may be obtained free of charge by writing: United States Department of Agriculture, Economic Research Service, Division of Information, Publications, Washington, D.C. 20250.

**Sec. 11. Requests for records.** Requests for records under 5 U.S.C. 552(a)(3) shall be made in accordance with 7 CFR 1.3(a) and addressed to: Assistant to the Administrator, Economic Research Service, Room 446-D, 500 12th Street, SW, Washington, D.C. 20250. This official is hereby delegated to make determination regarding such requests in accordance with 7 CFR 1.4(c).

**Sec. 12. Appeals.** Any person whose request under section 11 above is denied shall have the right to appeal such denial. This appeal should be made in accordance with 7 CFR 1.3(e) and addressed to: Administrator, Economic Research Service, Room 448-B, 500 12th Street, SW, Washington, D.C. 20250.

**Effective date:** This Notice is effective May 27, 1975.

KENNETH H. FARRELL,  
 Acting Administrator.

#### Farmers Home Administration

[Notice of Designation No. A228]

#### GEORGIA

##### Designation of Emergency Areas

The Secretary of Agriculture has found that a general need for agricultural credit exists in Mitchell County, Georgia, as a result of a natural disaster consisting of tornadoes January 12, 1976.

Therefore, the Secretary has designated this area as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 93-237, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor George Busbee that such designation be made.

Indiana, 8 counties—1974

County	Excessive rainfall	Flooding	Drought	Frost and/or freeze	Hail
Hendricks	May 9 to June 22		June 23 to Aug. 10	Oct. 1 and 2	
Lake	Apr. 25 to June 22		July 10 to Aug. 30	Sept. 22	
Newton	Apr. 22 to May 22		June 22 to Aug. 10	Sept. 22	
Posey	Apr. 1 to June 13	May 29 and June 7	July 14 to Aug. 1	Mar. 24, Sept. 24, and Oct. 3	Mar. 29 to May 5 (intermittent)
Pulaski	May 1 to June 15		July 1 to Aug. 15	Sept. 23	
Vermillion	May 1 to June 22	May 1 to June 22	June 23 to Aug. 24	Sept. 23	
Washington				Oct. 1 and 2	
White	May 8 to 31		May 9 to Aug. 23	Sept. 29	June 14

Therefore, the Secretary has designated these areas as eligible for Emergency loans, pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 93-237, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Otis R. Bowen that such designation be made.

Applications for Emergency loans must be received by this Department no later than July 14, 1975, for physical losses and February 16, 1976, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated areas makes it impracticable and contrary to the public interest to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 20th day of May, 1975.

FRANK B. ELLIOTT,  
 Administrator,  
 Farmers Home Administration.

#### BLACK PINE PLANNING UNIT Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Black Pine Planning Unit, Sawtooth National Forest, Idaho. The Forest Service report number is USDA-FS-DES (Adm) R4-75-20.

The environmental statement identifies and evaluates the probable effects of the land use plan for the Black Pine Planning Unit on the Sawtooth National Forest, Idaho. The purpose of the plan is to allocate National Forest lands within the unit to specific resource uses and activities; establish management objectives; document management direction, management decisions, and necessary coordination between resource uses and activities; and provide for the protection, use and development of the various resources within the planning unit. The plan provides for minimization of adverse effects and maximization of desirable effects. Significant areas will remain undeveloped with options for future management remaining open.

This draft environmental statement was transmitted to CEQ on May 19, 1975. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service  
South Agriculture Bldg., Room 3230  
12th St. and Independence Ave., SW  
Washington, D.C. 20250

Regional Planning Office  
USDA, Forest Service  
Federal Building, Room 4403  
324-25th Street  
Ogden, Utah 84401

Forest Supervisor  
Sawtooth National Forest  
1525 Addison Avenue East  
Twin Falls, Idaho 83301  
District Forest Ranger  
Burley Ranger District  
P.O. Box 430  
Burley, Idaho 83318

A limited number of single copies are available upon request to Forest Supervisor E. A. Fournier, Sawtooth National Forest, 1525 Addison Avenue East, Twin Falls, Idaho 83301.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor E. A. Fournier, Sawtooth National Forest, 1525 Addison Avenue East, Twin Falls, Idaho 83301. Comments must be received by July 18, 1975, in order to be

considered in the preparation of the final environmental statement.

Dated: May 19, 1975.

P. M. REES, Director,  
Regional Planning and Budget.

##### UNIVERSITY OF PITTSBURGH

##### Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (40 CFR 12253 et seq., 15 CFR 701, 1974).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 75-00306-98-29900. Applicant: University of Pittsburgh, Department of Physics, Pittsburgh, Pennsylvania 15260. Article: Far Ultraviolet Interference Filter. Manufacturer: Engins Matra, France. Intended use of article: The foreign article will be used to filter far ultraviolet light in equip-

ment intended to measure atomic oxygen at stratospheric altitudes.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides central wavelength ranges from 1300 Angstroms (Å) to 1350Å with narrow transmission band widths ranging from 70Å to 220Å. The National Bureau of Standards (NBS) advises in its memorandum dated April 30, 1975 that the specific narrow transmission band widths of the article is pertinent to the applicant's intended use. NBS also advises that it knows of no domestic manufacturer of far ultraviolet interference filters of equivalent scientific value to the foreign article for the applicant's intended use.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

A. H. STUART,  
Director, Special Import  
Programs Division.

#### National Oceanic and Atmospheric Administration

##### COASTAL ZONE MANAGEMENT PROGRAM

##### Marine Sanctuaries Nomination; Intent To File Environmental Impact Statement

The Office of Coastal Zone Management (OCZM), National Oceanic and Atmospheric Administration (NOAA), has received a nomination for the designation of a marine sanctuary for the coral reef tract seaward of John Pennekamp State Park in the State of Florida. This nomination was received January 23, 1975 pursuant to Title III of the Marine Protection, Research and Sanctuaries Act of 1972 (Pub. L. 92-532). NOAA has determined that the designation of a marine sanctuary has the potential for causing a significant impact on the environment, and that, therefore, an environmental impact statement for each proposed marine sanctuary should be prepared pursuant to the National Environmental Policy Act (42 USC 4321) and its implementing regulations (40 CFR Part 6).

The OCZM has received a nomination from the State of Florida for the following area:

Florida Keys Coral Reef Marine Sanctuary: Florida has nominated a marine sanctuary as a habitat preserve for the protection, preservation, and management of corals and coral reef ecosystems. The area nominated is adjacent to but excludes the State of Florida's John Pennekamp Coral Reef State Park, beginning at the three-mile limit extending seaward to the 300-foot isobath including the Key Largo Coral Reef Preserve.

The proposed marine sanctuary is being nominated for consideration as a habitat preserve as set forth in 15 CFR 922.10(a), to preserve, protect and manage specialized habitats representative of important marine systems. Management emphasis will be toward preservation of the habitat community (a natural association of organisms set apart according to certain defined features of the environment) associated with corals and coral reefs. The primary purpose shall be to preserve the coral reef ecosystem, however, management regulations will provide for all possible compatible uses of the coral reef which are consistent with the primary purpose of the habitat preserve.

Interested parties who wish to submit suggestions, comments, or substantive information concerning the scope or content of this environmental impact statement should do so as soon as possible. Comments may be submitted in writing or telephone to: Dr. Robert Kifer, (301-496-8821), Marine Sanctuary Coordinator, Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Maryland 20852.

R. L. CARNAHAN,  
Acting Assistant Administrator  
for Administration.

#### DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[NADA 2-676, 2-677]

#### PHENAZOID AND PHENAZOID COMPOUND

#### Withdrawal of Approval of New Animal Drug Applications

The Commissioner of Food and Drugs is withdrawing certain approved new animal drug applications for Phenazoid and Phenazoid Compound, effective May 27, 1975.

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner (21 CFR 2.120), the following notice is issued:

Pitman-Moore, Inc., P.O. Box 344, Washington Crossing, NJ 08560, holder of approved new animal drug applications (NADA) No. 2-676 for Phenazoid, containing phenothiazine, and No. 2-677 for Phenazoid Compound, containing phenothiazine with oxgall and phenolphthalein, has requested, by letter of February 10, 1975, that approval of the NADA's be withdrawn and has waived the opportunity for a hearing. The NADA's, which were approved on July 27, 1940, provide for use of the drugs as oral anthelmintics.

Based upon a reevaluation of the NADA's by the Food and Drug Administration, the firm was requested to submit information about the identity, quality, strength, and purity of the raw materials used, revised labeling, and data to

establish the absence of phenothiazine residues in the edible tissues of food-producing animals or the safety for human consumption of any such residues that may be present. In lieu of the submission of the requested information and because these drug products are no longer made or distributed, the firm has requested withdrawal of approval of the NADA's and has waived its opportunity for a hearing.

Therefore, in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115) (formerly § 135.28 prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)), notice is given that approval of NADA Nos. 2-676 and 2-677 and all supplements and amendments thereto for Phenazoid and Phenazoid Compound is hereby withdrawn, effective May 27, 1975.

Dated: May 20, 1975.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

[FR Doc.75-13676 Filed 5-23-75; 8:45 am]

#### WORK-SHARING PROGRAM: DRUG MANUFACTURERS, REPACKAGERS, AND DISTRIBUTORS

#### Memorandum of Understanding With the Pennsylvania Department of Health

The Pennsylvania Department of Health and the Food and Drug Administration executed a Memorandum of Understanding on April 28, 1975. The purposes of this agreement is to provide an increased level of consumer protection through more efficient inspectional coverage of Pennsylvania drug manufacturers, repackagers, and distributors. The agreement reads as follows:

#### MEMORANDUM OF UNDERSTANDING BETWEEN THE PENNSYLVANIA DEPARTMENT OF HEALTH AND THE PHILADELPHIA DISTRICT, U.S. FOOD AND DRUG ADMINISTRATION

I. Purpose. It is the purpose of this understanding to provide more effective consumer protection through more efficient inspectional coverage of Pennsylvania drug manufacturers, repackagers and distributors. The Pennsylvania Department of Health and the Food and Drug Administration, Philadelphia District, will coordinate their programs to maximize effectiveness in making inspections and gaining compliance. This understanding will provide a format for formal discussion and planning in the development of a cooperative inspectional program satisfactory to both agencies.

II. Work-sharing Program. A. Goals and Responsibilities: The Pennsylvania Department of Health and the FDA Philadelphia District Investigations Branch will attempt to develop a formal program for sharing the responsibility of the inspection of all Pennsylvania drug, device, and cosmetic establishments of mutual obligation. Close coordination and communication will be developed; there will be joint planning to assure that manpower is more efficiently utilized and regulatory efforts are properly meshed to achieve a high level of industry compliance.

#### B. Inspectional Obligation:

1. Inspection Inventory: An inventory of firms covered by this understanding, here-

after referred to as the cooperative establishment inventory (CEI), will be developed by both agencies and maintained by FDA's data processing unit (DPU).

2. Registration Information: The Pennsylvania Department of Health will supply Philadelphia District FDA with drug and device registration information. FDA will supply the State with a listing of registered drug firms in Pennsylvania.

3. Joint Inspections: During the term of this understanding, joint inspections will be conducted to give each agency the opportunity to observe its partner's inspectional procedures. The inspections will be planned during the first planning session and discussed during the second and last, as stated in section IV-A.

III. General Provisions. A. Drug Sampling: 1. Collection: The Pennsylvania Department of Health will assist the Philadelphia District FDA in the collection of drug samples when requested and within the limits of its available manpower.

2. Assay: The Philadelphia District drug laboratory will assay drug samples when requested by the Pennsylvania Department of Health, within the limits of available resources.

B. Recall and Emergency: The agencies will cooperate to the fullest extent possible in handling emergency public health problems of drug and device origin and in checking the effectiveness of drug product recalls.

C. Complaint Investigations: When indicated, each agency will assist its partner to the extent possible in the investigation of complaints.

D. Cross-Commissioning: Consideration will be given by both agencies to the possibility of commissioning each other's inspectors to operate under the authority of State and Federal Acts. The need for such commissioning will be determined during the term of this understanding.

E. Training: Based on the results of the joint inspections, FDA and the State will identify training needs and, if needed, develop several possible training activities designed to meet the needs of implementing this understanding.

F. Personnel Exchange: An exchange of personnel will be accomplished during the term of this understanding to permit closer program coordination, better understanding of mutual responsibilities, and an insight into operational procedures and regulatory philosophies. An FDA official will be assigned for a two-week period to the State Drug Section and a State official will be assigned to the Philadelphia District FDA for a two-week period. The details will be conducted under the provisions of the Federal Intergovernmental Personnel Act at federal expense.

IV. Program Review. A. Planning Sessions: Three joint planning sessions will be held during the term of this understanding to discuss the cooperative program, establish effective communication, determine regulatory philosophy, and plan future objectives. The first session will be held within 4 months of the signing of this memorandum; the second will be held 4 months thereafter, and the third during the 11th month of this understanding. The first session will be conducted in Harrisburg, Pennsylvania; the second in Philadelphia, Pennsylvania; and the third in Harrisburg. Each session will be arranged for and moderated by FDA's Region III Assistant Food and Drug Director for Intergovernmental Affairs.

B. Performance Evaluation: During the term of this understanding, a procedure for evaluation of the quality of program performance will be developed. The evaluation procedure will be established during the current term and set into operation during the second year of the program.

V. Term of Understanding. This understanding will expire on May 31, 1976, unless renewed and signed by the heads of both cooperating agencies to continue it in effect for another year. A new memorandum will be prepared each year with asterisks included to indicate sections in which changes were made to this memorandum.

This understanding in its entirety, or in part, may be revised by mutual consent or terminated upon 30 days' written notice by either agency.

Approved and accepted for the Pennsylvania Department of Health:

Leonard Bachman, M.D., Secretary, Pennsylvania Department of Health.

Date: April 28, 1975.

Jack B. Ogun, R.Ph., Chief, Drug, Device and Cosmetic Compliance Section.

Date: April 28, 1975.

Approved and accepted for the Food and Drug Administration:

T. C. Maraviglia, Regional Food and Drug Director, Region III, Food and Drug Administration.

Date: April 28, 1975.

Effective date. This Memorandum of Understanding became effective April 28, 1975.

Dated: May 19, 1975.

SAM D. FINE,  
Associate Commissioner  
for Compliance.

#### Public Health Service

#### NATIONAL INSTITUTES OF HEALTH

#### Statement of Organization, Functions, and Delegations of Authority

Part 8 of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare is hereby amended to reflect the implementation of the Reorganization Order effective July 1, 1973, and the Reorganization Order effective September 25, 1973, with respect to the organization of the National Institutes of Health (NIH) as a Public Health Service agency. Current statements for the National Institutes of Health are to be deleted and replaced by those given below.

SECTION 8-A. Mission. The National Institutes of Health provides leadership and direction to programs designed to improve the health of the people of the United States through the following activities:

(1) Conducts and supports research in the causes, diagnosis, prevention, and cure of diseases of man, in the processes of human growth and development, in the biological effects of environmental contaminants, and in related sciences, and supports the training of research personnel, the construction of research facilities, and the development of other research resources.

(2) Directs programs for the collection, dissemination, and exchange of information in medicine and health, in-

cluding the development and support of medical libraries and the training of medical librarians and other health information specialists.

SEC. 8-B. Organization and functions. The National Institutes of Health is administered by the Director of the National Institutes of Health, under the direction of the Assistant Secretary for Health. NIH consists of the following major components with functions as indicated:

Office of the Director (8A). Provides leadership and direction to the programs and activities of the National Institutes of Health.

Office of the Director and Deputy Directors (8A01). (1) Assists the Assistant Secretary for Health in the formulation of national health policy; (2) provides leadership in the development and implementation of policies and programs in support of biomedical research and communications; (3) manages and coordinates the activities of the National Institutes of Health.

Division of Equal Employment Opportunity (8A0106). (1) Advises the NIH Director and his staff on matters related to the equal employment opportunity programs and policies of the NIH; (2) plans, coordinates, provides policy direction, monitors, and evaluates execution of the equal employment opportunity program; (3) provides for investigation of complaints of discrimination and for fair and judicious processing of such complaints; (4) coordinates with the Division of Personnel Management and other responsible organizational elements in the development and implementation of plans for achieving definite and measurable progress in the equal employment opportunity program; (5) consults with and advises responsible officials in bureaus, institutes, and divisions regarding problems and progress of equal employment opportunity programs in their respective organizations; (6) represents the Director, NIH, in contacts with groups, both within and outside NIH, concerned with equal employment opportunity; (7) maintains liaison with CSC, DHEW, PHS, and other Federal agencies concerned with Federal equal employment opportunity programs.

Office of Collaborative Research (8A02). (1) Advises the Director, NIH, and his staff on collaborative and research contract programs; (2) provides guidance to NIH components in the development and management of collaborative research programs.

Office of Extramural Research and Training (8A03). (1) Advises the Director, NIH, and his staff, and provides guidance to the bureaus, institutes, and divisions on the extramural research and training programs of the NIH; (2) coordinates grants policy for the whole of NIH, and represents the NIH to the Assistant Secretary for Health on overall grants policy.

Office of Intramural Affairs (8A04). Advises the Director, NIH, and his staff, and provides guidance to research bureaus and institutes on the intramural research programs of the NIH.

Office of Clinical Care (8A05). (1) Advises the Director, NIH, and his staff on policies relating to clinical care; (2) provides guidance to research bureaus and institutes on matters affecting clinical care.

Office of Program Planning and Evaluation (8A06). (1) Advises the Director, NIH, and his staff on program plans and policies and on legislative proposals; (2) evaluates the programs of the operating organizations of the NIH and makes recommendations thereon to the Director; (3) directs staff activities relating to program development, program analysis, resources analysis, and legislative liaison and development.

Division of Program Analysis (8A0602). (1) Prepares annually an overall long-range program plan for NIH and coordinates and/or carries out associated program planning activities; (2) prepares annual Research and Evaluation Plan for NIH and manages all NIH program evaluation activities conducted as part of the Department's Health Evaluation Program; (3) prepares a variety of analytic studies and reports to assist the Director of NIH and his top staff in making broad policy and program decisions affecting the size, scope, and direction of NIH programs; (4) performs the OMB project review and clearance function for NIH.

Division of Resources Analysis (8A0603). (1) Provides systematic, continuing analysis of national resources for biomedical research, education, and communication; (2) identifies significant national trends in allocation of resources for biomedical research and analyzes implications for NIH policy and program planning; (3) develops long-range projections of biomedical research requirements and resources; (4) designs and manages surveys and monitors contractual arrangements to obtain data on: (a) flow of funds for biomedical research, and (b) supply, utilization, characteristics, and training of manpower for biomedical research and education; (5) in coordination with PHS develops special reports on national needs and resources capabilities for the Executive Branch and the Congress.

Division of Legislative Analysis (8A0604). (1) Identifies, analyzes, and reports on legislative developments relevant to NIH programs and activities; (2) assesses the need for and proposes changes in the statutory base of NIH activities; (3) plans and develops new legislative proposals; (4) coordinates and controls NIH Congressional communications; (5) provides coordination on NIH legislative matters with the Office of the Assistant Secretary for Health, the Department, the Congress, and other bodies; (6) coordinates preparation of testimony or statements for the use of staff of the Office of the Director before Congressional committees or other groups; (7) develops special reports, staff documents, or other studies concerning NIH interests, activities, and relationships.

Office of Administration (8A07). (1) Advises the Director, NIH, and his staff

on administration and management; (2) provides leadership and guidance in all phases of management; (3) directs staff and service functions in the areas of budget and financial management, personnel management, management policy, engineering services, grant and contract management, general administration, and management surveys.

**Division of Financial Management (8A0702).** (1) Advises the Director, NIH, and his staff and provides leadership and direction for NIH financial management activities; (2) collaborates with the Office of Program Planning and Evaluation in the development and implementation of the long-range plan; (3) develops policies and instructions for budget preparations and presentation; (4) administers allocation of funds and manages a system of fund and budgetary controls; (5) provides an NIH manpower resource control system designed to allocate resources; (6) provides, through development and maintenance, an NIH Management Account Structure; (7) directs planning and implementation of NIH fiscal systems and procedures and provides accounting services to all NIH components; (8) provides a central grant accounting and financial reporting point for all DHEW grants to educational and nonprofit institutions; (9) participates in the development of policies and procedures pertaining to grants and contracts.

**Division of Personnel Management (8A0703).** (1) Advises the Director, NIH, and his staff on personnel management; (2) directs central personnel management services; (3) provides NIH leadership and planning on personnel program development, salary administration, Upward Mobility, and other personnel functions; (4) makes studies and recommendations to top management at NIH and PHS for new or redirected personnel efforts and policies and participates, as appropriate, in the development of such policies.

**Division of Administrative Services (8A0705).** (1) Plans and conducts a centralized program of technical and administrative services in support of biomedical research, patient care, and administrative and plant operations; (2) advises the Associate Director for Administration on central services matters and acts as his representative with PHS, DHEW, GAO, and GSA; (3) collaborates with scientific, technical, and administrative staff of NIH components in the management of programs to meet NIH needs for administrative services and logistical support; (4) develops and implements policies and procedures in areas of responsibility.

**Division of Engineering Services (8A0706).** (1) Plans and conducts a centralized program in support of the construction, operation, and maintenance of NIH facilities and advises the Associate Director for Administration in these areas; (2) provides engineering design and architectural services in the (a) planning of NIH facilities and improvements, (b) the administration and inspection of NIH construction under direct contract, and

(c) liaison with and inspection of projects administered by the GSA or the Office of Facilities Engineering and Property Management, DHEW, in coordination with PHS; (3) provides engineering craft and labor services in operating and maintaining NIH buildings, grounds, utility plants, and related equipment; (4) maintains liaison with state and local review and governing authorities.

**Division of Contracts and Grants (8A0707).** (1) Advises the Director, NIH, and his staff and provides leadership and direction for NIH contracting and grants management activities; (2) plans, develops, and recommends NIH-wide research and development negotiated contracting policies, procedures, and practices; (3) provides contracting officer services to those NIH components which have a small volume of research contracts; (4) maintains a continuing review of contracting operations in those bureaus, institutes, and divisions with decentralized authority to insure adherence to FPR, DHEW, PHS, and NIH policies and standards; (5) provides NIH research contracting operating units with price/cost analysis services and comprehensive advice on the financial responsibility of prospective contractors; (6) participates with other offices in the Office of the Director, NIH, and with NIH awarding components in the formulation, coordination, and implementation of DHEW, PHS, and NIH policies and procedures pertaining to grants administration, and serves as focal point of liaison with the management staffs of grantee institutions; (7) in coordination with PHS, maintains liaison with the Audit Agency, Office of the Assistant Secretary Comptroller, and with the Office of Grants and Procurement Management, OS, on contracts and grants management policy, procedural, and operating matters including the resolution of audit reports.

**Division of Management Policy (8A0708).** (1) Advises and assists OD staff and operating officials on management policy, procedures, organization, business ADP systems, and related management matters; (2) provides staff assistance and coordination in management planning and in related policy development and implementation; (3) conducts management studies and evaluates studies of NIH made by outside organizations; (4) reviews, monitors, and advises on the development of business ADP systems at NIH and furnishes assistance in the analysis, design, and coordination of data systems in the administrative areas; (5) conducts a management program covering directives, forms, reports, records, and other aspects of paper work management; (6) maintains liaison with and, as assigned, serves as NIH coordinator for PHS and Department-wide efforts to improve management and administration.

**Division of Management Survey and Review (8A0709).** Provides advice and assistance to OD staff and operating officials on management problems: (1) Plans and organizes a management survey program throughout NIH; (2) plans, schedules, and conducts reviews designed

to appraise soundness and adequacy of management control systems; (3) develops recommendations to the OD staff, NIH, and the head of the organization surveyed, for improving the system of management controls and follows up to verify if corrective actions have been taken and if results are satisfactory; (4) investigates specific problem areas at the request of top management; (5) in coordination with PHS, acts as the central NIH liaison point for relationships on internal audit matters with the GAO and the HEW Audit Agency.

**Office of Communications (8A09).** (1) Advises the Director, NIH, with particular reference to the communications aspects of NIH policies and programs; (2) plans and directs activities designed to achieve better understanding of NIH programs, and accomplishments on the part of the general public, Congress, biomedical institutions, and the medical profession; (3) plans and directs programs designed to facilitate dissemination of scientific and technical information arising from NIH research to professional audiences; (4) advises the Director, NIH, on applications of the Freedom of Information Act and serves as the principal NIH spokesman in these matters; (5) assures effective communication on policy and program between the Office of the Director and operating components of NIH.

**Division of Public Information (8A0902).** (1) Advises the Associate Director for Communications on policies and programs relating to public information and public affairs activities of the NIH; (2) plans and directs the public information program; (3) identifies NIH needs in the area of public information and plans and carries out special efforts to meet those needs; (4) provides for orderly and expeditious processing and dissemination of NIH public information materials.

**Division of Scientific Reports (8A0903).** (1) Advises the Associate Director for Communications on policy and program aspects of NIH's multicategorical effort to interpret, present, and disseminate research findings and scientific and health information to the biomedical community and other special audiences; (2) provides guidance and coordination to and evaluates bureau, Institute, and division programs of scientific and health reporting; (3) directs the public inquiry function for the Office of the Director; advises and assists operating components of NIH in establishing policies and procedures to insure prompt and informative answers to inquiries concerning their activities; (4) prepares and publishes scientific and technical publications and reports relating to NIH programs and accomplishments; (5) serves as principal advisor to the Associate Director for Communications on the requirements of the Freedom of Information Act as it applies to NIH and on Departmental and OMB regulations governing scientific reporting and public inquiries; develops and issues guidelines to insure conform-

ance with laws, policies, and regulations in these areas throughout NIH.

**National Cancer Institute (8C).** Plans, conducts and coordinates a national program involving (a) research on the detection, diagnosis, cause, prevention, treatment, and palliation of cancers and on rehabilitation of the cancer patient and (b) demonstration of the effectiveness of cancer control methods and techniques. Specifically: (1) Conducts and directs research performed in its own laboratories and through contracts; (2) supports and coordinates research projects by scientific institutions and individuals through research grants; (3) supports manpower training in fundamental sciences and clinical disciplines through individual and institutional research training awards and clinical education awards; (4) supports construction of laboratories and related facilities necessary for research on cancer; (5) supports field tests and community demonstration projects of methods and techniques for cancer control; (6) collaborates with voluntary organizations and other institutions engaged in cancer research, training, and control activities; (7) encourages and coordinates cancer research by industrial concerns where such concerns evidence a particular capability for programmatic research; (8) collects and disseminates information on cancer research and cancer control; (9) consults with appropriate individuals and agencies in the development, coordination, and support of cancer research programs in other countries.

**Office of the Director (8C01).** (1) Serves as the focal point for the National Cancer Program; (2) develops a National Cancer Plan and monitors implementation of the Plan; (3) directs and coordinates the Institute's programs and activities; and (4) develops and provides policy guidance and staff direction to the Institute's programs in areas such as program coordination, program planning, clinical care, and administrative management.

**Office of Program Planning and Analysis (8C02).** (1) Manages the development and updating of the National Cancer Plan and monitors implementation of the Plan; (2) plans and analyzes the program plans for the Institute; (3) provides leadership for and coordinates Institute scientific and technical information activities, including development of a research data bank and a management information system for the National Cancer Program; (4) provides staff support to the Office of the Director for coordination of the National Cancer Program.

**Office of Administrative Management (8C07).** (1) Directs and conducts administrative management activities of the Institute by providing services in areas of financial management, contract management, personnel management, and administrative services; (2) advises the Director and the Divisions of the Institute on developments in administrative management and their implications and effects on program management; (3) co-

ordinates administrative management activities of the Divisions; (4) develops policies on administrative management and prepares and issues procedures and guidelines for implementation of administrative policies and requirements.

**Office of Cancer Communications (8C08).** (1) Develops and manages the program communications activities of the National Cancer Institute/National Cancer Program; (2) interprets program and organizes, prepares, and disseminates reports on cancer research and treatment for Congress, HEW, and other Federal departments, and for research institutions and other organizations participating in the National Cancer Program; (3) maintains liaison with National Cancer Program constituents on behalf of the Director to facilitate program management and reporting and interpretation and information exchange, and advises the Director on these matters; (4) responds to public inquiries; (5) prepares and coordinates internal reports for dissemination within the Institute and other parts of the Executive Branch, and to the Congress; (6) serves as a focal point for information on legislation and other Congressional developments affecting the National Cancer Program; (7) supports the Cancer Control Program in developing cancer education programs for professionals treating cancer patients and for individuals with cancer and at risk to cancer.

**Division of Cancer Treatment (8C10).** (1) Plans, directs, and coordinates an integrated program of cancer treatment activities with the objective of curing or controlling cancer in man by utilizing combination modalities including chemical, surgical, radiological, and certain immunological techniques, through intramural laboratory and clinical studies, contracted research, and research conducted in cooperation with other Federal agencies; (2) administers a total drug development program encompassing all phases from drug acquisition up to and including clinical trials; (3) serves as the national focal point for information and data on experimental and clinical studies related to cancer treatment and for the distribution of such information to appropriate scientists and physicians; (4) participates in the evaluation of and advises the Institute Director on program related aspects of cancer control activities and of grants and grant applications as they relate to cancer treatment.

**Clinical Oncology Program (8C1006).** (1) Plans, directs, coordinates, and evaluates patient care activities of the NCI and a program of basic, applied and clinical research in cancer treatment; (2) establishes program priorities, allocates clinical resources, integrates the projects of the various branches, evaluates program effectiveness and represents the program area in management and scientific decision-making meetings within the Institute; (3) through intramural studies and contracts, administers research in surgery, radiotherapy, chemotherapy and combined modalities of treatment; (4) advises the Director

of the Division, the National Cancer Advisory Board and other scientific advisory committees.

**Baltimore Cancer Research Center Program (8C1007).** (1) Plans, directs, coordinates, and evaluates a program of laboratory and clinical research carried on by the NCI Baltimore Cancer Research Center; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program areas in management and scientific decision-making meetings within the Institute; (3) through intramural studies and contracts, administers research and clinical support in general medical services including surgical, chemotherapeutic, and radiotherapeutic services; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Experimental Therapeutics Program (8C1008).** (1) Plans, directs, coordinates, and applies research concerning the pharmacologic and toxicologic aspects of cancer chemotherapy; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural laboratories and contracts, administers research in cell biology, toxicology, pharmo-kinetics and dynamics, drug metabolism, experimental therapeutics, and molecular, chemical, and biochemical pharmacology; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Drug Research and Development Program (8C1009).** (1) Plans, directs, coordinates, and evaluates a program of basic and applied research in drug development and evaluation; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural laboratories and contracts, administers research in genetics, molecular biology, experimental chemotherapy, and drug development, procurement, distribution, and evaluation; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Cancer Therapy and Evaluation Program (8C100B).** (1) Plans, directs, coordinates, and evaluates a clinical contract program of cancer therapy evaluation; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural and contract activities, administers

studies in literature research, anti-cancer drugs, therapeutic methods, and maintains liaison with the Food and Drug Administration; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Division of Cancer Cause and Prevention (8C11).** (1) Plans and directs a program of laboratory, field, and demographic research on the cause and natural history of cancer and means for preventing cancer through direct in-house research and through research contracts; (2) evaluates mechanisms of cancer induction by viruses and by environmental carcinogenic hazards; (3) serves as the focal point for the Federal Government on the synthesis of clinical, epidemiological, and experimental data relating to the cause of cancer; (4) participates in the evaluation of and advises the Institute Director on program aspects of cancer control activities and of grants and grant applications as they relate to cancer cause and prevention.

**Carcinogenesis Program (8C1103).** (1) Plans, directs, coordinates, and evaluates a program of basic and applied research on the cancer-causative factors and the prevention of carcinogenesis; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural laboratories and contracts, administers research in carcinogenesis and related toxicology, metabolism, chemistry, immunology, cell biology, experimental tumor pathology, carcinogen bioassays, and information sciences; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Field Studies and Statistics Program (8C1104).** (1) Plans, directs, coordinates, and evaluates a program of epidemiologic, statistical, and mathematical research activities and statistical and automatic data processing services for all NCI research programs; (2) establishes program priorities, allocates resources, integrates the projects of various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural and contract activities, administers research in biometry and epidemiology and the development of mathematical models and statistical methodology; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Viral Oncology Program (8C1105).** (1) Plans, directs, coordinates, and evaluates a program of basic and applied research regarding viruses as etiological agents of cancer; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural and contract activities, administers research in biometry and epidemiology and the development of mathematical models and statistical methodology; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

resents program area in management and scientific decision-making meetings within the Institute; (3) through intramural laboratories and contracts, administers research in biochemistry, tumors, genetics, pathology, biohazards, immunology, the environment, and viral and cell biology; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Division of Cancer Research Resources and Centers (8C12).** (1) Plans and directs the Institute's grant-supported activities including research grants, centers grants, manpower training, and facilities construction; (2) recommends Institute policy relating to the administration of grant programs; (3) develops, reviews, and coordinates plans and criteria for the implementation of grants and evaluates effectiveness of grant-supported activities in achieving the Institute's missions; (4) advises the Institute Director, the National Cancer Advisory Board, and other advisory bodies of grant activities and developments, as they apply to programs supported by contracts and the overall mission of the National Cancer Program.

**Biomedical Research Program (8C1209).** (1) Plans, directs, coordinates, and evaluates grant-supported activities in multidisciplinary biomedical and clinical research, including research grants, individual and institutional research training awards, and awards for support of scientific meetings, and recommends Institute policies regarding these program grants; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Cancer Center Program (8C1210).** (1) Plans, directs, coordinates, and evaluates the Cancer Center Program the Research Facilities Construction Program, and the Cancer Clinical Education Program; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Division of Cancer Biology and Diagnosis (8C13).** (1) Plans and directs the general laboratory and clinical research activities of the National Cancer Institute; (2) cooperates with other divisions of the Institute in conducting basic research which is supportive of targeted activities of the Institute; (3) serves as the national focal point for programs to improve the detection and diagnosis of human cancers; (4) plans and manages a collaborative program in immunology,

diagnosis, and breast cancer; (5) participates in evaluation of and advises the Institute Director on program related aspects of cancer control activities and of grants and grant applications as they relate to cancer biology and diagnosis.

**Clinical Research Program (8C1302).** (1) Plans, directs, coordinates, and evaluates a program of basic, applied, and clinical research; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through contracts and intramural laboratory and clinical studies, administers research in immunology, dermatology, metabolism, endocrinology, breast oncology, radiation oncology, pathology, physiology, genetics, biochemistry, cytology, and molecular and general biology; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board, and other scientific advisory committees.

**Immunology Program (8C1313).** (1) Plans, directs, coordinates, and evaluates a program of basic and applied research on tumor immunology and cell biology; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through intramural laboratories, administers research in tumor immunology, immunochemistry, cellular immunology, transplantation immunology, and other aspects of general immunology as applied to the study of the biology, diagnosis and treatment of neoplastic diseases; (4) develops and implements a single research program in tumor immunology for the National Cancer Institute utilizing the contract mechanism; (5) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Collaborative Research Program (8C1316).** (1) Plans, directs, coordinates, and evaluates a broad program of basic and applied research and also monitors the professional aspects of research contract management; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through research contracts, administers studies in cancer diagnosis and the diagnosis, therapy, and epidemiology of breast cancer; (4) advises the Director of the Division and supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**Division of Cancer Control and Rehabilitation (8C14).** (1) Plans, directs, and coordinates an integrated program of cancer control and rehabilitation ac-

tivities with the goal of identifying, testing, evaluating, demonstrating, communicating, and promoting the widespread application of available and new methods for reducing the incidence, morbidity, and mortality from cancer; (2) serves as the focal point of a coordinated national effort to control cancer, involving all appropriate elements of the Department of Health, Education, and Welfare, other Federal agencies, state and local health departments, voluntary health agencies and other elements of the private health community; (3) in collaboration with the research divisions of the National Cancer Institute, identifies candidate control techniques and methods for inclusion in the field test and demonstration activities of the Division; (4) serves as the focal point of the National Cancer Institute for research in cancer rehabilitation; (5) participates in evaluation of and advises the Institute Director on program related aspects of grants and contracts as they relate to cancer control and rehabilitation.

**Intervention Program (8C1412).** (1) Plans, directs, coordinates, and evaluates the identification and field testing of new and improved intervention methods and techniques to be used on a wide scale in community settings; (2) establishes program priorities, allocates resources, integrates the projects of the various branches, evaluates program effectiveness, and represents program area in management and scientific decision-making meetings within the Institute; (3) through contracts and grants, administers a broad program in cancer control intervention including prevention, detection, diagnosis, pretreatment evaluation, treatment, rehabilitation, and continuing care; (4) advises the Director of the Division and the Director of the Institute; supports the activities of the National Cancer Advisory Board and other advisory committees.

**Community Program (8C1413).** (1) Plans, directs, coordinates, and evaluates the demonstration and promotion of approved intervention techniques and methods in community settings; (2) establishes program priorities, allocates resources, integrates projects relative to intervention at the community level, evaluates program effectiveness, and represents the program area in management and scientific decision-making meetings within the Institute; (3) through contracts and grants, administers a broad program in cancer control intervention in community settings including prevention, detection, diagnosis, pretreatment evaluation, treatment, rehabilitation, and continuing care; (4) advises the Director of the Division and the Director of the Institute; supports the activities of the National Cancer Advisory Board and other scientific advisory committees.

**National Heart and Lung Institute (8G).** (1) Provides leadership for a national program in diseases of the heart, blood vessels, blood, and lungs; (2) plans, conducts, fosters, and supports an integrated and coordinated program of research, investigations, clinical trials, and

demonstrations relating to the causes, prevention, methods of diagnosis, and treatment (including emergency medical treatment) of the heart, blood vessel, lung, and blood diseases through: research performed in its own laboratories and through contracts and research grants to scientific institutions and to individuals; (3) plans and directs research in the development, trial, and evaluation of drugs and devices relating to the prevention and treatment of, and the rehabilitation of patients suffering from, such diseases; (4) conducts studies and research into the clinical use of blood and all aspects of the management of its resources; (5) supports training of manpower in fundamental sciences and clinical disciplines for participation in basic and clinical research programs relating to heart, blood vessel, blood, and lung diseases by individual and institutional research training awards; (6) coordinates with the other research institutes and with all Federal health programs relevant activities in the above diseases, including the related causes of stroke; (7) conducts educational activities, including the collection and dissemination of educational materials on these diseases, with emphasis on the prevention thereof, for health professionals and the lay public; (8) maintains continuing relationships with institutions and professional associations and with international, national, state, and local officials, and voluntary agencies and organizations working in these areas.

**Office of the Director (8G01).** (1) Develops and provides leadership for the national heart, blood vessel, blood, and lung program, including the coordination of all Federal health programs relating to the above diseases as authorized; (2) provides overall planning, direction, coordination, and evaluation of the Institute's programs; (3) collects, develops, and disseminates information on the above diseases, with emphasis upon factors in their prevention, and conducts and fosters related educational programs for scientists and clinicians; (4) provides overall management and administrative services for the Institute; (5) establishes internal Institute policies for program and administrative operations and maintains surveillance over their execution.

**Office of Program Planning and Evaluation (8G03).** (1) Advises the Director on program plans and policies; (2) assists in the establishment of Institute goals and in the development of programs to meet these objectives; (3) performs analysis and evaluation of data on cardiovascular, respiratory, and blood diseases and on blood resources for use in program planning and development; (4) coordinates the presentation of the Institute's varied activities in plans and reports to higher echelons.

**Office of Administrative Management (8G04).** (1) Advises and assists the Director on administrative matters; (2) plans and directs management functions of the Institute and provides leadership and coordination of Institute management activities; (3) participates in pro-

gram and legislative review, interpretation, analysis, and implementation to insure compliance with laws, regulations, and DHEW and PHS management policies, procedures, and goals; (4) provides coordination and selected supporting and staff services in fiscal management, personnel management, management analysis, and administrative services.

**Office of Prevention, Control, and Education (8G05).** (1) Plans, coordinates, and develops Institute policies and programs in the areas of information and education relating to cardiovascular, respiratory, and blood diseases and blood resources, and coordinates associated activities in the Divisions; (2) develops educational and informational materials for both the general public and the medical community as appropriate for professional use in the prevention, diagnosis, and treatment of these diseases and for general public education and information; (3) designs, develops, and operates or coordinates programs which facilitate or implement the transfer of knowledge gained through research and development into clinical practice through educational measures, demonstrations, and other means; (4) administers a clearinghouse for scientific and technical information on cardiovascular, respiratory, and blood diseases and blood resources.

**Division of Heart and Vascular Diseases (8G15).** (1) Plans and directs the Institute's research grant, contract, and training programs in heart and vascular diseases, encompassing basic research, targeted research, clinical trials and demonstrations, national cardiovascular centers, technological development, and application of research findings; (2) maintains surveillance over developments in its program area and assesses the national need for research in the causes, prevention, diagnosis, and treatment of cardiovascular diseases, in technological development, in the application of research findings, and for manpower training in these areas; (3) maintains the necessary scientific management capability to foster and guide an effective attack upon cardiovascular diseases.

**Etiology of Arteriosclerosis and Hypertension Program (8G1510).** (1) Plans and directs a program of grant and contract support for research on the etiology of arteriosclerosis and hypertension to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research in program areas; (3) recommends priorities and funding levels for programs to be recommended to the advisory council for support by grants; (4) determines priorities and allocates funds for research to be supported by contract; (5) collaborates with intramural programs in the Institute and NIH-wide and maintains an awareness of national research efforts in program areas; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying

research needs and developing programs to meet them.

**Cardiology Program (8G1512).** (1) Plans and directs a program of grant and contract support for research in cardiology, in its clinical and fundamental aspects, and in the relevant technological and bioengineering devices areas, to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research in program areas; (3) recommends priorities and funding levels for programs to be recommended to the advisory council for support by grants; (4) determines priorities and allocates funds for research to be supported by contract; (5) collaborates with intramural program in the Institute and NIH-wide and maintains an awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Clinical Applications and Prevention Program (8G1513).** (1) Plans and directs programs of basic and applied research and grant and contract support for research in biometrics, epidemiology, clinical trials, and preventive cardiology to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research in these program areas; (3) recommends priorities and funding levels for programs to be recommended to the advisory council for support by grants; (4) determines priorities and allocates funds for research to be supported by contract; (5) collaborates with intramural program in the Institute and NIH-wide and maintains an awareness of national research efforts in program areas; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Division of Lung Diseases (8G16).** (1) Plans and directs the Institute's research grant, contract, and training programs in lung diseases, encompassing basic research, targeted research, clinical trials and demonstrations, national pulmonary centers, technological development, and application of research findings; (2) maintains surveillance over developments in program area and assesses the national need for research in the causes, prevention, diagnosis, and treatment of lung diseases, in technological development, in the application of research findings, and for manpower training in these areas; (3) maintains the necessary scientific management capability to foster and guide an effective attack upon lung diseases.

**Division of Blood Diseases and Resources (8G17).** (1) Plans and directs the Institute's research grant, contract, and training programs in blood diseases and

resources, encompassing basic research, targeted research, and clinical trials and demonstrations; (2) maintains surveillance over developments in this program area; (3) conducts research and demonstrations to improve the national systems of blood procurement, management, and distribution; (4) coordinates Federal sickle cell disease activities, and operates a national clearinghouse for information on sickle cell disease; (5) maintains the necessary scientific management capability to foster and guide an effective attack upon blood diseases and to improve use of blood and blood products.

**Division of Extramural Affairs (8G19).** (1) Advises the Director on research contract, grant, and training program policy; (2) represents the Institute on overall NIH extramural and collaborative program policy committees, coordinates such policy within the Institute and coordinates the Institute's research grant and training programs with the National Heart and Lung Advisory Council; (3) provides the Institute's program divisions with grant and contract management and processing services; (4) provides reports and statistics related to the Institute's grant and contract programs; (5) provides initial scientific merit review of project grants and research contracts for the Institute.

**Division of Intramural Research (8G20).** (1) Plans and directs a program of general laboratory and clinical research in heart, blood vessel, lung, and kidney diseases; certain blood diseases such as sickle cell anemia, hemophilia, hepatitis; and development of technology related to cardiovascular and pulmonary diseases; (2) maintains communication with other programs of the Institute to facilitate early practical application of basic research findings. Areas of major interest are: the biology of experimental and clinical arteriosclerosis and its manifestations; the pathophysiology of hypertensive vascular disease; functions of the lung; clinical and experimental studies on physiological and pharmacological aspects of heart, blood, and lung diseases, and a broad program of other basic research and technical developments related to them.

**National Library of Medicine (8Z).** (1) Assists the advancement of medical and related sciences through the collection, dissemination, and exchange of information important to the progress of medicine and health; (2) serves as a national medical information resource for medical education, research, and service activities of Federal and private agencies, organizations, institutions, and individuals; (3) publishes and distributes guides to medical literature and audiovisual materials in the form of catalogs, indexes, and bibliographies; (4) develops, produces, and disseminates audiovisual materials and systems and other aids to medical education, research, and practice; (5) supports the translation and publication of biomedical literature; (6) provides support for medical library development and for training of biomedical

librarians and other health information specialists; (7) conducts and supports research in techniques and methods for recording, storing, retrieving, and communicating health information; (8) provides technical consultation services and research assistance.

**Office of the Director (8Z01).** (1) Directs and coordinates library activities; (2) advises the Director, NIH, on policy relating to the management and control of biomedical communication media; (3) studies, identifies, and defines needs in biomedical communications; (4) provides the secretariat for the Board of Regents of the National Library of Medicine.

**Office of Administration (8Z02).** (1) Plans and directs administrative management functions of the Library including financial management, personnel management, contracts management, administrative services, program analysis, and legislation; (2) advises the Director and the Divisions on developments in administrative management and their implications and effects on program management; (3) coordinates administrative management activities of the Divisions of the Library.

**Office of Computer and Communications Systems (8Z04).** (1) Performs systems analysis in collaboration with user organizations to determine requirements for data processing support, and performs systems analysis and computer programming for the implementation of data processing systems; (2) guides the development of new systems developed under contract for the National Library of Medicine; (3) coordinates the planning for the provision of on-line information services from the NLM; (4) conducts information system analyses of ongoing programs of the NLM to identify areas requiring improvement; (5) as appropriate, coordinates the digital network planning and operations of the National Library of Medicine; (6) advises the Director on EDP and digital communications activities; (7) provides data processing technical interface with Medical Literature Analysis and Retrieval System (MEDLARS) Centers; (8) maintains operating systems; (9) operates and maintains digital computer phototypesetting and related data processing storage retrieval and transmission equipment; (10) establishes production schedules and performs production control for NLM machine based production; (11) produces magnetic tape for distribution to MEDLARS Search Centers and other authorized users in the United States and abroad.

**Lister Hill National Center for Biomedical Communications (8Z10).** (1) Designs, develops, implements, and manages a Biomedical Communications Network; (2) assists the biomedical community in identifying and developing products and services for dissemination through the network; (3) develops network and information systems to improve health education, medical research, and the delivery of health services; (4) applies

technology to the improvement of biomedical communications; (5) in coordination with the Department and PHS, represents DHEW in Federal activities related to biomedical communications activities; (6) in coordination with the Department and PHS, serves as the focal point in the Department for development and coordination of biomedical communications, systems, and network projects.

**Division of Extramural Programs (8Z11).** (1) Administers programs to augment and strengthen the health sciences libraries of the nation and to improve biomedical communications through grants to, or contracts with, non-Federal and private institutions; (2) analyzes and evaluates extramural programs in relation to program objectives and national needs to achieve balanced and effective support; (3) provides grants management, grants processing, and administrative management services.

**Division of Library Operations (8Z12).** (1) Selects, acquires, catalogs, and preserves biomedical publications; (2) indexes and provides access to the material through manual and machine produced bibliographies; (3) furnishes reference and loan services; (4) prepares and publishes indexes, catalogs, and other publications for the use of the biomedical community; (5) manages the Library component of the Biomedical Communications Network.

**Division of Specialized Information Services (8Z13).** (1) Coordinates the development and operation of specialized information services throughout the NLM; (2) plans, develops, and operates a national toxicological information system; (3) develops and administers a program to organize and analyze published information on the effects of drugs and chemicals on man, and prepares special bibliographies and reports on that subject.

**National Medical Audiovisual Center (8Z14).** Plans and administers a national program to improve the quality and the use of biomedical audiovisual materials in schools of the health professions and throughout the biomedical community through: (1) The acquisition and distribution of films and other audiovisual resource materials; (2) audiovisual reference and research services; (3) consultation and assistance in the development and use of audiovisual materials and systems; (4) audiovisual research, training, experimental production, and other activities in the development of media to support medical education; (5) encouragement of the production, dissemination, and use of audiovisual materials.

**National Eye Institute (8E).** Conducts, fosters, and supports research on the causes, natural history, prevention, diagnosis, and treatment of disorders of the eye and visual system, and in related fields (including rehabilitation) through: (1) Research performed in its own laboratories and through contracts; (2) a program of research grants and

individual and institutional research training awards; (3) cooperation and collaboration with voluntary organizations and other institutions engaged in research and training in the special health problems of the blind; (4) collection and dissemination of information on research and findings in these areas.

**Intramural Research Program (8E10).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses five major disease areas: retinal and choroidal diseases, corneal diseases, cataract, glaucoma, and sensory and motor disorders of vision, to insure maximum utilization of available resources in the attainment of Institute objectives; (2) evaluates research efforts and establishes program priorities; (3) allocates funds, space, and personnel ceilings and integrates ongoing and new research activities into the program structure; (4) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; (5) provides advice to Institute Director and staff on matters of scientific interest.

**Extramural and Collaborative Program (8E10).** (1) Plans and directs a program of grant and contract support for research and research training in five major disease areas: retinal and choroidal diseases, corneal diseases, cataract, glaucoma, and sensory and motor disorders of vision to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) collaborates with Institute and NIH intramural and collaborative activities and maintains awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**National Institute of Allergy and Infectious Diseases (8J).** Conducts, fosters, and supports research and research training programs directed at finding the causes of and improved methods for diagnosing, treating, and preventing immunologic and infectious diseases through: (1) Research performed in its own laboratories; (2) research grants to scientific institutions and individuals; (3) individual and institutional research training awards; (4) a contract program aimed at the adaption and application of laboratory findings to the development of specific disease control measures and solutions to infectious and immunological disease problems; (5) collection and dissemination of research findings and related information.

**Intramural Research Program (8J10).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses allergic, immunologic, and infectious diseases, to insure maximum utilization of available resources in the attainment of Institute objectives; (2) evaluates research efforts and establishes program priorities; (3) allocates funds, space, and personnel ceilings and integrates ongoing and new research activities into the program structure; (4) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; (5) advises Director and staff on the intramural research and areas of science of interest to the Institute.

**Extramural Program (8J12).** (1) Plans and directs the Institute's grant program, which supports research and research training in allergic, immunologic, and infectious diseases, to assure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) collaborates with Institute and NIH intramural and collaborative activities and maintains awareness of national research efforts in program area; (5) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (6) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Collaborative Program (8J13).** (1) Plans and directs the Institute's research contract program in support of research on allergic, immunologic, and infectious diseases to assure maximum utilization of available resources in the attainment of Institute objectives; (2) assesses need for research in program areas; (3) determines priorities and allocates funds for research to be supported by contract; (4) collaborates with Institute and NIH intramural and extramural activities and maintains awareness of national research efforts in program area; (5) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (6) disseminates information on the Institute's programs and interests through announcements, workshops, and notices in appropriate publications; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**National Institute of Arthritis, Metabolism, and Digestive Diseases (8L).** Conducts, fosters, and supports basic and clinical research into the causes, prevention, diagnosis, and treatment of the various arthritic, metabolic, and digestive diseases, and covers the broad areas of arthritis, bone, and skin diseases; diabetes, blood, endocrine, and metabolic diseases; digestive diseases

and nutrition; and kidney and urologic diseases (joined with the Artificial Kidney/Chronic Uremia Program) through: (1) Research performed in its own laboratories and clinics; (2) research grants; (3) individual and institutional research training awards; (4) applied research and development programs through the contract mechanism; (5) field epidemiologic and clinical investigation studies on selected populations in the U.S.; (6) collection and dissemination of information on Institute programs.

**Intramural Research Program (8L11).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses the various arthritic, rheumatic and collagen diseases, the broad spectrum of metabolic diseases such as diabetes, other inborn errors of metabolism, digestive diseases, orthopedics, dermatology, hematology, nutrition, endocrine disorders, urology and renal disease, mineral metabolism, and subjects related to the above to insure maximum utilization of available resources in attainment of Institute objectives; (2) conducts basic research in biochemistry; nutrition; pathology; histochemistry; chemistry; physical, chemical, and molecular biology; pharmacology; and toxicology; (3) evaluates research efforts and establishes program priorities; (4) allocates funds, space, and personnel ceilings and integrates new research activities into the program structure; (5) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; and (6) advises Director and staff on Intramural research program and areas of science of interest to Institute.

**Digestive Diseases and Nutrition Program (8L12).** (1) Plans and directs a program of grants, contracts, and individual and institutional research training awards for digestive diseases and nutrition to insure maximum utilization of available resources to attain program objectives; (2) determines program priorities and recommends funding levels within program area; (3) prepares analyses of national research efforts to assist advisory groups in recommending new and/or continuing program emphases; (4) maintains surveillance over developments in designated categorical areas and assesses need for research into causes, diagnosis, prevention, and treatment of digestive diseases and nutrition and for training related thereto; (5) develops and manages an information system, covering research developments and identifying areas where additional research and training efforts are required, for research scientists and other interested groups; (6) consults with voluntary and professional health organizations in identifying and meeting research needs in digestive diseases and nutrition.

**Kidney, Urologic, and Blood Diseases Program (8L13).** (1) Plans and directs a program of research grants, contracts, and individual and institutional research training awards for kidney, urologic, and

blood diseases to insure maximum utilization of available resources to attain program objectives; (2) determines program priorities and recommends funding levels within program area; (3) prepares analyses of national research efforts to assist advisory groups in recommending new and/or continuing program emphases; (4) maintains surveillance over developments in designated categorical areas and assesses need for research into the causes, diagnosis, prevention, and treatment of kidney, urologic, and blood diseases and for training related thereto; (5) develops and manages an information system, covering research developments and identifying areas where additional research and training efforts are required, for research scientists and other interested groups; (6) consults with voluntary and professional health organizations in identifying and meeting research needs in kidney, urologic, and blood diseases.

**Arthritis, Bone, and Skin Diseases Program (8L14).** (1) Plans and directs a program of research grants, contracts, and individual and institutional research training awards for arthritis, bone, and skin diseases to insure maximum utilization of available resources to attain program objectives; (2) determines program priorities and recommends funding levels within program area; (3) prepares analyses of national research efforts to assist advisory groups in recommending new and/or continuing program emphases; (4) maintains surveillance over developments in designated categorical areas and assesses need for research into the causes, diagnosis, prevention, and treatment of arthritis, bone, and skin diseases and for training related thereto; (5) develops and manages an information system, covering research developments and identifying areas where additional research and training efforts are required, for research scientists and other interested groups; (6) consults with voluntary and professional health organizations in identifying and meeting research needs in arthritis, bone, and skin diseases.

**Diabetes, Endocrine, and Metabolic Diseases Program (8L15).** (1) Plans and directs a program of research grants, contracts, and individual and institutional research training awards for diabetes, endocrine, and metabolic diseases to insure maximum utilization of available resources to attain program objectives; (2) determines program priorities and recommends funding levels within program area; (3) prepares analyses of national research efforts to assist advisory groups in recommending new and/or continuing program emphases; (4) maintains surveillance over developments in designated categorical areas and assesses need for research into the causes, diagnosis, prevention, and treatment of diabetes, endocrine, and metabolic diseases and for training related thereto; (5) develops and manages an information system, covering research developments and identifying areas where additional research and training

efforts are required, for research scientists and other interested groups; (6) consults with voluntary and professional health organizations in identifying and meeting research needs in diabetes, endocrine, and metabolic diseases.

**Extramural Activities Program (8L16).** (1) Advises the Director on the Institute's extramural program, identifies areas where further efforts are needed and recommends funding levels for the four categorical programs; (2) coordinates program planning in the extramural area and assesses progress toward objectives within the broad field represented by the categorical disease programs; (3) keeps budget, personnel ceilings, and other matters of mutual concern to the extramural program area; (4) provides operational and technical support activities in program analysis, administrative services, and grants management.

**National Institute on Aging (8M).** Conducts, fosters, and supports biomedical, social, and behavioral research and training pertaining to the aging process and related health fields through: (1) Research performed in its own laboratories and through contracts; (2) a program of research grants and individual and institutional research training awards; (3) cooperation and collaboration with other Departmental agencies, voluntary organizations, and other institutions; (4) collection and dissemination of the findings of aging research and studies and other information about the process of aging.

**Gerontology Research Center (8M10).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses research designed to obtain fundamental knowledge of the nature of the aging process, to insure maximum utilization of available resources in the attainment of Institute objectives; (2) evaluates research efforts and establishes program priorities; (3) allocates funds, space, and personnel ceilings and integrates new research activities into the program structure; (4) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; (5) advises Institute Director and staff on intramural research programs and matters of scientific interest; (6) serves as a center for national and regional research by Federal or non-Federal investigators working on problems of the aging.

**Extramural and Collaborative Program (8M12).** (1) Plans and directs a program of grant and contract support for research and research training in the biological, behavioral, and social processes as they bear on adult development and aging to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) determines priorities and allocates funds for research to be supported by contract; (5) collaborates with intramural program in the Institute and NIH-

wide and maintains an awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**National Institute of Child Health and Human Development (8N).** (1) Conducts, fosters, and supports biomedical and behavioral research through research grants, research contracts, and research performed in its own laboratories on: child health, maternal health, problems of human development with special reference to mental retardation; and on family structure, the dynamics of human population, and the reproductive process; (2) promotes the application of research findings to clinical practice; (3) initiates and cooperates in government-wide efforts on unique problems that emerge affecting the health of children and their families; (4) provides consultation to Federal agencies and non-Federal groups in the development of programs to improve the health of children and their families; (5) coordinates and integrates research efforts with service-oriented health agencies and the Office of Child Development; (6) disseminates information related to research findings to practitioners and the general public for improving the health of children and their families.

**Center for Population Research (8N11).** (1) Serves as the cognizant agency for population research and research training activities throughout the Federal government and provides a central source of information, referral, and consultation for all agencies with population related research in the biomedical, social, and behavioral sciences; (2) establishes program priorities and allocates program resources for population research; (3) plans and directs a collaborative (contract) research program in contraceptive development, the medical effects of contraception, the social, psychological, and demographic aspects of population change, and infertility; (4) plans and directs extramural (grant) programs in population related research and research training in the biomedical, social, and behavioral sciences; (5) maintains close liaison with intramural units having population research programs to stimulate and coordinate improved and expanded activities in population research and to recommend to the Institute Director new directions and approaches for these units in order to enhance research in this field; (6) coordinates population studies supported by the special foreign currency (P.L. 480) program.

**Center for Research for Mothers and Children (8N16).** (1) Serves as the cognizant agency for research, throughout the Federal government, on the special health problems of mothers and children; (2) establishes program priorities and allocates program resources in support of research and research training activities

ties in this field; (3) provides a central source of information, referral, and consultation for all agencies with programs of research related to mothers and children in the biomedical, social, and behavioral sciences; (4) directs biomedical, social, and behavioral sciences extramural (grant) and collaborative (contract) research, and a program of individual and institutional research training awards in pregnancy and perinatal biology, infancy, disabilities in human development, and mental retardation; (5) maintains liaison with intramural units having similar research programs to stimulate and coordinate improved and expanded activities in research for mothers and children, and recommends to the Institute Director new directions and approaches for these units in order to enhance research in this field.

**Intramural Research Program (8N13).** (1) Plans and conducts the Institute's laboratory and clinical research programs which encompass the biomedical and behavioral aspects of human development relating to reproductive biology, population, maternal health, and child health; (2) insures maximum utilization of available resources in the attainment of Institute objectives; (3) evaluates research efforts and establishes program priorities; (4) allocates funds, space, and personnel ceilings and integrates ongoing and new research activities into the program structure; (5) provides advice to Institute Director and staff on matters of scientific interest.

**Epidemiology and Biometry Research Program (8N14).** (1) Plans and directs an epidemiology and biometry research program on human development relating to reproduction, population, maternal health, and child health; (2) assesses the need for such research; (3) establishes program priorities; selects epidemiologic and biometric studies to be done in-house and those to be conducted by contracts; (4) insures the maximum utilization of available resources in the attainment of Institute objectives; (5) collaborates with the Institute's intramural and extramural program staff in the management of statistical and epidemiological phases of research projects.

**National Institute of Dental Research (8P).** Conducts, fosters, and supports research and research training in the causes, diagnosis, prevention, and cure of oral diseases and disorders through: (1) Laboratory, clinical, and field research; (2) grants for research projects and dental research institutes and individual and institutional research training awards; (3) collaborative and developmental research programs aimed at specific dental problems where major advance seems clearly possible; (4) collection and dissemination of research findings and related information.

**Extramural Program (8P11).** (1) Plans and directs the Institute's programs which support research and research training through grants and contracts in periodontal and soft tissues diseases, craniofacial anomalies, pain control and

behavioral studies to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels; (4) collaborates with Institute and NIH intramural and collaborative activities and maintains awareness of national research efforts in program areas; (5) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (6) establishes and maintains effective relationships with dental schools, professional dental organizations, and other institutions concerned with extramural programs; (7) consults with voluntary health organizations and professional associations in identifying research needs and developing programs to meet them.

**Intramural Research Program (8P12).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses research efforts in caries, periodontal and soft tissues diseases, developmental biology, pain control and behavioral studies to insure maximum utilization of available resources in the attainment of Institute objectives; (2) evaluates research efforts and establishes program priorities; (3) allocates funds, space, and personnel ceilings and integrates new research activities into the program structure; (4) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; (5) provides advice on intramural research and science in general to the Institute Director.

**National Caries Program (8P13).** (1) Plans and directs the Institute's applied research and development activities directed toward the prevention of dental caries; assures maximum utilization of available resources to attain Institute objectives in this area; (2) determines program priorities and allocates funds for epidemiological and biometrical research, field trials, demonstrations, and related laboratory and clinical research; recommends funding levels for programs to be supported by grants; (3) collaborates with intramural, extramural and collaborative staffs to insure consistency of research efforts with Institute policies and goals; (4) maintains an awareness of national programs in area of prevention of dental caries and works toward application of research findings in dental public health and practice and in dental school curricula; (5) prepares analyses and reports to assist Institute staff and advisory groups in carrying out their responsibilities; (6) consults with voluntary health organizations and professional associations in identifying research needs and developing programs to meet them.

**National Institute of Environmental Health Sciences (8Q).** Conducts, fosters, and coordinates (in its own laboratories and through contracts, grants, and support of Environmental Health Sciences

Centers) research and research training on the biological effects of chemical, physical, and biological substances in the environment to: (1) develop understanding of the mechanism of action of such substances; (2) provide the scientific basis for evaluating their extent and severity on a national scale; (3) define and develop methods for diagnosis and treatment of environmentally induced illnesses; (4) collect and disseminate information in furtherance of program.

**Extramural Program (§Q12).** (1) Plans, directs, and evaluates the Institute's grant program which supports research and research training in environmental health; (2) develops program priorities and recommends funding levels to assure maximum utilization of available resources in attainment of Institute objectives; (3) through cooperative relationships within the NIH and with public and private institutions and organizations, maintains an awareness of national research efforts and assesses the need for research and research training in environmental health; (4) prepares reports for, and provides advice to the Institute Director, staff, and advisory groups to assist them in carrying out their responsibilities; (5) represents the Institute Director in the development and implementation of grant policy.

**National Institute of General Medical Sciences (§R).** Administers, fosters, and supports research in the basic medical and biological sciences and the clinical and related natural or behavioral sciences which have significance for two or more other Institutes, are outside the general area of responsibility of any other Institute, and will benefit by administration from a single point. Programs are carried out through: (1) Grants to scientific institutions and to individuals for biomedical research including broad multidisciplinary research programs and studies; (2) individual and institutional research training awards; (3) applied research and development utilizing the contract mechanism.

**National Institute of Neurological and Communicative Disorders and Stroke (§S).** Conducts, fosters, and supports research and research training on the causes, prevention, diagnosis, and treatment of neurological, sensory, communicative, and muscle disorders through: (1) Intramural, collaborative, and field research in its own laboratories, branches, and clinics and through contracts; (2) research grants to scientific institutions and to individuals; (3) individual and institutional research training awards to increase trained professional research manpower in neurological and communicative fields; and (4) cooperation with various agencies in collecting and disseminating educational and informational material related to neurological and communicative disorders.

**Intramural Research Program (§S11).** (1) Plans and conducts the Institute's laboratory and clinical research program, which encompasses neurological and communicative disorders and stroke, to insure maximum utilization of avail-

able resources in the attainment of Institute objectives; (2) evaluates research efforts and establishes program priorities; (3) allocates funds, space, and personnel ceilings and integrates new research activities into the program structure; (4) collaborates with other Institute and NIH programs and maintains an awareness of national research efforts in program areas; (5) provides advice to Institute Director and staff on intramural program and areas of science of interest to the Institute.

**Fundamental Neurosciences Program (§S13).** (1) Plans and directs a program of research grants, contracts, and individual and institutional research training awards, for fundamental neurosciences to insure maximum utilization of available resources to attain program objectives; (2) determines program priorities and recommends funding levels within program area; (3) prepares analyses of national research efforts and assists advisory groups in recommending new and/or continuing program emphases; (4) maintains surveillance over developments in designated areas and assesses need for research into the pertinent areas and for training related hereto; (5) develops and manages information systems, covering research developments and identifying areas where additional research efforts are required, for research scientists and other interested groups; (6) consults with outside scientific and professional organizations in identifying and meeting research requirements in fundamental neurosciences.

**Communicative Disorders Program (§S14).** (1) Plans and directs a program of grant and contract support for research and research training on communicative disorders to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) determines priorities and funding levels for research to be supported by contracts; (5) collaborates with intramural program in the Institute and NIH-wide and maintains an awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Neurological Disorders Program (§S15).** (1) Plans and directs a program of grant and contract support for research and research training on neurological disorders to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) determines pri-

orities and funding levels for research to be supported by contracts; (5) collaborates with intramural program in the Institute and NIH-wide and maintains an awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Stroke and Trauma Program (§S16).** (1) Plans and directs a program of grant and contract support for research and research training on stroke and trauma to insure maximum utilization of available resources in attainment of Institute objectives; (2) assesses need for research and research training in program areas; (3) determines program priorities and recommends funding levels for programs to be supported by grants; (4) determines priorities and funding levels for research to be supported by contracts; (5) collaborates with intramural program in the Institute and NIH-wide and maintains an awareness of national research efforts in program area; (6) prepares reports and analyses to assist Institute staff and advisory groups in carrying out their responsibilities; (7) consults with voluntary health organizations and with professional associations in identifying research needs and developing programs to meet them.

**Extramural Activities Program (§S17).** (1) Advises the Director on the Institute's extramural programs; (2) represents the Institute Director as required in extramural relationships; (3) coordinates program planning in the extramural area; (4) coordinates recommendations for funding levels for the categorical programs; (5) provides technical support activities, including technical merit review of grant and contract applications and proposals, and grants and contract management services; (6) has operational responsibility for the extramural data system.

**Clinical Center (§T).** (1) Provides patient facilities and services, other than physician care, for clinical investigations in the Clinical Center; (2) conducts research in clinical care, hospital administration, and related areas; (3) supervises residency and other training programs.

**John E. Fogarty International Center for Advanced Study in the Health Sciences (§U).** (1) Provides the facility for the assembly of scientists and leaders in the biomedical, behavioral, and related fields for discussion, study, and research in the health sciences at an international level; (2) conceives, designs, develops, and conducts studies on current and emerging health problems; (3) awards scholarships to outstanding individuals for the purpose of encouraging creative, speculative thought and contributions to advanced study; (4) awards fellowships for training in the United States and abroad; promotes international exchange of individuals for teaching, research, and study in the health related sciences; and

provides programming services for health professional training for international organizations; (5) collects, translates, publishes, and disseminates information concerning health related activities outside the United States; (6) furthers international cooperation and collaboration in the life sciences through its research programs, conferences, seminars, and publications; (7) provides research grants to individuals and scientific institutions; (8) coordinates NIH activities and functions concerned generally with the health sciences at an international level; (9) administers the NIH Special Foreign Currency Program; (10) provides central point for receiving, assisting, and/or programming foreign visitors to the National Institutes of Health and provides administrative support to the NIH visiting program.

**Division of Research Grants (§D).** (1) Provides staff support to the Office of the Director, NIH, in the formulation of grant and award policies and procedures; (2) provides central receipt of all PHS applications for research and research training support and makes initial referral to PHS components; (3) assigns NIH applications to supporting bureaus, Institutes, and divisions and to DRG initial review groups; (4) provides for scientific review of NIH research grants, National Research Service Awards, and research career development applications; (5) collects, stores, retrieves, analyzes, and evaluates management and program data needed in the administration of extramural programs; (6) reviews and analyzes the character and direction of research and training supported through NIH grants and the resources involved in providing such support; (7) administers the Grants Associates Program.

**Division of Research Services (§H).** (1) Plans and conducts a centralized program of scientific, engineering, and technical services in support of NIH activities; (2) collaborates with research scientists in providing support during the research planning stage, in carrying out the research project, and in the presentation of findings; (3) furnishes services and specialized assistance in the following areas: (a) biomedical engineering and instrumentation design and development; (b) research animal production, care, procurement, and animal disease identification and control; (c) centralized glassware, tissue culture, and media preparation and issuance; (d) biomedical library and translation services; (e) environmental health and safety; (f) medical arts and photography.

**Division of Computer Research and Technology (§W).** Plans and conducts an integrated computer research and service program in support of the NIH mission. In fulfilling this responsibility, the Division: (1) Provides professional programming and computational and automatic data processing capability to meet NIH program needs; (2) conducts theoretical and applied research in

mathematical statistics, mathematics, and other (physical and life) sciences; (3) provides resources for research, development, and consultation for the design and implementation of project-supporting computer systems; (4) provides scientific and administrative direction in the formulation of NIH-wide policies, standards, methods, and procedures on computation and automatic data processing activities; (5) participates in the analysis of requirements, design, and development of automatic data processing systems to make effective use of advanced techniques and equipment.

**Division of Research Resources (§X).** (1) Serves as the focal point within the National Institutes of Health for the development and support of multicategorical research resources needed on an institutional, regional, or national basis for health related research; (2) collaborates with the categorical Institutes in the identification of research resources needs, required by ongoing activities, and planned new directions relating to the overall NIH mission; (3) through research grants, individual and institutional research training awards, and research and development contracts to institutions involved in biomedical research, assures the availability of adequate tools, the necessary environment, and stability of funding for multicategorical research resources which provide support for the NIH's research mission. These awards provide: (a) support for specialized resources for multidisciplinary research programs of institutions conducting health related research; (b) general support for research and research training programs at universities and other institutions.

**Sec. 8.C Order of succession.** During the absence or disability of the Director, or in the event of a vacancy in that office, the first official listed below who is available shall act as Director, except during a planned absence for which different order has been specified:

- (1) (a) Deputy Director
- (b) Deputy Director for Science
- (2) For a planned period of absence the Director may specify a different order of succession.

**Sec. 8.D Delegations of authorities.** The Director shall continue to exercise all the authorities given him under the Redesignation of Authority by the Assistant Secretary for Health, dated June 18, 1973 (38 FR 18261), as may be amended, and Reorganization Order, dated September 25, 1973 (39 FR 27316), as may be amended, and those administrative authorities which NIH receives from the Assistant Secretary for Health and the Executive Officer, PHS.

Dated: May 19, 1975.

JOHN OTTINA,  
Assistant Secretary for Administration and Management.  
[FR Doc.75-13719 Filed 5-23-75; 8:45 am]

## DEPARTMENT OF TRANSPORTATION

### Federal Highway Administration

#### BRIDGE TOLLS ON BRIDGES OPERATED BY DELAWARE RIVER PORT AUTHORITY

#### Opinion and Order of the Federal Highway Administrator

MAY 19, 1975.

**Findings.** The Federal Highway Administrator, after consideration of the evidence in the record of this matter, and for the reasons hereafter stated finds that the existing toll schedule for crossing the Walt Whitman, Benjamin Franklin, Commodore Barry and Betsy Ross Bridges, when opened to traffic, operated by the Delaware River Port Authority, is not reasonable and just, and that the toll schedule set forth in Appendix A is just and reasonable. The rates of toll set forth in Appendix A to this Order shall become effective 12:01 a.m., August 1, 1975, and shall become the legal rates demanded and received for transit over all bridges operated by the Delaware River Port Authority, unless and until the Administrator orders otherwise.

**Authority.** The Delaware River Port Authority, pursuant to the interstate compact between Pennsylvania and New Jersey which Congress approved in Pub. L. 573, 82d Congress (66 Stat. 738),<sup>1</sup> has constructed and operates four bridges spanning the Delaware River between Philadelphia and New Jersey. These bridges are the Walt Whitman, Benjamin Franklin, Commodore Barry and Betsy Ross Bridges. (The latter has not yet been opened to traffic.) Section 3 of Pub. L. 573 provides that, while the Authority may charge tolls for crossing its bridges, the rates it charges are subject to the provisions of section 503 of the General Bridge Act of 1946.

Section 503 (33 U.S.C. 526) provides that if tolls are charged for transit over any interstate bridge, the tolls "shall be reasonable and just, and the Secretary of the Army may, at any, and from time to time, prescribe the reasonable rates of toll for such transit over such bridge, and the rates so prescribed shall be the legal rates and shall be the rates demanded and received for such transit." The power to prescribe reasonable rates for tolls on interstate bridges was transferred from the Secretary of the Army to the Secretary of Transportation by section 6(g)(4)(b) of the Department of Transportation Act, 80 Stat. 931, 941; 49 U.S.C. 1655(g)(4)(B), and the Secretary has delegated this power to the Federal Highway Administrator in § 1.48(1)(2) of the Department of Transportation Regulations (49 CFR 1.48(1)(2)). DRPA also

<sup>1</sup> A subsequent statute, Pub. L. 88-320 (78 Stat. 215 (1964)), approved amendments to the compact but did not make any relevant change in the terms and conditions of the basic Federal consent.

operates the Lindenwold high-speed rail commuter line (PATCO), and maintains a World Trade Division to promote the Port of Philadelphia.

**Background.** Since 1968, there have been three different schedules of tolls for transit of vehicles using the bridges operated by the DRPA. The reasonableness of these tolls have been the subject of three public hearings, three recommended decisions of Administrative Law Judges, and four opinions of the Federal Highway Administrator. A chronology of these hearings, decisions and opinions is attached as Appendix B.

This current proceeding is the result of an increase in toll charges, effective April 1, 1972, instituted by DRPA for the stated purpose of attaining additional revenue to complete the financing of a capital construction program and to operate and maintain those facilities. Immediately after the Port Authority announced that tolls would be increased, the Administrator received a large number of protests from members of the public and their representatives in Congress. Acting pursuant to the Federal Highway Administration's bridge toll procedural rules (49 CFR 310.14), the Administrator directed a formal hearing be held in Philadelphia for the purpose of permitting interested parties to submit evidence on the reasonableness and justness of the Port Authority's toll schedule. Subsequent to the hearing, the Administrative Law Judge, by decision of December 29, 1972, found that the rates of toll instituted by the Port Authority on April 1, 1972, were not reasonable and just, and recommended that the Federal Highway Administrator prescribe the pre-April 1972 toll schedule as the legal rates to be charged for transit of vehicles over the Walt Whitman and Benjamin Franklin Bridges (the only two bridges open to traffic at the time).

The Administrator, upon consideration of the initial decision, and the exceptions and replies, issued a tentative opinion on June 1, 1973, as supplemented on June 22, 1973, and held oral argument in Philadelphia on June 29, 1973, at which the principal parties and several individuals presented their views to the Administrator. Subsequently, after consideration of the evidence, arguments, and briefs, the Administrator in an opinion dated November 5, 1973, found that the toll schedule adopted by the Delaware River Port Authority was not reasonable and just and instituted a new schedule to become effective January 1, 1974 (Appendix C). On December 3, 1973, the Administrator denied DRPA's petition for reconsideration and a stay of the November 5, 1973, Order. The DRPA filed a complaint in the Federal Court for a permanent injunction and a stay of the November 5, 1973, Order pending litigation. On December 11, 1973, representatives of the Authority met in Washington, D.C., with

<sup>1</sup> This case, Delaware River Port Authority v. Tiemann, et al. (U.S.D.C. Ed Pa.) No. 73-2749, was dismissed by order of the Court, dated September 26, 1974.

the Federal Highway Administrator to discuss the impact of the impending energy crisis upon the operations of the Authority and to consider the adoption of a new schedule of tolls for use on its bridges in the light of the gasoline shortage and fuel crisis.

As a result thereof, the Administrator issued a new opinion on December 21, 1973, permitting the DRPA to put its new proposed toll schedule (Appendix D) into effect, "at least on an interim basis," leaving open the question whether the revenues produced would be excessive. The Administrator, recognizing that there were parties other than the Port Authority who had cognizable interests in the proceeding, reopened the administrative proceeding so that evidence bearing on the justness and reasonableness of the new toll schedule could be adduced.

It is this toll schedule (Appendix D) which is currently in effect and the one before the Administrator as to the reasonableness and justness thereof.

On April 23, 24, and 25, 1974, hearings were held in Philadelphia before the Honorable Edward V. Alfieri, Administrative Law Judge. The DRPA presented witnesses and documents in support of the reasonableness of the toll schedule. The Automobile Club of Southern New Jersey, Pennsylvania Motor Truck Association, U.S. Environmental Protection Agency, the City of Philadelphia, Keystone Automobile Club, the Motorists for Lower Tolls (a group of southern New Jersey motorists), and the Transport of New Jersey appeared in opposition to the toll schedule. The FHWA's Office of the Chief Counsel appeared as public counsel representing the public interest.

The Administrative Law Judge, in his recommended decision on October 16, 1974, found that the toll schedule prescribed in the Administrator's Order of December 21, 1973, which was effective January 1, 1974, was unjust and unreasonable (Appendix D), and that the toll schedule (Appendix C) prescribed in the Opinion of November 5, 1973, be the lawful tolls to be charged for the transit of vehicles over the bridges.

It is this recommended decision that is now before the Administrator. However, in considering this decision and the voluminous hearing record produced, it was found that all evidence concerning the financial structure of the Authority was based upon its General Bond Resolution of 1969, wherein it established a 1969 Refunding and Construction Program designed to refund in 1969 the Authority's then outstanding debt and to construct the following: The Commodore Barry Bridge, the Betsy Ross Bridge, the Rapid Transit System, a new centralized maintenance building, and new approaches to the Benjamin Franklin and the Walt Whitman Bridges. Various series of bonds have been issued under the 1969 Resolution in May 1969, July 1970, May 1972, and October 1972, creating precise revenue requirements for the service of the outstanding bonds as to principal and interest. Thus, the

hearings and opinions of 1972 through 1974 focused upon this plan of financing.

Subsequent to the hearings before Judge Alfieri in April 1974, the Authority on June 19, 1974, undertook another refunding program and authorized the issuance of \$27,270,000 series 1974 Special Revenue Refunding Bonds, maturing January 15, 1990, and \$20,545,000 series 1974 Special Obligation Refunding Bonds, maturing January 15, and July 15, 1975-1985. The net proceeds to the Authority of the sale of these bonds, plus other available funds, together with investment income thereon will be sufficient to pay (i) \$40,000,000 principal amount of outstanding Serial Bonds at maturity, (ii) interest on the Serial Bonds from July 15, 1974, to January 15, 1985, in the amount of \$15,022,038, and (iii) principal of and interest on the 1974 Special Obligation Bonds. The stated purpose of the refunding program was to restructure the Authority's debt with the objective of reducing the Authority's Bond Service requirements with respect to its Revenue Bonds during the years 1974 through 1984.

The 1974 Refunding Program was not a part of the Record at the April 1974 hearings before Judge Alfieri, although three refunding plans were discussed during the hearings. With respect to Plan II (74 Exhibits 126, 127), which Mr. R. Jones, bond advisor for the Authority testified was adopted at the regular monthly meeting of the Port Authority in April 1974 (74 TR., Vol. II, p. 107), Judge Alfieri stated in his October 16, 1974, Opinion at page 10, that the justification for the plan was "... to prevent a valley of coverage," i.e., below the mandatory 1.20 figure beginning in 1978 (Jones, Vol. III, p. 88, Exhibit 127). Continuing, the Judge said:

However sound and desirable this plan may be in its concept, it lacks the requisite degree of accuracy and basis in fact to justify its implementation. It is based on assumptions, verbally reported (Vol. III, p. 102), was compiled without the benefit of financial data, failed to take into consideration the upward trend of traffic, incorporated misleading information (Vol. III, p. 103) and erroneously included the sum of \$2,000,000 (Vol. III, p. 142). Lastly, it employed revenues projected in the bond prospectus in 1972, Exhibit 7, ignoring the fact that the revenues were running at a higher rate (Jones, Vol. II, p. 84) than projected. The record speaks for itself as to the reliability of this evidence.

The Administrator agrees with the Judge in rejecting the refunding plan for the reasons stated and for the more pertinent reason that it was at the time of presentation only a plan, a plan which had not been executed. In reviewing the recommended decision and the evidence, the Administrator was particularly concerned as to whether this refunding plan or any refunding plan had been executed. The point is pertinent in that any refunding plan adopted and put into effect which would alter the bond service requirements of the Authority would substantially be affected by the rate of tolls to be charged for crossing the bridges. Thus, upon inquiry, it was learned by the

Administrator that a refunding program was, in fact, undertaken in June 1974, as hereinbefore described, and the Administrator concluded that the precise nature of the refunding program should be reviewed before making a final determination of the reasonableness and justness of a toll schedule.

By Order of February 10, 1975, the Administrator took note of the fact of the issuance by the Authority of the \$47 million in refunding bonds and directed, for consideration of reopening of the record, that the Authority submit to the Administrator (1) the 1974 official statement of the Delaware River Port Authority authorizing the issuance of refunding bonds in 1974, (2) the financial statement of the Authority for calendar year 1974, (3) traffic counts for 1974, and the Authority's 1975 proposed budget. Upon receipt of the documents, they were submitted to other parties of record for comments, which were received and considered. By Order of March 26, 1975, the Administrator reopened the record in this proceeding for the inclusion of the following documents in evidence:

- (1) Exhibit 136—Official statement of the Delaware River Port Authority relating to the \$47,815,000 bond issue, dated June 15, 1974.
- (2) Exhibit 137—Financial statement of DRPA for calendar year 1974.
- (3) Exhibit 138—Traffic counts by toll classes of vehicles—revenue classes of vehicular traffic.
- (4) Exhibit 139—DRPA 1975 Capital and Operating Budget Report.

These exhibits play a major part in the decision rendered in this opinion.

**Discussion.** The record in this proceeding consists of the transcribed testimony and exhibits thereto of the April 23, 24, and 25, 1974, hearing in Philadelphia, and by stipulation at that hearing (74 Vol. I, pp. 12 and 13), all prior proceedings, testimony, and exhibits are incorporated by reference (meaning the 1972 hearing record), the transcript of oral argument before the Administrator on June 30, 1973, and subsequent exhibits 136, 137, 138 and 139 included by the Administrator in his Order of March 26, 1975. Included in the record also are all decisions, recommended decisions, tentative positions, orders and supplemental orders of the Federal Highway Administrator which have previously been issued in the matter. In all, the record consists of an impressive quantity of documents, testimony, and materials to be considered.

At the outset, the Administrator would like to restate some of the principles enunciated in his previous opinions which continue to be applicable in this decision.

In considering the proper meaning of reasonable and just as applied to a toll schedule, all parties to this proceeding agree that DRPA's revenues should be sufficient to achieve a return sufficient to support its total activities, including the operation of the bridges, the PATCO rapid transit system, and the World Trade Division, and provide sufficient coverage for financings. Thus, a reasonable and just toll

schedule would be one sufficient to support these activities and requirements. The DRPA has covenanted, through bond indentures agreements, with its bondholders to collect tolls, fares and other charges for transit over the bridges it operates and on PATCO sufficient to provide revenues to pay all the expenses of operating, repairing, and maintaining its facilities and to provide net revenues available in each year equal to at least 120 percent (also expressed as 1.2 coverage) of the aggregate bond service for that year. (Ex. 136, p. 31.) This does not apply to the Special Revenue Bonds issued in 1974, which requires a coverage of only 1.0 (p. 39, Ex. 136). DRPA may reduce tolls or fares if in the preceding calendar year a coverage of at least 1.6 has been achieved, or if in each of the two preceding years a coverage of at least 1.4 has been achieved. DRPA has obligated itself to raise tolls and fares to ensure at least a 1.2 coverage if coverage for any year is less than that amount, or if it appears that coverage for the ensuing years will not meet that figure. (See 1972 Ex. 7 and 1974 Ex. 136.)

The Administrator's findings in the tentative opinion of June 1, 1973, with regard to burden of proof is hereby reaffirmed. The burden of proof in a case such as this in which an existing toll structure is the subject of complaint, clearly lies with the complainants. However, regardless of where the burden of proof lies, it has been usually required in cases decided by the Interstate Commerce Commission that the party which proposed or maintained the rates in issue go forward initially with the proof. In the case now under consideration, DRPA went forward initially with the proof, and complainants met their burden by way of cross-examination on this proof.

The Administrator has carefully considered the record in this matter, including the briefs and arguments filed by the parties. The Administrator respectfully rejects the Law Judge's October 16, 1974, decision which recommended a reinstitution of the pre-April 1972 tolls, not because it is basically incorrect, but principally because the Judge did not have before him an up-to-date record of the financial structure of the Port Authority, i.e., the June 1974 Refunding Program of the DRPA. In addition, the Administrator's opinions of November 5, 1973, and December 21, 1973, insofar they relate to the setting of a toll schedule, is hereby rescinded.

While this proceeding has been exceedingly long timewise, and this opinion has appeared to have suffered undue delay in issuing, the passage of time has enabled the Administrator to benefit from a review of the operations of the Authority under the current toll schedule, in light of the requirements of the 1974 Refunding Program.

The April 1, 1972, toll increase was adopted by DRPA to prevent its bond coverage from dropping below the 1.2 base. DRPA in forecasting its revenue needs, projected estimates on a 15-year basis in its 1969 Refunding Program and

DRPA was permitted to maintain substantial toll increases in 1968.<sup>2</sup> Again, in the 1974 Refunding Program, the revenue needs were projected on a 12-year basis. Recognizing that the Authority, in order to market its bonds, must have such long-term projections, complete reliance upon such projections for toll setting purposes is not necessary, nor is it wise in face of changing conditions such as failure to open new bridges, failure to issue authorized bonds, or reduction in traffic due to gasoline shortage. The Administrator favors a shorter projection as herein adopted of a 4-year projection, 1975 through 1978.

The Administrator's Order of December 21, 1973, permitted DRPA to institute a new toll schedule designed to cope with the severe gasoline shortage which existed in the Nation at that time because of the Middle East Oil Embargo. It contained the innovative feature of allowing reduced rates for cars carrying three or more persons. The April 1974 hearings were directed to be held because of this serious change in circumstances since the 1972 hearings. However, at the time of the 1974 hearings the Oil Embargo had been lifted and the evidence adduced therein was to the effect that no gasoline shortage existed in the area of the Philadelphia bridges. Thus, the Law Judge, on the bare face of the record, was probably correct in finding that "Although there is a national energy crisis the easing of the gasoline shortage which precipitated the creation of a new toll schedule effectively militates against a finding that the schedule of tolls is just and reasonable."

With the President and Congress struggling to establish a national energy policy, the Administrator must recognize that a national energy crisis does exist. Reduction of our vulnerability to foreign oil supplies and establishment of national self-sufficiency are very real goals which this country must achieve in the coming years. Accomplishment of these goals will require concerted efforts in many areas, such as an increase in domestic production of oil, development of synthetic or new kinds of energy-producing fuels, and, not the least of which is the conservation of existing fuel. The motor vehicle is a major user of petroleum supplies on the highways because our Nation has become dependent, to a large extent, on the mobility afforded by automobiles, buses, and trucks. This dependency will probably continue in our society for as far into the future as we can now foresee. However, ways must be found to manage the use of the motor vehicles better than we have in the past. It will be necessary to get low occupancy cars off the highways and to observe the national 55 m.p.h. speed limit. Unnecessary automobile trips must be eliminated.

These facts are not in the record of this proceeding, but such facts are com-

<sup>2</sup> Report and recommended Order of Hearing Examiner, served August 1, 1968, and Opinion of the Administrator issued September 11, 1968.

mon knowledge, of which the Administrator can take "administrative notice" in considering the decision to be reached in this matter. It is the Administrator's judgment that within the definition of reasonable and just tolls, the criteria of national interest and public policy must, at this time, also be inserted. The national interest and public policy in this case being the conservation of fuel. This criteria makes more complex the issue of determining what is a reasonable and just toll schedule to be permitted for crossing these bridges, in that the permitting of high tolls in order to discourage vehicle traffic would have the effect of allowing the Port Authority to receive a large amount of revenue which is not needed for financing of their operations, and substantially beyond the covenanted bond service requirements.

For example, Appendix E presents DRPA's net operating revenue available for bond service for 1974 (actual), calculated from the statement of Revenue and Expenses for 1974. (Ex. 137.) The appendix shows that in 1974, the net revenue available for bond service amounted to \$25,873,245, as compared with the \$22,140,000 estimate appearing on page 23 of the 1974 Refunding Program Statement (Ex. 136). The statement of revenues, expenses and equity (Ex. 137) shows that the bond service on outstanding revenue bonds for 1974 was \$17,975,433. Thus, for 1974, under the toll schedule now in effect, the bond service coverage enjoyed by the Authority amounted to 1.44, substantially above the required 1.20 of the bond covenant. The difference between the actual and estimated net revenue is explained on page 22 of Ex. 136, wherein the transportation consultants reduced their estimate by a "reduction allowance" of \$4,488,000 because of the energy crisis. Elimination of the "reduction allowance" would have given the Authority bond coverage of 1.49 under the present schedule of tolls.

Therefore, the Administrator is faced with the dilemma of devising a toll schedule which would prevent the Authority from an excessive revenue return, and at the same time, conserve gasoline by reducing traffic. A low passenger car rate would encourage the use of more automobiles, and a high rate would unnecessarily benefit the Authority. A balance between the two must be accomplished. An effective means of reducing traffic and conserving gasoline is to encourage the use of mass transit and carpools. A small step in encouraging carpools was made in the December 21, 1973, Order which instituted a carpool commutation rate at 25 cents per crossing. As can be seen from Ex. 138, traffic count by classes of vehicles, this was ineffectual in reduction of traffic. Only 577,543 carpool tickets were sold, as compared with tolls paid on 48,226,183 other passenger car vehicles and light trucks. Of this, 13,150,844 were commuter tolls, of which some portion might conceivably go into carpools. There are means available, both program-wise and

financial, to promote carpooling. The Department of Transportation of the Federal Government has been vigorously pushing a major carpool promotion campaign. Federal funds are available for areawide carpool campaigns. It would be commendable if the Authority, the City of Philadelphia, and the States of Pennsylvania and New Jersey could unite to formulate a vigorous carpool campaign in this area.

The use of the PATCO rapid rail transit line was encouraged in a decision by the Interstate Commerce Commission on February 3, 1975, which denied a fare increase on this line to the Port Authority. (I.C.C. Investigation and Suspension Docket No. 8705, 349 I.C.C. 160). The Commission concluded that the proposed fare increase might cause a long-term diversion of riders to alternative modes of transport (including automobiles) thus increasing congestion on the area's already overcrowded roads.

**Conclusion.** The Administrator, in an effort to balance off the opposing points of view, i.e., higher tolls, unneeded revenue, and traffic reduction against lower tolls, less revenue and an increase in traffic, is putting into effect, the toll schedule as set out in Appendix A. The main feature of this schedule is a substantial reduction in the carpool commuter rate from \$10.00 for 40 tickets (25 cents per crossing) to \$4.00 for the book of 40 tickets (10 cents per crossing). This rate should have the effect of attracting some one-passenger car commuters to a carpool. Also in order to possibly forego a fare increase on buses using the bridges, the rate for two axle buses is reduced from \$1.00 to 80 cents, and three axle buses from \$1.50 to \$1.20. Other changes in the schedule are, while the commuter rate 30-day decal remains \$12.00, the cash toll per crossing is reduced from 10 cents to 5 cents, and the passenger car and trucks up to 7,000 gross weight rate is reduced from 60 cents to 55 cents.

The latter two reductions are for the purposes of reducing to some extent the amount of revenue received by the Authority which the Administrator feels is necessary. The reductions are not of sufficient amount so as to encourage automobile traffic.

The toll schedule set forth in Appendix A provides more than adequate bond service coverage for several years to come. Appendix F sets forth the estimated debt service coverage under this toll schedule for the years 1975 through 1978. It allows a coverage of a high of 1.38 in 1975 to 1.27 in 1978, well above the bond covenant requirement of 1.20. Ap-

\*One of the protestants to the fare increase in the I.C.C. case was the City of Philadelphia, who is a protestant in this case, opposing a higher toll rate. In the I.C.C. case, the city argued that the PATCO increase would encourage automobile usage, thereby contributing to the environmental degradation of the area. It would appear to the Administrator that lower tolls on the bridges, which the city advocates in this case, would do the same. In short, the city's positions in the two cases are diametrically opposite.

pendix G contains the calculation of applicable tolls to achieve specified bond coverage for the years 1975 and 1976. Appendix H contains the traffic projections on the bridges for 1975 through 1978, on which Appendix F is based.

Considerable testimony was generated during the hearings dealing with the expenses and projected revenues of DRPA. Much effort was expended by the protestants to the toll increase to show that projected operating and administrative expenses set forth by the Authority was unrealistic and constitutes a burden on the tollpayer and that the traffic and revenue projections were underestimated in order to represent to the Administrator low bond service coverage. While such effort is commendable, the sufficiency of such evidence is, while impressive, not persuasive for the Administrator to substitute his judgment for that of the Commission in the operation of the DRPA. This is not to say that the Administrator will never look behind the expenses and budgets presented by a toll authority, but to say that in this particular case, the stated expenses and the projected revenue of the Authority is not so grossly incorrect as to require a detailed appraisal of all items. Hence, at this time, as will be seen from the relevant appendices, the Administrator has taken the statements in the Authority's documents as the basis for calculating bond service coverage under the directed toll schedule.

The Administrator finds that the toll schedule as set forth in the Order of December 21, 1975, is not reasonable and just; that the toll schedule set forth in Appendix A is just and reasonable; that the December 21, 1975, toll schedule is ordered cancelled effective 12:01 a.m., August 1, 1975; that the rates of tolls set forth in Appendix A to this Order shall become effective 12:01 a.m., August 1, 1975, and shall be the legal rates demanded and received for transit over all bridges operated by the Delaware River Port Authority, unless and until the Administrator orders otherwise.

Within 20 days after the date of service of this Order, any party may petition the Administrator for reconsideration of this Order. The filing of a petition for reconsideration does not stay the effectiveness of this Order, unless the Administrator so orders.

Issued in Washington, D.C., this 19th day of May 1975.

NORBERT T. TIEMANN,  
Federal Highway Administrator.

#### APPENDIX A

##### RATES ESTABLISHED BY THIS ORDER

<b>Classification:</b>	
Passenger automobile and trucks to and including 7,000 lbs gross weight	\$0.55
Passenger automobile and 1-axle trailer (each additional trailer axle \$0.30)	.85
Motorcycle	.35
Buses:	
2 axles	.80
3 axles	1.20

#### Classification:

Trucks, 2 or more axles, 7,001 lbs or more gross weight, per axle	.75
Commutation rate for passenger automobiles, and 2 axle trucks up to and including 7,000 lbs gross weight—decal valid for 30 days after the date of purchase	12.00
Plus cash toll per crossing	.05
Carpools commutation rate for registered passenger automobiles only, occupied by 3 or more persons (including driver), accepted at all times—transferable book of 40 tickets valid until the end of the calendar month following the month in which purchased	4.00
Special permits (noncommercial motor vehicles, 60,001 pounds gross weight and upward, commercial vehicles operating under official permit) \$10 permit fee plus a \$1.50 fee for the first 40,000 lbs and \$0.25 for each 2,000 lbs or fraction thereof in excess of 40,000 lbs.	

#### Bus and truck toll scrip (twenty-five crossings)

Denomination	Value	Price
\$1.50	\$25.00	\$22.50
1.50	37.50	33.75
2.25	50.25	50.62
3.00	75.00	67.50
3.75	93.75	84.37
4.50	112.50	101.25

#### Definitions and Restriction:

Decals non-transferable, and affixed to left side of vehicle.  
Commutation decal valid only in Exact-Change Automatic Toll Lanes and not valid in manned lanes.  
Carpool commutation ticket accepted in manned lanes only and not valid in automatic toll lanes.  
Tickets detached from the ticket book will not be honored for passage. Unused tickets will not be redeemable or refundable.  
Bus and Truck Toll Scrip shall be good and valid until used. Toll scrip in excess of the required toll may be tendered in payment; however, no refund of the excess shall be made. Toll scrip in denominations of less than the fare and the balance in cash may be tendered in payment of the fare. Toll scrip may not be used to purchase other reduced rate fares. Toll scrip may be purchased by mail or in person at the toll accounting offices located in the Administration Buildings for each of the bridges.  
Toll scrip will not be accepted in payment of a Special Permit.

#### APPENDIX B

##### CHRONOLOGY OF HEARINGS AND OPINIONS REGARDING THE BENJAMIN FRANKLIN AND WALT WHITMAN BRIDGES IN PHILADELPHIA

Feb. 1, 1968, DRPA increased toll rates.  
May 29, 1968, Federal Highway Administrator directed Hearings on the matter.  
June 25, 26, 27, and 28, July 1 and 2, 1968, Hearings were held before Hearing Examiner.  
Aug. 1, 1968, Report and Recommended Order of Hearing Examiner.  
Sept. 11, 1968, Opinion of the Administrator.  
Apr. 1, 1972, DRPA increased toll schedules of bridges.  
Aug. 10, 1972, Administrator ordered formal hearings before Administrative Law Judge.  
Sept. 8, 1972, Pretrial Conference.  
Sept. 28-Oct. 7, 1972, Formal hearings before Administrative Law Judge.

#### NOTICES

Dec. 29, 1972, Administrative Law Judge issued recommended decision that April 1972 tolls were not just and reasonable and that tolls prior thereto be reinstated.

June 1, 1973, Administrator, after considering DRPA's exceptions, issued "tentative opinion" that April 1972 toll schedule was "neither just nor reasonable."

June 22, 1973, Supplement to June 1, 1973, opinion.

June 30, 1973, Oral argument held before the Administrator.

Nov. 5, 1973, Administrator issued his opinion and Order where he adopted his ruling that April 1, 1972, tolls were neither just nor reasonable.

Dec. 3, 1973, Administrator denied DRPA's petition for reconsideration and stay of the November 5, 1973, Order.

Dec. 10, 1973, DRPA filed a complaint in Federal Court for a permanent injunction and a stay of the Nov. 5, 1973, Order pending litigation. Suit subsequently dismissed (Case dismissed September 1974).

Dec. 11, 1973, Representatives of the Authority met in Washington with the Administrator to discuss impact of impending energy crisis on Authority's operations and to consider the adoption of a new schedule of tolls.

Dec. 21, 1973, Administrator's Order and decision permitting DRPA to put its new proposed schedule into effect, "at least on an interim basis and reopened the proceeding so evidence bearing on the justness and reasonableness of the new toll schedule can be adduced. It is this toll schedule that is under consideration (Appendix A)."

Apr. 23-25, 1974, Hearings were held before Administrative Law Judge Alfieri.

Oct. 16, 1974, Recommended decision of the Administrative Law Judge that the toll schedule prescribed in the Administrator's Order of Nov. 5, 1973 (Schedule H) be the tolls to be charged on the bridges.

Feb. 10, 1975, Administrator's Order directing submission of additional information for consideration.

Mar. 26, 1975, Administrator's Order specifying certain documents be incorporated in the record.

Since 1968, there have been three hearings before Law Judges, three recommended decisions of Law Judges, and four decisions by the Administrator.

#### APPENDIX C

##### RATES OF TOLL PRESCRIBED IN THE NOVEMBER 5, 1973, ORDER OF THE ADMINISTRATOR (Stayed by December 21, 1973, Order)

<b>Passenger cars and light trucks:</b>	
Cash	\$0.50
Commuter 40-trip <sup>1</sup>	.35
Trucks (per axle) <sup>2</sup>	.75
Motorcycles	.50
<b>Automobile and trailer:</b>	
1-axle trailer	.90
2-axle trailer	1.20
Buses (per axle)	.50
Special permits <sup>3</sup>	

#### APPENDIX D

##### RATES OF TOLLS PRESCRIBED IN THE DECEMBER 21, 1973, ORDER (Currently in Effect)

<sup>1</sup> Subject to conditions and restrictions imposed as of Aug. 31, 1973.

<sup>2</sup> A 10 percent scrip discount will be offered.

<sup>3</sup> Charges will be those in effect Aug. 31, 1973.

#### Classification:

Passenger automobile and trucks to and including 7,000 lbs gross weight	\$0.60
Passenger automobile and 1-axle trailer (each additional trailer axle \$0.30)	.90
Motorcycle	.35
Buses:	
2 axles	1.00
3 axles	1.50

#### National Highway Traffic Safety Administration NATIONAL MOTOR VEHICLE SAFETY ADVISORY COUNCIL Notice of Public Meeting

On June 10, 1975 the National Motor Vehicle Safety Advisory Council will hold open meetings in the DOT Headquarters Building, 400 Seventh Street SW., Washington, D.C. The Advisory Council is composed of 25 members, a majority of whom are representatives of the general public, including representatives of State and local governments, with the remainder including representatives of motor vehicle manufacturers, motor vehicle equipment manufacturers, and motor vehicle dealers. The Advisory Council makes recommendations to the Secretary of Transportation on motor vehicle safety and property loss reduction programs carried out by the National Highway Traffic Safety Administration.

The following meetings are subject to the approval of the National Highway Traffic Safety Administrator.

On June 10 at 1:00 p.m. in room 2232 of the DOT Headquarters Building the Congress Committee will meet with the following agenda:

To review plans for the upcoming Fourth International Congress on Automotive Safety.

On June 10 at 2:00 p.m. in room 2232 of the DOT Headquarters Building the Awards Committee will meet with the following agenda:

To review candidates nominated for the Council's annual Excellence Award.

For further information contact the NHTSA Executive Secretary, Room 5212, 400 Seventh Street, SW., Washington, D.C., telephone 202-426-2872.

This notice is given pursuant to section 10(a) (2) of Pub. L. 92-463, Federal Advisory Committee Act (FACA), effective January 5, 1973.

Issued: May 20, 1975.

JOHN F. MAGEE,  
Acting Executive Secretary.

[FR Doc. 75-13073 Filed 5-23-75; 8:45 am]

#### CIVIL AERONAUTICS BOARD

[Order 75-5-82; Docket No. 27570]

#### TEXAS INTERNATIONAL AIRLINES, INC. Order To Show Cause and Granting Temporary Suspension Regarding Certificate of Public Convenience and Necessity

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 21st day of May, 1975.

By application filed March 3, 1975, Texas International Airlines (TXI) requests the Board to issue an order requiring all interested persons to show cause why its certificate of public convenience and necessity for route 82 should not be amended so as to delete Pine Bluff, Arkansas, therefrom.

The City of Pine Bluff submitted a letter stating it is not opposed to the application.<sup>1</sup> No answer has been filed in opposition to the deletion request.

Upon consideration of the pleadings and all the relevant facts, we have decided to issue an order to show cause proposing to amend TXI's certificate as requested. In addition, we will grant TXI authority to suspend service temporarily at Pine Bluff pendente lite. Accordingly, we tentatively find and conclude that the public convenience and necessity require the amendment of TXI's certificate of public convenience and necessity for route 82 so as to delete Pine Bluff therefrom.<sup>2</sup>

In support of our ultimate conclusion, we make the following tentative findings and conclusions. TXI's service at Pine Bluff has been characterized by minimal traffic, has produced financial losses for the carrier in recent years, and is not likely to become economically sound in

<sup>1</sup> Pine Bluff forwarded its letter on April 17, 1975, expressing its position and suggestions in this matter. While not submitted within the precise deadline prescribed by the Board's rules of practice and procedure § 302.6, we have considered its contents in reaching our decision herein. Since the position of the City is essentially in accord with that of the applicant, we have concluded that no party will be harmed by such consideration.

<sup>2</sup> We also tentatively find and conclude that TXI is fit, willing and able properly to perform the air transportation authorized by the certificate proposed to be issued herein and to conform to the provisions of the Act and the Board's rules, regulations and requirements thereunder.

the future. Texas International has served Pine Bluff since 1953. Service has generally consisted of two round trips per day on a routing between Memphis and Dallas. Clearly the most important market for Pine Bluff has been Memphis, and TXI has consistently provided non-stop service between the two cities.<sup>3</sup> However, in recent years passenger boardings at Pine Bluff have steadily declined notwithstanding experimental increases in frequencies. According to the applicant, the average number of enplaned passengers per day has dropped from 15.2 in 1969 to 9.2 in 1974. This represents a present average of 2.7 passengers per departure.

These passengers will not be unduly inconvenienced by the proposed deletion.<sup>4</sup> Pine Bluff travelers will continue to have ready access to the nation's air transport system at Little Rock. Located only 46 miles and one hour's driving time away, Little Rock offers direct service by five different carriers to 25 cities, whereas TXI is the sole carrier serving Pine Bluff with single-plane prop service to only six cities.<sup>5</sup> There are 12 daily nonstop flights between Little Rock and Memphis spaced conveniently throughout the day; nine of these utilize jet equipment.<sup>6</sup> Public bus transportation between Pine Bluff and Little Rock consists of nine round trips daily between the two cities. Round-trip fare is \$6.00. In fact, the proximity of superior air services at Little Rock appears to be the primary factor in the recent decline of Pine Bluff traffic.<sup>7</sup>

We further tentatively conclude that in view of the limited public benefits, the increasing cost of providing service to Pine Bluff is not justified. TXI submitted exhibits indicating that it incurred a subsidy need of \$78,788 in serving Pine Bluff in the year ended September 30, 1974.<sup>8</sup> Consequently, a significant reduction in TXI's subsidy need would occur as a result of the deletion.<sup>9</sup>

Finally, we tentatively find that the public will not be totally without air services at Pine Bluff. To supplement the air transportation available at Little Rock, the City of Pine Bluff has indicated that

<sup>1</sup> According to the applicant's statistics over 70 percent of Pine Bluff's on-line O&D passengers in the 12 months ended September 30, 1974, traveled between Pine Bluff and Memphis.

<sup>2</sup> Compare with local service deletion findings in Orders 74-7-133, July 29, 1974; 75-2-103, February 26, 1975; and 75-3-105, March 27, 1975.

<sup>3</sup> TXI offers the following daily services from Pine Bluff: one nonstop to El Dorado/Camden, Arkansas; one nonstop to Hot Springs, Arkansas; two nonstops to Memphis, Tennessee; two nonstops to Jonesboro, Arkansas; one one-stop to Texarkana, Arkansas; one one-stop to Monroe, Louisiana; and one two-stop and one three-stop to Dallas-Ft. Worth, OAG, May 1, 1975.

<sup>4</sup> OAG, May 1, 1975.  
<sup>5</sup> In contrast to Little Rock, the quality of service at Pine Bluff is further limited by the airport's inability to accommodate jet aircraft.

it can obtain the services of a local commuter carrier as soon as there is a guarantee of no certificated competition in this small market. Accordingly, it has requested the Board to immediately suspend TXI's authority at Pine Bluff, pendente lite, in order to facilitate a prompt commitment by the commuter carrier. This is a reasonable request, and we will therefore authorize the requested suspension.<sup>10</sup>

Interested person will be given thirty days following the date of adoption of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to support their objections, if any, with detailed answers, specifically setting forth the tentative findings and conclusions to which objection is taken. Such objections should be accompanied by arguments of fact or law and should be supported by legal precedent or detailed economic analysis. If any evidentiary hearing is requested, the objector should state in detail why such a hearing is considered necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein, and amending the certificate of public convenience and necessity of Texas International Airlines for route 82 so as to delete Pine Bluff, Arkansas, therefrom;

2. Any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions, or certificate amendments set forth herein shall, within 30 days after the date of adoption of this order, file with the Board and serve upon all persons listed in paragraph 6 a statement of objections together with a summary of testimony, statistical data, and other evidence expected to be relied upon to support the stated objections;<sup>11</sup>

<sup>10</sup> We need not here detail TXI's figures in order to set out the precise reduction in subsidy need likely to result from the action we propose herein. However, we have studied the figures and found them to be generally reasonable. An appropriate ad hoc adjustment to the local service class rate (Class Rate VII as it applies to Texas International) of \$108,486 will be made in a separate order.

<sup>11</sup> As an additional benefit, the other communities along the Memphis-Dallas route of TXI would receive upgraded service if Pine Bluff is deleted. First nonstop service between El Dorado and Memphis would be instituted as would additional nonstop service between Hot Springs and Memphis.

<sup>12</sup> Our action does not result in a major Federal action significantly affecting the quality of the environment within the meaning of the National Environmental Policy Act of 1969. It is likely that our decision will result in some increase in surface traffic as well as the introduction of commuter air

3. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth herein;

5. Texas International Airlines be and it hereby is authorized to suspend service at Pine Bluff, Arkansas until 60 days after final decision on its deletion application in this Docket 27570;

6. A copy of this order shall be served upon Texas International Airlines; Governor, State of Arkansas; Mayor, City of Pine Bluff; Airport Manager, Grider Field; and the Postmaster General; and

7. The authority granted in paragraph 5 above may be amended or revoked at any time at the discretion of the Board without hearing.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

[FR Doc. 75-13724 Filed 5-23-75; 8:45 am]

[Order 75-5-81; Docket No. 27806]

#### TRANS WORLD AIRLINES, INC.

#### Order Regarding Nonacceptance of Restricted Articles on Cargo Aircraft

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 21st day of May, 1975.

By tariff revisions<sup>1</sup> issued April 23 and marked to become effective May 23, 1975, Trans World Airlines, Inc. (TWA) proposes to establish a provision refusing to accept on cargo aircraft all articles shown as not acceptable on passenger-carrying aircraft in the carrier's tariff.

In support of its proposal, TWA asserts, inter alia, that recent incidents involving hazardous materials in air transportation have caused it to evaluate its current practices of handling such materials from a safety aspect; that while there are no passengers on cargo aircraft, the flight crews and ground crews must be considered, along with the potential harm to carrier equipment; and that, consequently, the same reasons that lead to nonacceptance of certain articles on

service. However, in view of the low level of daily enplanements at Pine Bluff, it is doubtful that such increases will be significant, especially when placed against the beneficial environmental effects of the elimination of TXI's current operations at Pine Bluff.

<sup>12</sup> All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further such motions, requests, or petitions for reconsideration of this order will be entertained.

<sup>13</sup> Revisions to Airline Tariff Publishing Company, Agent, Tariff C.A.B. No. 82.

passenger aircraft equally apply to cargo aircraft.

A complaint has been filed by the Council for Safe Transportation of Hazardous Articles (COSTHA).<sup>1</sup> The complainant requests that the proposal be rejected, or in the alternative, suspended and investigated. COSTHA alleges, inter alia, that the proposal is in direct contravention of TWA's common-carrier responsibility; that this proposal concerns questions of safety, and the Board has recognized that the Federal Aviation Administration (FAA) has the necessary expertise and sole responsibility to prescribe regulations providing for safe transportation of hazardous materials by air; that FAA having thus preempted this area of regulation, no basis remains to conclude that carriers are free to pick and choose their traffic; and that since the proposal results, for certain articles, in a complete refusal to carry, the adequacy of alternative service, the justification offered, and the economic burden upon shippers should all be examined.

As the Board has previously concluded (see Order 75-4-75, and Order 75-2-127), it has accepted in principle the primary responsibility of the Department of Transportation (DOT)/Federal Aviation Administration for regulations on the transportation of hazardous materials by air.<sup>2</sup> TWA's proposal to refuse all restricted articles for cargo aircraft transportation if those articles are precluded from carriage aboard passenger aircraft would be more restrictive than current FAA Regulations, as well as rules currently proposed by FAA,<sup>3</sup> and, consequently, we will reject the filing.

The United States Court of Appeals for the Second Circuit, by an action dated March 25, 1975, in *Air Line Pilots Association Int'l v. Civil Aeronautics Board*, No. 75-4049, granted a motion filed by ALPA for a stay of Board Order 75-2-127 to preserve the status quo, pending its appeal.<sup>4</sup> In these circumstances and consistent with the Court's action, the Board will stay the effective-

ness of its order, pending determination by the Court of the issues before it. We believe that the issues herein and those before the Court in Case No. 75-4049 are sufficiently similar to warrant a stay in the effectiveness of this order.

This order will nevertheless be issued, served upon all parties, and published in the FEDERAL REGISTER to apprise all interested persons of the Board's opinions and decisions upon the issues now before it, subject, however, to the aforesaid provisions for a stay.

Accordingly, pursuant to the provisions of the Federal Aviation Act of 1958, and particularly sections 204(a), 401, 403, 404, and 1002 thereof,

It is ordered, That:

1. Subject to the conditions and provisions set forth in ordering paragraph 3 herein, 21st Revised Page 23 of C.A.B. No. 82, issued by Airline Tariff Publishing Company, Agent, be and hereby is rejected;

2. Except to the extent granted herein, the complaint filed by the Council for Safe Transportation of Hazardous Articles in Docket 27806 is dismissed;

3. The effective date of the Board's order as set forth in ordering paragraphs 1 and 2 herein is hereby stayed, pending determination by the United States Court of Appeals for the Second Circuit of the issues now before it in *Air Line Pilots Association Int'l v. Civil Aeronautics Board*, No. 75-4049, and further orders of the Board consistent therewith; and

4. Copies of this order shall be served upon Trans World Airlines, Inc., and the Council for Safe Transportation of Hazardous Articles.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,  
Secretary.

#### DEFENSE MANPOWER COMMISSION MEETING

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the Commissioners of the Defense Manpower Commission will meet on June 13, 1975 at 1:30 p.m. and on June 20, 1975 at 1:30 p.m. in the New Executive Office Building, Room 3010, 726 Jackson Place, NW, Washington, D.C. 20036.

The purpose of the June 13th meeting will be to conduct an in-progress review of issues in the Management Functional Area and such other business as may be presented by the members.

The purpose of the June 20th meeting will be to conduct an in-progress review of issues in the Compensation Functional Area and such other business as may be presented by the members.

The meetings will be open to the public. Interested persons wishing to attend should telephone (202) 254-7803 before

close of business June 11, 1975 for the June 13th meeting and before close of business June 18, 1975 for the June 20th meeting.

Dated: May 19, 1975.

BRUCE PALMER, Jr.,  
General, USA (Ret.),  
Executive Director.

#### ENVIRONMENTAL PROTECTION AGENCY

[OPP-33000/255; FRL 378-1]

#### NOTICE OF RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency Room EB-31, East Tower, 401 M Street SW., Washington, D.C. 20460.

On or before July 28, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alter-

natives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 28, 1975.

Dated: May 16, 1975.

JOHN B. RICH, Jr.,  
Director, Registration Division.

#### APPLICATIONS RECEIVED

EPA File Symbol 9403-RN. Alken Murray Corp., 111 5th Ave., New York NY 10003. ALKEN V-7. Active Ingredients: Disodium cyanodithiolimidocarbonate 3.68%; Potassium N-methylthiocarbamate 5.07%. Method of Support: Application proceeds under 2(b) of interim policy. PM22.

EPA File Symbol 8517-RG. American Machinery Corp., PO Box 3228, Orlando FL 32802. AMERICAN MACHINERY DOW-CIDE SOAP. Active Ingredients: Sodium Ortho-phenylphenate 18.9%. Method of Support: Application proceeds under 2(c) of interim policy. PM32.

EPA Reg. No. 5481-122. AMVAC Chemical Corp., 4100 E. Washington Blvd., Los Angeles CA 90023. DUSTING SULFUR 98. Active Ingredients: Sulfur 98.0%. Method of Support: Application proceeds under 2(c) of interim policy. Republished: Added use. PM22.

EPA File Symbol 3735-EL. Arlenge Lab., 175 Pearl St., Brooklyn NY 11201. ARLENGE BITE ME NOT INSECT REPELLENT. Active Ingredients: N, N-diethyl-methylamide 12.75%; other isomers 2.25%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 3735-EO. Arlenge Lab. ARLENGE X-34. Active Ingredients: Pyrethrins 0.3%; Technical Piperonyl Butoxide 1.2%; Cyclohexanone 5.0%; Petroleum Distillate 5.3%; Mineral Oil 2.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM17.

EPA File Symbol 4331-L. Arol Chem. Prod. Co., 849 Ferry St., Newark NJ 07105. ARO-CIDE B. Active Ingredients: Disodium cyanodithiolimidocarbonate 3.68%; Potassium N-methylthiocarbamate 5.07%. Method of Support: Application proceeds under 2(b) of interim policy. PM22.

EPA File Symbol 4331-U. Arol Chem. Prod. Co. ARO-CIDE A. Active Ingredients: Poly[oxyethylene(dimethyliminio)ethylene(dimethyliminio)ethylene dichloride] 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34.

EPA File Symbol 8512-IT. B & G Co., PO Box 20372, Dallas, TX 75220. B & G SYN-PY-2. Active Ingredients: (5-Benzyl-3-furyl)methyl 2,2-dimethyl-3-(2-methylpropenyl)cyclopropanecarboxylate 2.000%; Related compounds 0.274%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 12455-RU. Bell Lab., Inc., PO Box 5133, Madison WI 53705. RODENT CAKE. Active Ingredients: Diphacinone (2-diphenylacetyl-1,3-indandione) 0.005%. Method of Support: Application proceeds under 2(c) of interim policy. PM11.

EPA File Symbol 6853-EE. BES-TEX Insecticides Co., Inc., PO Box 664, San Angelo TX 76901. BES-TEX SYSTEMIC HOME & GARDEN SPRAY. Active Ingredients: Dimethoate (0,0-dimethyl S-[N-methylcarbamoylmethyl]phosphorodithioate). Method of Support: Application proceeds under 2(c) of interim policy. PM16.

EPA File Symbol 6853-ER. BES-TEX Insecticides Co., Inc. BES-TEX BIOTROL XK WETTABLE POWDER. Active Ingredients: Bacillus thuringiensis Berliner [Contains 7500 International Units of Potency per milligram of product (12 billion viable

spores per gram). Equivalent to 3.4 billion International Units per pound.] 1.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 34571-I. BETZ ENTEC, Inc., 2500 Office Center, Willow Grove PA 19090. BETZ ENTEC 347. Active Ingredients: Copper sulfate 15.0%; N-Alkyl (C12-40%, C14-50%, C16-10%) dimethyl benzyl ammonium chloride 5.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM31.

EPA File Symbol 5887-RNI. Black Leaf Prod. Co., 677 N. State St., Elgin IL 60120. BLACK LEAF TOMATO & VEGETABLE LIQUID SPRAY. Active Ingredients: Carbaryl (1-Naphthyl - N - Methylcarbamate) 22.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM12.

EPA File Symbol 5887-RNO. Black Leaf Prod. Co. BLACK LEAF BAGWORM SPRAY. Active Ingredients: 0,0-diethyl 0-(2-isopropyl-4-methyl-6-pyrimidinyl) phosphorothioate 12.5%; Aromatic Petroleum Derivative Solvents 72.6%. Method of Support: Application proceeds under 2(c) of interim policy. PM15.

EPA File Symbol 4450-GT. Chemex Chemicals and Coatings Co., Inc., PO Box 5072, Tampa FL 33605. CHEMEX FLYING INSECTICIDE SPRAY. Active Ingredients: Pyrethrins 0.30%; Piperonyl butoxide, technical 0.6%; N-octyl bicycloheptene dicarboximide 1.00%; Petroleum distillate 81.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 7478-EL. Chem-Pak Co., PO Box 430757, So. Miami FL 33143. KLEAR-ALL. Active Ingredients: O.O.O'. O'-Tetraethyl S, S'methylene bis phosphorodithioate (related compounds 0.12%) 4.0%; Petroleum Oils 88.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM16.

EPA File Symbol 34224-RR. Chemrite Corp., 12600 S. Daphne Ave., Hawthorne CA 90250. CR-509 ALGAERITE B. Active Ingredients: Disodium cyanodithiolimidocarbonate 4.90%; Potassium N-methylthiocarbamate 6.76%. Method of Support: Application proceeds under 2(b) of interim policy. PM22.

EPA File Symbol 8201-RG. Chem-Tex, Inc., PO Box 1987, Anderson SC 29621. CTX-802 OIL BASE LIQUID. Active Ingredients: (5-Benzyl-3-furyl)methyl 2,2-dimethyl-3-(2-methylpropenyl)cyclopropanecarboxylate 0.250%; Related compounds 0.084%; Aromatic petroleum hydrocarbons 0.456%; Petroleum distillate 99.250%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA Reg. No. 239-2419. Chevron Chem. Co., Ortho Div., 940 Hensley St., Richmond CA 94804. ORTHENE TOBACCO INSECT SPRAY. Active Ingredients: Acephate (O,S-Dimethyl acetylphosphorodithioate) 75.0%. Method of Support: Application proceeds under 2(a) of interim policy. PM16.

EPA File Symbol 239-EUGT. Chevron Chem. Co. ORTHOCIDE 4 FLOWABLE (FUNGICIDE). Active Ingredients: Captan 38.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM21.

EPA File Symbol 239-EUGL. Chevron Chem. Co. ORTHO VEGETABLE AND GARDEN FUNGICIDE. Active Ingredients: Chlorothalonil (Tetrachloroisophthalonitrile) 29.6%. Method of Support: Application proceeds under 2(c) of interim policy. PM21.

EPA File Symbol 5748-UO. Household Prod. Div., Conwood Corp., 701 N. Main St., Memphis TN 38101. HOT SHOT STRIKE ROACH AND ANT KILLER. Active Ingredients: Pyrethrins 0.050%; Technical Piperonyl Butoxide 0.075%; N-Octyl Bicycloheptene

Dicarboximide 0.125%; 2-(1-Methylethoxy) phenol methylcarbamate 1.000%; Petroleum Distillates 82.750%. Method of Support: Application proceeds under 2(c) of interim policy. PM12.

EPA File Symbol 5748-LN. Household Prod. Div. HOT SHOT STRIKE FLY AND MOSQUITO KILLER. Active Ingredients: Pyrethrins 0.150%; Technical Piperonyl Butoxide 0.300%; N-Octyl Bicycloheptene Dicarboximide 0.500%; Petroleum Distillates 98.900%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 7273-RL. Crown Chemicals, 4995 N. Main St., Rockford IL 61101. CROWN VEGETATION KILLER. Active Ingredients: Prometon; 2,4-bis (isopropylamino)-6-methoxy-s-triazine 3.73%; Petroleum distillate 81.04%. Method of Support: Application proceeds under 2(c) of interim policy. PM25.

EPA File Symbol 7273-RUL. Crown Chemicals. CROWN "READY TO USE" VEGETATION KILLER. Active Ingredients: Prometon; 2,4-bis (isopropylamino)-6-methoxy-s-triazine 1.5%; Petroleum distillate 94.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM25.

EPA File Symbol 9461-OR. Celanese Coatings & Specialties Co., Devoe & Reynolds Co. (Marine Div.), PO Box 99038, Jeffersonville KY 40299. NAVICOTE FISHERMAN'S PLASTIC ANTI-FOULING PAINT-MD-3840. Active Ingredients: Cuprous Oxide 25.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM22.

EPA File Symbol 1015-AN. Douglas Chemical Co., PO Box 297, Liberty MO 64068. DOUGLAS D-368 SOLVENT. Active Ingredients: Carbon Tetrachloride 82.09%; Carbon Disulfide 16.29%; Ethylene Dibromide 1.22%; Pentane 0.40%. Method of Support: Application proceeds under 2(c) of interim policy. PM11.

EPA File Symbol 1015-LO. Douglas Chemical Co. DOUGLAS F-310 SOLVENT. Active Ingredients: Carbon Tetrachloride 99.75%; Carbon Disulfide 0.25%. Method of Support: Application proceeds under 2(c) of interim policy. PM11.

EPA Reg. No. 464-393. The Dow Chemical Co., PO Box 1706, Midland MI 48640. DOW PLECTRAN 50W MITICIDE. Active Ingredients: Tricyclohexyltin hydroxide 50.0%. Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added uses. PM13.

EPA File Symbol 2127-A. Dumont Sales Co., 4400 Garfield St., Denver CO 80216. DU-O-SAN. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 5.0%; n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 5.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM31.

EPA File Symbol 2127-L. Dumont Sales Co. SAN-O-KLEEN. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 2.25%; n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 2.25%; Sodium Carbonate 3.00%; Tetrasodium ethylenediamine tetraacetate 1.00%. Method of Support: Application proceeds under 2(b) of interim policy. PM31.

EPA Reg. No. 352-354. E. I. DuPont de Nemours & Co., 7056 Dupont Bldg., Wilmington DE 19898. BENLATE BENOMYL FUNGICIDE PLUS CAPTAN FUNGICIDE TANK MIXTURE-APPLES. Active Ingredients: Benomyl [Methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate 50.0%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM22.

EPA Reg. No. 8343-7. Gabriel Chemicals, Ltd., 204 21st Ave., Paterson NJ 07509. AGRIS-ECT BRAND MALATHION 80 E.C. Active Ingredients: Malathion 80.00%; Aromatic Petroleum Derivative Solvent 7.79%. Method of Support: Application proceeds under 2(c) of interim policy. PM16

EPA File Symbol 2311-RL. The HAAO Lab., Inc., 14010 S. Seeley Ave., Blue Island IL 60406. PTF GERMICIDAL LIQUID DETERGENT. Active Ingredients: Petro 11 8.00%; Isopropyl alcohol, anhydrous 6.75%; Potassium laurate 3.22%; Ortho-benzyl-parachlorophenol 2.25%; Ortho-phenylphenol 2.00%; Potassium myristate 1.68%; 4-chloro-2-phenylphenol 1.28%; Para-tertiary amylphenol 1.00%; Tetrasodium ethylenediamine tetraacetate 0.78%; 6-chloro-2-phenylphenol 0.48%; Related phenolic and chloro-phenolic compounds 0.24%. Method of Support: Application proceeds under 2(c) of interim policy. PM32

EPA File Symbol 2596-AN. The Hartz Mountain Corp., 700 S. 4th St., Harrison NJ 07029. HARTZ MOUNTAIN 120 DAY CAT FLEA KILLING TAG. Active Ingredients: 2,2-dichlorovinyl dimethyl phosphate 18.6%; Related compounds 1.4%. Method of Support: Application proceeds under 2(c) of interim policy. PM13

EPA File Symbol 2393-EU. Hopkins Agricultural Chem. Co., PO Box 584, Madison WI 53701. HOPKINS ATRAZINE TECHNICAL. Active Ingredients: Atrazine (2-Chloro-4 [ethylamino]) 6 (isopropylamino-2-triazine) 95.00%; Related active triazine compounds 5.00%. Method of Support: Application proceeds under 2(c) of interim policy. PM25

EPA File Symbol 1182-EN. Hubman Chemicals, 1123 W. Goodale Blvd., Columbus OH 43212. SANAMAX M7. Active Ingredients: Alkyl (C14, 58%; C16, 28%; C12, 14%) dimethyl benzyl ammonium chloride 2.0%; Isopropanol 2.0%; Methyl salicylate 0.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM32

EPA File Symbol 1182-ER. Hubman Chemicals. SANAMAX P6. Active Ingredients: Isopropanol 4.75%; Pine oil 3.95%; Alkyl (C14, 58%; C16, 28%; C12, 14%) dimethyl benzyl ammonium chloride 1.97%. Method of Support: Application proceeds under 2(c) of interim policy. PM32

EPA File Symbol 1182-RO. Hubman Chemicals. SANAMAX L15. Active Ingredients: Alkyl C14, 58%; C16, 28%; C12 14%) dimethyl benzyl ammonium chloride 4.0%; Isopropanol 2.0%; Essential oils 0.5%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 36301-R. J-CHEM, PO Box 5421, Houston TX 77012. J-PYREDI-510 SYNERGIZED PYRETHRINS MILL SPRAY. Active Ingredients: Pyrethrins 0.50%; Piperonyl Butoxide Technical 3.00%; Petroleum distillate 96.50%. Method of Support: Application proceeds under 2(c) of interim policy. PM17

EPA File Symbol 13683-G. I. B. Kremer Co., PO Box 221 15670 W. 10 Mile Rd., Southfield MI 48075. ALGICIDE #711. Active Ingredients: Disodium cyanodithiolmido-carbonate 7.35%; Potassium N-methyldithiocarbamate 10.15%. Method of Support: Application proceeds under 2(b) of interim policy. PM22

EPA File Symbol 13683-U. I. B. Kremer Co. ALGICIDE #713. Active Ingredients: Disodium cyanodithiolmido-carbonate 3.68%; Potassium N-methyldithiocarbamate 5.07%. Method of Support: Application proceeds under 2(b) of interim policy. PM22

EPA File Symbol 939-UR. E. H. Leitte Co., PO Box 180, Lake Elmo MN 55042. LEITTE METHYL BROMIDE PLUS. Active Ingredients: Methyl Bromide 90.00%; Ethylene

Dibromide 10.00%. Method of Support: Application proceeds under 2(c) of interim policy. PM11

EPA File Symbol 10324-EW. Mason Chem. Co., 5253 West Belmont Ave., Chicago IL 60641. MAQUAT NK-50%. Active Ingredients: n-Alkyl (60% C14, 25% C12 and 15% C16) dimethyl benzyl ammonium chloride 50.0%. Method of Support: Application proceeds under 2(c) of interim policy. PM31

EPA File Symbol 2434-I. Mercury Supply Co., 901 Second Ave., South, Nashville TN 37210. MERCO MINT ODOR DISINFECTANT PHENOL COEFFICIENT 7. ## CHEVRON CHEMICAL CO.

## Extension of Temporary Tolerances

Chevron Chemical Co., 940 Hensley St., Richmond, CA 94804, was granted temporary tolerances for residues of the fungicide captatol [cis-N-(1,1,2,2-tetrachloroethyl) thiol - 4 - cyclohexene-1,2-dicarboximide] in or on the raw agricultural commodities peanut hulls at 1 part per million and peanuts at 0.1 part per million on May 31, 1974 in connection with Pesticide Petition No. 4G1420 (notice was published in the FEDERAL REGISTER of June 5, 1974 (39 FR 19976)). These temporary tolerances expire May 31, 1975.

The company has requested a 1-year extension of the fungicide in or on peanut hulls at 1 part per million and peanuts at 0.1 part per million to obtain additional experimental data.

It has been determined that such extension of the temporary tolerances will protect the public health. They are therefore extended as requested on condition that the herbicide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the Chevron Chemical Co. name.

These temporary tolerances expire May 22, 1976. Residues remaining in or on the above raw agricultural commodities after expiration of these tolerances will not be considered actionable if the pesticide is legally applied during the term, and in accordance with provisions of the temporary permit/tolerances.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (39 FR 18805).

Dated: May 22, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

## FEDERAL COMMUNICATIONS COMMISSION

## RADIO TECHNICAL COMMISSION FOR AERONAUTICS

## Establishment of Special Committee 130

The Federal Communications Commission has determined that the establishment of Special Committee 130, "Reliability Specifications for Airborne Electronics Systems", as a subcommittee of the Radio Technical Commission for Aeronautics is in the public interest and necessary in order to discharge the

agency's responsibilities. Notice of establishment is hereby published.

The purpose of RTCA Special Committee 130 is to: Investigate the various means of determining and specifying reliability for electronic systems recommended by RTCA Minimum Performance Standards; Assess the significance of specifying MTBR (Mean Time Between Repair) and MTBF (Mean Time Between Failure) for safety of flight electrical and electronic equipment; Recommend which, if any, of these available techniques may be applicable for incorporation into Minimum Performance Standards. During its investigations, the Special Committee should review the techniques employed by both civil and military agencies to improve reliability, and the result these techniques have achieved.

It is expected that Special Committee 130 will require approximately 6 meetings to complete its work. Pursuant to Pub. L. 92-463, notices will be published for all meetings. Anyone who desires additional information concerning the work of Special Committee 130 may contact the RTCA Secretariat, Suite 655, 1717 H Street, NW, Washington, D.C. 20006, telephone (202) 296-0484.

#### FEDERAL COMMUNICATIONS COMMISSION,

[SEAL] VINCENT J. MULLINS,  
Secretary.

[FR Doc 75-13707 Filed 5-23-75; 8:45 am]

#### DOMESTIC SATELLITE EARTH STATIONS Construction Permit Applications

MAY 14, 1975.

In issuing construction permits and licenses for domestic satellite earth stations, the Commission specifies in the station authorization the "range of azimuths of center of main lobe of radiation with respect to true north" over which the earth station may be operated. This range of azimuths corresponds to the range of satellite orbital locations for which frequency coordination with terrestrial microwave stations has been successfully completed in accordance with Subpart C of Part 25 of the rules and regulations.

The Commission has recently become concerned with the fact that certain domestic satellite earth station applicants have been performing frequency coordination for a very limited portion of the geostationary arc (e.g. a 20° range of satellite orbital locations as compared to the range of 70° or more in satellite longitude which is potentially useable by United States domestic satellites). Moreover, it also appears that such earth station antennas have been constructed with mountings which can be physically steered only over such a limited range of azimuths and elevation angles without extensive alterations to the antenna mounting.

While Part 25 allows frequency coordination with terrestrial microwave stations over a limited portion of the geostationary arc visible at the proposed

earth station site and/or over a portion of the frequency band(s) to be utilized by the station, domestic satellite earth station applicants are hereby given notice that the Commission may not be able to accommodate such operational restrictions at particular earth stations in making or modifying domestic satellite orbital location assignments. Although the Commission will attempt to minimize the negative consequences on the operations of any domestic satellite earth station that may be authorized with such operational restrictions, the applicant will be required to accept any consequences that could result from such restrictions on operational flexibility. For this reason, domestic satellite earth station applicants are urged to perform frequency coordination with terrestrial microwave stations over as wide a range of satellite orbital locations and frequency as possible to maximize the operational flexibility of their proposed earth stations. The earth station antenna mounting must be physically capable of movement over the entire range of the geostationary satellite arc visible at the earth station for which frequency coordination has been performed. Moreover, we urge that the antenna be capable of movement over the entire orbital arc potentially useable by United States domestic satellites whether or not frequency coordination has been performed over the entire arc.

Accordingly, domestic satellite earth station applicants who do not perform frequency coordination over the entire range of satellite orbital locations from about 70° West to about 135° West suitable for use by domestic satellites or the entire 3700-4200 MHz and/or 5925-6425 MHz frequency bands should include in their applications a statement why such coordination is not practical. Applicants should also include in their applications a description of the physical mounting and steering capabilities of the proposed earth station antenna, including the range of azimuths and elevation angles over which the antenna can be steered. In the event that the range over which the antenna can be physically steered is less than the range over which frequency coordination has been effected, a justification for such a limitation should be included in the application.

#### WARC LAND MOBILE WORKING GROUP Meeting

To assist in FCC preparations activities for the 1979 World Administrative Radio Conference (WARC), the Land Mobile Working Group, headed by Neal Pike, will hold its second meeting on June 4, 1975 from 9 a.m. to 4 p.m. at the Commission's office at 2025 M Street NW., Washington, D.C. in Room 8210.

The meeting will be open to the public and any member of the public is invited to participate and present oral or written statements of relevance to the agenda upon recognition by the Chairman.

The meeting will be conducted in accordance with the following agenda:

1. Call of the agenda.
2. Opening Remarks of the Chairman.
3. Progress reports from the Informal Subgroup Chairman.
4. Discussion and review of work progress to date.
5. Delineation of main subjects for future work and establishment of informal schedules to accomplish this work.
6. Set next meeting date.
7. Further business.
8. Adjournment.

No part of this meeting will be concerned with matters which are within the exemptions of the Public Information Act, 5 U.S.C. 552(b).

#### [Docket No. 18875]

#### WORKING GROUPS

#### Reports Submitted To the Common Carrier Bureau

MAY 20, 1975.

The Chief, Common Carrier Bureau, has received the reports from the Traffic Forecasting, Service Reliability, and Economics Working Groups set up under Docket No. 18875 as informal groups composed of representatives from government and industry. These groups were charged with the task of discussing, analyzing and presenting information to the Bureau with respect to the above subject matters for the sole purpose of assisting the Commission in executing its responsibilities within the terms of reference of Docket No. 18875.

The Common Carrier Bureau staff is reviewing the reports in preparation for the forthcoming meeting to be held in June 1975 with European entities to discuss the factors that should be considered in establishing guidelines for the implementation of transatlantic facilities.

The three reports submitted are informal, and no definitive conclusions should be drawn at this time while the work under Docket No. 18875 is proceeding.

Anyone desiring copies of these reports may obtain them by contacting the FCC duplicating contractor at the following address:

Downtown Copy Center  
1730 K Street NW  
Washington, D.C. 20006  
Telephone 452-1422 or 337-1106.

The ordering party will be billed by the contractor.

A copy of each of these reports is available for public inspection in Room

546 at the Commission's offices at 1919 M Street NW, Washington, D.C.

#### [Report No. 754]

#### COMMON CARRIER SERVICES INFORMATION

#### Domestic Public Radio Services Applications Accepted for Filing

MAY 19, 1975.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60 day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

#### FEDERAL COMMUNICATIONS COMMISSION,

#### Major Amendment

3003-CF-P-75, Microwave Transmission Corporation (New) Monument Peak, 4.5 miles NNE of Milpitas, California. Lat. 37°29'07" N., Long. 121°51'57" W. Application amended to add 11345H MHz, 11425H MHz, and 11625V MHz toward Bald Ridge, California, on azimuth 164°56'.

304-CF-P-75, (New), Bald Ridge, 5.0 miles NE of Watsonville, California. Lat. 36°58'00" N., Long. 121°41'31" W. Application amended to add 10735V MHz, 10855H MHz, 10895V, 10935H MHz, and 11095H MHz toward Salinas, Monterey, Watsonville, and Capitola, all in California, on azimuths 173°03'; 198°46'; 234°46'; and 274°38'; respectively. (Note: See file nos. 3395 thru 3997-CF-P-75).

#### Multipoint Distribution Services

50087-CM-P-75, Microband Corporation of America (New), Champaign Towers, 302 E. John Street, Champaign, Illinois. Lat. 40°06'33" N., Long. 88°14'06" W. C.P. for a new station on 2154.75H and 2150.25H. (Primary Service Area: Urbana, Illinois).

It appears that the following applications may be mutually exclusive and subject to the Commission's Rules regarding ex-parte presentations, reasons of potential electrical interference, to provide video service to Urbana, Illinois.

#### Major Amendment

7289-CF-P-71, Robert L. Mohr d.b.a. Radiocall Corporation amended to change applicant to "Metro Tel Corporation". Station location: Los Angeles, California. All other particulars remain the same as reported by Public Notice dated June 28, 1971.

#### Informative

The above amendment reflects a joint venture by Robert L. Mohr d.b.a. Radiocall Corporation, Microband Corporation of America, and Microwave Transmission Corporation to resolve mutually exclusive applications in Los Angeles. Upon grant of the above application, it is requested that the remaining applications in Los Angeles be dismissed. This amendment does not affect the applications status under the "Cut-off" rule. (See Notice of Proposed Rule Making in Docket 19905, 44 FCC 2d556).

#### RUST COMMUNICATIONS GROUP, INC. Application for License Renewal; Hearing

In re applications for renewal of license for stations WHAM & WHFM (FM), Rochester, New York.

1. The Commission has before it for consideration: (a) the above-captioned license renewal applications of Rust Communications Group, Inc. (Rust) licensee of Stations WHAM and WHFM (FM), Rochester, New York, filed March 3, 1972, and supplemented February 3, 1975; (b) a petition to deny said applications filed May 1, 1972, by Action for a Better Community, Inc. et al. (Action) comprised of individuals and organizations in the Rochester area; (c) a complaint filed by Metro-Act of Rochester, Inc. (Metro-Act), a local citizens

group; and (d) various related and responsive pleadings.<sup>1</sup>

2. Action bases its request to deny the WHAM and WHFM renewal applications upon the stations' alleged overall insensitivity to the needs and interests of Rochester's minorities. Specifically, the petitioners contend that the licensee has made no serious efforts to ascertain the needs of the area's minority population; the stations' programs have been and will continue to be unresponsive to the problems of the minorities; and the licensee discriminates in its employment practices.

3. Metro-Act's complaint alleges that Rust does not understand the composition of Rochester, the licensee has failed to deal with the community's needs, the stations have displayed unprofessional standards of journalism, Rust's employment record reflects a policy of discrimination and the stations' public files were not available for inspection.<sup>2</sup>

#### ASCERTAINMENT

4. Action maintains that Rust failed to adequately ascertain the needs of the minority community. The petitioners assert that although some of the 56 persons interviewed as leaders were black, none were representative of large, vocal black groups, and none of the contacted leaders represented Puerto Ricans, which, petitioners contend, comprise 7 percent of the city's population. Action also criticizes the general public survey for bias that allegedly results from Rust's use of "man-on-the-street" contacts and only white interviewers. However, the petitioners admit that the list of ascertained needs in the renewal application is "probably fairly accurate."

5. The Metro-Act complaint asserts that Rust's selection of community leaders reflects a failure to understand the real composition of the Rochester community. The complainant avers that none of the leaders represent major community groups such as FIGHT, Italian American Civil Rights League, SEAC, NEAD or 19th Ward Association. Also Metro-Act contends that only one-sixth of the leaders actually represent other

<sup>1</sup>Related pleadings include: the opposition filed by Rust June 30, 1972; a reply entered September 7, 1972 by Action; an amendment to the petition filed February 13, 1973; a supplement to the petition to deny submitted by petitioners on March 21, 1973; a letter response to the amendment to the petition entered by the licensee April 12, 1973; the applicant's May 4, 1973 opposition to the supplement to the petition; Action's replies to the stations' letter response and opposition filed June 5, 1973 and August 15, 1973 respectively; and the licensee's June 4, 1974 supplement to its opposition to the supplement to the petition.

<sup>2</sup>The complainant merely asserts that the file was not available until the filing date. The licensee contends that the renewal application is not required to be available for public inspection until filed with the Commission and it was available for public inspection after it was filed. These allegations do not raise any question warranting further Commission inquiry.

people in the community, with the balance comprised of politicians, representatives of institutions and persons merely responding as individuals. In the complainant's view, the survey ignored the busing issue, extreme political views, agribusiness, farm workers, the women's liberation movement and ethnic groups that represent the Ukrainian, German, Italian, Jewish and Polish population. Metro-Act alleges that although one Spanish speaking person was included in the leader survey, he was not a leader of any Spanish organization. With regard to WHFM, the complainant notes the absence of leaders under the age of 18 and the inclusion of just one leader between the ages of 25-35, despite the station's stated intent to provide entertainment programming for those groups. With regard to WHAM, Metro-Act argues that Rust selected all of the contacted leaders from Rochester and Monroe County despite the 15-county coverage of that station.<sup>3</sup>

6. In opposition to the petition, the licensee argues that its ascertainment efforts must have been sufficient if, as petitioners have admitted, the survey results were accurate. Rust contends that its leader survey of 56 persons covered all significant segments of the community including representatives of professional, minority, social action, business, government, women, youth, labor, charitable, civic, environmental, educational, cultural, agricultural, journalistic and religious organizations. The applicant alleges that the survey's seven black leaders represent the Southern Christian Leadership Conference, Monroe County Human Relations Commission, Virginia Wilson Center for the Poor, Rochester Community Chest, Legislature of Monroe County and the New York State Human Relations Division Appeals Board. Moreover, the licensee asserts that it contacted a Puerto Rican who is a member of the Rochester School Board. As to the validity of the general public survey, the applicant denies that bias results from the usage of white interviewers and notes that no specific instance of interviewer bias has been alleged. The licensee contends that 40 percent of the general public survey was made by telephone, which would eliminate the possibility of face-to-face bias.

7. Responding by letter to the complaint, Rust contends that the Primer supports the method by which the ascertainment was conducted.<sup>4</sup> The applicant observes that the Commission does not expect every organization in Rochester to be represented in the survey, nor does the Primer make distinctions between institutions and people in the selection of leaders, but directs stations to contact representatives of significant groups

<sup>3</sup>In this regard, we note that Rust's renewal application specifically states that WHAM will serve the needs of Rochester and Monroe County (Exhibit IV, page 4).

<sup>4</sup>Primer on Ascertainment of Community Needs by Broadcast Applicants, 27 FCC 2d 650 (1971).

which make up the community. The licensee alleges that its leader contacts were representative and included five female leaders and Mr. Emilio Serrano, the Administrator of the County Family Court and a member of the Rochester School Board. While Rust acknowledges that no surveyed leader was under 18 years old, it contends that the public involved more than 50 respondents in that age group and that 25 percent of the respondents were between 18 and 35.

8. In reply, Action asserts that the ascertained needs, however accurate, lack minority perspective. Petitioners contend that neither FIGHT nor Action for a Better Community, Rochester's two largest minority groups, or any Spanish speaking group was represented in the leadership survey. Similarly, Action alleges that the public survey lacks minority perspective since the licensee utilized white interviewers to whom minorities are unlikely to respond and employed telephones samples even though minority persons are unlikely to have personal telephone service.

9. The Primer requires renewal applicants to submit information on the means utilized to ascertain the problems of the community served, including the identification of the significant groups which make up the community, those features which make the community distinctive. See, Primer, supra, 661, 683. Rust's description of the area it undertakes to serve, submitted with its 1972 renewal application, included: the physical location of the city; a population breakdown of the city by age, race and sex; a list of five corporations as major industries; a list of five cultural facilities; and a list of five educational institutions. By letter of April 7, 1972, the Commission noted that this showing "did not furnish adequate information to support your determination of the composition of the community." That letter requested the stations to submit additional information pursuant to the requirements of the Primer. By letter dated May 2, 1972, the applicant submitted an amendment to the renewal applications which included the names of 134 clubs and organizations, presumably all located in Rochester. The amendment divides the organizations according to the following categories: cultural, agricultural, political, community action, educational, labor, professional and trade, veterans and patriotic, medical, women's clubs, religion, ethnic-racial, youth and social-charitable. In the supplemental renewal applications, filed February 3, 1975, Rust's description of Rochester is a verbatim copy of the original 1972 submission which was found to be inadequate.

10. The Primer requires an applicant to submit sufficient data to indicate the minority, racial or ethnic breakdown of the community as well as economic, governmental and other features that make the community distinctive. Here, the licensee's initial compositional study included no information on minorities other than black, and it failed to discuss

such matters as local government, religion, labor, agriculture, politics, social, professions, eleemosynary or ethnic elements of the community. The May, 1972 amendment merely recites numerous clubs and organizations under broad categories. This, in and of itself, fails to inform the Commission or the licensee as to whether any of the groups thereby disclosed are significant enough to warrant ascertainment. In 1975, the applicant again provided inadequate information by merely refilling its initial showing on the composition of the community. It therefore appears that Rust has three times failed to supply adequate information on the composition of the area it intends to serve.

11. Assuming arguendo that the groups catalogued in the licensee's May amendment reflect significant elements of the community, Rust's 1972 survey indicates no contacts in any of the ethnic, cultural, community action, labor, women's, religious, youth or social-charitable groups and organizations from that list. While contacts with representatives of some of the organizations listed in the May, 1972 amendment were reflected in the 1975 supplemental survey, Rust again failed to contact identified representatives of eight organizations reflecting diverse ethnic population segments. Therefore, assuming arguendo that Rust's description of the community was adequate, the applicant's survey efforts failed to reflect contacts with "significant" elements of the community revealed in that compositional showing.

12. However, as we have previously indicated, Rust's compositional showings were not adequate. We are therefore unable to find that the licensee has contacted representatives of the significant elements of the community. Under these circumstances, the Commission cannot conclude that the applicant's leadership surveys ascertained the problems of the community. Thus, we can have no confidence that Rust's proposed programming will be responsive to the real problems of the area. Accordingly, further inquiry into the licensee's ascertainment procedures, results and programming responses thereto is warranted, and an appropriate issue will be designated.

#### PROGRAM SERVICE

13. Petitioners allege that the public affairs programming broadcast by the Rust stations during the 1969-1972 license term was not responsive to the needs and interests of the Rochester community, especially the minority population. More specifically, Action asserts that in 1969 WHAM proposed to meet the needs of the community with four hours of public affairs programming but performed only one hour during the composite week. WHFM, according to the petition, offered no public affairs programming.

14. In the opposition, the licensee contends that it has treated the important needs of the community "in ways relevant to the whites as well as the poor." In this respect, Rust asserts that it has

responded to issues relative to the minority and majority segments of the population with such public affairs programs as: Five Minutes With Howard Coles, a five minute discussion aired Saturday evenings and featuring the publisher of Rochester's black newspaper; Opinion, a 90-minute telephone discussion program broadcast five nights a week; and Editorials, Observations, Washington Window, Washington Reports and City Conference.

15. According to the licensee, Opinion was discontinued in July, 1970 "... because a few vociferous individuals ... began to monopolize the program ... so that other members of the public became disinterested." Rust contends that the termination of this program resulted in the apparent loss of 75 percent of the applicant's proposed public affairs programming as reflected in the composite week. The licensee alleges that it resumed broadcast of the program in November, 1971. Rust acknowledges that WHFM presented no public affairs programming during the 1969-1972 period, but contends that none was proposed in 1969. The licensee further argues that it relies on WHAM to provide public affairs programming for the community.

16. In reply, Action alleges that none of the listed programs broadcast by WHAM, except for the Coles program, featured any blacks, Puerto Ricans or any other minorities as hosts or even guests. The petitioners conclude that the applicant has excluded minority perspectives from its programs dealing with the needs of the community.

17. It therefore appears that WHAM's 1969 renewal application proposed four hours per week of public affairs programming (2.5 percent), but the composite week reflected the broadcast of only one hour of such programming (0.6 percent). In this regard, we note that the licensee failed to notify the Commission of its decision to terminate the Opinion program until the filing of the renewal application, and Rust has provided no explanation of that failure or any reason why another program or programs were not substituted to meet the needs of the community during the 16-month hiatus of Opinion broadcasts. Moreover, WHAM's 1969 renewal application proposed Opinion, Editorials, Washington Report and Observations as the primary vehicles for addressing local issues and problems, but our review of WHAM's composite week logs indicates that the station did not broadcast Opinion, Editorials or Washington Report and Observations was aired only three times rather than the proposed five times per week.

18. Our review of the material before us therefore indicates that for at least 16 out of the 36 months between 1969 and 1972, Rust did not broadcast Opinion as promised in its 1969 application for renewal. This failing is made more significant by the fact that the station: did not inform the Commission of its decision to terminate a primary pro-

gramming response to ascertained local needs; has not explained its failure to replace the program for a 16-month period; did not fully adhere to the remainder of its local public affairs proposal during the composite week; and claims that WHAM bears the double burden of providing program responses to local problems for both itself and WHFM(FM). It is not our intent to lock a station into its program proposals during a license term. Rather, a licensee is free to respond to the changing needs of the community during that term and minor deviations from proposals must be excused so long as the overriding public interest standard is served. However, the deviation here is major, and it is not substantially lessened by the resumption of Opinion eight months before the expiration of the license term. See KORD, Inc., 31 FCC 85 (1961). Further, our confidence in granting Rust a license in 1969, was based, in part, on the proposed four hours of public affairs programming, and we cannot permit a licensee to disregard a significant portion of that programming without adequate explanations at the time and without program substitutions which are reasonably responsive to community needs. As a result of Rust's action, the Commission does not feel that it is ready to bestow that degree of confidence in the licensee which resulted in a grant of its renewal in 1969. Accordingly, appropriate issues will be designated.\*

19. Further, the licensee has failed to establish that its programming during the 1969-1972 period was responsive to the problems, needs and interests of the Rochester community. In its opposition pleading, WHAM alleges that seven programs had been broadcast during the 1969-1972 license term in response to community problems—Five Minutes With Howard Coles, Opinion, Editorials, Observations, Washington Window, Washington Reports and City Conference. The broadcast of these seven programs during the twelve months preceding the filing of WHAM's 1972 renewal application was reflected in Exhibit 9 of that application. However, the station's composite week logs reflect the broadcast of only three of the seven programs—Observations, Washington Window and City Conference. Absent a positive statement to the contrary,<sup>1</sup> a licensee's composite week logs and statement of programs broadcast during the twelve months preceding the filing of its application for renewal should provide a fair picture of the programming serv-

\* We recognize that we have imposed lesser sanctions in cases involving deviations of similar numerical magnitude. However, in view of the other factors present in this case and the need for a hearing on other issues, a full exploration of this question at that hearing is warranted.

<sup>1</sup> For example, in Exhibit 8 of the 1972 WHAM renewal application, the applicant explained its suspension of the Opinion program, but made no reference to the absence of the other listed programs from the composite week.

ice offered by the station during its three year license term. Here, these indicia do not establish that the programs which were alleged to have responded to local problems were broadcast throughout the license term, and the Commission therefore has no information on the extent of the licensee's programming responses to community needs during the first two years of the 1969-1972 term. In order to qualify for renewal, an applicant must show that it has been responsive to the needs of the community throughout its license term. See Primer, supra; KORD, Inc., supra. A substantial question as to what programming was offered in response to community needs during the first two years of the 1969-1972 license term has been raised, and we are unable to determine whether the licensee's programming during the entire license term was in fact responsive to community problems. An appropriate issue will therefore be designated.

20. We do not find further inquiry is necessitated on WHFM's past programming. Recalling the general economic state of FM broadcasting in 1969, it is apparent that the Commission was less demanding on FM licensees than is presently the case. Then Rust proposed no public affairs programming for WHFM and that proposal was approved by our grant of renewal. We cannot fault the station for performing in accordance with that proposal. We are encouraged by the applicant's increased public affairs proposals in 1972 and 1975. Accordingly, no further inquiry is warranted into the past programming of WHFM(FM).

21. With regard to the licensee's programming proposals for the 1972-1975 license term, both Action and Metro-Act have alleged an unresponsiveness to minority problems and a general inadequacy of programming. It is a licensee's duty to provide programming response to significant ascertained problems. See, Primer, supra. However, as previously pointed out, Rust does not appear to have adequately ascertained the problems of the Rochester area in either the 1972 renewal application or the 1975 supplement thereto. Under the circumstances, we cannot determine that the program proposals for either WHAM or WHFM(FM) would adequately respond to significant community problems. Appropriate issues will therefore be designated to resolve this question.

#### EMPLOYMENT

22. Action contends that Rust has not implemented its affirmative action program and engages in discriminatory hiring practices, including a requirement that minority job applicants be local and experienced while white applicants are not similarly restricted. The petitioners observe that, as of the filing of the petition, the licensee had only one minority employee, a janitor. In its complaint, Metro-Act asserts that the licensee's 1971 employment report reveals a discriminatory policy against minority persons in all job categories.

23. In response, the applicant con-

tends that it has adopted an equal employment affirmative action program as required by the Commission and that it "intends to implement it to the fullest." Rust alleges that its inability to hire professional minority employees stems from the nature of the broadcasting industry. Because the number of available qualified blacks is low, stations must compete for the experienced applicants. The licensee alleges that its low attrition rate lessens the opportunity to consider many applicants. Rather, the applicant asserts that the Rochester market requires experienced professionals and therefore the licensee must look to smaller radio markets for personnel who are ready to move up. In addition, the licensee argues that it has made affirmative efforts to seek out minority applicants, but, in one instance, one of the petitioning groups refused to refer any applicants.<sup>2</sup>

24. In its reply, Action argues that despite Rust's contention that few qualified minority applicants are available, most area stations have at least one minority employee. Action questions the licensee's failure to indicate the number of job openings it had during the past term and its failure to present examples of its competitive efforts to get qualified minority applicants. Petitioners further assert that any affirmative efforts to seek out minority applicants from local minority organizations came in May, 1972, after the petition to deny was filed.

25. In a supplement to its petition to deny filed March 21, 1973, Action alleges that Rust told a black job applicant, Charles Perkins, "come back when you learn to speak English." Rust denies that any discriminatory remarks were ever made to Charles Perkins and asserts that his application was rejected because of a total lack of broadcast experience.

26. Further, Action contends that, six months prior to filing its supplement, Al White, a black employed full-time as a technician-producer at Station WOKR-TV, Rochester, applied for a part-time job to produce a minority discussion program on WHAM. The petitioners allege that Rust continually failed to make any determination on his application. In its opposition, the licensee asserts that White's application was still being considered. The petitioners reply that White had been promised a decision on numerous occasions and was still awaiting WHAM's decision. Then in a pleading filed June 4, 1974, the licensee alleges that White had rejected their offer of a part-time announcing position at WHFM.<sup>3</sup>

<sup>2</sup> The licensee contends that it had an opening for an accounting clerk and it so notified four area minority organizations. Rust asserts that James McCuller, executive director of Action for a Better Community, Inc., refused to refer available, qualified applicants because he considered the job to be less desirable than a concurrently available opening in the sales department which was not communicated to the organizations.

<sup>3</sup> While petitioners have not supported the charges regarding Mr. White with a proper affidavit, the licensee has never challenged the accuracy of the facts alleged.

27. Sections 73.125 and 73.301 of the Commission's Rules require commercial radio licensees both to refrain from employment discrimination and to establish affirmative action programs which encompass positive efforts to recruit, employ, and promote qualified minorities. In cases where employment profiles fall outside a "zone of reasonableness," the licensee must modify or supplement its recruitment practices and policies by vigorous and systematic efforts to locate and encourage the candidacy of qualified minorities. See, Inquiry Into the Employment Policies and Practices of Certain Broadcast Stations Located in Florida, 44 FCC 2d 735 (1974); see also Bilingual Bicultural Coalition of Mass Media, Inc. v. F.C.C., 429 F. 2d 656 (D.C. Cir. 1974); Chuck Stone v. F.C.C., 466 F. 2d 316 (D.C. Cir. 1972). Our rules do not require fully proportional employment of minority group members, and we do not believe that fair employment practices will necessarily result in the employment of any minority group in direct proportion to its percentage of the community population. However, highly disproportionate representation of minorities employed by a licensee in relation to their presence in the workforce could constitute prima facie evidence of discriminatory practice. Report and Order Docket Number 18244, 23 FCC 2d 430, 431 (1971); Stone v. F.C.C., supra. In this respect, it is the consequences of the licensee's employment practices, not the intent, which determine whether discrimination requiring remedial action exists. See, Rosenfeld v. Southern Pacific Company, 44 F. 2d 1219 (9th Cir. 1971). Accordingly, if it is found that no additional efforts were undertaken to recruit, employ and promote minority employees, or that efforts undertaken are clearly insufficient, then administrative action to secure compliance with the Commission's Rules would be appropriate.

28. A review of Rust's Annual Employment Report (FCC Form 395) for 1971 indicates that the licensee had 39 full-time employees which included one black service worker.<sup>4</sup> In 1972, the applicant reported 38 full-time employees with no minority personnel. The 1973 figures show a total full-time work force of 33 with no minority employees. The licensee filed separate reports in 1974 which show a total of 37 full-time employees and no minorities. Individually, WHAM reported 24 employees and WHFM(FM) 13.<sup>5</sup> According to the 1970 Census, blacks comprise 6.5 percent of the population of the Rochester Standard Metropolitan Statistical Area and 16.8 percent of the population of the city. Clearly, the li-

<sup>4</sup> For the years 1971, 1972 and 1973 Rust filed combined Annual Employment Reports for WHAM and WHFM(FM). For 1974, the licensee filed individual reports for each station.

<sup>5</sup> Although WHAM and WHFM(FM) have not as yet filed Annual Employment Reports for 1975, their supplemental renewal applications reflect 26 full-time employees at WHAM with no minorities and 11 full-time employees at WHFM(FM) including one black professional.

licensee's employment profile showing no full-time black employees is outside the zone of reasonableness. Rust's female employment, we believe, also warrants further investigation. The licensee's 1974 report shows only five (3.5 percent) women on a full-time staff of 37 persons and only one (3.1 percent) female among the "upper four" category jobs at the two stations. See, Florida Inquiry, supra. Rust's record over the past four years sharply focuses our attention on the applicant's affirmative action program.

29. As set forth in its 1972 renewal application, Rust's affirmative action program indicates that: when the stations advertise for job openings, advertisements will be placed in newspapers with significant minority and female circulation; while the licensee does not usually recruit in schools and colleges, when it does so, it will select schools and colleges with significant minority enrollment; and the stations will maintain contact with organizations with significant minority involvement in order to seek out minority applicants. While this program, on paper, represents more than employment neutrality, it produced no positive results between 1971 and 1974. Further, it does not appear that the applicant adhered to this program in all respects, when, in May, 1972, it referred only one of two job openings to local minority organizations. See note 7. Rust's original program is therefore inadequate and more positive efforts to recruit, employ and promote qualified minorities are required. See Florida Inquiry, supra; Rosenfeld v. Southern Pacific Company, supra.

30. In its supplemental renewal application filed February 3, 1975, the licensee's affirmative action program reflects that the stations will not ordinarily use newspaper advertisements or school and college recruitment in filling job openings because of specialized work involved at a station the size of WHAM or WHFM(FM). That program further states that "when suitable openings exist" the licensee will contact minority organizations in an effort to recruit minority applicants. We find that such an affirmative action program does not satisfy the requirements of our rules. The affirmative action concept is meaningless unless positive action is undertaken to overcome the effects of past discrimination, however inadvertent. It is this past discrimination which, the licensee alleges, makes qualified minority applicants hard to find, but the stations cannot hide behind that past discrimination. Rather our rules require positive additional efforts to locate and encourage the candidacy of qualified minorities. See, Florida Inquiry, supra. Rust's most recent affirmative action program falls far short of such efforts.

31. We are particularly concerned by this program's apparent classification of only some positions as "suitable" or

<sup>11</sup> The WHFM(FM) affirmative action program states "where feasible" referrals will be requested from minority organizations."

"feasible" for minority applicants. This limitation is diametrically opposed to the policies which give rise to our rules, particularly the concept that equal employment opportunity, as a minimum, requires that minorities be considered for all job openings. We are further troubled by the callousness inherent in this program, which lessens the licensee's efforts to recruit minorities in the face of three years of zero minority employment. Under these circumstances, we believe that a prima facie case of employment discrimination has been established. While the petitioners have not alleged sufficient facts to establish that the licensee's delay in resolving Al White's employment application constituted discrimination based on race, Rust's conduct therein adds to our concern that the applicant may not have adhered to its stated policy of non-discrimination and affirmative action. We further find that the facts before us are not sufficient to permit this Commission to determine what, if any, administrative actions would be appropriate to secure compliance with our rules. Accordingly appropriate issues will be designated, covering both minority and female employment.

#### OTHER MATTERS

32. Complainant contends that the licensee has been unprofessional in the presentation of news, public affairs and other programming. Metro-Act complains about the applicant's selection of news stories and interviews; asserts that the stations have not provided an opportunity for the expression of contrasting views on controversial subjects on its news, public affairs, or other programs; and that several of the licensee's public affairs programs are nothing more than propaganda for elected officials.

33. On the basis of Metro-Act's allegations, we must conclude that no further inquiry is warranted into this matter. Complainant has not claimed that the stations have violated the fairness doctrine, and the complaint is devoid of the specific allegations of time, program, issue and request for response time necessary to make out a complaint under the fairness doctrine. Metro-Act has further failed to allege specific facts to establish that the licensee has somehow abused its discretion in the selection of news stories, interviewees or subjects to be handled in other non-entertainment programming. The Commission is prohibited by Section 326 of the Communications Act from censoring broadcast matter or from taking any action which would interfere with the right of free speech in broadcasting. Therefore, this Commission will not substitute its judgment for that of a licensee in the selection and presentation of material for programs of news or comment. Absent extrinsic evidence of deliberate distortion, slanting or staging, the Commission will not inquire into a licensee's decisions to cover or not to cover certain stories or certain persons. In re CBS Program "Hunger in America", 20 FCC 2d 143 (1969).

34. Accordingly, *it is ordered*, That

pursuant to Section 309(e) of the Communications Act of 1934, as amended, the captioned applications are designated for hearing at a time and place to be specified in a subsequent Order, upon the following issues:

(1) To determine the efforts made by Rust Communications Group, Inc., to ascertain the community problems of the area to be served and the manner in which the applicant proposes to meet these problems;

(2) To determine whether Rust Communications Group, Inc. made reasonable and good faith efforts to carry out its Public Affairs programming proposal set forth in its 1969 application for renewal of license for Station WHAM during the 1969-1972 license term;

(3) To determine whether Rust Communications Group, Inc.'s non-entertainment programming (i.e., News, Public Affairs and Other) of Station WHAM was reasonably responsive to the community problems, needs and interests.

(4) To determine whether Rust Communications Group, Inc. has met the requirements of the Commission's equal employment opportunity rules and policies, in the formulation and implementation of its non-discrimination and affirmative action programs as reflected in both the 1972 renewal application and the 1975 supplement thereto;

(5) To determine, in light of the evidence adduced under the preceding issue, what sanctions, if any, should be imposed to eliminate past discriminatory practices and to insure compliance with our rules in the future;

(6) To determine in light of the evidence adduced under the above issues, whether the applicant has the requisite qualifications to be or remain a Commission licensee, and whether a grant of the applications would serve the public interest, convenience and necessity.

35. *It is further ordered*, That Action for a Better Community, Inc., et al. and Metro-Act of Rochester, Inc. ARE MADE PARTIES RESPONDENT to this proceeding.

36. *It is further ordered*, That in accordance with Section 309(e) of the Communications Act of 1934, as amended, the burden of proceeding with the introduction of evidence shall be on Action for a Better Community, Inc., et al. and Metro-Act of Rochester, Inc., as to Issues (1) through (5). The burden of proceeding with respect to Issue (6), and the burden of proof with respect to all issues herein shall be upon Rust Communications Group, Inc.

37. *It is further ordered*, That, to avail themselves of the opportunity to be heard, Rust Communications Group, Inc., the petitioners and the complainant, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, shall within twenty (20) days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and

present evidence on the issues specified in this Order.

38. *It is further ordered*, That Rust Communications Group, Inc. shall, pursuant to section 3.11(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such rules, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the Rules.

Adopted: May 8, 1975.

Released: May 22, 1975.

#### BOSTON EDISON CO.

##### Notice of Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 9 to Facility Operating License No. DPR-35 issued to the Boston Edison Company (the licensee), which revised Technical Specifications for operation of the Pilgrim Nuclear Power Station (the facility), located in Plymouth County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment requires operability and surveillance of hydraulic snubbers required to protect the primary coolant system and all other safety related systems and components in accordance with the licensee's request dated October 7, 1974.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Ch. I, which are set forth in the license amendment. Prior public notice of this amendment is not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated October 7, 1974, (2) Amendment No. 9 to License No. DPR-35, with Change No. 11, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the

Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 15th day of May 1975.

For the Nuclear Regulatory Commission.

[Docket Nos. 50-514, 50-515]

#### PORTLAND GENERAL ELECTRIC CO. (PEBBLE SPRINGS NUCLEAR PLANT, UNITS 1 AND 2)

##### Schedule for Evidentiary Hearing

The U.S. Atomic Energy Commission by its December 9, 1974 "Notice Of Hearing On Application For Construction Permits", 39 FR 42938, ordered a public hearing to be held on the application by the Portland General Electric Company for construction permits for two pressurized water nuclear reactors designated as the Pebble Springs Nuclear Plant, Units 1 and 2, each of which would be designed for operation at 3,600 thermal megawatts with a net electrical output of approximately 1,260 megawatts. The proposed facilities are to be located in Gilliam County, Oregon.

The hearing on this application will be conducted by the Atomic Safety and Licensing Board, which has been designated by the Chairman of the Atomic Safety and Licensing Board Panel, consisting of Dr. Walter H. Jordan, Dr. William E. Martin, and James R. Yore, Esq., Chairman.

The evidentiary hearing is scheduled to begin at 10 a.m., local time, on Tuesday, June 24, 1975, in the Arlington Elementary School, Arlington, Oregon 97812. Members of the public are invited to attend this hearing. Individuals or representatives of organizations wishing to make limited appearances pursuant to § 2.715(a) of the Commission's rules of practice, 10 CFR Part 2, will be permitted to do so on Tuesday, June 24, 1975.

It is so ordered.

Dated at: Bethesda, Maryland this 21st day of May 1975.

For the Atomic Safety and Licensing Board.

JAMES R. YORE, Chairman.

[FR Doc.75-13714 Filed 5-23-75;8:45 am]

Pursuant to the Energy Reorganization Act, Pub. L. 93-438, all the regulatory and licensing functions of the Atomic Energy Commission were transferred to the Nuclear Regulatory Commission.

[Docket No. 50-249]

#### COMMONWEALTH EDISON CO. (DRESDEN NUCLEAR POWER STATION UNIT 3)

##### Proposed Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-25 issued to the Commonwealth Edison Company (the licensee) for operation of the Dresden Nuclear Power Station Unit 3 (the facility) located in Grundy County, Illinois. The licensee is presently licensed to operate the facility, a boiling water reactor, at power levels up to 2527 MWT using a mixture of 8x8 and 7x7 fuel assemblies in the core.

The amendment would revise the provisions in the facility Technical Specifications to permit operation of the facility (1) with additional 8x8 fuel assemblies, (2) using operating limits based on the General Electric Thermal Analysis Basis (GETAB), and (3) using modified operating limits based upon an evaluation of ECCS performance calculated in accordance with an acceptable evaluation model that conforms to the requirements of the Commission's regulations in 10 CFR § 50.46. The amendment would modify various limits established in accordance with the Commission's Interim Acceptance Criteria, and would, with respect to Dresden Unit 3, terminate the further restrictions imposed by the Commission's December 27, 1974, Order For Modification of License, and would impose instead, limitations established in accordance with the Commission's Acceptance Criteria for Emergency Core Cooling Systems for Light Water Nuclear Power Reactors, 10 CFR § 50.46. This action is in accordance with the licensee's applications dated January 21, 1975 (as supplemented by letter dated February 11, 1975), April 4, 1975 and May 5, 1975.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. By June 26, 1975 the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendment to the subject facility operating license. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of § 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and § 2.714, and must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Wash-

ington, DC. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC. 20555, and to John W. Rowe, Esquire, Isham, Lincoln and Beale, One First National Plaza, Chicago, Illinois 60670, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested. Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see (1) the applications for amendment dated January 21, 1975 (as supplemented by filing dated February 11, 1975) April 4 and May 5, 1975, (2) the Technical Report on the General Electric Company 8x8 Fuel Assembly dated February 5, 1974, by the Directorate of Licensing, (3) the Report of the Advisory Committee on Reactor Safeguards on operation with 8x8 fuel assemblies dated February 12, 1974, (4) the non-proprietary General Electric Report NEDO-10958 on GETAB, (5) the Commission's evaluation dated September 1974 of the General Electric Report (NEDO-10953), (6) the Commission's Order for Modification of License dated December 27, 1974 and the documents referred to in the Order (published in the FEDERAL REGISTER on January 9, 1975 (40 FR 1790), and (7) the Commission's "Notice of Proposed Issuance of Amendment to Facility Operating License", dated November 14, 1974, relating to Dresden Unit 3 high total peaking factors, which was published in the FEDERAL REGISTER on November 21, 1974 (39 FR 40880). (Item 7 is referred to in the April 4, 1975 application referenced in item (1) above.) All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, DC, and at the Morris Public Library at 604 Liberty Street in Morris, Illinois 60451. The license amendment and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the

U.S. Nuclear Regulatory Commission, Washington, DC. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland this 21st day of May 1975.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,  
Chief, Operating Reactors  
Branch 2, Division of Reactor Licensing.

#### SECURITIES AND EXCHANGE COMMISSION

##### BOSTON STOCK EXCHANGE

##### Applications for Unlisted Trading Privileges and of Opportunity for Hearing

MAY 20, 1975.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stocks of the following companies, which securities are listed and registered on one or more other national securities exchanges:

File No.

E. F. Hutton Group, Inc. (The)----- 7-4731  
Safeguard Industries, Inc.----- 7-4732

Upon receipt of a request, on or before June 5, 1975, from any interested person, the Commission will determine whether the application with respect to any of the companies named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on any of the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549 not later than the date specified. If no one requests a hearing with respect to any particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

#### INTEGRITY ENTERTAINMENT CORP.

##### Suspension of Trading

MAY 19, 1975.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common

stock of Integrity Entertainment Corp. being traded otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

Therefore, pursuant to section 15(c) (5) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended, for the period from 9:45 a.m. (e.d.t.) on May 19, 1975 through midnight (e.d.t.) on May 28, 1975.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

#### CONSOLIDATED NATURAL GAS CO.

##### Proposed Issue and Sale of Principal Amount of Debentures at Competitive Bidding

MAY 20, 1975.

Notice is hereby given that Consolidated Natural Gas Company ("Consolidated") 30 Rockefeller Plaza, New York, New York 10020, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Consolidated proposes to issue and sell, subject to the competitive bidding requirements of Rule 50, \$100,000,000 principal amount of — percent Debentures due July 1, 1995. The interest rate (which will be a multiple of  $\frac{1}{8}$  of 1 percent) and the price, exclusive of accrued interest (which will be not less than 99 percent or more than 102 percent of the principal amount thereof) will be determined by competitive bidding. The debentures will be issued as a new series under a Fifth Supplemental Indenture, dated as of July 1, 1975, to the Indenture between Consolidated and Manufacturers Hanover Trust Company, New York, New York, as Trustee. The Indenture includes a prohibition until July 1, 1980, against refunding the issue with or in anticipation of funds borrowed at a lower effective interest cost. The debentures will be subject to a sinking fund, commencing July 1, 1980, designed to retire 100 percent of the aggregate principal amount thereof by maturity. The proceeds of the sale of the debentures will be used to finance, in part, the 1975 capital expenditures of Consolidated's subsidiary companies, presently estimated at \$198,000,000, including \$161,600,000 required to develop sources of additional gas supply.

It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated at \$158,000 including \$30,000 service charges at cost, and accountants fees and

expenses of \$13,000. The fees and expenses of counsel for the underwriters are to be paid by the successful bidders; the amount will be supplied by amendment.

It is further stated that no State commission and no Federal commission other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 15, 1975, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from its rules under the Act as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[70-5677; Rel. No. 18992]

#### MONONGAHELA POWER CO.

##### Proposed Issuance and Sale of First Mortgage Bonds at Competitive Bidding

MAY 19, 1975.

Notice is hereby given that Monongahela Power Company ("Monongahela"), 1310 Fairmont Avenue, Fairmont, West Virginia 26554, an electric utility subsidiary company of Allegheny Power System, Inc. ("APS"), registered holding company, has filed an application-declaration and amendments thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6 and 7 of the Act and Rule 50 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, as amended, which is summarized below,

for a complete statement of the proposed transaction.

Monongahela proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, up to \$30,000,000 principal amount of First Mortgage Bonds, in one or more series, each such series to mature in not less than 5 and not more than 30 years. The interest rate (which will be expressed in a multiple of  $\frac{1}{8}$  of 1 percent) and the price to be paid to Monongahela for the Bonds (which shall not be less than 100 percent unless Monongahela shall authorize a lower percentage not less than 99 percent, and shall not exceed 102.75 percent) will be determined by competitive bidding. The terms of the Bonds preclude Monongahela from redeeming any such Bonds prior to June 1, 1980, if such redemption is for the purpose of refunding such Bonds with proceeds of funds borrowed at a lower effective interest cost. The Bonds will be issued under and secured by the Mortgage and Deed of Trust, dated as of August 1, 1945, as supplemented, to First National City Bank ("Trustee"), and a new Indenture Supplemental thereto which will be dated as of the first day of the month in which the Bonds are to be issued.

The proceeds realized from the sale of the Bonds are proposed to be used to pay short-term debt incurred by the Company, and to pay all or a part of the \$32,000,000 of 3 percent First Mortgage Bonds which mature on August 1, 1975. As of April 21, 1975, \$7,000,000 in short-term borrowings were outstanding, and it is anticipated that at the time of the issuance and delivery of the Bonds, approximately \$19,000,000 in short-term borrowings will be outstanding.

The fees and expenses to be incurred in connection with the proposed transaction will be supplied by amendment. It is stated that the Public Utilities Commission of Ohio has jurisdiction over the proposed issuance and sale of the Bonds and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 9, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the

application-declaration, as amended or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc.75-13728 Filed 5-23-75; 8:45 am]

[70-5679; Rel. No. 18987]

#### OHIO POWER CO.

##### Proposed Acquisition of Coal Cars and Sublease of Certain of Said Cars to Railroad Companies

MAY 15, 1975.

Notice is hereby given that Ohio Power Company ("Ohio Power"), 301 Cleveland Avenue SW, Canton, Ohio 44701, an electric utility subsidiary company of American Electric Power Company, a registered holding company, has filed with this Commission an application-declaration pursuant to the applicable provisions of the Public Utility Holding Company Act of 1935 ("Act") regarding the acquisition by lease of coal cars and related transactions. Ohio Power requests approval of these transactions, unless advised by the Commission that approval thereof under the Act is not required. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Ohio Power states that it has entered into agreements with Bethlehem Steel Corporation ("Bethlehem") and Greenville Steel Car Corporation ("Greenville") for the manufacture of 377 coal hopper cars by Bethlehem (collectively, the "cars") for aggregate purchase prices of approximately \$9,425,000 and \$10,630,000, respectively. By assignments dated December 23, 1974 and February 18, 1975, Ohio Power assigned its right to purchase the Bethlehem and Greenville cars, respectively, to C.I.T. Financial Services, Inc. ("lessor"). Ohio Power and lessor have entered into two leases ("lease #1" and "lease #2") dated December 23, 1974, with respect to the Bethlehem and Greenville cars, respectively. The leases are subject to the receipt of any required approval of this Commission.

Terms of the leases require Ohio Power to pay rent on the cars in the following manner: Ohio Power has paid, or will pay, to lessor an initial payment of rent on April 2, 1975 (for lease #1) and July 2, 1975 (for lease #2) in an amount

equal to .0355 percent of the purchase price of each car, and thereafter pay in sixty consecutive quarterly installments an amount equal to 3.194 percent of the purchase price thereof (or approximately \$798.50 and \$910.29 per car per quarter under lease #1 and #2, respectively). It is stated that the leases are net leases pursuant to which Ohio Power will pay the rents required thereunder unless such obligation to pay is executed or terminated under terms of the leases. Each lease contains a provision granting Ohio Power the option to purchase the cars from the lessor at a fair market sales value, said value to be determined on the basis of an arms-length transaction. These options to purchase may be exercised at the end of the leases or any extended term thereof. Ohio Power and the lessor have further agreed that in the event this Commission does not issue a no-action letter or approve Ohio Power's participation in the leases by June 15, 1975, Ohio Power will purchase the cars from the lessor at a price for each car equal to the sum of (i) the purchase price of the car, plus (ii) .0355 percent of said purchase price for each day which has elapsed between the acceptance of such car to and including June 15, 1975, plus (iii) certain expenses and (iv) less an amount equal to the initial rental payment.

It is further stated that Ohio Power is presently utilizing 167 of the 377 Bethlehem cars for the delivery of coal to its Mitchell Plant in West Virginia. Until the cars are fully utilized, Ohio Power has sublet 60 of the remaining cars to The Chesapeake and Ohio Railway Company ("C&O") under an agreement dated as of December 24, 1974 ("sublease"). Under terms of the sublease, Ohio Power may terminate the sublease of any and all cars upon 10 days' written notice to C&O. It is stated that the rental payments to Ohio Power from C&O are \$270 per car per month and that this is substantially equal to Ohio Power's cost under the lease. It is further stated that 150 of the Bethlehem cars are being subleased to the Burlington Northern ("BN") railroad under terms similar to those in effect with C&O. The C&O and BN subleases contemplate that additional cars may be made subject to those agreements.

Ohio Power's entry into Leases No. 1 and No. 2 have been expressly authorized by the Public Utilities Commission of Ohio and no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses to be incurred in connection with the proposed transactions are estimated at \$12,500, including legal fees of \$10,000.

Notice is further given that any interested person may, not later than June 11, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert, or he may request that he be notified if the

Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc.75-13729 Filed 5-23-75; 8:45 am]

[Rel. No. 18994; 31-750, etc.]

#### EMPIRE STATE POWER RESOURCES, INC. ET AL

##### Utility Companies; Proposal to Acquire Stock of Electric Generation Subsidiary; Applications for Exemptions

MAY 19, 1975.

In the matter of Empire State Power Resources, Inc., c/o Milbank, Tweed, Hadley & McCloy, 1 Chase Manhattan Plaza, New York, New York 10005; Consolidated Edison Company of New York, Inc., 4 Irving Place, New York, New York 10003, (31-750); Long Island Lighting Company, 250 Old Country Road, Mineola, New York 11501 (31-751); New York State Electric & Gas Corporation, 4500 Vestal Parkway East, Binghamton, New York 13902 (31-752); Niagara Mohawk Power Corporation, 300 Erie Boulevard West, Syracuse, New York 13202 (70-5681); (31-753); Rochester Gas and Electric Corporation, 89 East Avenue, Rochester, New York 14649 (70-5681). (31-754).

Notice is hereby given that Empire State Power Resources, Inc. ("ESPRI"), a newly-organized electric generating company, and five of its seven sponsoring public-utility companies, Consolidated Edison Company of New York, Inc. ("Con Ed"), Long Island Lighting Company ("LILCO"), New York State Electric & Gas Corporation ("NYSEG"), Niagara Mohawk Power Corporation ("Niagara Mohawk") and Rochester Gas and Electric Corporation ("RG&E"), have filed with this Commission a joint

application, including requests for exemptions, pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating, to the extent applicable, sections 3(a)(1), 3(a)(2), 9(a)(2) and 10 of the Act. All interested persons are referred to the joint application, which is summarized below, for a complete statement of the proposals.

ESPRI was organized under New York law in 1974 by seven public-utility companies ("Sponsors"). The Sponsors include the five applicants named above and Central Hudson Gas & Electric Corporation ("Central Hudson") and Orange and Rockland Utilities, Inc. ("Orange and Rockland"). The Sponsors intend, through ESPRI, to facilitate the development of power resources in the State of New York for the period 1980-1991 in order to supply anticipated load growth in the Sponsors' service areas, to provide reserve capacity, and to allow for retirement of uneconomical generating units. It is stated that the collective participation of the Sponsors in developing such capacity will relieve the Sponsors of the burden of financing future needs on an individual basis, will allow them to share the financial risks, and should make financing more readily available.

It is proposed that ESPRI will construct thirteen nuclear and three coal-fired base-load units at various locations throughout New York State, with a total rated capacity of 18,600 MW. The various units are expected to be placed in service from time to time, with the first unit scheduled for the summer of 1980. Preliminary work has been started by several of the Sponsors on four units. ESPRI plans to acquire all work-in-progress and other property interests related to these units and to complete construction. Although ESPRI will assume full responsibility for all units and will ultimately employ its own staff, it may, during the initial years, enter into contracts for services with one or more of its Sponsors.

To defray organizational costs and to provide ESPRI with funds for engineering, siting, planning, legal, financial and other studies to be undertaken in connection with its long-term construction program, the Sponsors propose to acquire up to 2,000 shares of ESPRI's capital stock, par value \$1.00 per share, at a price of \$1,000 per share for an aggregate price of up to \$2,000,000. The number of shares, purchase price and percentage of the outstanding total of such shares to be acquired by each Sponsor shall be as follows:

Sponsor	Number of shares	Purchase price	Percentage of total
Consolidated Edison	400	\$400,000	20
LILCO	400	400,000	20
NYSEG	400	400,000	20
Niagara Mohawk	400	400,000	20
RG&E	200	200,000	10
Central Hudson	110	110,000	5.5
Orange and Rockland	90	90,000	4.5
Total	2,000	2,000,000	100

It is stated that the number of shares proposed to be purchased by each Sponsor has been determined on the basis of the approximate percentage of ESPRI's capital stock to be owned by each Sponsor following completion of the last of the sixteen generating units now proposed to be constructed by ESPRI. If less than 2,000 of ESPRI's shares of capital stock are issued, the number of shares purchased by each Sponsor will be in the respective proportions set forth above.

It is estimated that over \$20 billion in capital funds will be required to complete ESPRI's construction program. To finance these costs, in part, the Sponsors propose to acquire additional shares of capital stock. The Sponsors also expect to arrange for interim financing in the form of lines of credit, term loans and other commitments. It is expected that the permanent capitalization of the company will consist of approximately 60 percent senior debt, 20 percent pollution control financing, and 20 percent common equity.

Each Sponsor has tentatively designated the percentage of capacity of a particular unit that it will require, and pursuant to a capital funds agreement each of the Sponsors will be obligated to provide the same percentage of capital funds required to complete the unit. The Sponsors participating in a particular unit will also enter into a long-term power contract with respect to such unit. Under each power contract, a participating Sponsor will be obligated to pay its pro rata share of total capacity costs of all the units based on the percentage of capacity which it has agreed to purchase from all of the units. Such capacity payments will be made without regard to the amount of energy produced by an individual unit, and each participating Sponsor will be entitled to purchase its share of energy output at an average cost determined on a systemwide basis.

It is further provided that upon any default by a participating Sponsor under either the power contract or capital funds agreement, the remaining participating Sponsors must increase their participation on a pro-rata basis in order to satisfy the obligations of the defaulting participant.

Con Ed, LILCO and NYSEG, each of which is organized under New York law, provide gas and electric service to customers exclusively within New York State. None of the three companies is now a holding company or an affiliate of a public-utility company, and no part of their revenues are derived from public utility operations outside of New York State. Since each proposes to acquire more than 10 percent of ESPRI's capital stock, each will be a holding company as defined by the Act.

RG&E is a public-utility company and an exempt holding company under the Act (HCAR No. 9296, August 25, 1949) by virtue of its ownership of all of the outstanding stock of Canadea Power Corporation ("Canadea"). Its acquisition of ESPRI's capital stock is, therefore, subject to sections 9(a)(2) and 10 of the

Act. Canadea is organized and operated in New York State. No part of RG&E's income is derived from public utility operations outside of New York State.

Niagara Mohawk is also an exempt holding company under section 3(a)(1) of the Act pursuant to Rule 2 thereunder by virtue of its ownership of all of the outstanding stock of two Canadian electric utility companies and 82.78 percent of the voting stock of an hydro-electric generation subsidiary company. Its acquisition of ESPRI's stock will also be subject to section 9(a)(2) and 10 of the Act. Only Niagara Mohawk, among the five applicants, derives income from public utility subsidiaries which are not organized and operated within New York State. Its two Canadian subsidiaries, on a combined basis, serve approximately 14,000 retail electric consumers in the Province of Ontario. For the period ended December 31, 1974, gross revenues from such sales were \$9,836,000 after adjustments are made for sales to and purchases from Niagara Mohawk. The Canadian gross subsidiary revenues represent approximately 1 1/2 percent of Niagara Mohawk's consolidated electric revenues. All of Niagara Mohawk's gas revenues are derived from sales within New York State.

Orange and Rockland and Central Hudson are not applicants in this proceeding since neither company's acquisition of ESPRI's stock is subject to sections 9(a)(2) and 10 of the Act. Moreover, neither company will become a holding company with respect to ESPRI.

The Public Service Commission of the State of New York has jurisdiction over the issuance and sale of ESPRI's capital stock and over the acquisition thereof by its Sponsors. The Federal Power Commission has jurisdiction over the acquisition of ESPRI's capital stock by those Sponsors not requiring Commission approval under sections 9(a)(2) and 10. The orders of those commissions approving the proposed transactions will be supplied by amendment. No other State or Federal commission, other than this Commission, has jurisdiction over the proposed transaction and applications for exemption. A statement of the fees, commissions and expenses incurred or to be incurred in connection with the proposed transaction will also be supplied by amendment.

Notice is further given that any interested person may, not later than June 13, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants at the above-

stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc.75-13730 Filed 5-23-75; 8:45 am]

[70-5683; Rel. No. 18995]

#### NEW ORLEANS PUBLIC SERVICE INC.

Issuance and Sale of Short-Term Promissory Notes to Banks

MAY 20, 1975.

Notice is hereby given that New Orleans Public Service Inc. ("NOPSI"), 317 Baronne Street, New Orleans, Louisiana 70160, an electric utility subsidiary company of Middle South Utilities, Inc., a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act as applicable to the following proposed transactions. All interested persons are referred to said declaration, which is summarized below, for a complete statement of the proposed transactions.

NOPSI proposes to issue and sell short-term notes to a group of banks from time to time through December 31, 1976. The maximum aggregate principal amount of notes outstanding at any one time shall not exceed the lesser of \$18,000,000 or 10 percent of the capitalization of the company, which is the maximum amount of unsecured borrowing permissible under the provisions of NOPSI's Restated Articles of Incorporation without the consent of the holders of a majority of the total number of shares of preferred stock outstanding. Applying this formula to the company's capitalization at March 31, 1975, an aggregate principal amount of \$21,442,699 of promissory notes would be issuable.

The proposed notes are to be issued and sold to the banks as listed below, will be due not more than nine months from date of issuance, will bear interest at the prime rate in effect at the time of borrowing, and are to be prepayable in whole or in part at any time without premium:

#### NOTICES

[In thousands of dollars]

	Present loans	Proposed maximum additional loans	Maximum loans to be outstanding
Whitney National Bank of New Orleans	\$3,000	\$5,100	\$8,100
Hilberts National Bank in New Orleans	2,000	1,500	3,500
First National Bank of Commerce in New Orleans		3,000	3,000
National American Bank of New Orleans		2,400	2,400
Chase Manhattan Bank		1,000	1,000
Total	5,000	13,000	18,000

No commitment fee and no compensating balances are required for any of the proposed borrowings.

It is further stated that the net proceeds to be received by NOPSI from the issuance and sale of the notes, together with other funds available from time to time from operations, will be applied principally to the company's construction program which is expected to result in expenditures of approximately \$19,000,000 in 1975 and \$20,500,000 in 1976.

The declaration also states that no State or Federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses to be incurred in connection with the proposed transactions are estimated to be less than \$4,000.

Notice is further given that any interested person may, not later than June 16, 1975, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request.

At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

#### ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

##### COMMITTEE ON RATE MAKING AND ECONOMIC REGULATION

###### Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Committee on Rate Making and Economic Regulation of the Administrative Conference of the United States, to be held at 10 a.m., June 5, 1975, in the office of the Administrative Conference of the U.S., 2120 L Street NW., Suite 500, Washington, D.C.

The Committee will meet for a general discussion of future projects.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify this office at least one day in advance. The Committee Chairman may, if he deems it appropriate, permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee, before, during, or after the meeting.

This meeting is being called without the customary notice period in order to take advantage of the presence of Committee members at the plenary session of the Conference.

For further information concerning this Committee meeting contact Mr. David B. H. Martin (phone 202-254-7065). Minutes of the meeting will be available on request.

Dated: May 23, 1975.

RICHARD K. BERG,  
Executive Secretary.

#### INTERSTATE COMMERCE COMMISSION

##### IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY

###### Elimination of Gateway Letter Notices

MAY 21, 1975.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed

with the Interstate Commerce Commission on or before June 6, 1975. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 21170 (Sub-No. E84), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along Iowa Highway 4 to junction Iowa unnumbered highway, thence along Iowa unnumbered highway to junction Iowa Highway 341, thence along Iowa Highway 341 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction Iowa Highway 175, thence along Iowa Highway 175 to junction Iowa Highway 39, thence along Iowa Highway 39 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction Iowa Highway 148, thence along Iowa Highway 148 to junction unnumbered highway, thence along unnumbered highway to the Iowa-Missouri State line, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along Illinois Highway 140 to junction U.S. Highway 40, thence along U.S. Highway 40 to junction unnumbered highway at Montrose, thence along unnumbered highway to junction Illinois Highway 13 at Rose Hill, thence along Illinois Highway 130 to junction unnumbered highway, thence along unnumbered highway to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E85), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Sec-

tion 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 63 to junction Iowa Highway 21, thence along Iowa Highway 21 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction Iowa Highway 108, thence along Iowa Highway 108 to junction unnumbered highway, thence along unnumbered highway to junction Iowa Highway 149, thence along Iowa Highway 149 to junction U.S. Highway 63, thence along U.S. Highway 63 to the Iowa-Missouri State line, to points in Illinois on and south of a line beginning at the Illinois-Missouri State line and extending along Illinois Highway 3 to junction Illinois Highway 149, thence along Illinois Highway 149 to junction Illinois Highway 13, thence along Illinois Highway 13 to junction Illinois Highway 34, thence along Illinois Highway 34 to the Illinois-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo.

No. MC 21170 (Sub-No. E86), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, and restricted to such commodities as are from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 65 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 69, thence along U.S. Highway 69 to the Iowa-Missouri State line, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along U.S. Highway 50 to junction Illinois Highway 161, thence along Illinois Highway 161 to junction Illinois Highway 37, thence along Illinois Highway 37 to junction Illinois Highway 15, thence along Illinois Highway 15 to junction U.S. Highway 45, thence along U.S. Highway 45 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction unnumbered highway at Carmi, thence along unnumbered highway to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo.

No. MC 21170 (Sub-No. E87), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier,

by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Minnesota-Iowa State line and extending along U.S. Highway 52 to junction Iowa Highway 24, thence along Iowa Highway 24 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 21, thence along Iowa Highway 21 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction Iowa Highway 108, thence along Iowa Highway 108 to junction Iowa Highway 149, thence along Iowa Highway 149 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction unnumbered highway at Bloomfield, thence along unnumbered highway to the Iowa-Minnesota State line, to points in Illinois on, south, and west of a line beginning at the Missouri-Illinois State line and extending along Illinois Highway 146 to junction Illinois Highway 3, thence along Illinois Highway 3 to junction unnumbered highway, thence along unnumbered highway through Diswood to junction Illinois Highway 127, thence along Illinois Highway 127 to junction unnumbered highway, thence along unnumbered highway to junction U.S. Highway 51, thence along U.S. Highway 51 to the Illinois-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo.

No. MC 21170 (Sub-No. E88), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Sections 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 59 to junction unnumbered highway to junction Iowa Highway 60, thence along Iowa Highway 60 to junction unnumbered highway at LeMars, thence along unnumbered highway to junction U.S. Highway 20, thence along U.S. Highway 20 to junction unnumbered highway, thence along unnumbered highway through Danbury to junction Iowa Highway 141, thence along Iowa Highway 141 to junction Iowa Highway 183, thence along Iowa Highway 183 to junction Iowa Highway 37, thence along Iowa Highway 37 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction

unnumbered highway, thence along unnumbered highway to junction Iowa Highway 48, thence along Iowa Highway 48 to junction U.S. Highway 59, thence along U.S. Highway 59 to the Iowa-Missouri State line, to points in Indiana on and south of a line beginning at the Illinois-Indiana State line and extending along U.S. Highway 70 to junction Indiana Highway 39, thence along Indiana Highway 39 to junction Indiana Highway 42, thence along Indiana Highway 42 to junction Indiana Highway 144, thence along Indiana Highway 144 to junction Indiana Highway 44, thence along Indiana Highway 44 to junction U.S. Highway 27, thence along U.S. Highway 27 to junction U.S. Highway 40, thence along U.S. Highway 40 to the Indiana-Ohio State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo.

No. MC 21170 (Sub-No. E89), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along Iowa Highway 4 to junction Iowa Highway 175, thence along Iowa Highway 175 to junction U.S. Highway 71, thence along U.S. Highway 71 to the Iowa-Missouri State line, to points in Indiana on and south of a line beginning at the Illinois-Indiana State line and extending along Indiana Highway 54 to junction U.S. Highway 41-150, thence along U.S. Highway 41-150 to junction Indiana Highway 54, thence along Indiana Highway 54 to junction Indiana Highway 37, thence along Indiana Highway 37 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction Indiana Highway 39, thence along Indiana Highway 39 to junction Indiana Highway 250, thence along Indiana Highway 250 to junction Indiana Highway 7, thence along Indiana Highway 7 to junction Indiana Highway 62, thence along Indiana Highway 62 to junction Indiana Highway 250, thence along Indiana Highway 250 to the Indiana-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo.

No. MC 21170 (Sub-No. E91), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicles, over irregular routes, transporting: Food products and com-

modities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 59 to junction Iowa Highway 175, thence along Iowa Highway 175 to junction Iowa Highway 141, thence along Iowa Highway 141 to junction Iowa Highway 183, thence along Iowa Highway 183 to junction Iowa Highway 37, thence along Iowa Highway 37 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction U.S. Highway 71, thence along U.S. Highway 71 to the Iowa-Missouri State line, to points in Kentucky. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc. pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E92), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale and chain grocery stores, from points in Iowa on and west of U.S. Highway 69 to points in Kentucky on and south of a line beginning at the Indiana-Kentucky State line and extending along U.S. Highway 460 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction Kentucky Highway 32, thence along Kentucky Highway 32 to the Kentucky-West Virginia State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc. pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E95), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economics regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale and chain grocery stores, from points in Iowa on and west of a line beginning at the Minnesota-Iowa State line and extending

along unnumbered highway through Lake Park to junction Iowa Highway 10 at Peterson, thence along Iowa Highway 10 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction Iowa Highway 141, thence along Iowa Highway 141 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 69 to junction U.S. Highway 65, thence along U.S. Highway 65 to the Iowa-Missouri State line, to points in Virginia. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc. pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E120), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohutki (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 169 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa Highway 117, thence along Iowa Highway 117 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction Iowa Highway 163, thence along Iowa Highway 163 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction unnumbered highway near Melton, thence along unnumbered highway through Cantril, to the Iowa-Missouri State line, to points in Connecticut on and east of a line beginning at the Connecticut-Massachusetts State line and extending along U.S. Highway 86 to junction Connecticut Highway 89, thence along Connecticut Highway 89 to junction Connecticut Highway 66, thence along Connecticut Highway 66 to junction Connecticut Highway 17, thence along Connecticut Highway 17 to junction U.S. Highway 91, thence along U.S. Highway 91 to the Atlantic Ocean. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E121), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa

52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along Iowa Highway 9 to junction Iowa Highway 182, thence along Iowa Highway 182 to junction U.S. Highway 18, thence along U.S. Highway 18 to junction U.S. Highway 75, thence along U.S. Highway 75 to junction Iowa Highway 3, thence along Iowa Highway 3 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Iowa Highway 44, thence along Iowa Highway 44 to junction Iowa Highway 25, thence along Iowa Highway 25 to junction U.S. Highway 80, thence along U.S. Highway 80 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction unnumbered highway at Bloomfield, thence along unnumbered highway through Savannah to the Iowa-Missouri State line, to points in New Jersey. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E122), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along Iowa Highway 4 to junction Iowa Highway 7, thence along Iowa Highway 7 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Iowa Highway 141, thence along Iowa Highway 141 to junction Iowa Highway 89, thence along Iowa Highway 89 to junction Iowa Highway 210, thence along Iowa Highway 210 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction unnumbered highway at Bloomfield, thence along unnumbered highway through Savannah, to the Iowa-Missouri State line, to points in New Jersey on, west,

and south of a line beginning at the New Jersey-Pennsylvania State line and extending along New Jersey Highway 12 to junction U.S. Highway 202, thence along U.S. Highway 202 to junction U.S. Highway 208, thence along U.S. Highway 208 to junction U.S. Highway 80, thence along U.S. Highway 80 to junction U.S. Highway 202, thence along U.S. Highway 202 to the New Jersey-New York State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E123), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and west of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 169 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 65, thence along U.S. Highway 65 to junction Iowa Highway 117, thence along Iowa Highway 117 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction Iowa Highway 14, thence along Iowa Highway 14 to junction Iowa Highway 163, thence along Iowa Highway 163 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction unnumbered highway near Milton, thence along unnumbered highway through Cantrill, to the Iowa-Missouri State line, to points in New Jersey on and bounded by a line beginning at the Delaware Bay and extending along New Jersey Highway 548 to junction New Jersey Highway 552, thence along New Jersey Highway 552 to junction U.S. Highway 40, thence along U.S. Highway 40 to the Atlantic Ocean. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E124), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and com-

modities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa on and bounded by a line beginning at the Iowa-Nebraska State line and extending along U.S. Highway 75 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction unnumbered highway near Mark, thence along unnumbered highway through Savannah, to the Iowa-Missouri State line, to points in New York on and east of a line beginning at Lake Ontario and extending along New York Highway 104 to junction New York Highway 34, thence along New York Highway 34 to junction New York Highway 13, thence along New York Highway 13 to junction New York Highway 14, thence along New York Highway 14 to the New York-Pennsylvania State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E125), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa, on, west, and south of a line beginning at the Iowa-Nebraska State line and extending along U.S. Highway 75 to junction Iowa Highway 37, thence along Iowa Highway 37 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Iowa Highway 92, thence along Iowa Highway 92 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction unnumbered highway at Mark, thence along unnumbered highway through Savannah, to the Iowa-Missouri State line, to points in New York, on, south, and east of a line beginning at the New York-Pennsylvania State line and extending along New York Highway 17 to junction New York Highway 10, thence along New

York Highway 10 to junction New York Highway 7, thence along New York Highway 7 to junction New York Highway 30, thence along New York Highway 30 to junction New York Highway 67, thence along New York Highway 67 to junction U.S. Highway 9, thence along U.S. Highway 9 to junction New York Highway 29, thence along New York Highway 29 to junction New York Highway 153, thence along New York Highway 153 to the New York-Vermont State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E126), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Iowa, on and south of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 59 to junction Iowa Highway 10, thence along Iowa Highway 10 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Iowa Highway 4, thence along Iowa Highway 4 to junction Iowa Highway 141, thence along Iowa Highway 141 to junction Iowa Highway 89, thence along Iowa Highway 89 to junction Iowa Highway 210, thence along Iowa Highway 210 to junction U.S. Highway 69, thence along U.S. Highway 69 to junction Iowa Highway 5, thence along Iowa Highway 5 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction U.S. Highway 63, thence along U.S. Highway 63 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction unnumbered highway near Milton, thence along unnumbered highway through Cantrill, to the Iowa-Missouri State line, to points in New York on and south of a line beginning at the New York-New Jersey State line and extending along New York Highway 210 to junction New York Highway 9W, thence along New York Highway 9W to junction U.S. Highway 6, thence along U.S. Highway 6 to the New York-Connecticut State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E133), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene

R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale and chain grocery stores, from points in Iowa, on, south and east of a line beginning at the Illinois-Iowa State line and extending along Iowa Highway 62 to junction U.S. Highway 61, thence along U.S. Highway 61 to junction U.S. Highway 6, thence along U.S. Highway 6 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction U.S. Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction unnumbered highway through Savannah to the Iowa-Missouri State line, to points in Colorado on and south of a line beginning at the Colorado-Utah State line and extending along U.S. Highway 50 to junction Colorado Highway 92, thence along Colorado Highway 92 to junction Colorado Highway 133, thence along Colorado Highway 133 to junction Colorado Highway 135, thence along Colorado Highway 135 to junction unnumbered highway at Almont, thence unnumbered highway to junction Colorado Highway 306, thence along Colorado Highway 306 to junction U.S. Highway 24, thence along U.S. Highway 24 to junction Colorado Highway 94, thence along Colorado Highway 94 to junction unnumbered highway to junction Colorado unnumbered highway through Truckton and Kendrick to junction Colorado Highway 96 at Olney Springs, thence along Colorado Highway 96 to the Colorado-Kansas State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to No. MC-F-10199.

No. MC 21170 (Sub-No. E134), filed June 4, 1975. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale and chain grocery stores, from points in Iowa on and east of a line beginning at the Iowa-Minnesota State line and extending along U.S. Highway 52 to junction Iowa Highway 150, thence along Iowa Highway 150 to junction U.S. Highway 151, thence along U.S. Highway 151 to junction U.S. Highway 218, thence along U.S. Highway 218 to junction U.S.

Highway 34, thence along U.S. Highway 34 to junction Iowa Highway 1, thence along Iowa Highway 1 to junction Iowa Highway 2, thence along Iowa Highway 2 to junction unnumbered highway at Bloomfield, thence along Iowa unnumbered highway through Savannah, to the Iowa-Missouri State line, to points in Colorado on and south of a line beginning at the Colorado-Utah State line and extending along the Dolores River to junction Colorado Highway 141, thence along Colorado Highway 141 to junction Colorado Highway 90, thence along Colorado Highway 90 to junction U.S. Highway 50, thence along U.S. Highway 50 to the Colorado-Kansas State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to No. MC-F-10199.

No. MC 21170 (Sub-No. E165), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in that part of Minnesota on and west of a line beginning at the North Dakota-Minnesota State line and extending along U.S. Highway 1 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction Minnesota Highway 34, thence along Minnesota Highway 34 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Minnesota Highway 9, thence along Minnesota Highway 9 to junction U.S. Highway 12, thence along U.S. Highway 12 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction Minnesota Highway 67, thence along Minnesota Highway 67 to junction Minnesota Highway 68, thence along Minnesota Highway 68 to junction U.S. Highway 14, thence along U.S. Highway 14 to junction Minnesota Highway 83, thence along Minnesota Highway 83 to junction Minnesota Highway 30, thence along Minnesota Highway 30 to junction Minnesota Highway 13, thence along Minnesota Highway 13 to junction U.S. Highway 65, thence along U.S. Highway 65 to Minnesota-Iowa State line, to points in West Virginia on and south of U.S. Highway 52. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E166), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa

52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in that part of Minnesota on and north of a line beginning at the United States-Canada International Boundary line and extending along Minnesota Highway 72 to junction Minnesota Highway 1, thence along Minnesota Highway 1 to junction unnumbered highway, thence along unnumbered highway to junction Minnesota Highway 92 at Clearbrook, thence along Minnesota Highway 92 to junction Minnesota Highway 32, thence along Minnesota Highway 32 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction U.S. Highway 75, thence along U.S. Highway 75 to junction Minnesota Highway 113, thence along Minnesota Highway 113 to the Minnesota-North Dakota State line, to points in that part of West Virginia on and south of a line beginning at the Kentucky-West Virginia State line and extending along U.S. Highway 52 to junction West Virginia Highway 65, thence along West Virginia Highway 65 to junction West Virginia Highway 10, thence along West Virginia Highway 10 to junction U.S. Highway 19-21, thence along U.S. Highway 19-21 to junction U.S. Highway 219-460, thence along U.S. Highway 219-460 to junction West Virginia Highway 20, thence along West Virginia Highway 20 to junction West Virginia Highway 3, thence along West Virginia Highway 3 to junction West Virginia Highway 63, thence along West Virginia Highway 63 to junction U.S. Highway 219, thence along U.S. Highway 219 to junction U.S. Highway 60, thence along U.S. Highway 60 to the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., located at or near California, Mo.

No. MC 21170 (Sub-No. E167), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in that part of Minnesota on and west of a line beginning at the United States-Canada International Boundary line and extending along Minnesota Highway 72 to

junction Minnesota Highway 46, thence along Minnesota Highway 46 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction Minnesota Highway 6, thence along Minnesota Highway 6 to junction Minnesota Highway 200, thence along Minnesota Highway 200 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Minnesota Highway 210, thence along Minnesota Highway 210 to junction Minnesota Highway 371, thence along Minnesota Highway 371 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction Minnesota Highway 25, thence along Minnesota Highway 25 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Minnesota Highway 19, thence along Minnesota Highway 19 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 218, thence along U.S. Highway 218 to the Minnesota-Iowa State line, to points in that part of West Virginia on and south of a line beginning at the Kentucky-West Virginia State line and extending along U.S. Highway 52 to junction West Virginia Highway 102, thence along West Virginia Highway 102 to the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E168), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in that part of Minnesota on and west of a line beginning at the United States-Canada International Boundary line and extending along U.S. Highway 53 to junction Minnesota Highway 73, thence along Minnesota Highway 73 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction Minnesota Highway 3, thence along Minnesota Highway 3 to junction Minnesota Highway 60, thence along Minnesota Highway 60 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 14, thence along U.S. Highway 14 to junction unnumbered highway, thence along unnumbered highway to junction U.S. Highway 218, thence along U.S. Highway 218 to the Minnesota-Iowa State line, to points in that part of Kentucky on and west of a line beginning at the Indiana-Kentucky State line and extending along U.S. Highway 41 to junction Kentucky Highway 54, thence along Kentucky Highway 54 to junction U.S. Highway 231, thence along U.S. Highway 231 to

junction U.S. Highway 31W, thence along U.S. Highway 31W to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction U.S. Highway 68, thence along U.S. Highway 68 to junction Kentucky Highway 90, thence along Kentucky Highway 90 to junction U.S. Highway 127, thence along U.S. Highway 127 to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E169), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in that part of Minnesota on and west of a line beginning at the United States-Canada International Boundary line and extending along Minnesota Highway 72 to junction Minnesota Highway 71, thence along Minnesota Highway 71 to junction U.S. Highway 2, thence along U.S. Highway 2 to junction Minnesota Highway 371, thence along Minnesota Highway 371 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction Minnesota Highway 15, thence along Minnesota Highway 15 to junction U.S. Highway 14, thence along U.S. Highway 14 to junction U.S. Highway 218, thence along U.S. Highway 218 to the Minnesota-Iowa State line, to points in that part of Kentucky on and south of a line beginning at the Indiana-Kentucky State line extending along U.S. Highway 60 to junction Kentucky Highway 86, thence along Kentucky Highway 86 to junction U.S. Highway 62, thence along U.S. Highway 62 to junction U.S. Highway 150, thence along U.S. Highway 150 to junction Kentucky Highway 52, thence along Kentucky Highway 52 to junction Kentucky Highway 30, thence along Kentucky Highway 30 to junction Kentucky Highway 542, thence along Kentucky Highway 542 to junction Kentucky Highway 404, thence along Kentucky Highway 404 to junction Kentucky Highway 7, thence along Kentucky Highway 7 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction U.S. Highway 119, thence along U.S. Highway 119 to the Kentucky-West Virginia State line. The purpose of this filing is to eliminate the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E172), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Minnesota on and bounded by a line beginning at the United States-Canada International Boundary line and extending along Minnesota Highway 18, thence along Minnesota Highway 18 to junction Minnesota Highway 21, thence along Minnesota Highway 21 to junction Minnesota Highway 135, thence along Minnesota Highway 135 to junction Minnesota Highway 4, thence along Minnesota Highway 4 to junction Minnesota Highway 23, thence along Minnesota Highway 23 to the Minnesota-Wisconsin State line, thence along the Minnesota-Wisconsin State line to junction U.S. Highway 8, thence along U.S. Highway 8 to junction Minnesota Highway 98, thence along Minnesota Highway 98 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction Minnesota Highway 371, thence along Minnesota Highway 371 to junction Minnesota Highway 210, thence along Minnesota Highway 210 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Minnesota Highway 38, thence along Minnesota Highway 38 to junction Minnesota Highway 6, thence along Minnesota Highway 6 to junction U.S. Highway 71, thence along U.S. Highway 71 to the United States-Canada International Boundary line and point of beginning, to points in Illinois south and west of a line beginning at the Missouri-Illinois State line and extending along Illinois Highway 13 to junction Illinois Highway 34, thence along Illinois Highway 34 to the Illinois-Kentucky State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E173), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Minnesota on and bounded by a line beginning at the Minnesota-Wisconsin

State line, and extending along Minnesota Highway 58 to junction U.S. Highway 52, thence along U.S. Highway 52 to junction U.S. Highway 63, thence along U.S. Highway 63 to Minnesota-Iowa State line, thence along the Minnesota-Iowa State line to junction U.S. Highway 35, thence along U.S. Highway 35 to junction Minnesota Highway 19, thence along Minnesota Highway 19 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Minnesota Highway 25, thence along Minnesota Highway 25 to junction U.S. Highway 10-52, thence along U.S. Highway 10-52 to junction Minnesota Highway 98, thence along Minnesota Highway 98 to junction U.S. Highway 8, thence along U.S. Highway 8 to the Minnesota-Wisconsin State line and point of beginning, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along U.S. Highway 460 to junction unnumbered highway at Carmi, thence along unnumbered highway to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E174), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Minnesota on, south, and west of a line beginning at the South Dakota-Minnesota State line and extending along Minnesota Highway 68 to junction Minnesota Highway 19, thence along Minnesota Highway 19 to junction U.S. Highway 35, thence along U.S. Highway 35 to the Minnesota-Iowa State line, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along U.S. Highway 50 to junction U.S. Highway 45, thence along U.S. Highway 45 to junction unnumbered highway near Cisne, thence along unnumbered highway to junction Illinois Highway 130, thence along Illinois Highway 130 to junction Illinois Highway 15, thence along Illinois Highway 15 to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E175), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa

52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, from points in Minnesota on and bounded by a line beginning at the South Dakota-Minnesota State line and extending along Minnesota Highway 117 to junction Minnesota Highway 27, thence along Minnesota Highway 27 to junction Minnesota Highway 25, thence along Minnesota Highway 25 to junction Minnesota Highway 23, thence along Minnesota Highway 23 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction U.S. Highway 10-52, thence along U.S. Highway 10-52 to junction Minnesota Highway 25, thence along Minnesota Highway 25 to junction Minnesota Highway 5, thence along Minnesota Highway 5 to junction Minnesota Highway 19, thence along Minnesota Highway 19 to junction Minnesota Highway 68, thence along Minnesota Highway 68 to the Minnesota-South Dakota State line, and point of beginning, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along Illinois Highway 140 to junction U.S. Highway 70, thence along U.S. Highway 70 to junction unnumbered highway, thence along unnumbered highway through Gilmore and Mason, to junction U.S. Highway 45, thence along U.S. Highway 45 to junction U.S. Highway 50, thence along U.S. Highway 50 to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E176), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohuski (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food products* and commodities exempt from economic regulation pursuant to the provisions of section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and grocery stores, from points in Minnesota on and bounded by a line beginning at the North Dakota-Minnesota State line and extending along Minnesota Highway 1 to junction Minnesota Highway 6, thence along Minnesota Highway 6 to junction Minnesota Highway 18, thence along Minnesota Highway 18 to junction U.S. Highway 169, thence along U.S. Highway 169 to junction Minnesota Highway 23, thence along Minnesota Highway 23 to junction Minnesota Highway 25, thence along Minnesota Highway 25 to junction Minnesota Highway 27, thence along

Minnesota Highway 27 to junction Minnesota Highway 117, thence along Minnesota Highway 117 to the Minnesota-South Dakota State line, thence along the Minnesota-South Dakota-Minnesota-North Dakota State line to point of beginning, to points in Illinois on and south of a line beginning at the Missouri-Illinois State line and extending along Illinois Highway 140 to junction U.S. Highway 51, thence along U.S. Highway 51 to junction unnumbered highway near Patoka, thence along unnumbered highway to junction Illinois Highway 37, thence along Illinois Highway 37 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction U.S. Highway 45, thence along U.S. Highway 45 to junction unnumbered highway at Enterprise, thence along unnumbered highway to the Illinois-Indiana State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E177), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohurski (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Minnesota on and west of a line beginning at the South Dakota-Minnesota State line and extending along U.S. Highway 75 to junction Minnesota Highway 67, thence along Minnesota Highway 67 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Minnesota Highway 30, thence along Minnesota Highway 30 to junction U.S. Highway 71, thence along U.S. Highway 71 to junction U.S. Highway 16, thence along U.S. Highway 16 to junction Minnesota Highway 4, thence along Minnesota Highway 4 to the Iowa-Minnesota State line, to points in Massachusetts on, east, and south of a line beginning at the New Hampshire-Massachusetts State line and extending along U.S. Highway 140, thence along Massachusetts Highway 140 to junction Massachusetts Highway 16, thence along Massachusetts Highway 16 to junction unnumbered highway at Mendon, thence along unnumbered highway to the Massachusetts-Rhode Island State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 21170 (Sub-No. E178), filed June 4, 1974. Applicant: BOS LINES,

INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohurski (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act in mixed loads with food products, restricted to such commodities as are dealt in by retail, wholesale, and chain grocery stores, from points in Minnesota, on, south, and west of a line beginning at the South Dakota-Minnesota State line and extending along U.S. Highway 14 to junction U.S. Highway 59, thence along U.S. Highway 59 to the Iowa-Minnesota State line, to points in Massachusetts east and south of a line beginning at the Connecticut-Massachusetts State line and extending along U.S. Highway 202 to junction Connecticut Highway 57, thence along Connecticut Highway 57 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Massachusetts Highway 32, thence along Massachusetts Highway 32 to junction Massachusetts Highway 9, thence along Massachusetts Highway 9 to junction Massachusetts Highway 12, thence along Massachusetts Highway 12 to junction Massachusetts Highway 110, thence along Massachusetts Highway 110 to junction U.S. Highway 95, thence along U.S. Highway 95 to the New Hampshire-Massachusetts State line. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC-21170 (Sub-No. E179), filed June 4, 1974. Applicant: BOS LINES, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Gene R. Prohurski (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Food products and commodities exempt from economic regulation pursuant to the provisions of Section 203(b)(c) of the Interstate Commerce Act, in mixed loads with food products, restricted to such commodities as are dealt in by wholesale, retail, and chain grocery stores, from points in Minnesota on, south, and west of a line beginning at the South Dakota-Minnesota State line and extending along Minnesota Highway 30, thence along Minnesota Highway 30 to junction Minnesota Highway 91, thence along Minnesota Highway 91 to the Minnesota-Iowa State line, to points in Massachusetts. The purpose of this filing is to eliminate the gateway of the facilities of Ralston Purina Co., located at or near California, Mo. The authorities mentioned above were purchased by Cedar Rapids Steel Transportation, Inc., pursuant to MC-F-10199.

No. MC 30844 (Sub-No. E7), filed May 15, 1974. Applicant: KROBLIN

REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Meats, meat products, and meat by-products, dairy products, and articles distributed by meat packinghouses, as described in the Appendix to the report in Modification of Permits-Packing House Products, 48 M.C.C. 628, from Denver, Pueblo, and Colorado Springs, Colo., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Rhode Island, Vermont, Ohio, Michigan, Indiana, Pennsylvania, West Virginia, the District of Columbia, and Chicago, Ill. The purpose of this filing is to eliminate the gateway of Waterloo, Iowa.

No. MC 30844 (Sub-No. E8), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Frozen foodstuffs, from points in Indiana to points in Nebraska and Colorado. The purpose of this filing is to eliminate the gateway of Marshalltown, Iowa.

No. MC 30844 (Sub-No. E9), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Groceries, from points in Texas, Oklahoma, Kansas, Nebraska, Colorado, and Missouri on and west of U.S. Highway 65 to Detroit, Mich. The purpose of this filing is to eliminate the gateway of Marshalltown, Iowa.

No. MC 30844 (Sub-No. E10), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Canned goods, from Indianapolis, Ind., to points in Nebraska, Colorado, Kansas, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateway of Chariton, Iowa.

No. MC 30844 (Sub-No. E11), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Canned goods, from the Lower Peninsula of Michigan, to points in Colorado, Nebraska, Kansas, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateway of Ottumwa, Iowa.

No. MC 30844 (Sub-No. E12), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Prepared food products, from points in New York to points in Iowa, Nebraska, Colorado, Kansas, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateways of Pittsburgh, Pa., Keokuk, and Davenport, Iowa.

No. MC 30844 (Sub-No. E13), filed May 15, 1974. Applicant: KROBLIN REFRIGERATED XPRESS, INC., P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: John P. Rhodes (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Canned goods and groceries, from Pittsburgh, Pa., to points in Colorado, Kansas, Oklahoma, and Texas. The purpose of this filing is to eliminate the gateway of Keokuk, Iowa.

No. MC 45764 (Sub-No. E6), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, ESSINGTON, PA. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in Maryland (except those (a) west of Interstate Highway 81, (b) east of the Chesapeake Bay and the Susquehanna River, and (c) within 75 miles of Philadelphia, Pa.), on the one hand, and, on the other, points in New York on and east of a line beginning at Port Jervis, N.Y., on the New York-Pennsylvania State line and extending northwest over New York Highway 97 to junction New York Highway 42, thence north over New York Highway 42 to junction New York Highway 17 to Liberty, N.Y., thence east Highway 17 to Liberty, N.Y., thence east over New York Highway 55 to junction U.S. Highway 209, thence northeast over U.S. Highway 209 to junction New York Highway 213, thence north over New York Highway 213 to junction New York Highway 28A, thence west and north over New York Highway 28A to junction New York Highway 28, thence northwest over New York Highway 28 to Oneonta, N.Y., thence east over New York Highway 7 to junction New York Highway 28, thence north over New York Highway 28 to junction New York Highway 5S, thence west over New York Highway 5S to Utica, N.Y., thence north over New York Highway 12 to junction New York Highway 365, thence east over New York Highway 365 to junction New York Highway 8, thence northeast over New York Highway 8 to junction New York Highway 30, thence north over New York Highway 30 to junction New York to junction New York Highway 28, thence

northwest over New York Highway 28 to junction New York Highway 30, thence north over New York Highway 30 to the United States-Canadian Border line at Trout River, N.Y. The purpose of this filing is to eliminate the gateway of Philadelphia, Pa.

No. MC 45764 (Sub-No. E7), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, ESSINGTON, PA. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in Pennsylvania on, south, and west of a line beginning at the Pennsylvania-Maryland State line and extending north over U.S. Highway 219 to Somerset, Pa., and thence west over the Pennsylvania Turnpike to the Pennsylvania-Ohio State line, on the one hand, and, on the other, points in Bergen, Passaic, and Sussex Counties, N.J. (except those within 75 miles of Philadelphia, Pa.). The purpose of this filing is to eliminate the gateway of Philadelphia, Pa.

No. MC 45764 (Sub-No. E8), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, ESSINGTON, PA. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in Pennsylvania on, south, and west of a line beginning at the Pennsylvania-Maryland State line and extending north over Interstate Highway 83 to York, Pa., thence west over U.S. Highway 30 to junction Pennsylvania Turnpike one mile east of Breezewood, Pa., and thence west over that Turnpike to the Pennsylvania-Ohio State line, on the one hand, and, on the other, points in New York on and east of a line beginning at the New York-New Jersey State line and extending over Interstate Highway 87 to Glen Falls, N.Y., thence east over New York Highway 32 to Hudson Falls, N.Y., thence northeast over U.S. Highway 4 to the New York-Vermont State line. The purpose of this filing is to eliminate the gateway of Philadelphia, Pa.

No. MC 45764 (Sub-No. E9), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, Essington, Pa. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza, Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in Pennsylvania Highway 27 to junction Pennsylvania Highway 36, thence southeast over Pennsylvania Highway 36 to junction Pennsylvania Highway 949, thence east over Pennsylvania Highway 949 to Ridgway, Pa., thence south over U.S. Highway 219 to Du Bois, Pa., thence east over Pennsylvania Highway 255 to junction Interstate Highway 80, thence east over Interstate Highway 80 to junction Pennsylvania Highway 153, thence south over Pennsylvania Highway 153 to junction U.S. Highway 322, thence east

points in the District of Columbia, on the one hand, and, on the other, points in New Jersey (except those within 75 miles of Philadelphia, Pa.). The purpose of this filing is to eliminate the gateway of Philadelphia, Pa.

No. MC 45764 (Sub-No. E10), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, ESSINGTON, PA. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in the District of Columbia, on the one hand, and, on the other, points in New York on and east of a line beginning at the New York-Pennsylvania State line, and extending north over New York Highway 282 to Nichols, N.Y., thence northeast over unnumbered highway to Owego, N.Y., thence northeast over New York Highway 96 to junction New York Highway 96B, thence northwest over New York Highway 96B to Ithaca, N.Y., thence northwest over New York Highway 96 to junction New York Highway 5, thence west over New York Highway 5 to Geneva, N.Y., thence north over New York Highway 14 to junction New York Highway 31, thence west over New York Highway 31 to Rochester, N.Y., thence northeast over New York Highway 18 to Sea Breeze, N.Y., on Lake Ontario, thence east and north along the south shore of Lake Ontario to the United States-Canadian Border at Cape Vincent, and thence northeast along that Border to its junction with the New York-Vermont State line. The purpose of this filing is to eliminate the gateway of Philadelphia, Pa.

No. MC 45764 (Sub-No. E11), filed May 12, 1974. Applicant: ROBBINS MOTOR TRANSPORTATION, INC., P.O. Box 36, ESSINGTON, PA. 19029. Applicant's representative: ALAN KAHN, 2 Penn Center Plaza Suite 1920, Philadelphia, Pa. 19102. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Commodities, the transportation of which because of size or weight require the use of special equipment, between points in Pennsylvania on and north of a line beginning at Erie, Pa., and extending south over Interstate Highway 79 to junction U.S. Highway 322, thence northeast over U.S. Highway 6 to Meadville, Pa., thence east over Pennsylvania Highway 27 to junction Pennsylvania Highway 36, thence southeast over Pennsylvania Highway 36 to junction Pennsylvania Highway 949, thence east over Pennsylvania Highway 949 to Ridgway, Pa., thence south over U.S. Highway 219 to Du Bois, Pa., thence east over Pennsylvania Highway 255 to junction Interstate Highway 80, thence east over Interstate Highway 80 to junction Pennsylvania Highway 153, thence south over Pennsylvania Highway 153 to junction U.S. Highway 322, thence east

plant (including refining, manufacturing, and processing plant) sites of storage sites.

(c) *Machinery, equipment, materials, and supplies* used in, or in connection with, the drilling of water wells, (d) *machinery, equipment, materials, and supplies* used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, other than pipelines used for the transmission of natural gas, petroleum, their products and by-products, water, or sewerage, restricted to the transportation of shipments moving to or from pipeline right of way, (e) *earth drilling machinery and equipment, and machinery, equipment, materials, supplies, and pipe* incidental to, used in, or in connection with, (1) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (2) the completion of holes or wells drilled, (3) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (4) the injection or removal of commodities into or from holes or wells; (1) from points in Oklahoma on and east of U.S. Highway 77 and on and north of U.S. Highway 66, including Oklahoma City, to points in Tennessee on and east of the Tennessee River, points in Kentucky on and east of U.S. Highway 31W, points in Indiana on and east of U.S. Highway 75 and on and north of U.S. Highway 66 to points in Mississippi on and east of U.S. Highway 51, (3) from Oklahoma City, Okla., to points in Kentucky on and east of U.S. Highway 41, and (4) from points in Kansas to points in Mississippi, Alabama, Georgia, Florida, and South Carolina. The purpose of this filing is to eliminate the gateways of Ottawa Co., Okla., or Cherokee, Crawford, Labette, or Montgomery Counties, Kans., and Van Buren, Ark.

No. MC 76177 (Sub-No. E122), (Correction), filed April 15, 1974, published in the FEDERAL REGISTER December 26, 1974. Applicant: BAGGETT TRANSPORTATION CO., 2 South 32nd St., Birmingham, Ala. 35233. Applicant's representative: T. C. Sinclair (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Classes A and B explosives, and blasting supplies*, from points in New York to points in Texas. The purpose of this filing is to eliminate the gateways of (1) the storage magazine of the Trojan-U.S. Powder, Division of Commercial Solvents Corp., located at the junction of West Virginia Highway 62, and White Church Road near Point Pleasant (Mason County), W. Va.; (2) Grafton, Ill., and points within 2 miles thereof; (3) Wolf Lake, Ill., and points within 15 miles thereof. The purpose of this correction is to cor-

rect the "E" number, previously published as E89.

No. MC 83539 (Sub-No. E25), filed May 24, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, because of their size or weight, requires the use of special equipment, and related contractors' materials and supplies when their transportation is incidental to the transportation by carrier of commodities which by reason of size or weight require special equipment, between points in Colorado (except Logan, Sedgwick, Phillips, Washington, and Yuma Counties), and Illinois. The purpose of this filing is to eliminate the gateways of points in Iowa, South Dakota, Missouri, Wichita, Kansas, Texas, and New Mexico.

No. MC 83539 (Sub-No. E27), filed June 2, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 West Commerce St., Dallas, Tex. 75208. Applicant's representative: Wiley Willingham (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, as described in Appendix V to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, the transportation of which, because of their size or weight require the use of special equipment, or handling, and parts thereof, from points in Florida, Alabama, Mississippi, Louisiana, Arkansas, Texas, New Mexico, Arizona, and those points in Georgia on and west of Interstate Highway 75, and those in Oklahoma on and south of U.S. Highway 66 to points in Ohio. The purpose of this filing is to eliminate the gateway of Nashville, Tenn., and points in Ohio.

No. MC 83539 (Sub-No. E29), filed June 3, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 West Commerce St., Dallas, Tex. 75208. Applicant's representative: Wiley Willingham (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Iron and steel valves and hydrants, and iron and steel parts, attachments, and accessories for valves and hydrants*, from Houston, Texas to points in Alabama, Arizona, California, Colorado, Connecticut, Delaware, the District of Columbia, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kentucky, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming, with no transportation for compensation on return except as otherwise authorized. The purpose of this filing is to eliminate the gateway of Beaumont, Tex.

No. MC 83539 (Sub-No. E30), filed May 17, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 W. Commerce St., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Wiley C. Willingham (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Plastic pipe* (except those which because of size or weight require the use of special equipment, and except conduit or pipe such as are included in the first findings of the Commission in *T. E. Mercer and G. E. Mercer, Extension-Oilfield Commodities*, 74 M.C.C. 459, 543), from Brownwood, Texas to points in Idaho, Illinois, Iowa, Montana, Oregon, Utah, and Washington. The purpose of this filing is to eliminate the gateway of Oklahoma City, Okla., and Pueblo West, Colo.

No. MC 83539 (Sub-No. E31), filed June 4, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Wiley C. Willingham (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Commodities*, the transportation of which because of size or weight require the use of special equipment, (2) *Self propelled articles*, each weighing 15,000 pounds or more (except in driveway service), and (3) *Related machinery, parts, materials, and supplies* moving in mixed loads, respectively, with the commodities described in (1) and (2) above; (a) between points in California north of San Luis Obispo, Kern, and San Bernardino Counties, on the one hand, and, on the other, points in Texas (except those in Brewster, Presidio, Jeff Davis, Culberson, Hudspeth, and El Paso Counties); (b) between points in Santa Barbara, Kern, and San Luis Obispo Counties, Calif., on the one hand, and, on the other, all points in that part of Texas on, north, and east of a line beginning at the Texas-New Mexico State line, and extending along U.S. Highway 84 to junction with U.S. Highway 87, thence along U.S. Highway 87 to junction U.S. Highway 281, thence along U.S. Highway 281 to the United States-Mexico International Boundary line; (c) between points in Ventura and Los Angeles Counties, Calif., on the one hand, and, on the other, points in Texas on, north, and east of a line beginning at the Texas-New Mexico State line and extending along U.S. Highway 84 to junction U.S. Highway 283, thence along U.S. Highway 283 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction U.S. Highway 290, thence along U.S. Highway 290 to junction U.S. Highway 81, thence along U.S. Highway 81 to junction Texas Highway 123, thence along Texas Highway 123 to junction U.S. Highway 181, thence along U.S. Highway 181 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction U.S. Highway 281, thence along U.S. Highway 281 to the United States-Mexico International Boundary line; (d) between all points in Orange, Riverside, and San Diego Coun-

ties, Calif., on the one hand, and, on the other, all points in Texas on and east of a line beginning at the Oklahoma-Texas State line and extending along U.S. Highway 77 to junction U.S. Highway 90, thence along U.S. Highway 90 to junction Texas Highway 71, thence along Texas Highway 71 to junction U.S. Highway 59, thence along U.S. Highway 59 to junction Texas Highway 172, thence along Texas Highway 172 to Port Lavaca, Tex; and (e) between all points in San Bernardino and Imperial Counties, Calif., on the one hand, and, on the other, all points in Texas on and east of a line beginning at the Oklahoma-Texas State line and extending along U.S. Highway 35 to junction U.S. Highway 84, thence along U.S. Highway 84 to junction Interstate Highway 45, thence along Interstate Highway 45 to Galveston, Tex. The purpose of this filing is to eliminate the gateways of points in Colorado and Utah.

No. MC 83539 (Sub-No. E39), filed June 4, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 W. Commerce St., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, because of size or weight, requires the use of special equipment, and related contractors' materials and supplies when their transportation is incidental to the transportation by the carrier of commodities which, because of size or weight, require the use of special equipment, between (1) points in North Dakota, on the one hand, and, on the other, points in Virginia (points in South Dakota, Kansas within 50 miles of Nashville, Tenn., and Philadelphia, Pa.); (2) points in Iowa, on the one hand, and, on the other, points in Massachusetts (points in Illinois, Braddock, and Philadelphia, Pa.); (3) points in Nebraska, on the one hand, and, on the other, points in Virginia (points within 50 miles of Nashville, Tenn., and Kansas, Illinois, Braddock, and Philadelphia, Pa.). The purpose of this filing is to eliminate the gateways indicated by asterisks above.

No. MC 83539 (Sub-No. E46), filed June 4, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 W. Commerce St., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, because of size or weight, requires the use of special equipment, and related machinery parts and related contractors' materials and supplies when their transportation is incidental to the transportation by the carrier of commodities which, because of size or weight, require the use of special equipment, between points in Arizona, on the one hand, and, on the other, points in Minnesota on and east of a line beginning at the Minnesota-Iowa State line

and extending along U.S. Highway 218 to junction Interstate Highway 35, thence along Interstate Highway 35 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction U.S. Highway 23, thence along U.S. Highway 23 to Lake Superior. The purpose of this filing is to eliminate the gateways of points in New Mexico and Illinois.

No. MC 83539 (Sub-No. E56), filed June 4, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 W. Commerce St., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, which because of size or weight, require the use of special equipment, and related machinery parts and related contractors' materials and supplies when the transportation of such commodities is incidental to the transportation of commodities, which because of size or weight, require the use of special equipment, between points in that part of Michigan on and south of U.S. Highway 10, on the one hand, and, on the other, points in Minnesota. The purpose of this filing is to eliminate the gateway of points in Illinois.

No. MC 83539 (Sub-No. E61), filed June 4, 1974. Applicant: C. & H. TRANSPORTATION CO., INC., 2010 W. Commerce St., P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: Kenneth Weeks (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, the transportation of which, because of size or weight, requires the use of special equipment, and related machinery parts and related contractors' materials and supplies when their transportation is incidental to the transportation by the carrier of commodities which, because of size or weight, require the use of special equipment, from points in Delaware to points in Kentucky on and west of a line beginning at the Ohio-Kentucky State line and extending along U.S. Highway 68 to junction U.S. Highway 27, thence along U.S. Highway 27 to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateway of Philadelphia and Braddock, Pa.

No. MC 95540 (Sub-No. E348), filed May 15, 1974. Applicant: WATKINS MOTOR LINES, INC., P.O. Box 1636, Atlanta, Ga. 30301. Applicant's representative: Clyde W. Carver, Suite 212, 5299 Roswell Rd. NE., Atlanta, Ga. 30342. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Oleomargarine*, from Detroit, Mich., to points in that part of California on and south of a line beginning at the Pacific Ocean and extending along California Highway 1 to junction U.S. Highway 101, thence along U.S. Highway 101 to junction Interstate Highway 680, thence along Interstate Highway 680 to junction California

Highway 4, thence along California Highway 4 to junction Temporary Interstate Highway 5, thence along Temporary Interstate Highway 5 to junction California Highway 88, thence along California Highway 88 to the California-Nevada State line near Woodfords, Calif. The purpose of this filing is to eliminate the gateway of Florence, Ala.

No. MC 100666 (Sub-No. E38), filed April 4, 1975. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard W. May (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Composition board*, from points in Texas (except Pineland or Silsbee and particleboard from Diboll), on or south of a line beginning at the junction of Texas State Highway 203 and the Oklahoma-Texas State line, thence west on Highway 203 to the junction with U.S. Highway 287, thence west on U.S. Highway 287 to the junction with Interstate Highway 40, thence west on Interstate Highway 40 to the New Mexico-Texas State line to points in Illinois. The purpose of this filing is to eliminate the gateways of Acme, Irving, Pineland and Silsbee, Tex., and Craig and Miami, Okla.

No. MC 100666 (Sub-No. E45), filed March 20, 1975. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Richard A. May (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Composition board*, from points in Texas (except Pineland and Silsbee and Particleboard from Diboll) to points in Oklahoma; (except not applicable from points in Texas located in Armstrong, Bailey, Briscoe, Carson, Castro, Cochran, Collingsworth, Dallam, Deaf Smith, Donley, Floyd, Gray, Hale, Hall, Hansford, Hartley, Hemphill, Hockley, Hutchinson, Lamb, Lipscomb, Moore, Ochiltree, Oldham, Parmer, Potter, Randall, Roberts, Sherman, Swisher, and Wheeler Counties on the one hand; to points in Oklahoma located in Alfalfa, Beaver, Beckham, Blaine, Canadian, Cimarron, Custer, Dewey, Ellis, Garfield, Grant, Harper, Kay, Kingfisher, Logan, Major, Noble, Oklahoma, Osage, Payne, Pawnee, Roger Mills, Texas, Washita, Woods, and Woodward Counties on the other; nor shall the authority apply from points in Texas located in Childress, Cottle, Foard, Hardeman, and Motley Counties, on the one hand, to points in Oklahoma located in Beaver, Cimarron, and Texas Counties on the other, nor shall the authority apply from points in Texas located in Archer, Baylor, Bowie, Cass, Collin, Cooke, Denton, Fannin, Franklin, Grayson, Hardeman, Hopkins, Hunt, Jack, Knox, Lamar, Marion, Montague, Morris, Red River, Titus, Upshur, Van Zandt, Wichita, Wilbarger, Wise, Wood Counties in Texas to points in Oklahoma in the Adair, Atoka, Cherokee, Choctaw,

Delaware, Haskell, Latimer, Le Flore, Mayes, McCurtain, McIntosh, Okmulgee, Pittsburg, Pushmataha, Sequoyah, and Wagoner Counties.) The purpose of this filing is to eliminate the gateways of Acme and Irving, Tex.

No. MC 102567 (Sub-No. E9), filed June 3, 1974. Applicant: MC NAIR TRANSPORT, INC., P.O. Drawer 5357, Bossier City, La. 71010. Applicant's representative: Jo E. Shaw, Houston First Saving Bldg., Houston, Tex. 77002. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Such petroleum products as are liquid chemicals (petrochemicals) in bulk, in tank vehicles, from those points within 150 miles of Henderson, Tex., which are north, south, and west of a line beginning at the junction of U.S. Highway 80 and U.S. Highway 180 near Weatherford, Tex., and extending along U.S. Highway 80/180 to junction Interstate Highway 20, to junction Louisiana Highway 157, to junction Louisiana Highway 132, to junction U.S. Highway 82, to junction U.S. Highway 271, to the Pittsburg-Atoka County line in Oklahoma, to those points in Louisiana west of a line beginning at the Louisiana-Arkansas State line and extending along U.S. Highway 167 to junction Louisiana Highway 34, to junction U.S. Highway 84, to junction Louisiana Highway 107, to junction Louisiana Highway 115, to junction U.S. Highway 71, to junction Louisiana Highway 31, to junction Louisiana Highway 30, to the Gulf of Mexico. The purpose of this filing is to eliminate the gateway of plant site of Dow Chemicals, U.S.A., in Columbia County, Ark.

No. MC 102567 (Sub-No. E19), filed June 3, 1974. Applicant: MC NAIR TRANSPORT, INC., P.O. Drawer 5357, Bossier City, La. 71010. Applicant's representative: Jo E. Shaw, Houston First Saving Bldg., Houston, Tex. 77002. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Such petroleum products as are liquid chemicals (except liquefied petroleum gases), in bulk in tank vehicles, from those points in Texas within 150 miles of Henderson, Tex., including Henderson, and which are south of a line beginning at Chilton, Tex., and extending along Texas Highway 7 to junction U.S. Highway 287, to junction U.S. Highway 190, to the Louisiana-Texas State line, to those points in Kentucky east of a line beginning at the Kentucky-Indiana State line and extending along Kentucky Highway 91 to junction U.S. Highway 41, to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateway of plant site of American Cyanamid Company at Avondale, La.

No. MC 10345 (Sub-No. E1), filed December 4, 1974. Applicant: C. & J. COMMERCIAL DRIVEAWAY, INC., P.O. Box 689, Lansing, Mich. 48903. Applicant's representative: Joseph Gracia (same as above). Authority sought to operate as a common carrier, by motor

vehicle, over irregular routes, transporting: Automobiles, trucks, and chassis, new, used, unfinished, or wrecked, in secondary movements, in truckaway service, from Ft. Wayne, Ind., to points in Iowa, New Hampshire, Tennessee, Vermont, Virginia, New York, Massachusetts, Rhode Island, Connecticut, New Jersey, Pennsylvania, Maryland, West Virginia, Michigan, Kentucky, Indiana, Illinois, Wisconsin, Missouri, Arkansas, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Ohio, the District of Columbia, and those in Texas north of a line beginning at the Texas-Louisiana State line and extending along U.S. Highway 80 to junction U.S. Highway 81, thence along U.S. Highway 81 to the Texas-Oklahoma State line. The purpose of this filing is to eliminate the gateway of Indiana.

No. MC 106401 (Sub-No. E5), filed May 13, 1974. Applicant: JOHNSON MOTOR LINES, INC., P.O. Box 10877, Charlotte, N.C. 28234. Applicant's representative: Thomas G. Sloan (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: General Commodities, except those of unusual value, classes A & B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, livestock, and commodities injurious or contaminating to other lading from points in Alamance, Buncombe, Burke, Cabarrus, Caldwell, Catawba, Chatham, Cumberland, Davidson, Davie, Durham, Forsyth, Guilford, Granville, Harnett, Iredell, McDowell, Mecklenburg, Moore, Orange, Randolph, Rowan, Stokes, Surry, and Stanly Counties, N.C., except points on U.S. Highway 29 between the Gaston-Mecklenburg County line and Charlotte, North Carolina Highway 49 between Charlotte and the Junction of unnumbered highway just south of Concord, unnumbered highway between the Junction of North Carolina Highway 49 and Concord, Alternate U.S. Highway 29 between Concord and the Junction of U.S. Highway 29, U.S. Highway 29 between the Junction of Alternate U.S. Highway 29 and High Point, Alternate U.S. Highway 29 between High Point and Greensboro, Alternate U.S. Highway 70 between Greensboro and Junction U.S. Highway 70, U.S. Highway 70 between the Junction of Alternate U.S. Highway 70 and Durham, U.S. Highway 15 between Durham and Oxford, U.S. Highway 158 between Oxford and the Granville-Vance County line, U.S. Highway 220 between the Montgomery-Randolph County line and the Junction of U.S. Highway 311 just south of Randleman, U.S. Highway 311 between the Junction of U.S. Highway 220 just south of Randleman and High Point, N.C. Highway 70 between Durham and the Junction of North Carolina Highway 54 (formerly unnumbered highway), North Carolina Highway 54 between the Junction of U.S. Highway 70 and the Durham-Wake County line, U.S. Highway 29 between Greensboro and the Guilford-

Rockingham County line, U.S. Highway 70 between Salisbury and Hickory, U.S. Highway 321 between Hickory and the Junction of Alternate U.S. Highway 321, Alternate U.S. Highway 321 between the Junction of U.S. Highway 321 and Valmead, U.S. Highway 29 between the Junction of North Carolina Highway 49 and China Grove, to points in South Carolina west or north of a line consisting of western and northern boundaries of Horry, Georgetown, Williamsburg, Clarendon, Calhoun, Orangeburg, and Barnwell Counties, except points on U.S. Highway 123 between the Georgia-South Carolina line and Greenville, U.S. Highway 29 between the Georgia-South Carolina State line and Lyman, Alternate U.S. Highway 29 between Lyman and the South Carolina-North Carolina State line, U.S. Highway 1 between the Georgia-South Carolina State line and the South Carolina-North Carolina State line, U.S. Highway 76 between Columbia and Florence, U.S. Highway 15 between Sumter and the Junction of U.S. Highway 52 near Society Hill, U.S. Highway 52 between Florence and the Junction of U.S. Highway 1 near Cheraw. The purpose of this filing is to eliminate the gateways of Greenville, Spartanburg, Blacksburg, Columbia, Cheraw, Sumter, Florence, and Camden, S.C. and Charlotte, N.C.

No. MC 106603 (Sub-No. E1), filed May 10, 1974. Applicant: DART TRANSIT LINES, INC., 200 Colrain St. SW., P.O. Box 8008, Grand Rapids, Mich. 49505. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Building contractors' materials, restricted to roofing materials, from those points in Illinois on, south, and west of a line beginning at the Illinois-Missouri State line, and extending along U.S. Highway 51 to junction U.S. Highway 24, thence along U.S. Highway 24 to the Illinois-Missouri State line, thence along the Illinois-Missouri State line to those points in Ohio north of a line beginning at the Ohio-Indiana State line and extending along U.S. Highway 30 to junction U.S. Highway 30S, thence along U.S. Highway 30S to junction Ohio Highway 95, thence along Ohio Highway 95 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 36, thence along U.S. Highway 36 to junction U.S. Highway 250, thence along U.S. Highway 250 to the Ohio-West Virginia State line. The purpose of this filing is to eliminate the gateway of Whiting, Ind.

No. MC 106603 (Sub-No. E2), filed May 10, 1974. Applicant: DART TRANSIT LINES, INC., P.O. Box 80008, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavett (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Building contractor's materials, restricted to roofing materials, from those points in Illinois on and north of U.S. Highway 17 to

points in Ohio. The purpose of this filing is to eliminate the gateway of Whiting, Ind.

No. MC 106603 (Sub-No. E3), filed May 10, 1974. Applicant: DART TRANSIT LINES, INC., P.O. Box 8003, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Building contractor's materials, restricted to building and roofing materials, from points in Illinois to those points in the Lower Peninsula of Michigan. The purpose of this filing is to eliminate the gateway of Whiting, Ind.

By the Commission.

[Notice No. 775]

#### ASSIGNMENT OF HEARINGS

May 21, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notifi-

#### NOTICES

fied of cancellation or postponements of hearings in which they are interested.

MC 136384 Sub 7, Palmer Motor Express, Inc., now assigned August 4, 1975 at Atlanta, Georgia is postponed to August 11, 1975, at Atlanta, Georgia.

MC 119493 Sub 133, Monkem Company, Inc., application dismissed.

MC 119726 Sub 47, N.A.B. Trucking Co., Inc., application dismissed.

MC-F 12338, Riteway Express, Inc.—Purchase—A. Knorr's Express, Inc., and MC 1668 Sub 6, Riteway Express, Inc., now assigned July 8, 1975, at New York, New York, is postponed to September 9, 1975 in New York, New York.

MC 130279, Four Winds Travel, Inc., now assigned July 23, 1975 at New York, New York, is postponed indefinitely.

MC-C-8619, Transport of New Jersey, Asbury Park-New York Transit Corporation; Decamp Bus Lines; Hudson Bus Transportation Company, Inc.; Hudson Transit Lines, Inc.; Lakeland Bus Lines, Inc.; Lincoln Transit Company; Manhattan Transit Company; Maplewood Equipment Company; New York-Keansburg-Long Branch Bus Company, Inc.; North Boulevard Transportation Company; Somerset Bus Company, Inc.; Suburban Transit Corporation; and Port Authority of New York and New Jersey—Investigation of Operations and Practices; now being assigned July 21, 1975 (1 week) at New York, New York; in a hearing room to be designated later.

No. 36093 Mississippi Public Service Commission v. Illinois Central Gulf Railroad Company, now being assigned September 15, 1975 (1 week), at Jackson, Miss., in a hearing room to be later designated.

MC 25708 Sub 25, Laney Tank Lines, Incorporated; MC 103191 Sub 49, The Goe. A. Rheman Co., Inc. and MC 106119 Sub 22, Associated Petroleum Carriers; now being assigned July 28, 1975 (1 week) at Colum-

bia, South Carolina, in a hearing room to be designated later.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

#### FOURTH SECTION APPLICATION FOR RELIEF

May 21, 1975.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 40 of the general rules of practice (49 CFR 1100.40) and filed on or before June 11, 1975.

FSA No. 42993—Corn and Soybeans Between Points in Iowa. Also From Points in Iowa, Minnesota and South Dakota, to Points in Illinois, Iowa and Wisconsin. Filed by Western Trunk Line Committee, Agent (No. A-2713), for interested rail carriers. Rates on corn and soybeans, in bulk, in carloads, as described in the application, between points in Iowa; also from points in Iowa, Minnesota and South Dakota, to points in Illinois, Iowa and Wisconsin.

Grounds for relief—Unregulated truck competition.

By the Commission.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

## Title 21—Food and Drugs

## CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

## Administrative Practices and Procedures

This notice establishes administrative practices and procedures governing activities of the Food and Drug Administration. It includes the procedures under which citizen petitions will be submitted to and considered by the agency, the justification for and conduct of formal evidentiary public hearings, public hearings before a Public Board of Inquiry, public hearings before a public advisory committee, public hearings before the Commissioner, regulatory hearings before the Food and Drug Administration, and standards of conduct and conflicts of interest. It amends existing agency regulations to conform them to the new regulations governing practices and procedures. The new regulations are effective on July 28, 1975. Public comment on the new regulations may be submitted to the Hearing Clerk on or before July 28, 1975. Any changes warranted by such comment will be reflected in a further order modifying those new regulations.

The present administrative practices and procedures of the Food and Drug Administration are largely uncodified and, to the extent that they are included in existing regulations, are spread throughout numerous sections in the Code of Federal Regulations and in agency manuals. Many of these practices and procedures have been developed over the years on an ad hoc basis, to meet immediate needs, without systematically integrating them into the agency's overall practices and procedures. Many of the agency's practices and procedures have not been written down in any manual or regulation. Accordingly, the Commissioner of Food and Drugs has concluded that a thorough review of agency practices and procedures should be undertaken, and that comprehensive regulations should be adopted to codify existing requirements, establish new requirements where none currently exist, and conform present regulations so that practices and procedures will be applied consistently throughout the agency. This notice reflects the continuing efforts of the Food and Drug Administration on this project for more than a year.

Many of the matters covered in these regulations are not explicitly mentioned in any of the laws administered by the Commissioner. The Supreme Court recently recognized in *Weinberger v. Benetex Pharmaceuticals, Inc.*, 412 U.S. 653, 645 (1973), that the Food and Drug Administration has authority which "is implicit in the regulatory scheme, not spelled out in *haec verba*" in the statute. As stated in *Morrow v. Clayton* 326 F. 2d 36, 44 (10th Cir. 1963):

However, it is a fundamental principle of administrative law that the powers of an administrative agency are not limited to those expressly granted by the statutes, but include, also, all of the powers that may fairly be implied therefrom. *Pan American World*

*Airways v. United States*, 371 U.S. 206, 83 S. Ct. 470, 9 L.Ed.2d 325; *United States v. Pennsylvania Railroad Company*, 323 U.S. 612, 65 S.Ct. 471, 89 L.Ed. 499; *United States v. Bailey*, 9 Pet. 238, 34 U.S. 238, 9 L.Ed. 113. The rule in this respect is well stated in 1 Am. Jur.2d, Administrative Law, section 44, p. 848:

The Court is not limited to the mere words of a statute or what is expressly declared therein, and that which is incidentally necessary to a full exposition of the legislative intent should be upheld as being germane to the law. In the construction of a grant of powers, it is a general principle of law that where the end is required the appropriate means are given and that every grant of power carries with it the use of necessary and lawful means for its effective execution. There is therefore conferred by necessary implication every power proper and necessary to the exercise of the powers and duties expressly given and imposed.

The Commissioner concludes that all of the matters covered in the new regulations readily fall within these principles.

The Commissioner notes that this notice promulgates regulations dealing with administrative practices and procedures exclusive of regulatory enforcement activities. The Food and Drug Administration is presently at work codifying the agency's enforcement practices and procedures, which will include regulations relating to imports, criminal prosecution (including both the use of citations under section 305 and the criteria for recommending criminal prosecution), recall and detention of products, publicity, regulatory letters, and related matters. These regulations will be published in the *FEDERAL REGISTER* in the future.

## EFFECTIVE DATE

The Commissioner has concluded that there are compelling public interest reasons why these regulations should be made effective at this time, rather than first publishing them as a proposal with time for public comment.

All of these regulations establish procedures governing the on-going activities of the agency. It is clear that such activities will continue, whether or not written procedures exist to govern them. For example, citizens will continue to submit petitions to the agency, public hearings of all types will be conducted, advisory committees will meet, and other similar activities will take place. Without written regulations of the type established in this notice, considerable confusion and uncertainty about the procedures governing these activities will continue to exist. The Commissioner concludes that, rather than continue with inconsistent, incomplete, and out-of-date agency practices and procedures, many of which have never been codified in any form, it is in the public interest to establish clear new practices and procedures by making these regulations effective 60 days after their publication in the *FEDERAL REGISTER*.

At the same time, the Commissioner wishes to encourage public comment on these regulations. A period of 60 days is provided for submission of such comments. The Commissioner emphasizes that, although all of the regulations established in this notice have been the

subject of intensive agency consideration for over a year, and therefore represent the best current thinking of the Food and Drug Administration, all of them are subject to modification on the basis of persuasive public comment which points out errors, inconsistencies, or sound legal or public policy reasons for changing them. The fact that they are published as final regulations, rather than as a proposal, is simply to permit the orderly transaction of agency business, pursuant to written procedures, during the interim period while public comment is being obtained. Once all public comment has been obtained, further modification of these regulations will be undertaken.

Most of the statutory provisions implemented by these regulations are self-executing, and thus the agency must comply with such requirements regardless whether implementing regulations exist. Similarly, many agency practices and procedures already in existence, but uncodified, require no regulations for continuation. Rather than publish a proposal, which would then of necessity be implemented as if it were a final order, it is more forthright and fair to publish this notice as a final regulation, subject to modification on the basis of the public comment that will be received.

The Commissioner concludes that the Administrative Procedure Act (APA), 5 U.S.C. 553(b), as well as the provisions of these regulations, fully authorize their publication as final regulations with time for comment. Under the APA, all regulations governing procedure or practice may be published without the requirement of notice and public procedure, and indeed any other regulation may be so published where notice and public procedure are impracticable, unnecessary, or contrary to the public interest. The Commissioner concludes, for the reasons stated above, that both of these standards are met in this instance. Under the new regulations themselves, it is provided that any regulation may be issued in final form, without notice and public procedure, under such circumstances, and that in all such instances time will be provided for public comment in order to determine whether additional modification is appropriate. Although the Commissioner has very seldom used this procedure in the past few years, and intends to use it very seldom in the future, it is apparent that on occasions such as this it is the only practicable way to proceed in an orderly fashion with the activities of the agency.

The Commissioner will consider any reasonable request for an extension of the 60-day period for public comment on the new regulations, where good cause is shown. No extension of time for comment will be considered by the Commissioner, however, on any provision of the new regulations on which litigation is instituted. The Commissioner has concluded that, if any provision of the new regulations is challenged in the courts, it will be important to receive and act upon all comments relating at least to that portion of the regulations, so that any modification justified by the com-

ment can promptly be made and judicial reviews can therefore be obtained on the final version of the regulations, as so modified in light of the comments received.

The Commissioner recognizes that, with experience, these new regulations will undoubtedly require additions and modifications. As is true with any attempt to codify procedures on a comprehensive basis, it must be expected that some of the provisions will require change, and new provisions will be needed to clarify existing provisions and to codify new procedures not previously covered. This will necessarily be a lengthy on-going process that will never fully be completed.

## ADMINISTRATIVE PRACTICES AND PROCEDURES (PART 2)

The Commissioner has concluded that Part 2 of Title 21 of the Code of Federal Regulations should be set aside to contain all regulations governing Food and Drug Administration administrative practices and procedures. Accordingly, the existing provisions in Subparts H and M of Part 2, relating to delegations of authority and organization of the Food and Drug Administration, have been transferred to a new Part 5. The provisions relating to formal evidentiary public hearings in present Subpart F of Part 2 are substantially out of date, and are revoked and superseded by the new regulations in Subpart B of Part 2.

## GENERAL (SUBPART A)

Subpart A of new Part 2 is intended to encompass all of the general provisions relating to the agency's practices and procedures. The Commissioner anticipates that, as additional agency policy is established with regard to general practices and procedures, it will be added in the form of new sections in this subpart.

## SCOPE (§ 2.1)

Subpart A of new Part 2 deals with a number of provisions that have general applicability throughout the agency. It contains, for example, uniform requirements with respect to all information filed with the Hearing Clerk, and a standard form for petitions to be filed with the Hearing Clerk. The Commissioner recognizes, however, that specific provisions in other subparts of Part 2, or in other sections of Title 21 of the Code of Federal Regulations, state different requirements applicable to a particular matter. Thus, the form for a new drug application (NDA) in § 314.1(c)(2) will of course remain applicable, as will all of the other specific forms and formats specified throughout present agency regulations. Similarly, an NDA will continue to be submitted to the Bureau of Drugs as provided in § 314.1(c), a food additive petition will continue to be submitted to the Bureau of Foods as provided in § 121.51(c), and other forms will be submitted as provided in current agency regulations. In summary, all information submitted to the Hearing Clerk must comply with

the requirements specified in new § 2.5, except to the extent that other specific sections in existing regulations contain different requirements that are inconsistent with the provisions of new § 2.5. Thus, new general requirements are established that will be applied consistently and uniformly throughout the agency, except to the extent that they are explicitly overridden by specific provisions in other sections.

## DEFINITIONS (§ 2.3)

Section 2.3 contains uniform definitions for use throughout all of Part 2. Some of the more important definitions are as follows:

The definitions clearly distinguish between a "party" to and a "participant" in a formal evidentiary public hearing or a Board of Inquiry. A "party" is any person who has exercised the right to request a hearing and as a result of whose action a hearing has been granted. A "participant" means any person who wishes to participate in any proceeding, including the parties and other interested persons. The bureau of the Food and Drug Administration responsible for the matter involved is always a party in any hearing.

The terms "interested person" and "any person who will be adversely affected" are defined very broadly to mean any person who wishes to participate in any proceeding of the Food and Drug Administration. There is no requirement that such person exhibit any particular interest, or show any specific economic or other harm or other indicia of "standing." Since Food and Drug Administration activities directly affect all members of the public, all members of the public who wish to participate are "interested persons" and "adversely affected" by definition. The courts have ruled that all citizens who wish to challenge agency actions affecting food and drugs are "adversely affected" and thus may properly submit objections and otherwise participate in administrative proceedings where the statute requires such a showing. See *Reade v. Ewing*, 205 F. 2d 630 (2d Cir. 1953).

The term "petition" is defined broadly to include any form of formal request for agency action, including petitions, applications, or other similar documents. It does not include routine correspondence which does not purport to meet the requirements for a petition established in § 2.6(a) of the regulations.

The definitions distinguish between a "regulation" and an "order," for purposes of application of the requirements of the Administrative Procedure Act. Regulations are agency rules of general or particular applicability and future effect that are issued in the *FEDERAL REGISTER* and codified in the Code of Federal Regulations. A regulation may state either a legal requirement or a recommendation of the Food and Drug Administration. Orders mean final agency disposition of an administrative proceeding other than by the issuance of a regulation, including the issuance or revocation of product licenses.

A "meeting" is defined to include any oral discussion, whether by telephone or in person.

"Administrative action" includes every form and kind of act, including the refusal or failure to act, involved in the implementation of the laws administered by the Commissioner. The referral of apparent violations to United States attorneys for the institution of criminal and civil proceedings, including any enforcement activity in preparation for or incidental to such referral, is specifically excluded from this definition, however, since such enforcement action is solely within the discretion of the Commissioner and is not subject to petitions or other action by interested persons outside the agency. Thus, such compliance activity as factory inspection, requests for samples, section 305 citations, and similar matters related to the agency's law enforcement role are not included in this definition.

## SUMMARY OF PROCEDURES (§ 2.4)

Many interested persons have complained that it is difficult to know and understand all of the administrative procedures utilized by the Food and Drug Administration. The Commissioner recognizes that public understanding of agency procedures is essential to encourage and facilitate public participation in all agency activities. Accordingly, § 2.4 of the regulations requires preparation and broad dissemination of summaries of agency procedures, perhaps in pamphlet form, in terms that will be readily understood and usable by the lay public.

SUBMISSION OF DOCUMENTS TO HEARING CLERK; COMPUTATION OF TIME; AVAILABILITY FOR PUBLIC DISCLOSURE (§ 2.5)

Section 2.5 of the regulations contains new uniform requirements for submission of all documents to the Hearing Clerk, except where other provisions in agency regulations specify different requirements.

All submissions must be filed in quintuplicate, except for comments filed by individuals, and must include all data and information referred to or in any way relied upon unless the material has been previously submitted as part of the administrative file in the same proceeding, e.g., a petition for reconsideration may refer to the previously established administrative record without reproducing any portion of it. All such documents shall be considered as submitted on the date on which they are postmarked or delivered in person during regular business hours, unless an applicable regulation or *FEDERAL REGISTER* notice specifies otherwise. Actual copies of all documents to which reference is made are needed because of the Commissioner's experience that they are frequently hard to locate. Documents in a foreign language must be translated to avoid substantial agency resources being devoted to such translation and delay necessitated by obtaining translation.

Submissions must be signed by the person making the submission or by an attorney or other authorized representa-

tive. An attorney or other authorized representative may, of course, submit comments or other documents in his own name, without revealing that he is acting on behalf of a client. If a submission reveals that an attorney or representative is not acting on his own behalf, there must be documentation verifying his authority to act in a representative capacity.

The Commissioner advises that the Food and Drug Administration will require rigid adherence to these new requirements. Failure to comply with the requirements of § 2.5, or any other applicable requirements for format and content in these new regulations, e.g., § 2.112 relating to objections and requests for hearing, will result in rejection of the submission for filing or, if it has been filed, in exclusion from consideration of any portion of the submission which fails to comply. The courts have held that administrative agencies may properly reject a filing when it is deficient in form. See, e.g., *Municipal Light Boards v. Federal Power Comm'n.*, 450 F.2d 1341, 1345-1346 (D.C. Cir. 1971), cert. denied, 405 U.S. 989 (1972). It is therefore essential that the procedural requirements in these new regulations be complied with strictly.

The Commissioner recognizes that it will be difficult for the Hearing Clerk to determine compliance by the hundreds of thousands of submissions made yearly to the Food and Drug Administration with all of the technical requirements of these regulations. The appropriate bureau, the Chief Counsel, and the Associate Commissioner for Compliance may be called upon by the Hearing Clerk to advise as to whether a particular submission should be filed. It is anticipated that some submissions which do not comply will erroneously be filed. Accordingly, the regulations provide that acceptance for filing does not mean or imply that a document in fact meets all applicable requirements of the regulations.

Under some Food and Drug Administration regulations, acceptance for filing means that the agency has determined that a petition contains reasonable grounds for the action requested and that the action requested is in accordance with the law. In view of the fact that the Hearing Clerk is not in a position to make these determinations, the new regulations explicitly provide that acceptance for filing of any document by the Hearing Clerk does not mean or imply anything with respect to the merits of the request.

Because the office of the Hearing Clerk is located in Rockville, MD, it is sometimes inconvenient to deliver a submission which is required to be received by the Hearing Clerk on a specific date. Accordingly, any document delivered to Rm. 6819 of the Food and Drug Administration downtown headquarters building at 200 C Street, SW., Washington, DC, will be considered as having been received by the Hearing Clerk on the date on which it is logged in at that office. The Commissioner emphasizes that this provision applies only to documents that

are required to be received by the Hearing Clerk by a specific date, and not to documents that are required to be mailed to the Hearing Clerk by a specific date.

All submissions to the Hearing Clerk constitute a representation that, to the knowledge and belief of the person making the submission, the statements made are true and accurate. The False Reports to the Government Act, 18 U.S.C. 1001, provides that a willfully false statement in any submission of this type is a felony. All submissions will be required to be signed by the person making the submission, and that individual will therefore be subject to this provision of the law.

Section 2.5(j) governs the availability for public examination and copying of all submissions to the Hearing Clerk. Thus, it is applicable to such matters as petitions and comments on petitions, and also to all evidence and pleadings submitted to the Hearing Clerk in the course of a formal evidentiary public hearing pursuant to Subpart B of Part 2, a public hearing before a Public Board of Inquiry pursuant to Subpart C, a public hearing before the Commissioner pursuant to Subpart E, or any alternative form of public hearing used pursuant to § 2.117 in lieu of a formal evidentiary public hearing. It is not applicable to a public hearing before a public advisory committee pursuant to Subpart D except when it is being used pursuant to § 2.117 or to a regulatory hearing before the Food and Drug Administration pursuant to Subpart F, however, because those two subparts do not provide for submission of material to the Hearing Clerk. Accordingly, separate provisions in §§ 2.316 and 2.514 govern examination of the administrative record of a public hearing before a public advisory committee and a regulatory hearing before the Food and Drug Administration.

Section 2.5(j) divides submissions to the Hearing Clerk into three categories: those that may be seen and copied by the public, those that may be seen but not copied by the public, and those that may be neither seen nor copied by the public.

The Commissioner concludes that all petitions and comments thereon submitted to the Hearing Clerk must be available for public review and copying. These involve public procedures, and any action to be taken must be justified by the Commissioner to the public. For example, the Commissioner must publicly explain his action in accepting or rejecting any comment on a proposed regulation. Accordingly, material which any person does not wish to become available to the public should not be submitted to the Hearing Clerk with a petition or comment. Of course, since NDA's, NADA's, and applications for biologics licenses are submitted directly to the bureaus and not to the Hearing Clerk, their availability for public disclosure is governed by the provisions on public information in Part 4 and the regulations referenced therein, and not by the provisions of § 2.5(j).

The Commissioner concludes that the type of issue which is likely to be con-

sidered at a public hearing before the Commissioner pursuant to Subpart E of Part 2 is very similar to the type of issue likely to be considered in petitions and comments. Such a hearing will involve policy issues, not technical issues of the kind that will require submission and detailed consideration of trade secret material. For example, any valuable safety and effectiveness data relevant to such a hearing can be discussed in summary form without submitting the full reports in a way that would destroy their commercial value. Accordingly, all material submitted by any person at a public hearing before the Commissioner pursuant to Subpart E will also be fully available to the public.

The only exception to this will be when a public hearing before the Commissioner is being used pursuant to § 2.117 in lieu of a formal evidentiary public hearing. In that situation the same rules on examination and copying of the administrative record will apply as would apply if it were held pursuant to Subpart B, i.e., § 2.5(j) (2) and (3) will be applicable. The Commissioner concludes that the same disclosure rules must apply to all alternative forms of public hearing used under § 2.117.

Objections and requests for hearing filed pursuant to Subpart B, and material submitted at either a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry, will also be fully available to the public except to the extent prohibited by the provisions in § 2.5(j) (2) and (3), discussed below, which limit public access to particular types of material. The Commission is of the opinion that public proceedings of any type should be held on the basis of publicly available data and information wherever possible. Unless this is true, participants in the proceeding may not be in a position to review and evaluate all relevant information, and thus to participate in such proceedings in a meaningful way. Accordingly, the Commissioner has concluded that all data and information submitted to the Hearing Clerk relating to such proceedings must be available for examination and copying by the public, with only very limited exceptions.

The exceptions to the general rule for public disclosure of material submitted to the Hearing Clerk are set out in § 2.5(j) (2) and (3), and relate solely to data and information which constitute trade secrets or which represent a clearly unwarranted invasion of personal privacy.

With respect to data and information involving personal privacy, the Commissioner has previously stated in paragraph 127 of the preamble to the public information regulations promulgated in the *FEDERAL REGISTER* of December 24, 1974 (39 FR 44602) that the right to privacy is a fundamental principle of law and ethics. Accordingly, §§ 4.63 and 4.82 prohibit discretionary release of any information that falls within the personal privacy exemption to the Freedom of Information Act. That policy is fully reflected in § 2.5(j) (3), which similarly prohibits public disclosure of material submitted to the Hearing Clerk which

contains data and information of a privacy nature, e.g., names of medical patients. The Commissioner anticipates that the prohibition against submission of such material to the Hearing Clerk in § 2.5(c) (4) will prevent its submission. If it is submitted and filed, however, it will not be available for public disclosure.

With respect to data and information which constitute trade secrets and confidential commercial or financial information, the agency's public information regulations published on December 24, 1974 reflect detailed consideration of the application of the provisions of 21 U.S.C. 331(j) and 18 U.S.C. 1905, which need not be repeated here. Those regulations clearly distinguish between material which provides a competitive advantage because it is needed for submission to the Food and Drug Administration by each person who wishes to obtain approval for marketing of a particular product (safety and effectiveness data) and material which, if known to any competitor, could be put to use directly by that competitor in his business activity (manufacturing and quality control procedures, production and sales data, quantitative and semiquantitative formulas, and design and construction information). The former have an indirect competitive effect, and the latter have a direct competitive effect. Accordingly, slightly different rules were adopted in the provisions of Part 4 and the regulations referenced therein with respect to these two different categories of material.

The Commissioner has concluded that the same distinction should be reflected in the provisions of § 2.5(j) (2) and (3) with respect to public disclosure of material filed with the Hearing Clerk. Data and information relating to safety and effectiveness, which of course necessarily reveal the protocols involved, will be placed on public display in the office of the Hearing Clerk but will not be available for copying. In contrast, data and information relating to such trade secrets as manufacturing processes and quantitative formulas will not be available either for examination or for copying by the public. Of course, any data and information which are available for public disclosure pursuant to Part 4 and the regulations referenced therein will be available for public examination and copying pursuant to § 2.5(j) (1) and will not be subject to the limitations set out in § 2.5(j) (2) or (3).

Thus, the provisions in § 2.5(j) (2) relating to limited availability of safety and effectiveness information are applicable only to new drugs and new animal drugs. Safety and effectiveness data relating to food additives, antibiotics, and biologics are available for public disclosure pursuant to the public information regulations promulgated on December 24, 1974.

In accordance with the provisions of Part 4 and the regulations referenced therein, a summary of secret safety and effectiveness data is itself not secret, because no NDA or NADA can properly be approved on the basis of such a summary. Moreover, the public information

regulations promulgated on December 24, 1974, provide that the Food and Drug Administration will release, for every NDA or NADA, a summary of the safety and effectiveness data on the basis of which the approval was made. Accordingly, any hearing which concerns the safety or effectiveness of a new drug or new animal drug will permit full public participation, since any participant will be able to obtain a copy of the summary of all of the relevant data and information and will then be able to check that summary against the full reports of the data and information contained in the office of the Hearing Clerk.

At the same time, providing the full reports only in the office of the Hearing Clerk, and prohibiting their copying or, if they should be copied, subsequent submission to the Food and Drug Administration in support of any petition or application, protects their commercial value to the maximum extent that is consistent with a public hearing. The Commissioner notes that the trade secret status of this type of data and information consists not in actual knowledge of the content of the reports, but in their availability for submission to the agency to support an NDA or NADA. By precluding such submission, the commercial value of this material is preserved.

The Commissioner is unaware of any formal evidentiary public hearing on an NDA or NADA conducted by the Food and Drug Administration since 1938 in which manufacturing processes and similar information were relevant. All such hearings have related to issues of safety and effectiveness. Under the provisions of new Subpart B, only the relevant portions of the NDA or NADA are submitted to the Hearing Clerk, and the irrelevant portions do not become a part of the administrative record. Accordingly, it is highly probable that, in practice, all participants in virtually all future hearings will have access to all of the data and information needed for meaningful participation. It will only be the rare instance where, in order to protect valid trade secrets, relevant information cannot be made available to all participants.

In order to reduce the possibility of damage to commercial interests, § 2.5(j) (2) provides that safety and effectiveness data and information which constitute trade secrets shall be available for public examination only as long as is necessary for participation in a hearing and any subsequent judicial review.

The Commissioner notes that the provisions of § 2.5(j) (2) represent a compromise between the need for public availability of information relevant to a public hearing, and the need for protection of trade secrets. Greater access to the data and information involved is provided than is the situation where no public hearing is held, but less access is provided than for data and information which do not constitute trade secrets. The Commissioner concludes that this resolution of the matter is consistent with applicable statutes and is in the public interest.

The Commissioner realizes that, in some instances, it would be a hardship to require that a participant in a proceeding, who is located elsewhere in the country, come to the Hearing Clerk's office in Rockville, MD, to review data and information that are available for examination in the Hearing Clerk's office but not for copying. Where this occurs, the Commissioner will entertain a petition requesting that the data and information involved be sent to the nearest Food and Drug Administration District Office, where they may be examined by the participant.

The Commissioner emphasizes that the provisions in § 2.5(j) will be strictly followed. If a person submits comments on a regulation and marks some of the attachments as "confidential," those attachments will be placed on public display in accordance with the provisions of §§ 2.5(j) (1) and 4.27 without consultation with the person who has submitted the information.

In some proceedings, the new regulations require the Food and Drug Administration to file the prior administrative record, which would include the relevant portions of an NDA or NADA. In performing this function, the Food and Drug Administration may either request that the holder of the NDA or NADA review and make an initial designation of those portions for which full public access is not warranted, pursuant to § 2.5(j) (2) or (3), after which the agency will make its final determination on the matter; or the agency may itself make a determination and then consult with the holder of the NDA or NADA on any close questions pursuant to the provisions of § 4.45.

#### INITIATION OF ADMINISTRATIVE PROCEEDINGS (§ 2.6)

Section 2.6 recognizes that an administrative proceeding may be initiated in any of three ways: On the initiative of an interested person outside the agency, on the agency's initiative, or at the request of a court.

The Supreme Court has held, in the four decisions it handed down on June 18, 1973, relating to the agency's regulation of new drugs, that the Food and Drug Administration has primary jurisdiction to make the initial administrative determination on issues within its statutory mandate: "A decision that FDA lacks authority to determine in its own proceedings the coverage of the Act it administers, subject of course to judicial review, would seriously impair FDA's ability to discharge the responsibility placed on it by Congress." *Ciba Corp. v. Weinberger*, 412 U.S. 640, 643 (1973). Accordingly, § 2.6(b) provides that the agency will request a court to dismiss, or to hold in abeyance its determination of, or to refer to the agency for administrative determination, any issue within the agency's jurisdiction which has not previously been determined by the agency or which, if it has previously been so determined, the agency concludes should be reconsidered and subject to a new administrative determination.

## CITIZEN PETITION (§ 2.7)

The Administrative Procedure Act, 5 U.S.C. 553(d), provides that every agency shall accord any interested person the right to petition for the issuance, amendment, or repeal of a rule. Even more fundamental, the First Amendment to the Constitution explicitly recognizes the right of the people to petition the government for a redress of grievances. Accordingly, § 2.7 provides that any person may submit to the agency a citizen petition requesting the Commissioner to issue, amend, or revoke a regulation or order to take or refrain from taking any other form of administrative action.

The citizen petition is intended to cover every form of agency administrative activity, including a refusal to act. It may relate to factual, policy, or legal issues. The regulation does not set out all of the possible activities involved because it is intended to be all-inclusive and any such list would necessarily be incomplete. It does not cover, however, referral of matters to United States attorneys for enforcement action in the courts and related regulatory activity.

In the past, there has been no form or other procedural requirements relating to a citizen petition. This has resulted in confusion and uncertainty on the part of those who wish to petition the agency on a particular matter, as well as on the part of those in the agency who have received various forms of requests and have been unable to determine how they should be handled.

Of course, the provisions of § 2.7 do not apply to routine correspondence. Where members of the public address letters to the Food and Drug Administration making informal requests or suggestions, they will be handled in the same way as other correspondence rather than as petitions under § 2.7. For example, anyone may send a letter to the agency suggesting particular action which, if the agency then pursues the matter on its own initiative, obviates filing a petition pursuant to § 2.7. Denial of an informal request or suggestion encompassed in routine correspondence will not be sufficient, however, to constitute final agency action and to invoke the right to judicial review of administrative action as set out in § 2.11 of the new regulations. Only those matters specifically raised in a formal petition submitted pursuant to § 2.7 will require a formal response by the Commissioner which constitutes final agency action subject to such court review.

The provisions of § 2.7 will therefore in no way impede the normal flow of informal and routine correspondence by the agency, on the basis of which most of its daily work is accomplished. Rather, § 2.7 will be reserved for those specific matters where, perhaps after informal discussion and correspondence, a member of the public concludes that a formal proceeding should be initiated to resolve a particular matter. Thus, the agency will easily be able to distinguish between informal discussion and formal petitions

in a way that has not previously been possible.

The petition must include the action requested, a statement of grounds, and the environmental impact, if any, of the action requested. In addition to including all data, information, and views on which the petition relies, it must also include representative data and information known to the petitioner that are unfavorable to the petition. The Commissioner has found, in reviewing petitions submitted in the past, that adverse or unfavorable information is omitted and ignored, thus resulting in a very unbalanced and misleading presentation. It is for this reason that, in recent regulations, the Commissioner has required submission of representative unfavorable information in order to provide a more balanced and reasonable presentation, e.g., § 328.30(c)(18) relating to submission of data and information on in vitro diagnostic products in connection with the development of a standard. Without such a requirement, a person submitting a petition could present only one side of the story and thus mislead both the Food and Drug Administration and the public as to the true situation. This provision will prevent, for example, a manufacturer from submitting only data showing the safety and utility of an ingredient or product, or a consumer advocate from submitting data showing only the hazards from an ingredient or product. In both instances, a balanced presentation, showing representative data on both sides of an issue, will be required. The failure to include such data and information would constitute a violation of the False Reports to the Government Act, 18 U.S.C. 1001.

Any petition which appears to meet the requirements set out in this new regulation shall be filed by the Hearing Clerk and handled in accordance with the provisions of this regulation. A docket number will be assigned to each petition (or to related petitions) which will be used to identify the administrative file established by the Hearing Clerk for all submissions relating to that petition.

The Commissioner on occasion receives petitions on which others wish to comment before the Commissioner takes action. The new regulation provides that such comments may be submitted to the Hearing Clerk and will be included as part of the administrative file.

The Commissioner will review and rule upon every petition as soon as possible, taking into consideration the agency resources, the priority assigned to the matter, and time requirements established by statute. Perhaps the greatest problem facing the Food and Drug Administration today is the scarcity of resources to deal with petitions and other similar requests. Quite frequently, a lack of resources, and the high priority necessarily given to health-related matters, requires that important but lower priority matters be deferred for a substantial period of time. It is evident that not all petitions can be handled in a short period of time, simply because of the lack of resources available. Thus the Commission-

er anticipates that, in a significant number of instances, petitions with a relatively low priority will not be acted upon promptly.

An apparent delay in responding to a petition may also result from the fact that the agency is in the process of taking action of the type sought in the petition, but has not reached the point of implementation. To grant the relief sought in the petition in such instances would be premature; to deny the petition would constitute final administrative action possibly triggering the unnecessary initiation of judicial review by the petitioner. A delay in ruling on the petition is prudent in such instances.

A determination with respect to the priority to be assigned to any particular petition or other matter must of necessity be within the discretion of the Commissioner, who is charged with the responsibility for implementing all provisions of the laws subject to his jurisdiction.

A petitioner may supplement or amend his petition at any time, and may withdraw it without agency approval at any time before the Commissioner rules on it.

The decision of the Commissioner on a petition shall be in writing and shall be sent to the petitioner as well as placed in the public administrative file in the office of the Hearing Clerk. The Commissioner has inherent discretionary power to set any reasonable effective date relating to any decision resulting from a citizen petition.

In reviewing the matter and making his decision, the Commissioner may, in his discretion, utilize any of a wide variety of optional procedures specified in the regulation.

The record of the administrative proceeding is specified in § 2.7(i) of the regulations. Under § 2.7(j), that administrative record shall constitute the exclusive basis for the Commissioner's decision. Accordingly, any subsequent judicial review shall be based solely upon that administrative record and the Commissioner's decision. If the Commissioner or any interested person wishes to rely upon other data or information not included in the administrative record, the new information must be submitted with a new petition seeking to modify the decision.

The Hearing Clerk is required to maintain a chronological list of all petitions filed pursuant to this section, including all requests for advisory opinions pursuant to § 2.19, showing the docket number, the date of filing, the name of the petitioner, and the subject matter involved. This list will exclude petitions submitted elsewhere in the agency pursuant to § 2.6(a)(1) of the new regulations. Those other petitions will be listed in the list of regulations prepared pursuant to § 2.10(i) of the new regulations or in other lists, e.g., the list of approved NDA's available pursuant to § 4.117(a)-(1) of the newly-promulgated public information regulations published in the FEDERAL REGISTER of December 24, 1974 (39 FR 44602).

## ADMINISTRATIVE RECONSIDERATION OF ACTION (§ 2.8)

Section 2.8(a) recognizes the inherent right of any administrative official to reopen and reconsider any matter, at any time, on his own initiative or on the petition of any interested person, for any reason whatever. This principle has long been recognized by the courts. See, e.g., *United States v. Pierce Auto Freight Lines, Inc.*, 327 U.S. 515, 534-535 (1946); *Interstate Commerce Comm'n. v. Jersey City*, 322 U.S. 503, 517-518 (1944); *American Chain & Cable Co. v. F.T.C.*, 142 F.2d 909, 911 (4th Cir. 1944); and *Cla Mexicana De Gas v. Federal Power Comm'n.*, 167 F.2d 804, 806-807 (5th Cir. 1948).

Section 2.8(b) contains a specific form for use by any interested person who wishes to request reconsideration by the Commissioner of any part or all of a decision rendered on the basis of a petition submitted pursuant to § 2.6(a), i.e., either in the form specified in § 2.7(b) or in a form specified in any other applicable section in Food and Drug Administration regulations. A petition for reconsideration must be limited to the administrative record on which the Commissioner made his decision, and must be filed within 30 days after the date of the decision involved and before legal action is brought in the courts to review such action. A petition for reconsideration submitted later than 30 days after the date of decision shall be denied as untimely. The Commissioner concludes that a strict time limit of 30 days must be established for such a petition, as well as for a petition for an administrative stay of action pursuant to § 2.9, in order to make certain that such matters are settled promptly. Although filing such petitions does not operate to delay any administrative action, the uncertainty that would be generated by permitting such petitions at any point in time would undermine effective implementation of the act.

A petition for reconsideration is limited to those situations involving reconsideration of a matter arising out of a petition submitted pursuant to § 2.6(a) of the regulations. The Commissioner concludes that, although he may, and in many instances will, reconsider other matters on his own initiative or at the request of an interested person, a formal petition for reconsideration should be limited to those situations in which a well-defined administrative record delineates the data and information on which a decision is reached, and where the decision is in writing. In the future, this will cover all matters where interested persons have formally requested action of the Commissioner, since all such formal requests must be the subject of a petition filed pursuant to § 2.6(a). Formal reconsideration of any other action must be initiated in the form of a petition pursuant to § 2.7, so that an appropriate administrative record can be delineated and considered. This procedure will be utilized, for example, where the Commissioner takes action on his

own initiative rather than pursuant to a petition, and thus the formal administrative record of the type specified in § 2.7 is not yet designated and ready for reconsideration.

The Commissioner has broad discretion in determining whether he should reconsider a matter as a result of a petition for reconsideration. If he concludes that a matter should be reconsidered, he must promptly review the merits of the matter and reaffirm, modify, or overrule his prior decision. His decision on reconsideration, like his initial decision, shall be made in writing, sent to the petitioner, and filed with the Hearing Clerk. In the event that reconsideration is undertaken, all pertinent records will become part of the administrative record of the proceeding.

## ADMINISTRATIVE STAY OF ACTION (§ 2.9)

Section 2.9(a) recognizes the inherent authority of an administrative official to set and to stay or postpone the effective date of any administrative action on his own initiative, or on the petition of any interested person, for good cause. See, e.g., 5 U.S.C. 705 and *N.L.R.B. v. Pool Mfg. Co.*, 339 U.S. 557, 580-582 (1950); *Moog Industries, Inc. v. Federal Trade Comm'n.*, 355 U.S. 411 (1948); *Niagara Mohawk Power Corp. v. Federal Power Comm'n.*, 379 F.2d 153, 158-159 (D.C. Cir. 1967); 1 Davis, *Administrative Law* Treatise § 6.07 (1958 ed.).

In contrast to the provisions governing reconsideration of action, which are limited to matters arising from petitions submitted pursuant to § 2.6(a), § 2.9(b) provides that an administrative stay of action may be requested with respect to any decision of the Commissioner. Such request for stay must be in the form specified in the regulations, and shall be submitted within 30 days after the date of the decision involved. For any decision published in the FEDERAL REGISTER, the date of decision shall be the date of such publication. A request for postponement or extension of the effective date of any regulation shall be made by submitting a petition for a stay pursuant to this regulation. The record of the administrative proceeding with respect to any requested stay shall become part of the total administrative proceeding relating to that matter.

For the same reasons that court enforcement action has been excluded from the definition of administrative action and thus cannot be the proper subject of a petition, it is also not a proper subject of a petition for an administrative stay of action.

The regulations point out that the mere filing of a petition for a stay of action pursuant to this section does not, in itself, operate to stay or otherwise delay any administrative action by the Commissioner, including enforcement action of any kind, unless the Commissioner, in his discretion, determines that a stay or delay is in the public interest, or a statutory provision requires a stay, or a court orders a stay. Similarly, other procedural actions taken by an interested person in accordance with the

new regulations, e.g., the filing of a petition or a request for advisory opinion or any other related action, does not stay or delay any administrative action to which it may relate. The Commissioner is charged with enforcement of important regulatory statutes vitally affecting the public health, and a determination as to when enforcement or other administrative action is appropriate must be subject to his discretionary determination, subject of course to judicial review.

The Commissioner may grant a stay or an extension of time for as short or as long a period of time as is justified under the circumstances. Such a stay may be for a specific time period, which can later be extended, or for an indefinite time period.

The Commissioner advises that adoption of a regulation itself constitutes a finding by the Commissioner that the regulation is in the public interest, and requires a substantial showing to justify a stay.

## PROMULGATION OF REGULATIONS FOR THE EFFICIENT ENFORCEMENT OF THE LAW (§ 2.10)

The Commissioner's general authority under section 701(a) of the Federal Food, Drug, and Cosmetic Act to promulgate regulations for the efficient enforcement of the act permits the establishment of any regulations which are "reasonably related to the purposes of the enabling legislation." See *Mourning v. Family Publications Services, Inc.*, 411 U.S. 356, 369 (1973), and *Thorpe v. Housing Authority of the City of Durham*, 393 U.S. 268, 280-281 (1969). All such regulations are subject to the procedural requirements and exemptions for informal rule making set out in the Administrative Procedure Act, 5 U.S.C. 553.

In addition to the general rule making authority under section 701(a) of the act, section 701(e) and certain other sections of the act specify particular provisions of the law with respect to which Congress concluded that more detailed and formal procedural requirements should be established. Those particular provisions, which are specified in § 2.12(c) (1) through (15) of the new regulations, require rule making "on a record" and thus are subject to a formal evidentiary public hearing pursuant to the requirements of 5 U.S.C. 556 and 557, as spelled out in the provisions contained in Subpart B of Part 2 of the new regulations. The provisions of § 2.10 therefore apply only to regulations not subject to the provisions of § 2.12 except insofar as § 2.12 and Subpart B incorporate by reference some of the general requirements of § 2.10.

Section 2.10(b) spells out the procedure for the promulgation of regulations to implement the laws administered by the Commissioner.

Each notice of proposed rule making must contain in the first or second paragraph a general statement describing the substance of the document in broad and simple terms, similar to the first paragraph of this notice promulgating these new regulations. The Commissioner has

received numerous requests that the agency include such a paragraph in all notices so that it can be reproduced and used by interested publications to describe, in terms readily understood by the public, the scope and intended impact of the proposal.

Each proposed regulation will also contain a proposed effective date. Most proposals published in the past have not specified the proposed effective date, and thus interested persons who have submitted comments have not had an opportunity to express their views on this aspect of the matter.

Ordinarily, 60 days will be provided for comment on a proposal, although the Commissioner may reduce or extend this time period for good cause. Approximately 3 years ago, the normal period for comment was extended from 30 days to 60 days in order to provide sufficient time for comment on most proposals, and to avoid the constant requests for additional time for comment that were then prevalent. Unfortunately, the Commissioner has found that many people do not take the stated time for comment seriously, and instead wait until the last minute before beginning work on their submission, with the belief that any request for extension will usually be granted. In the future, therefore, the Commissioner intends to deny requests for time extension without an extremely persuasive showing of good cause. Extensions of time to comment will not routinely or ordinarily be granted.

Two types of time extension may be utilized, where justified. First, a short period of time, of less than 30 days, may be granted to one or more persons by letter or memorandum filed with the Hearing Clerk without the necessity of a published notice in the *FEDERAL REGISTER*. Second, any extension of time for comment of 30 days or longer shall be the subject of a notice published in the *FEDERAL REGISTER* and shall be applicable to all interested persons.

Ordinarily, in accordance with § 2.5, all comments must be submitted to the Hearing Clerk in quintuplicate. The Commissioner recognizes, however, that this would be a burden upon individual members of the public who usually submit comments by letter, without enclosing any copies. Accordingly, individuals need submit only one copy of their comments.

Any interested person may of course petition for the establishment of a regulation in accordance with § 2.6(a). In the past, there have been no explicit criteria for determining when the Commissioner will issue a proposal to be published in the *FEDERAL REGISTER* on the petition of an interested person. The new regulation spells out the criteria for making this discretionary determination.

The Commissioner may, in his discretion, issue for publication two or more alternative proposals on the same subject to obtain comment on the different alternatives. Where the Commissioner does not have sufficient information to make a determination whether a proposal should be published, he may instead issue a notice stating that the petition has

been filed and requesting additional comment and information to determine whether a proposal is justified.

After the time for comment on a proposed regulation has expired, the Commissioner shall review the comments and terminate the proceeding, issue a new proposal, or promulgate a final regulation. Once again, the time within which this can be accomplished will be determined according to the priority of the matter in relation to other matters pending before the agency and the resources available to the agency for this type of work at that moment. No specific time period can be established with respect to this process because of the uncertainties involved.

The new regulations point out that the Commissioner's decision must be based on the entire administrative record, and that the quality and persuasiveness of the comments, rather than the number or length of comments, shall determine the Commissioner's conclusions on them. In the past, many persons have erroneously believed that the number of comments is in some way relevant to the Commissioner's decision. As a result, on several occasions the Commissioner has been flooded with thousands of form letters, each making the identical point, and often in identical words. The Commissioner advises that such repetitive comments are given no more weight than a single comment, and indeed that a single well-reasoned comment, relying upon sound data and information, will be given far greater weight than a large number of form letters which simply support or oppose a proposal in conclusory terms.

The Commissioner notes that agency experience shows that most comments filed in response to a proposal oppose the proposal in whole or in part. Indeed, in many instances all comments will oppose the proposal. This is true because persons opposing a proposal are far more likely to respond to the invitation for comment than are persons who support it. It is therefore apparent that the number of comments supporting or opposing a proposal must be regarded as immaterial to the Commissioner's ultimate decision.

Under the Administrative Procedure Act, 5 U.S.C. 706, the final regulation will be upheld by a court unless it is found, in light of the administrative record before the Commissioner at the time he made his decision, to be arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law. Accordingly, the Commissioner's determination with respect to the final regulation must rest upon all of the information in the administrative record, including both the data and information submitted with the comments and the data and information identified by the Commissioner as relevant to the matter. It is this administrative record, and only this record, on which the Commissioner makes his decision.

The Administrative Procedure Act, 5 U.S.C. 553(c), requires that the agency incorporate in each regulation it promulgates "a concise general statement" of

the basis and purpose of the regulation. The courts have held that, although the agency is not required to develop specific and detailed findings and conclusions of the kind customarily associated with formal proceedings, it does require a sufficiently reasoned articulation of the administrative decision to permit meaningful judicial review. See, e.g., *Federal Trade Comm'n. v. Sperry & Hutchinson Co.*, 405 U.S. 233, 245-250 (1972); *Securities & Exchange Comm'n. v. Chenery Corp.*, 318 U.S. 80, 87-95 (1943); *National Nutritional Foods Ass'n. v. Weinberger*, F.2d (2d Cir. 1975); *Consumers Union v. Consumer Product Safety Comm'n.*, 491 F.2d 810, 812 (2d Cir. 1974); *Kennecott Copper Corp. v. Environmental Protection Agency*, 462 F.2d 846, 850 (D.C. Cir. 1972); *Environmental Defense Fund v. Ruckelshaus*, 439 F.2d 584, 597-598 (D.C. Cir. 1971); and *Automotive Parts & Accessories Ass'n. v. Boyd*, 407 F.2d 330, 338 (D.C. Cir. 1968). The new regulations therefore require that the preamble to the final regulation summarize each type of comment received, state the Commissioner's conclusions with respect to it, and contain a thorough and comprehensible articulation for the Commissioner's decision on each issue so raised.

The Administrative Procedure Act, 5 U.S.C. 553(b), provides that regulations that are interpretive, or that relate to agency practices and procedures, may be published as final regulations without time for comment. Nevertheless, as a matter of policy, the Commissioner has concluded that ordinarily such regulations will be published with time for comment before they are adopted, with the exceptions discussed below. Thus, they will be handled in the same way as any other regulations. This is in accordance with recent recommendations of the Administrative Conference of the United States, and codifies the practice of the Commissioner for the past three years.

On occasion, the Commissioner issues for publication in the *FEDERAL REGISTER* informational notices of interest to the regulated industry or the public, statements of legal interpretation, and matters involving agency organization and delegations of authority. In accordance with the Administrative Procedure Act, these will be published without time for comment, since they are intended solely for informational purposes and are not the type of material on which public comment is relevant.

In accordance with the provisions of the Administrative Procedure Act, 5 U.S.C. 553(b), the Commissioner may dispense with the requirements of notice and public procedure when he determines for good cause that they are impracticable, unnecessary, or contrary to the public interest. It is pursuant to this provision that the Commissioner has concluded that the notice promulgating these regulations should be issued as a final order rather than as a proposal. However, the new regulations provide that, whenever this procedure is used, the notice promulgating the regulation

must provide an opportunity for submission of comments to determine whether the regulation should subsequently be modified or repealed. This is, of course, the procedure being followed in the promulgation of these new regulations, and codifies current practice.

This procedure assures both that regulations can be promulgated in final form where that is essential, and that even under those circumstances the policy of the Administrative Procedure Act and these new regulations of providing time for public comment will nonetheless be implemented. Moreover, in the event that a court should determine that the regulation must first be published for comment, this defect will already have been cured by explicitly inviting comments and, by expediting consideration of those comments, the agency will be in a position to assure prompt promulgation of a final regulation.

The requirement that a regulation first be published as a proposal for comment is also inapplicable to food additive and color additive petitions and to new animal drug regulations. Food additive and color additive petitions are subject to a notice of filing rather than to a proposal, as provided in sections 409(b)(5) and 706(d)(1) of the act, and new animal drug regulations are promulgated by notice pursuant to section 512(i) of the act.

The regulations provide for a number of alternative optional procedures that the Commissioner may, in his discretion, use in reviewing any proposed or final regulations. All of these procedures have been used by the agency on occasion in the past, and this provision simply recognizes current practice.

The regulations specify the data and information which are included in the record of the administrative proceeding, and on which the Commissioner must base his decision and any reviewing court must base its review. Any interested person who subsequently requests that new information be considered by the Commissioner shall submit it with a new petition to modify the final regulation.

The Hearing Clerk is required to maintain a chronological list of all regulations proposed and promulgated pursuant to the provisions of this section and of § 2.12, which deals with regulations promulgated after an opportunity for a formal evidentiary hearing. The list must show the docket number, the name of the petitioner, if any, and the subject matter involved. This list will exclude those regulations resulting from petitions filed and assigned a docket number pursuant to § 2.7, which will appear separately on the list of petitions required to be maintained pursuant to § 2.7(1) of the regulations.

Thus, § 2.10 of the new regulation sets out a comprehensive procedure for issuance of the vast majority of the regulations promulgated by the Food and Drug Administration. For the most part, it simply codifies and unifies current practice. In the future, all employees of the agency and all interested persons

outside the agency will have available a consistent and fair procedure, in writing, for handling these matters.

#### COURT REVIEW OF FINAL ADMINISTRATIVE ACTION; EXHAUSTION OF ADMINISTRATIVE REMEDIES (§ 2.11)

Once the Commissioner has promulgated a final regulation pursuant to § 2.10, it is subject to judicial review in accordance with the Administrative Procedure Act, 5 U.S.C. 701 et seq., and, in many instances, the Declaratory Judgment Act, 28 U.S.C. 2201. All other forms of final administrative action taken by the Commissioner are also subject to court review in this way, except for those that are solely within the Commissioner's discretion. Section 2.11 establishes the practices and procedures governing such judicial review of most actions. Actions subject to the provisions of § 2.12 and Subpart B of Part 2 are, however, governed by the provisions in Subpart B and not by § 2.11, since unique statutory requirements apply to them.

As already noted, § 2.7 establishes a procedure by which any interested person may formally request action from the Commissioner. Accordingly, § 2.11(b) provides that this administrative procedure must be exhausted before any person may properly seek relief in court with respect to a particular matter. If any person files suit in court before exhausting his administrative remedies, the Commissioner will object to such court action and request its dismissal or referral to the agency on the grounds of a failure to exhaust administrative remedies, the lack of final agency action, and the lack of an actual controversy.

An existing Food and Drug Administration regulation is subject to judicial review under the Administrative Procedure Act, 5 U.S.C. 701 et seq., at any time by any interested person. If the regulation was promulgated some years ago, however, any person who concludes to challenge its legality may wish first to petition the Commissioner pursuant to § 2.7 to amend or revoke the regulation. The Commissioner's decision on that petition, as well as the regulation itself, would then be subject to judicial review in accordance with § 2.11.

A request that the Commissioner stay any form of administrative action must first be directed to the Commissioner in accordance with the provisions of § 2.9 before any request is made that a court stay such action. Pursuant to § 2.9 (b) and (f), such administrative relief must be requested within 30 days after the action involved is taken. If no such request is made within 30 days, any right to request such relief shall be deemed to have been waived, and the Commissioner will object to any subsequent request for a judicial stay on the ground of a failure to exhaust administrative remedies.

The Commissioner recognizes the right of any interested person to seek judicial review of any final agency administrative action, in accordance with *Abbott Laboratories v. Gardner*, 387 U.S. 136 (1967). Once a final agency decision has been made, it is the policy of the

Food and Drug Administration not to interpose technical objections, such as a lack of standing, to the right of any interested person to seek court review. Of course a decision of the Commissioner to institute or not to institute civil or criminal enforcement action in the courts on a particular matter is not subject to judicial review because it is committed by the law solely to his discretion.

The matters handled by the Food and Drug Administration, governing the safety, effectiveness, functionality, and labeling of consumer products that represent over 25 percent of the consumer dollar spent daily in this country, vitally and directly affect the interests of every citizen. Accordingly, applying the standards established in *Sierra Club v. Morton*, 405 U.S. 727 (1972), the Commissioner concludes that every citizen has standing in the courts to contest any action of the agency, and that no objection relating to such standing will be interposed by the agency in such cases. The Commissioner has followed this policy for the past 3 years.

The Commissioner has concluded that current judicial decisions require any court review of final administrative action taken by the Food and Drug Administration to be based solely on the administrative record of the proceeding identified in these regulations, on the basis of which the Commissioner made his decision. No additional data, information, or views may properly be presented to a reviewing court without first presenting them to the Commissioner by a petition pursuant to § 2.6(a), with a request that the action be modified or revoked on the basis of such new information. In short, both the Commissioner and any other person who is interested in any matter pending before the Food and Drug Administration are obligated to submit and identify all relevant data and information at the administrative stage of the proceeding. It is improper for either to wait until the matter is pending before the courts and then to identify new information, or to present new arguments, to support a position. See e.g., *Camp v. Pitts*, 411 U.S. 138 (1973); *Citizens to Preserve Overton Park, Inc. v. Volpe*, 401 U.S. 402, 419-420 (1971), and *Bradley v. Weinberger*, 483 F.2d 410, 414-415 (1st Cir. 1973).

Accordingly, all cases involving review of Food and Drug Administration action in the future should properly be decided solely on motions to dismiss or for summary judgment. A trial de novo or the submission of additional written or oral testimony or other evidence would not be proper. Pursuant to recent court decisions, it is apparent that judicial review of administrative action pursuant to the Administrative Procedure Act must proceed on the basis solely of the administrative record involved in the decision in the same way that administrative review of action taken after a formal evidentiary public hearing proceeds on the basis of the established administrative record. New information cannot be introduced at the judicial level, only at the administrative level.

The Commissioner recognizes that, on occasion, the administrative record relating to a particular matter may be found, upon judicial review, to be unclear or incomplete. Under these circumstances, the Commissioner will request that the court remand the matter for further administrative proceedings, prior to a final judicial ruling on the matter. See, e.g., *Securities & Exchange Comm'n. v. Chenery Corp.*, 318 U.S. 80, 93-94 (1943). The Commissioner believes that this procedure is preferable to a court decision based on an inadequate record, after which the Food and Drug Administration could in any event reopen the matter at the administrative level and correct the deficiencies in the administrative record, thereby requiring further judicial review on the basis of the new record.

Similarly, on occasion the administrative record relating to a particular matter may be found, upon judicial review, to be clear and complete, but the court may require further elucidation of the rationale for the administrative action. Under these circumstances, the Commissioner may either request that such further explanation be provided in writing directly to the court without further administrative proceedings, or that the matter be remanded to the agency for further administrative proceedings in order to provide the requested explanation. This choice will depend upon the facts of the specific situation. In neither event, however, would it be necessary or proper for a court to conduct its own evidentiary hearing on the matter. "A failure of the agency adequately to explain its actions is not a warrant to the district court to conduct de novo evidentiary hearing," but rather justifies a remand to the agency for a more complete articulation of its reasoning or a court hearing limited to that purpose. See, e.g., *National Nutritional Foods Ass'n. v. Weinberger*, — F.2d — (2d Cir. 1975).

Depending upon the nature of the specific matter involved, it may well be appropriate for a regulation or other administrative action to remain in effect pending remand to the agency or further court proceedings under these circumstances. Where this is in the public interest, the Commissioner will request that the court not stay the matter pending such remand. See, e.g., *Twin City Milk Producers Ass'n. v. McNutt*, 122 F.2d 564, 568 (8th Cir. 1941).

The Commissioner concludes that the requirement that his decision, and subsequent court review, be based solely on the administrative record will in no way diminish justifiable reliance upon the experience and expertise of the agency with respect to the matters involved. The Federal Trade Commission has for many years exercised its expertise in similar matters through written opinions, and reviewing courts have properly deferred to such expertise where it has been exercised in a reasonable manner and articulated through the written opinion. The requirement that a decision be based upon the record does not mean that such

expertise and judgment must in some way be encapsulated in documentary evidence or "proved" as a "fact," but simply that it be referred to and explained in the comprehensive written statement of the basis for the Commissioner's decision on a particular matter, so that it is a matter of record. For example, the courts have uniformly deferred to the expertise of the Federal Trade Commission in determining that advertising is misleading to the public without the need for specific evidence that particular persons have been so misled, and the Commissioner anticipates that the expertise, experience, and judgment of the Food and Drug Administration in such matters would be similarly recognized. See, e.g., *United States v. An Article of Drug*, — Bact. Unidisk, 394 U.S. 784, 791-792 (1969) and *Federal Trade Comm'n. v. Colgate-Palmolive Co.*, 380 U.S. 374, 384-392 (1965).

Thus, § 2.11 establishes a consistent administrative policy with respect to judicial review. First, it strongly encourages any person who believes that the agency is acting improperly to participate in the proceeding at the administrative level, and to advance all information and arguments at that point rather than wait until the matter has proceeded to the courts. Second, it requires the Food and Drug Administration to identify the data and information on which it bases a decision, and to articulate the reasons for that decision. Third, it encourages any person who believes that the agency has acted improperly to seek judicial review, and guarantees that the Food and Drug Administration will not interpose technical procedural issues but rather will meet the substantive issue on its merits. Fourth, it guarantees to the courts that there will be a specific and designated administrative record and a thorough explanation of the decision on the basis of which an informed judicial review can be conducted, and guarantees to the Commissioner that the court in conducting its review will consider only the data and information reviewed by the Commissioner rather than new information which the Commissioner has had no opportunity to review. In the opinion of the Commissioner, this procedure establishes an extremely fair and reasonable method of proceeding for all interested persons.

The Commissioner is aware of the possibility of a multiplicity of suits in various jurisdictions challenging a particular matter. The Supreme Court pointed out in *Abbott Laboratories v. Gardner*, 387 U.S. 136, 154-155 (1967), that:

... the courts are well equipped to deal with such eventualities. The venue transfer provision, 28 U.S.C. § 1404(a), may be invoked by the Government to consolidate separate actions. Or, actions in all but one jurisdiction might be stayed pending the conclusion of one proceeding. ... A court may even in its discretion dismiss a declaratory judgment or injunctive suit if the same issue is pending in litigation elsewhere. ... In at least one suit for a declaratory judgment, relief was denied with the suggestion that the plaintiff intervene in a pending action elsewhere. ...

Further, the declaratory judgment and injunctive remedies are equitable in nature, and other equitable defenses may be interposed. If a multiplicity of suits are undertaken in order to harass the Government or to delay enforcement, relief can be denied on this ground alone. ... The defense of laches could be asserted if the Government is prejudiced by a delay. ... And courts may even refuse declaratory relief for the non-joinder of interested parties who are not, technically speaking, indispensable.

Accordingly, if suit is brought in more than one jurisdiction on the same matter, the Commissioner will recommend one or more of the procedural mechanisms suggested by the Supreme Court to deal with the matter.

#### PROMULGATION OF REGULATIONS AND ORDERS AFTER AN OPPORTUNITY FOR A FORMAL EVIDENTIARY PUBLIC HEARING (§ 2.12)

In contrast to the regulations issued under section 701(a) of the act and 5 U.S.C. 553, some regulations and orders are designated in the act as requiring an opportunity for development "on the record," i.e., for a formal evidentiary trial-type public hearing conducted in accordance with the Administrative Procedure Act, 5 U.S.C. 556 and 557. In enacting the present act, Congress designated a limited number of provisions subject to this formal requirement. Section 2.12(c) (1) through (18) specifies those provisions of the law, some of which are listed in section 701(e) of the act and others of which are designated elsewhere in the act or other laws, and provides that they are subject to the special provisions established in Subpart B of Part 2. Those proceedings designated in § 2.12(c) (1) through (15) relate to rule making. Those designated in § 2.12(c) (16) through (18) relate to adjudication. The different procedures applicable to each category are set out in Subpart B.

The Commissioner has carefully considered whether the wording of section 701(e) of the act and the related provisions in the other sections of the act listed in § 2.12(c) require development of a formal record pursuant to the Administrative Procedure Act, 5 U.S.C. 556 and 557. This matter has never directly been adjudicated in the courts. In a recent decision, however, the Supreme Court used section 701(e) of the act as an example of a statutory provision which requires a hearing "on the record" and thus a formal evidentiary public hearing. See *United States v. Florida East Coast Railway Co.*, 410 U.S. 224, 237-238 (1973). Although this was dictum, and not a holding, the Commissioner concludes that it represents the Supreme Court's current thinking on the matter and thus should be followed without further litigation. Accordingly, the regulations require an opportunity for a formal evidentiary public hearing for all regulations and orders listed in section 701(e) and related provisions of the act and the Fair Packaging and Labeling Act.

A similar question arises with respect to the biological licensing provisions contained in section 351(a) of the Public Health Service Act, 42 U.S.C. 362(a).

This legal issue has never become a matter of contention, and has never been addressed by the courts. The provisions of 5 U.S.C. 558 relating to licensing do not change the requirement in 5 U.S.C. 554(a) that a formal evidentiary public hearing pursuant to 5 U.S.C. 556 and 557 is required only where the applicable statute specifically provides for an opportunity for a hearing "on the record." See, e.g., *Lincoln Transit Co. v. United States*, 256 F. Supp. 990, 993-994 (S.D. N.Y. 1966). Section 351(a) of the Public Health Service Act does not require a hearing "on the record." Nevertheless, the Commissioner concludes that an opportunity for a formal evidentiary public hearing should be available with respect to the licensing of biologics to the same extent that it is available for non-biological drugs, i.e., new drugs and antibiotics. Section 310.4 presently exempts biological drugs licensed pursuant to section 351(a) from the new drug requirements of section 505 of the act. In promulgating the review procedures for determining the safety, effectiveness, and proper labeling of biological drugs in § 601.25 of the regulations, however, the Commissioner announced in the *Federal Register* of August 18, 1972 (37 FR 16679) that this exemption would be superseded and revoked as the results of the biologics review become available. Accordingly, upon completion of the biologics review, § 310.4 will be totally revoked, and all biologics will be subject to the new drug provisions of the act as well as to the licensing requirements of section 351(a) of the Public Health Service Act. This means that the same procedural requirements will be applicable to biologics as are applicable to other new drugs, including an opportunity for a formal evidentiary public hearing. If these procedures are to be changed, as the Commissioner and the Administrative Conference of the United States believe they should, this is properly done by Congress. Accordingly, the new regulations provide that denial or revocation of a license pursuant to section 351(a) of the Public Health Service Act shall be subject to an opportunity for a formal evidentiary public hearing.

In contrast to the licensing provisions of section 351(a) of the Public Health Service Act, the standards authorized by section 351(d) are properly issued in regulations promulgated pursuant to the general rule making provisions of the Administrative Procedure Act, 5 U.S.C. 553, because they are not required to be based "on the record," and thus are subject to the general rule making provisions in § 2.10 rather than to the formal evidentiary hearing provisions in § 2.12 and Subpart B. The same is true of performance standards for electronic products promulgated pursuant to section 358 of the Public Health Service Act, 42 U.S.C. 263f, for which a hearing "on the record" also is not required by the statute. See *United States v. Allegheny-Ludlum Steel Corp.*, 406 U.S. 742, 756-757 (1972).

## RULES AND REGULATIONS

### SEPARATION OF FUNCTIONS: EX PARTE COMMUNICATIONS (§ 2.13)

In the *Federal Register* of March 24, 1972 (37 FR 6107), the Commissioner issued a proposed regulation to revise former § 2.104, dealing with separation of functions and ex parte communications before and during formal evidentiary public hearings. Former § 2.104 is revoked and replaced by these new regulations. The preamble to that proposal stated that, although present law does not require separation of functions in formal rule making proceedings and does not prohibit ex parte communications during formal hearings of any kind, as long as they are made a matter of record, the Commissioner had concluded that strict separation of functions and an outright prohibition of ex parte communications should be adopted in both formal rule making and adjudication proceedings to avoid even the appearance of unfairness.

Two comments were received on this proposal, one from a law student and the other from a trade association. The law student generally favored the proposal, although he enclosed an excerpt from Davis, *Administrative Law Text*, sec. 13.05 (1972), which strongly opposes formal hearings or separation of functions with regard to any Food and Drug Administration rule making. The trade association also generally approved the thrust of the proposal, although it suggested a number of clarifying changes and requested republication for further comment. The Commissioner concluded to defer final action on this proposal until a complete revision of all of the agency's procedural regulations could be undertaken.

Under the proposal, separation of functions would have occurred as of the moment of publication of a regulation or order on which there is an opportunity for a formal evidentiary public hearing. In the intervening 3 years, the Commissioner has as a matter of policy imposed separation of functions in the following way.

With respect to all rule making except the revocation of antibiotic monographs, separation of functions has been imposed as of the date of publication of a notice of hearing, rather than as of the date of publication of the final regulation which preceded the notice of hearing. This has allowed customary negotiations and attempts at settlement after the regulation is published and requests for hearing are made, and before it is finally concluded that a hearing must be held. Once it is determined that a hearing is necessary, and a notice of hearing has been published, strict separation of functions has been imposed.

With respect to all adjudication and revocation of antibiotic monographs, the Commissioner has imposed separation of functions as of the date of publication of the notice of opportunity for hearing or, in the case of an antibiotic monograph, the date of the request for hearing. This approach to separation of functions was promulgated in the *Federal*

*Register* of March 13, 1974 (39 FR 9750), for new drugs and antibiotics. It is adopted by cross-reference for biologics in these new regulations and will be adopted for new animal drugs in proposed amendments to § 514.200 to be published in the *Federal Register* in the near future.

The Commissioner concludes that the practice developed during the past 3 years should be adopted in new § 2.13. It has worked effectively and efficiently. It has assured all parties to a rule making proceeding that, once it is determined that a formal evidentiary public hearing must be held, all reasonable steps will be taken to make certain that no party to the proceedings improperly or unduly influences either the presiding officer or the Commissioner. It has similarly assured all parties to an adjudication (and to the related proceeding for revocation of an antibiotic monograph) that, once a formal evidentiary public hearing is requested, both the decision about whether a matter is properly subject to summary judgment or requires a hearing, and the decision resulting from any hearing, will be independently considered and resolved by the office of the Commissioner without ex parte communications from the bureau.

Accordingly, § 2.13 provides that, in any matter which is subject by statute to an opportunity for a formal evidentiary public hearing, the rules on separation of functions and ex parte communications become operable for rule making (except antibiotic monographs) as of the date of publication in the *Federal Register* of the notice of hearing, and for adjudication and antibiotic monographs at the time of the notice of opportunity for hearing and request for hearing. After that time, for either a rule making or an adjudication proceeding, the bureau of the Food and Drug Administration which is a party to the proceeding and the other parties to the proceeding are precluded from ex parte communications or any other form of participation with the presiding officer or the Commissioner, except in the way that all parties openly participate in the proceeding. Under the regulations governing adjudicatory proceedings such as withdrawal of approval of an NDA, the bureau involved in the matter submits to the office of the Commissioner a proposed final order granting or denying a hearing, without making this document available to the NDA holder or others, but there may be no ex parte communications between the bureau and the office of the Commissioner about that matter. In the event that ex parte communications do take place, they must be the subject of a written memorandum, and any person involved in such communications shall be made available for appropriate cross-examination and rebuttal testimony.

#### REFERRAL BY COURT (§ 2.14)

As a result of the Food and Drug Administration's primary jurisdiction over the matters within its statutory mandate, any Federal, State, or local court

may hold in abeyance, or refer to the Commissioner, any matter for an initial administrative determination. In such circumstances, the Commissioner shall promptly agree or decline to accept any such referral. The Commissioner will make every reasonable effort to accept such referrals and to institute proceedings to determine the matters so referred, but must reserve the right to decline a referral in light of other agency priorities and the resources available to the agency. In handling such a matter, the Commissioner may, in his discretion, utilize any of the various procedures established in the new regulations.

The Commissioner encourages the judiciary to utilize the provisions of this new section. Referral of complex and technical issues falling within the jurisdiction of the Food and Drug Administration to the agency for an initial administrative determination will promote consistent and fair interpretation and application of the law. See *Weinberger v. Hynson, Westcott and Dunning, Inc.*, 412 U.S. 609, 624, 627 (1973); *Ciba Corp. v. Weinberger*, 412 U.S. 640, 643-644 (1973); *Weinberger v. Bentez Pharmaceuticals, Inc.*, 412 U.S. 645, 652-654 (1973); *National Ethical Pharmaceutical Ass'n. v. Weinberger*, 365 F. Supp. 735 (D.S.C. 1973), aff'd. per curiam, 503 F.2d 1051 (4th Cir. 1974); *Purdue Frederick Co. v. Acme United Corp.*, Ruling on Reference to Food and Drug Administration, Civ. No. N-74-115 (D. Conn., January 30, 1975).

#### MEETINGS AND CORRESPONDENCE (§ 2.15)

In addition to formal proceedings, such as public hearings, the Commissioner recognizes that informal procedures are properly utilized to handle administrative determinations. Indeed, without them, the entire administrative process would bog down in stifling formality.

Such informal procedures include meetings and correspondence. Section 2.15 of the new regulations sets out the rules governing use of these procedures.

Section 2.15(b) relates to the use of an open public meeting to discuss any matter pending before the agency. Public notice of any such meeting shall be given through the agency's public calendar, and may, depending upon the time involved, also be published in the *Federal Register*. Any interested person may attend and participate although no transcript and recording is required, one may be taken and in any event a written summary shall be prepared and retained in any relevant administrative file.

The Commissioner notes that this procedure has usefully been employed in the recent past on a number of occasions. See, e.g., the notices on microwave ovens published in the *Federal Register* of December 5, 1973 (38 FR 33510), on dioxin published in the *Federal Register* of March 8, 1974 (39 FR 9219), and on high intensity mercury vapor discharge lamps published in the *Federal Register* of January 29, 1975 (40 FR 4328). Such meetings are to be conducted informally, very much like a town meeting, and are not to be structured. Unlike a public

hearing before the Commissioner, as established in Subpart E of Part 2 of the new regulations, there is no fixed order in which persons may participate nor any advance notice required of those who intend to attend and participate. The Commissioner anticipates increased use of these public meetings to explore pending matters in the future.

Under § 2.15(c), any meeting between an employee of the Food and Drug Administration and any person outside the Department of Health, Education, and Welfare relating to a pending case or other regulatory action or decision must be recorded in a written memorandum, and filed in the administrative file on the matter, unless it involves only a brief description of the matter provided for informational purposes. This assures that an adequate administrative record will be maintained of all contacts outside the Department on any regulatory matter, to avoid the possibility or appearance of improper influence.

Thus, if a person in another government agency outside the Department, or in Congress, were to telephone any person in the Food and Drug Administration to make any suggestion about a pending regulatory decision, a memorandum will be prepared summarizing the discussion. Other meetings with persons within the Federal government, however, which do not involve a pending regulatory matter, are not subject to this requirement. Preparation of memoranda of meetings with representatives of Congress are subject to additional rules established in paragraph (g) of § 2.15, discussed below.

Section 2.15(d) deals with any private meeting between a person and a representative of the Food and Drug Administration in the agency offices. The Commissioner concludes that is a fundamental right of every citizen to meet with his government in private. The Federal government is created by the people, and absent explicit statutory authority the government has no right to impose upon any citizen who requests an opportunity for a private meeting with a representative of the government a requirement that others outside of the government be present. Accordingly, § 2.15(d)(1) provides that neither the Food and Drug Administration nor any other person may require the attendance of any person who is not a Federal government employee or consultant without the agreement of the person requesting such a private meeting.

At the same time, by statute, the Food and Drug Administration is responsible for matters that affect all members of the public. Accordingly, whenever a private meeting involves a matter covered by paragraph (c) or any other important matter, a decision on an issue, or statements or advice or conclusions to which future reference may be required as part of the administrative record, a written memorandum summarizing the substance of any private meeting shall be prepared by a representative of the agency. This will make certain that any matter which should be documented as part of the public record is in fact so

recorded. The availability of such memoranda for public disclosure is determined by the provisions of the agency's public information regulations in Part 4 and the regulations referenced therein. The Commissioner believes that this will adequately protect the public interest, without infringing upon the citizen's right to a private meeting.

Somewhat different rules apply where the Food and Drug Administration is requested to send a representative to a meeting to be held outside agency offices. The Commissioner recognizes that agency employees have a responsibility to meet with all segments of the public in order to promote the objectives of the act and the agency. Accordingly, § 2.15(e) states that, where an agency representative is invited to attend an outside meeting, he may do so where he concludes that it is in the public interest and will promote the objectives of the act and the agency. He may, of course, request that such meeting be an open meeting when he concludes that this would be in the public interest. He may agree or decline to participate in any such meeting which is held as a private meeting, depending upon which action he concludes will best serve the public interest. In no event, however, may an agency representative knowingly participate in any meeting which is closed on the basis of sex, race, or religion. All outside meetings are subject to the requirements relating to preparation of memoranda summarizing the substance of the meeting.

In addition to meetings initiated by outside persons, Food and Drug Administration representatives may also initiate meetings with any person. Any such meetings with one or two people, e.g., relating to a pending petition, may be held as a private meeting. Any such meeting with a large number of people, however, shall be held as an open public meeting pursuant to § 2.15(b), and thus shall be publicly announced so that any person may attend and participate. Again, all such meetings are subject to the rules for preparation of a memorandum summarizing the substance of the matter, whether they are private or open.

The Commissioner recognizes that the content of summaries of oral discussions, whether by telephone or in person, may differ depending upon the person who prepares the summary. Accordingly, § 2.15(g) provides that, in addition to the agency summary, any outside person participating in such a meeting may prepare and submit to the agency for inclusion in the administrative record his own written memorandum recording the substance of the meeting. Pursuant to § 4.104 (c) of the public information regulations, this summary will be released along with the agency summary whenever public request is made for them.

All memoranda of meetings and correspondence shall be filed in any appropriate public administrative file and made a part of the administrative record of the relevant proceeding.

Any meeting between a Food and Drug Administration employee and a repre-

sentative of Congress, e.g., a committee staff member, relating to any pending or potential investigation, inquiry, or hearing shall be recorded in a written memorandum which shall be forwarded to the agency's Office of Legislative Services. This provision does not restrict the right of any agency employee to participate in any such meeting, but guarantees that the agency will be aware of any congressional concern about agency activities and thus be in a position to respond in an adequate way.

#### DOCUMENTATION OF SIGNIFICANT DECISIONS IN ADMINISTRATIVE FILES (§ 2.16)

Section 2.16 requires all Food and Drug Administration employees to document, in an appropriate manner, every significant agency decision.

The agency employees responsible for handling any matter are responsible for assuring that the agency has a complete administrative file on it. The file shall contain appropriate documentation, including the recommendations and decisions of responsible employees. It must reveal any significant controversies or differences of opinion and their resolution. Any agency employee working on a matter shall have the opportunity to record his views on that matter, for inclusion in the file. Once a written, signed, and dated memorandum is placed in the file, it may not be altered, added to, or removed. Rather than permit changes to be made in a document by a person other than the person who prepared that document, such changes will be reflected by preparing a new memorandum. This will provide a complete record of the development of the matter within the agency.

Memoranda and other documents prepared by agency employees not contained in the administrative file shall have no status or effect. Thus, the file will contain all pertinent material and will represent the definitive record of the administrative handling of the matter.

Memoranda placed in the administrative file shall relate to the issues under consideration, and shall be sent to other appropriate agency employees. Such memoranda shall avoid defamatory language, intemperate remarks, undocumented charges, or irrelevant matters, e.g., personnel complaints. To the extent that a memorandum records the views of any agency employee in addition to the author, it must be furnished to such other employee who will, pursuant to the new regulations, have an opportunity to respond in any way that they believe appropriate.

All agency employees working on a matter shall have access to the administrative file on that matter, as appropriate for the conduct of their work. Reasonable restrictions may be placed upon access by employees to such files in order to make certain that the files do not become dismantled, lost, or unavailable to others who need them for their work.

The Commissioner concludes that these rules guarantee full participation of all agency employees in the matters

on which they are working and adequate documentation of the manner in which, and the reasons for which, decisions are made within the agency, without at the same time entangling the agency in endless red tape and producing pointless paperwork.

#### INTERNAL AGENCY REVIEW OF DECISIONS (§ 2.17)

Many Food and Drug Administration decisions vitally affect interested persons and groups outside the agency. Inquiries are constantly received, throughout the agency, from individual consumers, manufacturers, and affected professionals, as well as organizations representing these interests. Few people outside the agency understand where their questions and complaints should be directed.

Section 2.17 of the new regulations provides for an orderly process of administrative review of decisions within the agency, and thus advises those outside the agency of how they should pursue matters which interest and concern them. Any decision of an agency employee is subject to review by that employee's supervisor at the request of the employee himself, on the initiative of the supervisor, at the request of any interested person outside the agency, or as required by duly promulgated delegations of authority. Such review ordinarily follows the established agency channels of supervision or review for the specific matter involved. Where a person outside the agency requests internal agency review of any decision, it shall be done only through established agency channels. Review shall take place to resolve issues, to review policy matters, in unusual situations requiring immediate review in the public interest, and as required by the delegations of authority.

Thus, where a matter has not yet been reviewed by a bureau director, any request from outside the agency that he review it would be denied until the matter was first reviewed at lower levels. Similarly, any request for intervention or review by the office of the Commissioner would be denied until the matter had been fully considered within the bureau and forwarded to the office of the Commissioner. It is, of course, entirely within the Commissioner's discretion to grant or deny a request to review any matter.

Any internal agency review of a decision must be based solely upon the data and information available in the administrative file. If any interested person presents new data or information not previously considered, the matter will be returned to the appropriate lower level within the agency for a reevaluation before it is again subjected to internal review at a higher level. Thus, bureau directors and the office of the Commissioner act in basically the same way as a reviewing court. Division personnel can be assured that higher agency officials will not intervene before a matter is fully considered at the lower level, and will not review any issue on the basis of information not available at that level.

#### DISSEMINATION OF DRAFT FEDERAL REGISTER NOTICES AND REGULATIONS (§ 2.18)

Until relatively recently, there has been no Food and Drug Administration policy or regulations governing the dissemination of draft *Federal Register* notices and regulations. As a result, such documents have at times been given to some persons and not to others, in a way that raised public concern about agency activities.

Section 2.18 codifies the policy that has been followed by the Food and Drug Administration on this matter during the past 2 years.

The Food and Drug Administration welcomes assistance from anyone in developing its policy and regulations. General concepts may be discussed by agency employees with any interested person. Details of a document, or a draft of a document, may not be furnished to any interested person outside the Executive Branch of the Federal Government unless and until it is made available to all interested persons by a notice published in the *Federal Register*. See, e.g., the notices with respect to the availability of the GMP regulations for low-acid canned foods published in the *Federal Register* of November 14, 1972 (37 FR 24117), and the various regulations for shellfish control published in the *Federal Register* of December 13, 1973 (38 FR 34353) and January 14, 1975 (40 FR 2607).

In some instances, detailed discussion of a draft document is necessary for proper development of administrative policy. This is especially true where a specific industry which is the subject of a particular regulation has detailed technical knowledge not otherwise available to the Food and Drug Administration, and which is critical in developing an effective regulation. Where this occurs, the draft document will be made available to all interested persons through an announcement in the *Federal Register*, and any other appropriate protective procedures will be undertaken to make sure that a full and impartial administrative record is established. Thus, public regulations will not be negotiated in private.

In certain limited instances, it has long been agency policy that a draft of a final regulation relating to a particular ingredient or product, e.g., a regulation relating to a food additive, new animal drug, or antibiotic drug, may be furnished to the petitioner for comment on the technical accuracy of such regulation. The new regulations continue this longstanding practice. In these situations, where only technical accuracy rather than any policy issue is involved, publication of the availability of the draft regulation in the *Federal Register* is unnecessary in order to protect the public interest.

The provisions of the Radiation Control for Health and Safety Act of 1968, 42 U.S.C. 263f, explicitly require the Commissioner to consult with interested persons in the development of performance standards. Accordingly, the Commis-

tioner will publish in the FEDERAL REGISTER an announcement that a performance standard is being considered, and thereafter a draft of a proposed or final performance standard, including any amendment thereof, shall be furnished to any interested person upon request and may be discussed by agency employees in detail with any interested person at any time through final consideration of such a document.

All such documents will be continuously available to the public after publication of the notice in the FEDERAL REGISTER, and it will therefore be unnecessary to publish in the FEDERAL REGISTER a specific notice of the availability of each draft of the document.

The regulations recognize that the restrictions on discussion and disclosure of draft FEDERAL REGISTER notices and regulations established in this paragraph do not apply to those situations in which internal agency documents are properly disclosed under §§ 4.83 through 4.89 of the agency's public information regulations. Such situations include disclosure to consultants, other Federal departments and agencies, Congress, State and local government officials, and foreign government officials, as well as disclosure required by court order and in administrative or court proceedings. Thus, it is entirely proper to provide a draft regulation to an advisory committee without making it publicly available to all interested persons. If it should become available to some members of the general public, however, the agency would make it available for public disclosure to all interested persons pursuant to § 4.31, as was done with a draft of revised drug GMP regulations by a notice published in the FEDERAL REGISTER of March 19, 1975 (40 FR 12535).

#### ADVISORY OPINIONS (§ 2.19)

Throughout its history, the Food and Drug Administration has issued advisory opinions in various forms. Early advisory opinions, between 1938 and 1946, were issued as trade correspondence (TC's). More recently, advisory opinions have been codified in the agency's Compliance Policy Guides manual, which is available from the Public Records and Documents Center. In other documents designated as "advisory opinions," and in preambles to FEDERAL REGISTER documents, the new regulations recognize the continuing status of these prior documents as advisory opinions except to the extent that they are revoked. Some of these advisory opinions, particularly those in the form of trade correspondence, have been revoked, e.g., the notice published in the FEDERAL REGISTER of May 20, 1969 (34 FR 7922).

Prior Food and Drug Administration policy has not distinguished between formal advisory opinions and informal oral advice and correspondence. As a result, confusion and uncertainty has been engendered both within the agency and outside as to whether opinions expressed in correspondence or orally carry the weight of the agency or only of the individual agency employee involved.

Absent specific regulations to the contrary, the statements of a government employee do not bind the government. See, e.g., *Bentex Pharmaceuticals, Inc. v. Richardson*, 463 F.2d 363, 368 n.17 (4th Cir. 1972), rev'd on other grounds, 412 U.S. 645 (1973); *Udall v. Oelschlaeger*, 389 F.2d 974, 977 (D.C. Cir. 1968), cert. denied, 392 U.S. 909 (1968); *AMP Inc. v. Gardner*, 275 F. Supp. 410, 412 n.1 (S.D.N.Y. 1967), aff'd, 389 F.2d 825 (2d Cir. 1968); and *United States v. 354 Bulk Cartons . . . Trim Reducing-Aid Cigarettes*, 178 F. Supp. 847, 853-854 (D.N.J. 1959). Accordingly, because of the lack of any agency regulations on this matter, none of the correspondence or oral advice previously issued by the agency has had any binding legal effect.

In many instances, important agency correspondence relating to the legal status of ingredients and products has not been compiled or reviewed in any comprehensive or systematic way, with the result that few in the agency have known about the existence of such correspondence nor has the fact that such correspondence has no legal status been understood by the public. For this reason, on recent occasions the agency has been forced to issue regulations formally withdrawing prior opinion letters relating to the food additive and new drug status of products. See 21 CFR 121.11 and 310.100.

The Commissioner concludes that the present uncertainty should be resolved by adoption of regulations that clearly and explicitly recognize the difference between the informal opinion of an individual in the agency, which represents his best information and advice, and the formal opinion of the agency, which represents a position of the Food and Drug Administration that is binding and commits the agency to the views expressed until they are formally modified or revoked. Section 2.19 of the new regulations establishes such a system.

Under § 2.19, a request for a formal advisory opinion shall be made pursuant to a specified form. The resulting advisory opinion must be followed by the agency until it is amended or revoked. Amendment or revocation of an advisory opinion is required to be made with the same degree of public dissemination as adoption of the original advisory opinion, or by publishing notice of such revocation in the FEDERAL REGISTER, which by statute constitutes adequate public notice. See 44 U.S.C. 1508; *North American Pharmacal, Inc. v. Department of HEW*, 491 F.2d 546 (8th Cir. 1973). An advisory opinion must, however, be explicitly revoked, and is not revoked by implication as a result of publication of other advisory opinions or regulations.

The Commissioner advises that a request for an advisory opinion will be granted whenever feasible. The fact that a course of action is already being followed by the person requesting the advisory opinion, or that an investigation or regulatory action is already pending with respect to the matter, shall not operate to preclude an advisory opinion.

On the other hand, the Commissioner recognizes that there are some circum-

stances where an advisory opinion is not feasible. For example, where there is insufficient information on which to base an informed opinion, e.g., further investigation is necessary before such opinion could be given, or where the subject matter is so complex that any opinion would be too qualified and indefinite to be helpful, a request for an advisory opinion may be denied. An advisory opinion will ordinarily concern policy matters or issues of broad applicability. Thus, advisory opinions ordinarily will not be given with respect to a particular product or label, unless a policy issue of broad applicability is involved. Similarly, a request for an advisory opinion on the legality of a product marketed by a competitor, or on any similar matter, will also ordinarily be denied, although the Food and Drug Administration will investigate complaints about the legality of products or practices when filed by any interested person.

All statements or advice given by a Food and Drug Administration employee orally or in writing, but which do not constitute an advisory opinion, represent informal communications that contain the best information and opinion available to that employee at that time, but do not have the same binding effect as an advisory opinion. Accordingly, such informal communications in no way obligate or commit the agency to the views expressed.

On occasion, the Food and Drug Administration receives oral or written requests which require resolution of important issues that have broad applicability, but which do not specifically request an advisory opinion. In the future, the Commissioner may, in his discretion, handle such inquiries as a request for an advisory opinion in order to provide a definitive agency position on the matter and to give it wide dissemination.

Ordinarily, an advisory opinion will commit the Food and Drug Administration to the position stated in the opinion, until it is amended or revoked. In unusual situations involving an immediate and significant danger to health, however, the Commissioner may take appropriate civil enforcement action contrary to an advisory opinion prior to amending or revoking it. Thus, although an advisory opinion will in virtually all instances be binding upon the agency until amended or revoked, the regulations provide for sufficient flexibility to permit immediate action where essential to public protection.

The Commissioner has carefully considered whether advisory opinions should be published in the FEDERAL REGISTER. In view of the potentially large number of advisory opinions and the resources that would be necessary to accomplish this, the Commissioner has concluded that it is not feasible. Such advisory opinions may be compiled as part of the agency's Compliance Policy Guides manual, or in a separate compilation of advisory opinions. The substance of these advisory opinions will undoubtedly be disseminated widely by the agency, trade associations, and the trade press.

One particular issue has frequently arisen within the Food and Drug Administration within the past few years. Companies often request the agency for so-called "certificates of free sale," i.e., a statement from the Food and Drug Administration that a particular ingredient or product may lawfully be sold in this country. Such "certificates" are often required by foreign governments before a product may be imported into that country.

In the opinion of the Commissioner, an unrestricted "certificate" of this kind cannot be given because the Food and Drug Administration cannot guarantee the legality of any particular product at all times. Nor is a formal advisory opinion appropriate, since it involves a particular product and the agency's resources are insufficient to provide this service for all products. The agency will, however, provide an informal letter stating specific information with respect to a product, e.g., that it is the subject of an approved NDA or food additive regulation, or that the agency does not presently object to the product's labeling, if sufficient information has been submitted to make such a determination and if there are sufficient agency resources to provide this service. Such "certificates" will thus not constitute a formal advisory opinion on the status of a product, but will provide informal written views which state the current views of the agency employee who signs the letter.

#### FOOD AND DRUG ADMINISTRATION REGULATIONS, GUIDELINES, RECOMMENDATIONS, AND AGREEMENTS (§ 2.20)

The Commissioner is aware that there is uncertainty about the status of some of the various types of documents adopted by the Food and Drug Administration. In general, these documents fall into the following four categories: Regulations, guidelines, recommendations, and agreements. The Commissioner has concluded that § 2.20 should be promulgated to clarify the status and legal effect of these different types of documents.

Section 2.20(a) provides that all agency regulations having general applicability and legal effect shall be promulgated in the FEDERAL REGISTER pursuant to § 2.10 or § 2.12. This is in accordance with the requirements of the Administrative Procedure Act and current case law. Any document, other than a statute, which the Food and Drug Administration intends to enforce as a legal requirement, shall be published as a regulation in the FEDERAL REGISTER.

Of course, the agency is not required to issue regulations implementing the law before it takes legal action to enforce specific statutory provisions against persons or products in violation of the law. Thus, the agency may seize a food product containing a poisonous or deleterious substance, or a new drug which is being marketed illegally without an approved NDA, regardless whether it has first issued a regulation designating that substance as poisonous

or deleterious or that drug as a new drug. On the other hand, if the agency chooses to bring such action, it may not rely upon any guidelines it may have issued as establishing substantive legal requirements.

In addition to provisions which will be enforced as legal requirements, regulations may contain provisions which are intended only as guidelines and recommendations. The specific language of each provision in a regulation states its intended application. For example, provisions which state that a person "shall" take certain action establish a legal requirement, whereas provisions which state that a person "should" or "may" take certain action establish guidelines and recommendations which are not legal requirements. Thus, the fact that a provision is published in the FEDERAL REGISTER as a regulation is not determinative of whether it establishes a legal requirement or guidelines and recommendations.

Section 2.20(b) governs the establishment and use of Food and Drug Administration guidelines, which are not published in the FEDERAL REGISTER as regulations. The Commissioner recognizes that such guidelines, which do not have the legal status of regulations, are increasingly important in providing assistance both to the regulated industry and to agency employees who are charged with consistent and fair administration of the law. In many instances, such guidelines are available on an informal basis before comparable regulations can be promulgated. For example, the Commissioner may wish to issue guidelines for acceptable premarket substantiation for safety of cosmetics, as required by § 740.10(a), published in the FEDERAL REGISTER of March 3, 1975 (40 FR 8912), in order to obtain experience with such guidelines before publishing them in a proposed regulation. Moreover, not all guidelines are appropriate for publication in the FEDERAL REGISTER as regulations. Some are intended as no more than informal suggestions. Others are so voluminous and complex as not to be appropriate for FEDERAL REGISTER dissemination. Still others are subject to such frequent change as to make their publication for comment virtually impossible. Under these circumstances, the development and use of guidelines that represent acceptable conduct from the standpoint of the agency, but which are not published in the form of regulations, are imperative for efficient administrative implementation of the law.

As the use of guidelines in the agency has increased, their methods of development, their availability, notice of any changes, and an opportunity to participate in their development and modification, have become more important. These new regulations will regularize these matters, and in the judgment of the Commissioner will provide for adequate notice and opportunity to participate for all interested persons.

Section 2.20(b) (1) defines "guidelines" broadly to include all technical or policy criteria relating to any matter subject

to the jurisdiction of the Commissioner. Guidelines state procedures or standards of general applicability which are not legal requirements but which are acceptable to the agency with respect to a particular subject matter. Although analytical methods are clearly guidelines, they are excepted from the provisions of this regulation because of their large number, their length and complexity, and the volume and frequency of amendments involved. Such analytical methods are, of course, available for public disclosure pursuant to the public information regulations contained or cross-referenced in 21 CFR Part 4.

Although a person may rely upon an agency guideline with assurance that it is acceptable to the Food and Drug Administration, he is also free to use any different procedure or standard even though it is not provided for in a guideline. When a person chooses to differ from a guideline, he may, but is not required to, discuss the matter further with the agency to prevent the expenditure of money and effort on work that may later be determined to be unacceptable. The Commissioner is concerned that innovation not be stifled by the adoption of guidelines. Nor does the Commissioner believe that, in all instances, a person who deviates from a guideline should feel obligated to consult with the agency first. Where such consultation is requested, however, the agency is obligated to provide the best answer available to it at that moment.

The Commissioner emphasizes that following a testing guideline does not in any way guarantee that the ingredient or product so tested will receive agency approval. Approval must depend, of course, upon all of the available information relating to the matter. The results may indicate that the ingredient or product should be disapproved, or that additional testing must be undertaken. Similarly, poor quality testing will not be acceptable even if the protocol complies with a guideline.

Guidelines will be issued by filing them in the public file established by the Hearing Clerk for this purpose, and publishing a notice of availability of the guideline in the FEDERAL REGISTER. Amendments to a guideline shall be issued in the same way. Any interested person may, of course, petition the agency pursuant to § 2.7 to issue a guideline relating to any matter.

When a guideline is amended or revoked, just as where an advisory opinion is amended or revoked, the question will inevitably arise as to whether work undertaken or completed in good faith reliance on the prior version of the guideline will remain acceptable to the Food and Drug Administration. The Commissioner has concluded that such work should remain acceptable unless substantial public interest considerations preclude continued acceptance. This determination must be made on the basis of all of the surrounding facts. Where the guideline consists of a protocol for an animal study which is simply being revised to reflect the latest knowledge

about appropriate scientific procedures rather than because of any concern about the scientific validity of prior results under the former protocol, the old work will undoubtedly remain acceptable. Where the guideline or advisory opinion consists of labeling standards, however, labels meeting the old guideline ordinarily will no longer remain acceptable after an appropriate transition period. Whenever possible, the notice of an amended guideline will state when it has been determined that work previously undertaken or completed on the basis of the prior guideline no longer remains acceptable.

For the same reasons that FEDERAL REGISTER notices and regulations must be available to all members of the public on an equal basis, all draft guidelines must similarly be accessible to all interested persons on the same basis. Accordingly, the dissemination of draft guidelines shall be subject to the requirements of § 2.18. Similarly, to guarantee an opportunity for interested persons to comment on guidelines and to suggest modifications, the notice of availability of a guideline shall state the individual or office responsible for each guideline so that written comments may be filed. Such comments can then be used by the agency in considering further modifications.

The Commissioner advises that guidelines have the same legal status as an advisory opinion. Until modified or revoked, they represent the formal position of the agency and bind the agency to that position. Other informal communications relating to acceptable procedures or standards represent the best information and opinion available to a particular employee at a particular time, but do not constitute a guideline or advisory opinion and thus do not obligate the agency to follow the views expressed.

The Commissioner emphasizes that only those guidelines which are issued by the Food and Drug Administration pursuant to § 220(b) shall have any official status. Other written documents shall, until issued as guidelines, stand on the same legal footing as any informal communication by an agency employee. Accordingly, it will be important for all such written documents relied upon throughout the agency to be reviewed and a decision made whether they should be issued as guidelines pursuant to these provisions or should no longer be used by the agency. To complete this process, § 220(b) will not become effective for 180 days. Those internal written documents which have not been issued as guidelines by that time will no longer be regarded as having official agency approval as representing acceptable procedures or standards and will have no status other than as representing the views of a particular employee.

Section 220(c) deals with agency recommendations which are not published in the FEDERAL REGISTER as regulations. In addition to guidelines, which relate to regulatory matters which fall within the laws administered by the Commissioner, the Food and Drug Ad-

ministration also formulates and disseminates recommendations about matters which are authorized by, but do not involve direct regulatory action under, those laws. Examples are model State and local ordinances, recommendations for physicians and technicians in the proper use of machines and products, and other similar matters.

The Commissioner concludes that recommendations of this nature may be handled pursuant to the procedures for guidelines, except that they shall be included in a separate public file established by the Hearing Clerk. Thus, recommendations may be made public in the same systematic and comprehensive way. Of course, recommendations may also be incorporated in agency regulations.

Finally, § 220(d) deals with agency agreements. The Food and Drug Administration enters into agreements, memoranda of understanding, and other similar formal written documents with government agencies, foreign governments, companies subject to the agency's regulatory jurisdiction, and other persons. All of these are required to be published in the FEDERAL REGISTER and included in the public file on agreements established by the Public Records and Documents Center pursuant to § 4.108. Any such document not included in that public file shall be deemed to be rescinded and shall have no force or effect whatever.

#### PARTICIPATION IN OUTSIDE STANDARD-SETTING ACTIVITIES (§ 2.21)

As the Food and Drug Administration has increased its reliance upon regulations to establish standards to regulate the practices and products of those subject to the laws administered by the Commissioner, questions about the activities of agency employees in outside standard-setting activities have arisen. The Commissioner has concluded that agency policy on this matter should be reflected in new § 2.21.

"Standard-setting activities" is defined broadly to include all of the same technical and policy criteria that are properly the subject of agency regulations and guidelines. In general, the Food and Drug Administration encourages employee participation in outside standard-setting activities that are in the public interest.

Section 2.21 divides outside standard-setting activities into three categories: Those conducted by other Federal government agencies; those conducted by State and local government agencies and by United Nations organizations and other international organizations and foreign governments pursuant to treaty; and those conducted by private groups and organizations.

With respect to all three categories of standard-setting activities, any agency employee may participate after the approval by the relevant bureau director or the Commissioner of Form PHS3763 ("Request for approval of appointment as liaison representative") covering the activity involved. This form and all pertinent background material describing

the activities must be included in the public file on standard-setting activities established for this purpose by the Public Records and Documents Center. The Food and Drug Administration employee who participates in these activities shall refer all requests for information about or participation in such activities to the group or organization responsible. Where, as often occurs, the agency employee may invite members of the public to accompany him at any meeting relating to such activities, such invitation shall be extended to a representative sampling of the public and not just to one interest group.

Special additional requirements apply with respect to standard-setting activities by private groups and organizations. The Food and Drug Administration employee may participate either as a voting or as a nonvoting liaison representative, but participation by the individual does not connote Food and Drug Administration agreement with, or endorsement of, any decisions reached. Should the matter come before the agency at a later date, that employee could not serve as the deciding official on the matter involved. Nor will the fact of that employee's participation, per se, be relevant in any subsequent agency determination with respect to the matter.

In addition, the new regulation establishes minimum standards that shall apply to all outside private standard-setting activities in which Food and Drug Administration employees participate. The activities must be based upon sound scientific and technological information, and be designed to protect the public against unsafe, ineffective, or deceptive products or practices. The activities may not be designed for economic benefit of any company, group, or organization, or involve violation of the antitrust laws. Perhaps most important, the group or organization responsible for the standard-setting activities shall have a procedure through which any interested person shall have an opportunity to provide information and views on the activities involved, without the payment of fees. The exact manner in which this is accomplished, including whether such presentation is in person or in writing, is at the discretion of the group or organization responsible for the activities.

In some situations involving private standard-setting activities, the Food and Drug Administration has a particular regulatory interest which justifies direct participation as an agency activity. Examples of such activities include the development of uniform State and local laws and regulations that will implement the same policies that are expressed in the laws administered by the Commissioner, and development of analytical methods used for regulatory purposes. In these situations, the Commissioner may determine that agency participation shall be an official activity that does connote agreement with or endorsement of the decisions reached, and that participation by the individual will not in any way disqualify him from consideration of the matter if it should arise within

the agency. Any such determination will be included in the public file on the matter.

Many Food and Drug Administration employees have close daily contact with associations of State and local government officials who have parallel responsibilities at the local level. Many agency employees are members of these associations, and participate in their activities. The Commissioner concludes that the standard-setting activities of these associations, of which 11 are listed in the new regulations, should not be subject to the requirements of this section. Instead, a list of all committees and other groups of these associations will be included in the public file on standard-setting activities so that agency participation in these matters will be a matter of public record.

#### PUBLIC CALENDARS (§ 2.22)

Section 2.22 provides for two types of public calendars to be disseminated weekly: A prospective calendar of public proceedings that will contain all public meetings and similar events for the following 4 weeks, and a retrospective calendar of private meetings of top agency officials for the previous week with persons outside the Federal government.

The prospective calendar contains public meetings, conferences, hearings, advisory committee meetings, seminars, and other public proceedings of the Food and Drug Administration, as well as significant public events involving the agency, such as congressional hearings and court cases. It does not contain future private meetings or similar nonpublic events, or public events of organizations other than the Food and Drug Administration in which agency employees participate. The Commissioner concludes that inclusion of such meetings and events would necessarily be incomplete and inaccurate because of the need to schedule or cancel meetings or agenda items on short notice, and would serve no useful purpose because others are not entitled to attend private meetings and will in any event be able to obtain memoranda of meetings shown on the retrospective calendar to the extent permitted by the public information regulations contained in 21 CFR Part 4 and the regulations referenced therein.

The retrospective public calendar contains, for the preceding week, all of the meetings with persons outside the Federal government and other significant events involving designated top officials of the Food and Drug Administration. The agency officials subject to this requirement are set forth in § 2.22(b)(3).

The Commissioner has concluded that the retrospective public calendar shall include all personal meetings, but may or may not include oral discussions by telephone at the option of the official making the report. Any meeting with an onsite contractor, e.g., at the National Center for Toxicological Research, need not be included because of the impracticalities involved. Meetings with other persons in the Federal government, e.g., with an official of another government

agency or a member of Congress, are not shown on the retrospective public calendar regardless of whether those other persons have also invited to the meeting persons from outside the Federal government.

The regulation provides that meetings with the working press also shall not be included in the retrospective calendar at this time. This issue was closely debated within the Food and Drug Administration, and there is a contrariety of views on it. Some agency officials believe that, because of the unique status of the press in this country, such discussions should not be required to be made a matter of public record. Other agency officials strongly believe that the same principles should apply to the working press as to any other member of the public, with respect to meetings and discussions. The Commissioner has concluded that, for purposes of these regulations, the working press will be exempt on an interim basis. The Commissioner particularly invites comment on this aspect of the regulations so that a final determination can be made on the matter.

Finally, the Commissioner recognizes that meetings which would prejudice law enforcement activities, or would invade privacy, are properly excluded from the retrospective public calendar, and the regulations so provide.

#### REPRESENTATION BY AN ORGANIZATION (§ 2.23)

It is common practice for organizations to represent their members by filing petitions, comments, objections, and otherwise participating in any administrative proceeding of the Food and Drug Administration. The Commissioner believes that this is an entirely proper function and that it serves very useful purposes.

At the same time, the Commissioner believes that, when a trade association participates in the administrative process in this way, such representation is properly interpreted as expressing the viewpoint of all of the members of the trade association except those specifically excluded by name in any submission. Accordingly, § 2.23(b) of the new regulations requires that every submission either attach a list of the members of the trade association or refer to such a list that is placed on permanent file with the Hearing Clerk and is kept current by the trade association. In this way, the representation of the trade association will be made a matter of public record.

When a trade association files an objection or request for hearing in a proceeding that permits an opportunity for a formal evidentiary public hearing, all subsequent action by the association with respect to such matters binds each member except to the extent that that member independently files its own objection or request for hearing or is otherwise specifically excluded from representation by the trade association in the matter, in which case its rights shall be entirely separate and distinct.

It has been common practice for trade associations and other organizations to file declaratory judgment actions or other judicial review proceedings on behalf of their members to determine the legality of Food and Drug Administration action. Again, the Commissioner believes that such activity is entirely proper and serves a useful public purpose. In the opinion of the Commissioner, a trade association or other membership organization has standing in the courts to represent its membership in such matters, and the Food and Drug Administration will not interpose procedural objections to such standing.

In the past, however, after a trade association has obtained an adverse judicial interpretation with respect to a particular issue, its members have continued to litigate the matter in separate judicial proceedings. For example, after the Pharmaceutical Manufacturers Association unsuccessfully challenged agency regulations governing adequate and well-controlled clinical investigations in Pharmaceutical Manufacturers Ass'n v. Richardson, 318 F. Supp. 301 (D. Del. 1970), and did not appeal that adverse determination, individual PMA members continued to litigate the same issues in courts throughout the country, and ultimately in the Supreme Court. Thus, the benefit of the initial representative legal action by the trade association to settle an issue on behalf of its members has been wholly destroyed, and litigation has proliferated, wasting public resources without the benefit of a definitive decision. The Commissioner believes that such proliferation is contrary to the public interest and to the purpose of such litigation, and that a determination in any suit involving a trade association properly binds all members of the association and precludes further litigation of the same issues by any association member.

In the future, the Commissioner intends to take two independent steps to assure that representative actions brought by trade associations or other organizations on behalf of their members settle issues and preclude further litigation by the membership. First, the Commissioner will take appropriate legal measures in such cases to have the case brought or considered as a class action or otherwise as binding upon all members of the association or organization except those explicitly excluded by name. Second, regardless whether the case is brought or considered as a class action or as otherwise binding upon all members, the Commissioner will take the position in any subsequent suit involving the same issues and any member of the association or organization not explicitly excluded by name from the prior suit that such issues are precluded from further litigation by such member pursuant to the doctrines of collateral estoppel or res judicata. Accordingly, § 2.23(c) gives adequate notice to all trade associations or organizations and their membership that future litigation by the association or organization will have this legal effect. See, e.g., Abbott Laboratories v. Gard-

ner, 387 U.S. 136, 154-156 (1967), National Automatic Laundry and Cleaning Council v. Schultz, 443 F.2d 689, 704 (D.C. Cir. 1971), and Acree v. Air Line Pilots Ass'n., 390 F.2d 199, 202 (5th Cir. 1968).

#### SETTLEMENT PROPOSALS (§ 2.24)

The Commissioner wishes to encourage settlement of issues without hearings and litigation wherever this is feasible. Accordingly, § 2.24 provides that settlement proposals and related matters may be raised by any person at any point in any administrative proceeding, and that unaccepted proposals of this nature shall not be admissible in evidence in any Food and Drug Administration proceeding. The Food and Drug Administration will oppose admission of such proposals in any other administrative or court proceeding. Thus, settlement may be proposed without the fear that it will later be used against the individual to imply that he did not have confidence in his case or was willing to concede the incorrectness of part of his position. The Commissioner recognizes that all settlement involves compromise on the part of all persons involved, and unless this protection is granted the possibility of settlement would be severely diminished.

On the other hand, where a compromise is accepted, it may well be necessary to submit the various settlement proposals and related matters in evidence in an administrative or court proceeding in order adequately to explain the compromise reached. Section 2.24 therefore applies only to unaccepted proposals for settlement.

#### WAIVER, SUSPENSION, OR MODIFICATION OF PROCEDURAL REQUIREMENTS (§ 2.25)

The Commissioner has concluded that it is important to establish detailed procedural rules for the various public hearings conducted by the agency. Without such rules, which are set forth in Subparts B through F, neither the presiding officers nor the participants would have sound guidance on how to proceed, and the uncertainty and confusion that would prevail would substantially hinder the progress of these hearings.

By providing such detailed regulations, on the other hand, there is the danger, on occasion, variations will be necessary. The Commissioner recognizes that the procedural requirements for these hearings must have sufficient flexibility to be workable in a wide variety of situations. It is simply not possible to take account of all reasonable variations and exceptions that have occurred in the past and will occur in the future. Accordingly, § 2.25 provides that the Commissioner or the presiding officer in any such hearing may modify any procedural requirement with respect to a particular hearing to assure a fair and efficient hearing, where this will serve the interests of justice and not prejudice any participant.

## RULES AND REGULATIONS

### FORMAL EVIDENTIARY PUBLIC HEARINGS (SUBPART B)

Subpart B of the new regulations establishes the requirements applicable to those situations where there is a statutory right to an opportunity for a hearing "on a record," i.e., a formal evidentiary trial-type public hearing, usually before an administrative law judge, or where the Commissioner concludes, in his discretion, that such an opportunity should be provided. The statutory provisions under which such an opportunity is granted are listed in § 2.12(c) (1) through (18). New Subpart B replaces former Subpart F of Part 2 and the provisions in other parts of the regulations relating to such specific matters as food additives and new drugs, which previously governed formal agency hearings.

Section 701(e) of the act originally required a formal evidentiary public hearing for every regulation promulgated pursuant to that section, regardless whether any controversy existed on the matter. Because this inflexible requirement was obviously unworkable, it was amended to require a hearing only upon receipt of objections and a request for a hearing. See Pub. L. No. 83-335, 68 Stat. 55 (1954) and Pub. L. No. 84-905, 70 Stat. 919 (1956). The courts have since narrowed the requirement for a hearing still further, as reflected in the provisions of § 2.113(b), discussed below.

One commentator has pointed out that "some of this country's gravest administrative deficiencies stem from lawyer-induced overreliance on courtroom methods to cope with problems for which they are unsuited." Gellhorn, Administrative Procedure Reform; Hardy Perennial, 48 Am. Bar Ass'n. Journal 243 (March 1962). Largely as a result of lengthy trial-type hearings on the regulations for special dietary foods and peanut butter, there has been virtually unanimous criticism of the way in which section 701(e) has been utilized. See, e.g., Byerley, Rx for Administrative Ills: Simplification, Association of Food & Drug Officials of the United States Quarterly Bulletin, Vol. 34, No. 1, p. 17 (January 1970); Note, FDA Rule-making Hearings: A Way Out of the Peanut Butter Quagmire, 40 Geo. Wash. L. Rev. 726 (1972). In 1971, the Administrative Conference of the United States released a report on the agency's use of formal hearings in which a number of recommendations for improvement were made. See Hamilton, Rulemaking on a Record by the Food and Drug Administration, 50 Tex. L. Rev. 1132 (1972). Subsequently, the Administrative Conference has also issued a report and recommendations suggesting modification of the present statutory requirements for formal hearings. See Hamilton, Procedures for the Adoption of Rules of General Applicability: The Need for Procedural Innovation in Administrative Rulemaking, 60 Cal. Law R. 1276 (1972) and Crampton,

Causes and Cures of Administrative Delay, 58 American Bar Ass'n. Journal 937 (September 1972).

At about the same time, the American Bar Association appointed a special committee to consider the agency's hearing procedures, which also issued a report and recommendations. See Pendergast, The Diagnosis and Treatment of FDA Hearings, Association of Food & Drug Officials of the United States Quarterly Bulletin, Vol. 34, No. 1, p. 23 (January 1970). These various reports and recommendations have been widely discussed. See, e.g., Hamilton, Rulemaking on a Record, 26 Food Drug Cosmetic Law Journal 627 (December 1971); Goodrich, A Reply to Professor Hamilton's Comments and Recommendations for Procedural Reform, 26 Food Drug Cosmetic Law Journal 639 (December 1971).

The Commissioner has carefully considered all of the comments and suggestions made in the course of these reports and discussions. Many are incorporated into these new regulations.

During the same period, the courts have realized that the use of a formal evidentiary public hearing is not always appropriate for agency decisionmaking. In American Airlines, Inc. v. Civil Aeronautics Board, 359 F.2d 624, 629 (D.C. Cir. 1965), cert. denied, 385 U.S. 843 (1966), the court noted that "rulemaking is not to be shackled, in the absence of clear and specific congressional requirement, by importation of formalities developed for the adjudicatory process and basically unsuited for policy rulemaking." In Marine Space Enclosures, Inc. v. Federal Maritime Commission, 420 F.2d 577, 589-590 (D.C. Cir. 1969), it was suggested that, in appropriate situations, a formal evidentiary public hearing "may usefully approach the legislative rather than the adjudicatory model." In Walter Holm & Co. v. Hardin, 449 F.2d 1009, 1016 (D.C. Cir. 1971), the court stated that "This requirement of hearing is not shackled by rigidities of procedure that may stultify the regulatory program." More recently, in Cooper Laboratories, Inc. v. Commissioner, 501 F.2d 772, 792-793 (D.C. Cir. 1974), it was suggested that the hearing required by the Federal Food, Drug, and Cosmetic Act with respect to withdrawal of approval of an NDA "need not borrow the characteristics of conventional courtroom controversy, burdened with the impedimenta of the kind of arcane questions with which lawyers often bedevil expert witnesses," by an on-the-record conference-hearing procedure, modeled on conference discussions between lawyers and experts."

Thus, the Commissioner has recognized that, in those situations where complex scientific and medical issues are involved, a searching scientific inquiry conducted by independent experts may well be more appropriate to resolve the matters involved than a formal evidentiary public hearing. Use of a public hearing before a Board of Inquiry pursuant to Subpart

C, or a public hearing before a public advisory committee pursuant to Subpart D, has therefore been authorized. Similarly, where a legislative-type public hearing before the Commissioner pursuant to Subpart E is appropriate to consider broad policy issues, the new regulations provide for this mechanism.

The courts have recently sustained the use of section 701(a) of the act for substantive rule making, in addition to section 701(e), so that the Food and Drug Administration "may follow streamlined procedures designed to avoid the endless delays that have tended to paralyze adjudicatory hearings and render them ineffective as a means of utilizing agency expertise." See National Nutritional Foods Ass'n. v. Weinberger, — F.2d — (2d Cir. 1975). As the Court stated in that case, which involved an agency rule making proceeding with respect to the safety of vitamins A and D, "Since the decision did not turn on precise factual issues or on the credibility of witnesses but represented a judgment based upon consideration of relevant medical and scientific data, we doubt that a trial-type adversary hearing would have shed any further light on the question . . ."

There has been substantial concern expressed in recent years about the need for development of more appropriate procedures than trial-type hearing for resolving difficult scientific issues. See, e.g., Hall, A. " . . . Diet Wholesome, But Not Excessive," Food Technology, Vol. 27, No. 7, p. 61 (1973) and Katz, One Professor's Finding of Fact is not Necessarily Another's, 22 National Academy of Sciences News Report, No. 6, pp. 4-5 (June-July 1972). The Commissioner believes that a Public Board of Inquiry or a public advisory committee represents a feasible approach to this problem, combining the features of traditional scientific inquiry with the need of the law to develop a full record on which to base the Commissioner's decision and subsequent judicial review. The Commissioner is hopeful that the flexibility provided by the range of procedures available under the new regulations will be fully utilized by the public and the regulated industries to avoid inappropriate use or abuse of formal trial-type hearings.

#### SCOPE OF SUBPART (§ 2.100)

Subpart B is applicable both to adjudicatory and to rule making proceedings subject to the requirements for a formal evidentiary public hearing in the Administrative Procedure Act, 5 U.S.C. 554, 556, and 557. For the most part, the procedures are identical in both situations. In a few instances, however, the new regulations provide different provisions for these two types of hearings.

In addition to formal evidentiary public hearings required by statute, the Commissioner may also, in his discretion, hold such a hearing with respect to any matter where he concludes that it would be in the public interest. Thus, even if a formal evidentiary hearing is requested but not justified pursuant to the new regulations, the Commissioner may order that a hearing be held on the matter

## RULES AND REGULATIONS

pursuant to this Subpart if he concludes that there are sound public policy reasons for doing so.

### INITIATION OF A FORMAL EVIDENTIARY PUBLIC HEARING INVOLVING THE ISSUANCE, AMENDMENT, OR REVOCATION OF A REGULATION (§ 2.110)

Section 2.110 governs initiation of a formal evidentiary public hearing involving rule making. The statutory provisions covered by this section are set out in § 2.12(c) (1) through (15).

In general, rule making that is subject to an opportunity for a formal evidentiary public hearing pursuant to § 2.12(c) (1) through (15) is no different than rule making that is subject only to the notice-and-comment procedures under 5 U.S.C. 553 and § 2.10 of these regulations, up through promulgation of the final regulation subject to this Subpart, however, any person who would be adversely affected shall have 30 days within which to file written objections and a request for a formal evidentiary public hearing.

The Commissioner notes that section 701(e) of the act and the other related statutory provisions explicitly provide 30 days within which objections and requests for hearing may be submitted. The Commissioner has no legal authority to extend this time period. In the past, many persons have requested, and been denied, an extension of this 30-day period. Accordingly, the new regulations explicitly provide that this 30-day period shall not be extended by the Commissioner.

The statutory provisions relating to color additives and food additives are somewhat different from those for other regulations subject to this Subpart. Under sections 409 and 706 of the act, the notice of filing of a petition published in the FEDERAL REGISTER takes the place of the customary proposal, and thereafter the final order is published with time for objections and a request for hearing but no time for additional comment. Under §§ 8.9 and 121.51(h) (21 CFR 8.9 and 121.51(h)), as established in the recently promulgated public information regulations, the Commissioner will make available for public disclosure all safety and functionality data relating to any color additive or food additive at the time of filing of the petition, so that public comment can be prepared meaningfully and submitted prior to publication of the final regulations.

Similarly, the statutory provisions relating to new animal drug regulations explicitly eliminate the need for a proposal before promulgating a final regulation. Under section 512(i) of the act, a new animal drug regulation is promulgated by notice, which upon publication in the FEDERAL REGISTER is effective as a regulation.

For many years, it has been customary to promulgate technical amendments to antibiotic monographs as final regulations rather than as proposals because they usually involve only technical considerations rather than policy issues, are prepared in consultation with the manu-

facturers who must meet them, and impose new safety requirements in the public interest. The new regulations permit the continuation of this practice under these circumstances. Where controversy or significant policy issues exist, such amendments will be published as proposals unless public health considerations require that they be made effective immediately.

### INITIATION OF A FORMAL EVIDENTIARY PUBLIC HEARING INVOLVING ISSUANCE, AMENDMENT, OR REVOCATION OF AN ORDER (§ 2.111)

Section 2.111 governs the initiation of a formal evidentiary public hearing that is adjudicatory in nature. The statutory provisions involved are set out in § 2.12(c) (16) through (18), and relate to approval or withdrawal of approval of new drugs, new animal drugs, and biological licenses.

In these circumstances, the Commissioner issues a notice of opportunity for hearing on any proposal to take adverse action with respect to the particular matter involved. The applicant for or holder of the order in question, and all other persons subject to the notice, e.g., the manufacturer of an identical, related, or similar drug that is covered by the order, shall have 30 days after the issuance of the notice within which to request a formal evidentiary public hearing on the matter.

The Commissioner notes that, pursuant to the statutory provisions involved, only specified persons have the legal right to exercise the opportunity for a hearing on these matters. Unlike the situation involved in public rule making, where every member of the public is entitled to an opportunity for a hearing, the statute explicitly states that only the persons directly affected by the agency action, i.e., those who hold or are covered by the license involved, have an opportunity for a hearing with respect to the matters involved under these three statutory provisions. Thus, for example, a physician has no legal right to a hearing to contest withdrawal of approval of a new drug.

Nonetheless, the Commissioner may, in his discretion, grant a formal evidentiary public hearing, or some other type of public hearing, e.g., a public hearing before the Commissioner pursuant to Subpart E of the new regulations, upon the request of any interested person even though he may not have the statutory right to a hearing. The Commissioner will carefully consider any request for a hearing involving a new drug, new animal drug, or biologics license, even though the person submitting the request has no statutory opportunity for a hearing on the matter involved.

Specific provisions are included in other sections in agency regulations relating to a request for hearing upon adverse action relating to new drugs, new animal drugs, and biological licenses, i.e., §§ 314.200, 514.200, and 601.7(a). The new regulations cross-reference these existing provisions.

# FILING OBJECTIONS AND REQUESTS FOR A HEARING ON A REGULATION OR ORDER (§ 2.112)

Section 2.112 of the new regulations specifies with particularity the form in which objections to agency action and requests for a hearing must be submitted. In general, each objection must be separately numbered and, if a hearing is requested on it, accompanied by a detailed description and analysis of the specified factual information intended to be presented in support of the objection if a hearing is held. Under § 2.113(b) (6), the failure to follow this form, or to file it within the time period specified, will result in denial of a hearing. As discussed in paragraph 16 of the preamble to the hearing regulations for new drugs and antibiotics published in the *FEDERAL REGISTER* of March 13, 1974 (39 FR 9750), it is not necessary to submit unfavorable data and information in requesting a hearing, but if a hearing is granted such unfavorable data and information will be required to be submitted pursuant to § 2.153 (a) (2) and (b).

## RULING ON OBJECTIONS AND REQUESTS FOR HEARING (§ 2.113)

Based upon any objections or requests for hearings filed pursuant to §§ 2.111 and 2.112, the Commissioner has a number of options to pursue. First, he may modify or revoke the regulation or order involved. Second, he may order a formal evidentiary public hearing or an alternative form of hearing on the matter. Third, he may deny any hearing as unjustified and let the regulation or order stand unmodified.

Section 2.113(b) sets out the criteria under which the Commissioner shall determine whether a request for hearing has been justified. The Commissioner believes that these criteria accurately reflect the legal standards enunciated by the courts in litigation on these matters during the past few years. See, e.g., *Weinberger v. Hynson, Westcott & Dunning, Inc.*, 412 U.S. 609, 620-622 (1973); *Cooper Laboratories, Inc. v. Commissioner*, 501 F.2d 772, 776-777, 780 n.22 (D.C. Cir. 1974); *Hess & Clark v. Food & Drug Administration*, 495 F.2d 975, 982-985 (D.C. Cir. 1974); *Gulf States Utilities Co. v. Federal Power Comm'n.*, 411 U.S. 747, 772-775 (1973); *Federal Power Comm'n.*, 411 U.S. 747, 772-775 (1973); *Federal Power Comm'n. v. Texaco*, 377 U.S. 33, 39-41 (1964); *United States v. Storer Broadcasting Co.*, 351 U.S. 192, 202-205 (1956); *Municipal Light Boards v. Federal Power Comm'n.*, 450 F.2d 1341, 1345-1346 (D.C. Cir. 1971); *Citizens for Allegan County, Inc. v. Federal Power Comm'n.*, 414 F.2d 1125, 1128-1129 (D.C. Cir. 1969); *Total Telecable, Inc. v. Federal Communications Comm'n.*, 411 F.2d 639, 641-642 (9th Cir. 1969); *Virginia Electric & Power Co. v. Federal Power Comm'n.*, 351 F.2d 408, 410 (4th Cir. 1965); and *Dyestuffs and Chemicals Inc. v. Flemming*, 271 F.2d 281, 286-287 (8th Cir. 1959), cert. denied, 362 U.S. 911 (1960).

To justify a hearing, there must be a genuine and substantial issue of fact for

resolution at the hearing. If there are only policy or legal issues involved, rather than factual issues, there is no requirement that a hearing be held on the matter.

The factual issue must, moreover, be capable of being resolved by available and specifically identified reliable evidence. A request for hearing accompanied only by general allegations or denials or descriptions of contentions will not be sufficient to justify a hearing. Such a request must be accompanied by a detailed description and analysis of the specific factual information intended to be presented in the event that a hearing is held, not by general allegations. The failure to identify reliable evidence to be presented at the hearing will result in a decision that the hearing has not been justified.

The specific evidence identified in a request for hearing must be adequate to justify resolution of the factual issue in the way sought by the person submitting the request. If the Commissioner concludes that, even assuming the truth and accuracy of all of the data and information submitted in support of the objection and request for the hearing, they are insufficient to justify the factual determination urged, there is no issue of fact remaining and thus no point whatever in conducting a hearing on the matter. For example, an allegation that a regulation may have a particular economic impact may be accepted by the Commissioner as factually true, without the need for a hearing, and still not require any change in the regulation involved. Summary disposition of the matter is clearly warranted at that stage of the proceeding. If, on the other hand, the data and information submitted are on their face sufficient to justify the factual determination urged and the Commissioner would change the regulation or order if such facts were proved to be true, a hearing on the issue is warranted. Thus, a hearing will be denied only where there is no relevant factual issue in dispute.

Resolution of the factual issue in the way sought by the person must be adequate to justify the relief requested in the objections and requests for hearing. Irrelevant factual contentions that are not determinative or controlling with respect to the relief requested will not justify a hearing. In some instances in the past, the Commissioner has received requests for a hearing on food standards which fail to include a product, but which do not exclude or otherwise affect that product. Under these circumstances, a hearing is not justified. Whenever there is an effect upon a product, however, a hearing may be justified. See, e.g., *A. E. Staley Mfg. Co. v. Secretary of Agriculture*, 120 F.2d 253 (7th Cir. 1941).

The action requested must not, on its face, be inconsistent with or in violation of any provision of the act or in any agency regulation particularizing the statutory standards. Instead of requesting a hearing under these circumstances, the proper procedure for the person to follow is to request an amendment or waiver from the regulation involved. For

example, the Food and Drug Administration is presently engaged in rule making proceedings to establish monographs for OTC drug products and for biological products. Once those monographs are promulgated and made effective, new drug applications and biological licenses which are not in conformity with the monographs will be revoked or required to be amended to be consistent with the monographs. Hearings will not be granted with respect to such revocation or amendment, since the issue will already have been decided in the rule making proceeding. The proper procedure for any aggrieved manufacturer will be to request an amendment of or waiver from the monograph.

In some instances, a request for hearing may present a close question as to whether a hearing is justified, or the Commissioner may otherwise be uncertain as to whether the public interest justifies a hearing. In such circumstances, § 2.113(d) provides that the Commissioner may serve upon the party involved a proposed order denying a hearing, and the party shall have 30 days within which to respond with justification for the hearing.

## MODIFICATION OR REVOCATION OF REGULATION OR ORDER (§ 2.114)

Based upon objections or a request for hearing, the Commissioner may modify or revoke the regulation or order involved, in whole or in part. Such modification or revocation shall be accomplished through a further *FEDERAL REGISTER* notice. Thereafter, further objections or requests for hearing may be submitted with respect to such modification or revocation, but not with respect to any other provisions in the regulation or order involved. Such other provisions shall become final upon expiration of the original 30 days provided for objections or requests for hearing, and cannot thereafter be reopened except upon further notice by the Commissioner specifically reopening them.

## DENIAL OF FORMAL EVIDENTIARY PUBLIC HEARING IN WHOLE OR IN PART (§ 2.115)

Where the Commissioner concludes that a formal evidentiary public hearing, or the alternative form of hearing requested, is not justified, § 2.115 requires that he issue a notice of such determination in the *FEDERAL REGISTER*. In accordance with present procedure and applicable case law, any such determination must specify the reasons therefor.

Section 2.115(b) specifies the record of the administrative proceeding. That administrative record shall constitute the exclusive record for the Commissioner's decision, and the record upon which subsequent court review of the denial of a hearing may be obtained.

In some instances, a request for hearing may be granted on some issues and denied on others. Under these circumstances, the denial constitutes final agency action on that matter, and is subject to judicial review pursuant to the specific statutory provisions relating to that subject matter. The time for filing a petition for judicial review begins to run

on the date of publication in the *FEDERAL REGISTER* of the Commissioner's determination denying a public hearing on those particular issues. The failure to file such a petition within the time period established by the specific statutory provisions governing the matter constitutes a waiver of the right to judicial review of those particular issues at any later time, regardless whether a hearing has been granted on other issues. In this way, there will be prompt judicial review of any partial denial of a hearing. In the event that a reviewing court concludes such denial to be improper, the issues involved can then be added to the hearing before it is concluded.

## JUDICIAL REVIEW AFTER WAIVER OF HEARING ON A REGULATION (§ 2.116)

In the past, it has been assumed that any person who wishes to obtain judicial review of the Commissioner's decision on a final regulation which is subject to an opportunity for a hearing must request a hearing, and go through the entire hearing process, before he may obtain such review in the courts. The Commissioner concludes that this is a wasteful procedure that is not required by the statute. Accordingly, § 2.116 of the regulations provides a procedure under which judicial review may be obtained on any regulation which is subject to an opportunity for a formal evidentiary public hearing without the necessity of requesting or conducting such a hearing.

Under this procedure, the interested person need submit only an objection to the final regulation involved. After the Commissioner issues a notice in the *FEDERAL REGISTER* ruling upon any such objection, the person may then appeal the Commissioner's ruling on that objection to a United States Court of Appeals pursuant to the applicable statutory provisions in the act. The record for review shall be the administrative record of the proceeding designated in the new regulations.

The Commissioner notes that this procedure will not be available where a hearing is in fact requested and justified on the particular matter involved by some other person. Under those circumstances, since the matter will be the subject of a formal evidentiary hearing or an alternative form of hearing, it would be impermissible to have it also subject to immediate court review while the issue is being reviewed in a hearing. If a hearing is requested and justified on an unrelated aspect of the matter, however, immediate court review of an adverse ruling on an objection can, and indeed must, be obtained pursuant to this new procedure. The failure to file a petition for court review within the statutory time period after the Commissioner's determination rejecting the objections constitutes a waiver of judicial review on those objections.

This procedure is quite similar to the procedure used for review of regulations issued by the Commissioner under section 701(a) of the act which are reviewable in the courts under the Administrative Procedure Act, 5 U.S.C. 701 et seq., except that the statutory provisions of

the act permit direct review in a United States Court of Appeals rather than in a United States District Court. The record for review upon such appeal is, however, the same record in both instances, i.e., the administrative record compiled before the Commissioner on the basis of which he made his decision.

The Commissioner concludes that this procedure will substantially expedite matters by eliminating the necessity for a public hearing prior to court review of any matter on which an interested person wishes to institute legal challenge. It will provide a fair and efficient procedure for such challenge, without burdening both the party involved and the Food and Drug Administration in a needless public hearing. The courts will, moreover, have a full administrative record to review, even without the public hearing. That record will consist of all of the relevant *FEDERAL REGISTER* notices, a full articulation of the Commissioner's decision, including the reasons for his rejection of the objections filed to the final regulation, and all of the data and information on which the Commissioner and the other parties to the matter have relied. The reviewing court's determination of whether the Commissioner's decision is supported by substantial evidence of record in this instance will therefore be no more difficult, and indeed probably no different, than its determination after a public hearing is held on a matter.

## REQUEST FOR ALTERNATIVE FORM OF PUBLIC HEARING (§ 2.117)

For the reasons already noted above, the Commissioner has concluded that it is important to establish alternative forms of public hearings in addition to the formal evidentiary public hearing provided in Subpart B of the new regulations. Section 2.117 provides that a person who has a right to an opportunity for a formal evidentiary hearing may waive that opportunity and, in lieu thereof, request a public hearing before a Public Board of Inquiry pursuant to Subpart C, a public hearing before a public advisory committee pursuant to Subpart D, or a public hearing before the Commissioner pursuant to Subpart E. Such a waiver may, but need not, be conditioned upon the grant of one of these alternative forms of hearing. Such a request may be on his own initiative or at the suggestion of the Commissioner. The Commissioner anticipates that, in many instances, such a person will request a hearing under Subpart B and then indicate his willingness to waive that right to a hearing, conditioned upon the use of an alternative form of hearing. A request for an alternative form of hearing will be filed by the Hearing Clerk in the same administrative file as any related objections and request for hearing under Subpart B.

The Commissioner has concluded that, at this time, an alternative form a hearing will be used only where all persons who have a right to a formal evidentiary public hearing, and who justify such a hearing, agree to the alternative form. Under recent case law, it is clear that

an alternative form of hearing could in many instances be required even without the consent of the parties. The Commissioner believes, however, that it will be unnecessary to resort to this type of requirement, and that parties to a hearing will readily agree to the form of hearing that will resolve the issue most expeditiously. Should this not occur, however, the Commissioner will reconsider this portion of the new regulations and may require use of alternative forms of hearings where they are more appropriate under the circumstances involved.

The Commissioner may, of course, determine to hold an alternative form of public hearing even where the formal requirements for justifying a formal evidentiary public hearing are not fully satisfied. Where close questions arise with respect to justification for a formal evidentiary public hearing, it may well be in the best interests of all parties to agree to the use of an alternative form of hearing rather than to conduct litigation on the question whether a formal evidentiary public hearing has been justified.

If the Commissioner determines that an alternative form of public hearing should be used, a *FEDERAL REGISTER* notice shall be published setting forth all of the pertinent information relating to the hearing, including any provision of the regulation or order which has been stayed, the issues to be considered at the hearing, and similar matters. If the hearing is to be conducted by a Public Board of Inquiry or a public advisory committee, the notice will state whether the findings and conclusions resulting from the hearing will be handled as a recommended decision or as an initial decision.

## NOTICE OF HEARING; STAY OF ACTION (§ 2.118)

If the Commissioner determines that a request for hearing justifies a formal evidentiary public hearing, he must issue a notice of that determination in the *FEDERAL REGISTER*, setting forth all relevant information about the hearing, such as a statement as to which parts, if any, of the regulation or order involved are stayed pending the hearing, the parties to the hearing, the issues to be considered at the hearing, whether the presiding officer will prepare a recommended decision or an initial decision, and similar matters. The presiding officer and the time of the prehearing conference may be included in the notice of hearing or may be published in a later notice.

The Commissioner notes that the various provisions of the act subject to § 2.12 and Subpart B state different requirements with respect to whether a regulation or order is automatically stayed pending a public hearing. All regulations and orders subject to sections 505 and 701(e) of the act are automatically stayed by the filing of proper objections and requests for a hearing. Under section 409 of the act, the Commissioner has discretion to stay or not to stay a food additive regulation pending a hearing. Neither section 507 of the act nor section 351 of the Public Health Service Act provides for a stay of an antibiotic or

biologic regulation or order pending a hearing, and accordingly the Commissioner also has discretion to grant or deny a stay under these provisions. Where the Commissioner has discretion to consider a stay, any request for a stay pending a hearing must be submitted pursuant to § 2.9 of the new regulations.

The statement of the factual issues raised by the objections or requests for hearings contained in the notice of hearing determines the scope of the hearing. Although the presiding officer may revise or restate the issues, he may not add other issues or delete any of those issues contained in the notice of hearing.

#### EFFECTIVE DATE OF A REGULATION (§ 2.119)

If no objections are filed and no hearing is requested, the regulation shall become effective as specified in the notice promulgating it, and the Commissioner shall publish an appropriate notice in the *Federal Register* confirming the effective date of the regulation involved. Based upon additional information, the Commissioner may also wish to extend the time for compliance with the new regulation.

#### EFFECTIVE DATE OF AN ORDER (§ 2.120)

If no hearing is requested in response to a notice of opportunity for hearing, the Commissioner shall publish a final order withdrawing approval of the NDA, NADA, or biologics license involved. Such withdrawal may, of course, involve the entire approval or only a portion of it, e.g., elimination of a single indication from labeling. The final order shall establish the date on which it becomes effective.

Any person subject to the notice of opportunity for hearing, e.g., the manufacturer or distributor of a drug product which is identical, related, or similar to a drug product named in the notice, who does not request a hearing will be bound by the final order as of its effective date. If one person requests a hearing and others do not, the Commissioner may publish a final order covering those who do not request a hearing before he rules upon the other person's request for hearing, or he may delay any such final order and handle them all at once.

In accordance with section 512(i) of the act, a final order withdrawing or modifying approval of an NADA requires that a corresponding change forthwith be made in the regulation reflecting the action taken.

#### APPEARANCE AND PRACTICE (§§ 2.130 AND 2.131)

Sections 2.130 and 2.131 relate to the filing of a notice of appearance in any formal evidentiary public hearing. No person need be licensed or otherwise specially qualified to appear on his own behalf or on behalf of any other interested person.

No person may participate in any proceeding without first having filed a written notice of appearance under these provisions. A notice of appearance may be stricken by the presiding officer for good cause, in which case the person in-

volved may no longer participate in the proceeding.

#### PRESIDING OFFICER (§§ 2.140-2.144)

Sections 2.140 through 2.144 relate to the authority and functions of the presiding officer. In most instances the presiding officer will be an administrative law judge. In general, the presiding officer shall have the authority and duty to conduct a fair and expeditious hearing.

The Food and Drug Administration presently has no subpoena power, and accordingly the presiding officer has no authority to require witnesses to answer questions. In the event that a person whose direct testimony has been presented then declines to answer any question presented by the presiding officer or by any other participant on cross-examination, however, the presiding officer may strike all the testimony of that witness. Similarly, where a participant in the hearing fails to abide by the regulations and the orders issued by the presiding officer, all evidence presented by that participant may properly be stricken from the record.

#### HEARING PROCEDURES (§§ 2.150-2.165)

Sections 2.150 through 2.165 contain the procedures to be utilized in the conduct of the formal evidentiary public hearing.

#### FILING AND SERVICE OF SUBMISSIONS (§ 2.150)

Section 2.150 requires all submissions relating to a formal evidentiary public hearing to be filed with the Hearing Clerk in accordance with § 2.5. Copies of any such submission must be served on all participants in the proceeding except for documentary data and information.

#### PETITION TO PARTICIPATE IN FORMA PAUPERIS (§ 2.151)

Section 2.151 provides that the Commissioner may grant a participant's petition to proceed in forma pauperis, where the person is indigent and there is a strong public interest justification in his participation, or where such participation is in the public interest because it primarily benefits the general public. Under these circumstances, the participant need file only one copy of each submission with the Hearing Clerk, and the Hearing Clerk shall then be responsible for serving copies upon all other participants.

#### ADVISORY OPINIONS (§ 2.152)

Section 2.152 provides for the use of advisory opinions to settle issues during the course of a formal evidentiary public hearing.

#### DISCLOSURE OF DATA AND INFORMATION BY THE PARTICIPANTS (§ 2.153)

Section 2.153 requires the director of the agency bureau responsible for the matter involved in the hearing to submit to the Hearing Clerk, before the notice of hearing is published, all relevant portions of the administrative proceeding, all documents in the bureau files containing relevant factual data and in-

formation, whether favorable or unfavorable, all other documentary data and information on which the bureau relies for its position, and a narrative statement of his position on the factual issues involved and the type of evidence intended to be introduced in the hearing. Within 60 days after the notice of hearing is published, all other participants must file with the Hearing Clerk the same information. The failure to comply with this requirement constitutes a waiver of the right to participate further in the hearing and, in the case of a party, a waiver of the right to a hearing.

The Commissioner notes that those portions of the administrative record which are not relevant to the issues in the hearing will not be included in the documents filed by the bureau director. For example, if the manufacturing and quality control procedures for a new drug are not in issue in a hearing relating to the drug's safety or effectiveness, they will not be a part of the hearing record and, because they are otherwise prohibited from public disclosure pursuant to the provisions of Part 4 and the regulations referenced therein, will not be available for public disclosure.

Such submissions may be supplemented later in the proceeding with the approval of the presiding officer, but the Commissioner emphasizes that good cause must be shown as to why such supplemental material was not reasonably known or available, or why its relevance could not reasonably have been foreseen.

No participant need file data and information already filed by the Food and Drug Administration or by any other participant. Thus, participants are encouraged to exchange and consolidate lists of documentary evidence to reduce duplicative submissions.

#### PURPOSE; ORAL AND WRITTEN TESTIMONY; BURDEN OF PROOF (§ 2.154)

Section 2.154 governs the presentation of evidence and the burden of proof in a formal evidentiary public hearing. The Commissioner has concluded that, since the use of oral direct testimony and the use of cross-examination have been the principal causes for delay of Food and Drug Administration hearings in the past, most of the hearing should be developed through the submission of written documentary and testimonial evidence. Oral evidence should be permitted only where necessary for a full and true disclosure of relevant evidentiary facts. See, e.g., *Long Island R.R. v. United States*, 318 F. Supp. 490 (E.D.N.Y. 1970).

Under the Administrative Procedure Act, 5 U.S.C. 556(d), all direct evidence in a formal evidentiary public hearing involving rule making may be required to be introduced in writing, and a party to an adjudicatory proceeding may introduce direct testimony either orally or in writing. Commentators and the courts have pointed out, however, that it is virtually impossible to draw a clear line between rule making and adjudicatory proceedings, and thus that the true nature of any proceedings and the requirements applicable to them must be con-

sidered by reviewing the nature of the issues involved rather than by the use of arbitrary labels. See, e.g., *Appalachian Power Co. v. Environmental Protection Agency*, 477 F.2d 495, 500-501 (4th Cir. 1973); *City of Chicago v. Federal Power Comm'n.*, 458 F.2d 731, 739 (D.C. Cir. 1971), cert. denied, 405 U.S. 1074 (1972); *American Airlines, Inc. v. Civil Aeronautics Board*, 359 F.2d 624, 627-632 (D.C. Cir. 1966), cert. denied, 385 U.S. 843 (1966); 1 Davis, *Administrative Law Treatise* § 5.01; 2 Davis, *Administrative Law Treatise* § 15.03; and Note, *The Judicial Role in Defining Procedural Requirements for Agency Rulemaking*, 87 Harv. L. Rev. 782 (1974). This is particularly true with respect to Food and Drug Administration proceedings. Although revocation of an antibiotic monograph and withdrawal of approval of a new drug on grounds of lack of safety or effectiveness involve the identical issue, the former is technically regarded as "rule making" whereas the latter is technically regarded as "adjudication." It is apparent, and the courts have recognized, that this distinction is meaningless and that, under the circumstances, an agency may apply similar procedural requirements depending upon the nature of the issues involved.

Accordingly, the Commissioner has concluded that the need for oral direct testimony should depend upon whether the type of proceeding involves "adjudicatory" facts or "legislative" facts. Where the issues involve a particular party or product and have no general applicability, e.g., the failure of one manufacturer to use adequate quality control in processing a specific drug product, they will be regarded as adjudicatory in nature. Where the issues have general applicability, as is true with the safety and effectiveness of a class of drugs produced by a number of companies, they will be regarded as "legislative" or "rule making" in nature. Accordingly, all issues of general applicability will be subject to the requirement for written direct testimony, whereas issues involving specific applicability and particular parties shall be considered adjudicatory in nature and each party shall determine whether, and the extent to which, he wishes to present his direct testimony orally or in writing.

With respect to cross-examination, the Administrative Procedure Act, 5 U.S.C. 556(d), states that the same rules shall apply in both rule making and adjudicatory proceedings. Under the law, cross-examination shall be permitted upon a showing that it is necessary for a full and true disclosure of the facts. The Commissioner therefore adopts this standard, under which the presiding officer shall in all cases determine whether cross-examination has been justified. The burden shall be on the party involved to justify cross-examination in each instance in which it is requested. Ordinarily, cross-examination is justified when it relates to witness perception or credibility, but not when it relates to a judgment based on scientific, medical, or technical data.

The Commissioner emphasizes that these new regulations do not eliminate either oral direct examination or oral cross-examination. Rather, they require that any participant in a formal evidentiary public hearing justify the need for such oral presentation. Where the lack of an oral presentation can be shown to prejudice any participant, the new regulations provide that such an oral presentation shall be permitted. Accordingly, formal evidentiary public hearings will be far less protracted and legalistic but will preserve the right of each participant to make a full and fair presentation of his case.

The Commissioner concludes that these rules fully meet the requirements of the Administrative Procedure Act, as interpreted by the courts. They will neither hinder the parties in developing the relevant facts, nor unduly prolong the proceeding to the detriment of the public interest. Any diligent party will have full opportunity to present all relevant information for consideration by the presiding officer and the Commissioner.

Pursuant to the Administrative Procedure Act, 5 U.S.C. 556(d), the proponent of a regulation or order has the burden of proof in any formal evidentiary public hearing. Except as otherwise provided by statute, this means that, where an interested person submits a petition to the agency but the agency modifies it in any significant way, the agency itself must bear the burden of proof with respect to such modification. Where the matter involves a drug, food additive, or color additive, however, the provisions of the act specifically place the burden of proof on the person contending that the product is safe or effective or both and who is requesting approval or contesting withdrawal of approval. In these situations, the burden of proof remains on any such participants regardless whether the proceeding involves a denial of approval in the first instance, or revocation of prior approval. See, e.g., *Environmental Defense Fund v. Finch*, 428 F.2d 1083, 1092 n.27 (D.C. Cir. 1970) and *Dow Chemical Co. v. Ruckelshaus*, 447 F.2d 1317, 1324 (8th Cir. 1973).

#### PARTICIPATION OF NONPARTIES (§ 2.155)

Section 2.155 provides that a nonparty participant shall have basically the same rights as a party to the proceeding, except that he may not submit written interrogatories or conduct cross-examination except to the extent that the presiding officer finds that such additional rights should be granted because the participant's interests are not adequately protected otherwise, or it is required for a full and true disclosure of relevant evidentiary facts. Any person whose petition is the subject of the hearing shall have the same rights as a party, even though he does not meet the definition of a party in § 2.3(a) (10).

#### CONDUCT AT ORAL HEARINGS OR CONFERENCES (§ 2.156)

Section 2.156 requires dignified and ethical conduct by all participants in a hearing. Failure to observe this require-

ment shall result in exclusion from the proceeding by direction of the presiding officer. Exclusion of a participant for improper conduct at a hearing has been upheld in the courts. See, e.g., *Ubiotica Corp. v. Food and Drug Administration*, 427 F.2d 376, 382 (6th Cir. 1970).

#### TIME AND PLACE OF PREHEARING CONFERENCE (§ 2.157)

Section 2.157 provides for a prehearing conference to be held as scheduled in the notice of hearing or in a subsequent notice.

#### PREHEARING CONFERENCE PROCEDURE (§ 2.158)

Section 2.158 describes the matters to be determined at a prehearing conference. In general, the purpose of the prehearing conference is to lay out the full course of the hearing to the extent feasible, to identify all issues, to resolve all matters in contention between the participants with respect to the conduct of the hearing, and otherwise to take whatever action is necessary to assure a fair and efficient hearing. At the conclusion of the prehearing conference, the presiding officer must prepare a written prehearing order summarizing all of the decisions made, which shall control the subsequent course of the hearing unless later modified for good cause shown. The presiding officer may revise the prehearing order as the evidence develops in the course of the hearing.

#### SUMMARY DECISIONS (§ 2.159)

Section 2.159 provides that, just as in court proceedings, part or all of a formal evidentiary public hearing may be decided by summary judgment at any point in the proceeding.

#### RECEIPT OF EVIDENCE (§ 2.160)

Section 2.160 relates to the development of evidence at a formal evidentiary public hearing. All participants will be submitting evidence during the same time period, rather than having it developed in sequence. Separate rules are provided with respect to written and oral evidence.

A written submission to the record is admissible as evidence unless the document is not authentic or is excluded in order to enforce the procedural requirements of Subpart B. Thus, all of a participant's evidence may be excluded if he fails to comply with the requirements for a hearing.

Written evidence will not be excluded as inadmissible on the ground that it is irrelevant, immaterial, or repetitive. All such evidence shall be admitted even though it is of no probative value whatever. The admission of written evidence therefore does not indicate that it is of any weight or value in determining the issues raised at the hearing. The Commissioner concludes that it is far preferable to admit all written evidence and then to disregard irrelevant material in reaching a decision, than it would be to spend substantial time in debating the admissibility of such evidence at the hearing. For example, a scientific study

or consumer survey is admissible in evidence without the extensive voir dire that usually precedes it, in full court trials, and the other participants may then submit evidence on any alleged defects in the study or survey in order to support any contentions they may wish to make with respect to the weight that should be given to it. Admitting all written testimony into evidence, without consideration of evidentiary objections, will substantially shorten the time necessary to conduct a hearing.

Oral testimony, whether on direct or on cross-examination, will be admissible as evidence unless it is excluded as irrelevant, immaterial, or repetitive, or to enforce the procedural requirements relating to the hearing. If such evidence is excluded, it shall remain a part of the administrative record, as a proffer of proof, in the event that such ruling is later challenged on judicial review. The Commissioner concludes that excluding irrelevant, immaterial, and repetitious oral testimony will expedite the hearing by reducing the need for lengthy trial-type proceedings. Accordingly, by encouraging the use of written testimony and limiting oral testimony the new regulations will prevent the type of prolonged and contentious hearings for which the agency has been criticized in the past.

On occasion, oral testimony may be offered relating to matters which constitute trade secrets and which, pursuant to § 2.5(j) (3), are prohibited from public disclosure. After the presiding officer has assured himself that this is in fact the situation, he shall order the portion of the hearing closed which deals exclusively with oral testimony, whether on direct examination or cross-examination, relating to such matters. Testimony relating to other matters may not be offered during such a closed session. The only persons who may attend and participate in such a closed session are the witness, his counsel, and Federal Government Executive Branch employees and special government employees.

Any party may at any time in the course of the proceeding move for an order that the submission of oral and written evidence be concluded. It is within the power of the presiding officer to grant or deny such order. Once the taking of evidence is concluded, no additional evidence may be submitted and considered as part of the record unless the record is reopened for that purpose.

#### OFFICIAL NOTICE (§ 2.161)

Under § 2.161, the presiding officer may take official notice of specified matters on his own initiative or on the motion of any participant. All participants shall have an opportunity to object to any specific matter of which official notice is proposed to be taken.

#### BRIEFS AND ARGUMENT (§ 2.162)

Section 2.162 assures all participants of the right to file briefs, together with proposed findings of fact and conclusions of law, at the conclusion of the proceed-

ing. The presiding officer may also permit oral argument, in his discretion.

Where a formal evidentiary public hearing involves trade secret matters prohibited from public disclosure pursuant to § 2.5(j) (3), the participants who have access to this information, and particularly Food and Drug Administration representatives, shall make a reasonable effort to avoid disclosing the details of such matters in a way that would reveal the trade secrets involved, in their pleadings and oral arguments. Where such matters are at the very heart of the issue, however, and it is essential that they be discussed for the issue to be resolved, whatever presentation is necessary under the circumstances will be permitted.

#### INTERLOCUTORY APPEAL FROM RULING OF PRESIDING OFFICER (§ 2.163)

Ordinarily, an interlocutory appeal from a ruling of the presiding officer to the Commissioner is not permitted. Such an appeal pursuant to § 2.163 is allowed only where specifically provided for with respect to a particular matter in the subpart, or upon certification of the matter by the presiding officer.

#### OFFICIAL TRANSCRIPT (§ 2.164)

All oral testimony shall be transcribed.

#### MOTIONS (§ 2.165)

Under § 2.165, any participant may make a motion with respect to any matter by filing it with the Hearing Clerk and providing it to the other participants in the proceeding.

#### ADMINISTRATIVE RECORD (§§ 2.170-2.173)

Sections 2.170 through 2.173 designate the contents of the administrative record, provide for its examination and correction, and state that the record is the sole basis for decision on the matter involved.

The administrative record begins with the final regulation or order and the objections and requests for hearing thereon, and thus does not include any proposed regulation and comments on it which led to the final regulation. The Commissioner's decision on the matter must be based upon the evidence introduced at the hearing, and not upon earlier comments. The original proposal and some of or all the comments on it may, of course, be introduced as evidence by any participant in the hearing who wishes to rely upon such material.

The Commissioner has carefully considered the handling of data and information relevant to a formal evidentiary public hearing which would otherwise be prohibited from public disclosure pursuant to 21 U.S.C. 331(j) and 18 U.S.C. 1905, as interpreted and applied in the recently promulgated public information regulations contained in 21 CFR Part 4 and the regulations referenced therein. For the reasons already fully discussed above, § 2.5(j) (2) and (3) provides that safety and effectiveness data and information will be available for examination but not for copying, and that manufacturing procedures and related informa-

tion will not be available for examination or copying. In the Commissioner's experience, this will mean that, in virtually all formal evidentiary public hearings, all of the data and information necessary to full and meaningful participation by members of the public will be accessible.

#### RECOMMENDED, INITIAL, TENTATIVE, AND FINAL DECISIONS (§§ 2.180-2.185)

Sections 2.180 through 2.185 of the new regulations govern the initial decision of the presiding officer and the final decision of the Commissioner. Until now, Food and Drug Administration regulations have provided that the presiding officer in a formal evidentiary public hearing shall never prepare an initial decision on the matters involved, but shall always prepare a report and certify the record to the Commissioner. Thereafter, the Commission has prepared a tentative order, with time for exceptions by any party, and then a final order after which judicial review can be obtained.

The Commissioner has concluded that the new regulations should provide for the full flexibility permitted by the Administrative Procedure Act, 5 U.S.C. 557 (b), and thus should state that the Commissioner will in each instance decide, in the notice of hearing, whether the presiding officer will prepare a recommended decision or an initial decision.

Where the notice of hearing states that the presiding officer will prepare a recommended decision, the regulations provide for the same procedure that has been used in the past. That recommended decision will be certified to the Commissioner with the full record, and the Commissioner will then publish tentative and final decisions. This procedure will ordinarily be used where the hearing involves broad policy issues.

Where the notice of hearing states that the presiding officer will prepare an initial decision, or where the notice of hearing is silent on this matter, the new regulations provide that the initial decision shall stand as the final decision unless it is appealed by a party to the Commissioner, or the Commissioner concludes on his own initiative to review it. This procedure will ordinarily be used where the hearing involves narrow technical issues.

The same rule applies with respect to the handling of trade secret information prohibited from public disclosure pursuant to § 2.5(j) (3) in an initial or recommended decision as applies under § 2.162(c) for briefs and oral argument by the participants.

If the initial decision is appealed to the Commissioner, or he concludes to review it on his own initiative, the Commissioner shall have all the powers he would have in making the initial decision, and may take whatever action is necessary in the interest of justice, including a remand to the presiding officer for further proceedings. The scope of the issues on appeal shall be the same as the scope of the issues at the public hearing unless the Commissioner concludes to limit the issues as permitted by the Administrative

Procedure Act, 5 U.S.C. 557(b). The Commissioner's decision must, of course, be based upon substantial evidence of record, and shall be published in the FEDERAL REGISTER. Following his final decision, any participant may petition for reconsideration or a stay of action.

#### JUDICIAL REVIEW (§§ 2.190 AND 2.191)

Sections 2.190 and 2.191 provide for judicial review of the Commissioner's final decision, pursuant to the specific statutory provisions governing the matter involved.

#### PUBLIC HEARING BEFORE A PUBLIC BOARD OF INQUIRY (SUBPART C)

Subpart C of the new regulations establishes, as an alternative to a formal evidentiary public hearing, an informal public hearing before a Public Board of Inquiry that will be conducted in the form of a scientific inquiry rather than as a legal trial. The reasons for providing this alternative to a formal evidentiary public hearing have been discussed fully above.

#### SCOPE OF SUBPART (§ 2.200)

The Commissioner may convene a Public Board of Inquiry whenever he concludes, in his discretion, that it is in the public interest to hold a public hearing before such a Board with respect to any matter pending before the agency. Although no agency regulations currently provide for the right to a public hearing before a Board of Inquiry, the Commissioner may in the future promulgate regulations providing this right. A Public Board of Inquiry may also be requested by any person who has an opportunity for a hearing pursuant to Subpart B, and who waives that opportunity and instead requests pursuant to § 2.117 the establishment of a Board to act as an administrative law tribunal with respect to the matters involved. The Commissioner may, in his discretion, accept or deny such a request.

The Commissioner notes that the only persons who may request a Board of Inquiry pursuant to § 2.117 are those who are, by statute, entitled to an opportunity for a hearing under Subpart B. For example, an NDA applicant or holder who has received a denial of approval or withdrawal of approval has a statutory right to request a hearing on the matter, but no other member of the public has such a right. A physician or other citizen who wishes to have a Board inquire into the matter may request the Commissioner to order such a hearing pursuant to his discretionary authority, but he has no legal right to require either a formal evidentiary public hearing or the establishment of a Board of Inquiry.

#### NOTICE OF A PUBLIC HEARING BEFORE A PUBLIC BOARD OF INQUIRY (§ 2.201)

Once it is determined that a Board will be established, a notice of hearing will be published pursuant to § 2.201 which will provide the essential information about the hearing. If the hearing is in lieu of a formal evidentiary public

hearing the notice of hearing will provide all of the information required by § 2.117(e), and the criteria for granting a stay of the matter pending the hearing will be the same as for a formal evidentiary public hearing.

#### MEMBERS OF A PUBLIC BOARD OF INQUIRY (§ 2.202)

Section 2.202 requires that the members of a Board have medical, technical, scientific, or other qualifications relevant to the issues to be considered at the hearing. The members will be special government employees and thus subject to the conflict of interest rules applicable to such employees. Although a Board member may be a full-time or part-time Federal government employee or serve on a Food and Drug Administration advisory committee, he may not be a full-time or part-time employee of the agency or otherwise act as a consultant to the agency unless all of the parties to the proceeding agree.

Within 30 days after the notice of the hearing before the Board is published in the FEDERAL REGISTER, each of the parties to the proceeding and any person whose petition is the subject of the hearing shall submit a list of five nominees for members of the Board. Such persons may agree upon a single list of nominees. Following receipt of such lists, such persons may submit comments on the other lists submitted. The Commissioner shall then review the lists and comments and select one member of the Board from the lists submitted by the director of the agency bureau involved and any person whose petition is the subject of the hearing, one member from the lists submitted by the other parties, and one member of his own choosing from any source whatever who shall serve as the Chairman of the Board. Thus, although the parties shall have a right to participate in the selection of the members of the Board, the Commissioner shall have the final determination on this matter.

In lieu of the nomination procedure set out above, the parties to such a proceeding and any person whose petition is the subject of the hearing may meet and agree upon any other method of selection that is reasonable, subject to the approval of the Commissioner. For example, any standing advisory committee of the agency may be utilized as the Board for a particular proceeding.

Since the Board is acting as an administrative law tribunal with the consent of the parties involved, it does not meet the definition of an "advisory committee" and thus is not subject to the requirements of the Federal Advisory Committee Act or Subpart D of these regulations. On the other hand, the procedures established for a Board clearly meet all of the requirements with respect to public notice and participation for an advisory committee. The only difference is that a Board utilizes a public notice of hearing rather than a charter, and is not required to be approved by the Office of Management and Budget and the Department.

#### SEPARATION OF FUNCTIONS; EX PARTE COMMUNICATIONS; ADMINISTRATIVE SUPPORT (§ 2.203)

To assure objectivity and fairness, the proceedings of a Board are subject to the same provisions with respect to separation of functions and ex parte communications as are the proceedings of a formal evidentiary public hearing. Similarly, administrative support for a Board shall be provided only by the office of the Commissioner and not by the Bureau which is a party to the proceeding.

#### SUBMISSIONS TO A PUBLIC BOARD OF INQUIRY (§ 2.204)

All submissions to the Board shall be filed with the Hearing Clerk in accordance with the general requirements established in § 2.5. Documentary data and information need be filed only with the Hearing Clerk, but all submissions that are generally regarded as "pleadings," such as transmittal letters, summaries, statements of position, and other similar documents, as well as any certification of service required by § 2.204(d), shall be sent to each participant so that he will understand the position of all of the participants and will be able to follow the progress of the proceeding. The same provisions with respect to participating in forma pauperis apply to a public hearing before a Public Board of Inquiry as apply to a formal evidentiary public hearing.

#### DISCLOSURE OF DATA AND INFORMATION BY THE PARTICIPANTS (§ 2.205)

Section 2.205 requires that the director of the responsible agency bureau file with the Hearing Clerk, before the notice of hearing is published, the relevant portions of the administrative record of the proceeding up to that time, a list of the persons whose views will be presented orally or in writing at the hearing, all relevant documents in the agency files containing factual data and information, whether favorable or unfavorable, and all other documentary data and information on which he relies. In this way, the full position of the agency with respect to the matters involved will be made public at an early date.

Within 60 days after the notice of hearing, each participant in the proceeding who has submitted a notice of appearance is required to submit the same information. Because the agency will already have filed its information, no participant need submit duplicative documents. This will substantially reduce the amount of paperwork involved.

These submissions may be supplemented later in the proceeding upon a showing of good cause, but no participant may fail to conduct an adequate search and then later supply new information that could reasonably have been found at the time of the initial submission.

The Commissioner believes that it is important that this section be complied with fully. Accordingly, the failure to comply, e.g., the failure to submit any data and information as required by

## RULES AND REGULATIONS

§ 2.205 (a) and (b), shall constitute a waiver of the right to participate further in the hearing and, in the case of a party, shall constitute a waiver of the right to a hearing.

## PROCEEDINGS OF A PUBLIC BOARD OF INQUIRY (§ 2.206)

Section 2.206(a) makes it clear that the purpose of a Board is to review complex technical issues in a reasonably short time by using the informal approach of a scientific inquiry rather than the formal procedures of a legal trial. Accordingly, it is anticipated that there will be little, if any, need for participation by attorneys in the proceeding. The participants will primarily be the scientists and others with technical backgrounds who wish to present data and information relevant to issues raised at the hearing. The agency's Chief Counsel will participate only to the extent that he is requested by the Chairman of the Board to provide legal assistance to the Board.

The Chairman of the Board shall determine the order in which the parties and participants make their presentations. Such order of presentation may well be the subject of a prior agreement. Each participant may then proceed with his presentation, which shall be made without interruptions and without objection or other legalistic procedures. At the conclusion of a participant's presentation, each of the other participants may briefly state questions or criticism and suggest further questioning with respect to specific matters. The members of the Board may interrupt a participant at any time to ask questions, and may conduct further questioning at the conclusion of the participant's full presentation either on their own initiative or at the suggestion of the other participants. The exact nature of the proceeding will largely be in the discretion of the Chairman, who shall be the presiding officer and shall have all of the powers necessary to conduct a fair and expeditious hearing.

Following the initial session, each participant shall have 30 days within which to submit additional written information. If a second session is requested and justified by any participant, the Chairman shall schedule it. Each hearing shall be subject to the same procedural requirements.

In addition to hearing the views of the participants, the Board may independently consult with any other person who it concludes may have useful information. All such consultation must be at an announced hearing of the Board unless all participants agree that it may be done in writing.

Moreover, any participant in the proceeding may submit to the Board a request that it consult with specific persons who may have useful information. The Board may accept or deny such a request, in its discretion.

All hearings of a Board will be conducted in open session, and thus may be attended by any interested person, except for presentation of data and in-

formation constituting trade secrets which are prohibited from public disclosure pursuant to § 2.5(j) (3). Presentation of such material shall be at a session closed to all persons except those making and participating in the presentation and Federal Government Executive Branch employees and special government employees. The person making the presentation may bring with him only such persons who are employees, consultants, or other persons with whom he has a commercial arrangement within the meaning of § 4.81(a), and thus to whom disclosure is properly made without destroying the trade secret status of the material.

At the conclusion of all hearings, the Board will permit the participants to submit written statements on their positions, with proposed findings and conclusions. Oral argument may also be permitted, in the discretion of the Board. The Board will then prepare its findings and conclusions on the matter involved.

## ADMINISTRATIVE RECORD OF A PUBLIC BOARD OF INQUIRY (§ 2.207)

Section 2.207 specifies the administrative record of a hearing before a Board. The administrative record shall be on public display and, except for trade secrets and other confidential information, available for copying.

## EXAMINATION OF ADMINISTRATIVE RECORD (§ 2.208)

The same provisions with respect to confidentiality of information submitted in the course of the hearing shall apply to the proceedings of a Board as apply in a formal evidentiary public hearing. In addition, both the lists of nominees for members of a Board and any comments thereon shall not be made available for public examination or copying at any time.

## RECORD FOR ADMINISTRATIVE DECISION (§ 2.209)

The administrative record of the public hearing constitutes the exclusive record for decision on the matter. If the public hearing is held in lieu of a formal evidentiary public hearing pursuant to § 2.117, the findings and conclusions of the Board shall constitute an initial decision unless the notice of hearing specifically states that they shall constitute a recommended decision. Thereafter, the participants in the proceeding may pursue the administrative and court remedies that are available as specified in §§ 2.180 through 2.191.

## PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE (SUBPART D)

Subpart D governs all proceedings and activities of Food and Drug Administration advisory committees.

## SCOPE OF SUBPART (§ 2.300)

Because of the requirements in this subpart for public notice and participation, all proceedings before a public advisory committee constitute a public hearing on the matters involved. Any interested person is entitled to present his views for the consideration of the ad-

visory committee, and the committee proceedings constitute part of the administrative record on the basis of which the agency makes its determination with respect to that matter.

The Commissioner may utilize a public advisory committee with respect to any matter on his own initiative, pursuant to specific provisions in other sections of agency regulations, or at the request of any interested person. Section 2.300(a) (2) of the regulations lists five specific provisions in existing laws and regulations which provide for the use of a public hearing before a public advisory committee as part of the administrative process. Pursuant to § 2.117, a person who has a right to an opportunity for a formal evidentiary public hearing may waive that opportunity and in lieu thereof request a public hearing before a public advisory committee.

As defined in the Federal Advisory Committee Act in § 2.3(a) (14), an advisory committee means any group or subgroup thereof that is not composed wholly of full-time employees of the Federal government and is established or utilized by the Food and Drug Administration to obtain advice or recommendations. On the basis of guidelines established by the Office of Management and Budget and the Department of Justice, and other available materials, the Commissioner has set out in § 2.300(b) a set of general principles governing the determination whether a committee or group falls within the definition of an advisory committee. All Food and Drug Administration advisory committees are also listed in § 2.340.

In general, an advisory committee shall ordinarily have a fixed membership, a defined purpose of providing advice to the agency on a particular matter, regular or periodic meetings, and an organizational structure, and shall serve as a source of independent advice rather than as a representative of or advocate for any particular interest. The Commissioner notes that the agency is charged with seeking out the views of all segments of the public on enforcement of the laws he administers. Thus, the fact that the agency meets with and requests the comments of a group on pending regulatory matters, or that a group regularly meets with the agency, does not necessarily mean that it is an advisory committee which is utilized by the agency. The provisions relating to advisory committees are not applicable, for example, to routine meetings, discussions, and other dealings, including exchanges of views, between the agency and any committee representing or advocating the particular interests of consumers, industry, professional organizations, or others. If this were not true, the Food and Drug Administration would be precluded from meeting with any group of individuals interested in the activities of the agency. Thus, when a consumer organization or trade association meets with the agency to obtain a briefing on various matters, or to protest certain action or lack of action, it is not an advisory committee for that purpose.

## ESTABLISHMENT AND RENEWAL OF PUBLIC ADVISORY COMMITTEES (§ 2.301)

Before any advisory committee may be established by the Commissioner, it must first be approved by the Department and the Office of Management and Budget. Its establishment shall then be published in the FEDERAL REGISTER, and the permanent list of standing advisory committees in § 2.340 will be amended to include it.

## TERMINATION OF PUBLIC ADVISORY COMMITTEES (§ 2.302)

All advisory committees except those established by statute shall terminate every 2 years unless renewed for an additional period. The only two permanent statutory advisory committees established under the laws administered by the Commissioner are the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC) and the Board of Tea Experts.

## PURPOSE OF PUBLIC HEARING BEFORE PUBLIC ADVISORY COMMITTEE (§ 2.303)

The Commissioner may use a public advisory committee to hold a public hearing on any matter pending before the Food and Drug Administration. The function of the advisory committee is to provide advice and recommendations to the Commissioner. The Commissioner is charged with sole statutory responsibility for making the ultimate determination with respect to action to be taken and policy to be expressed with respect to such matters.

## PORTIONS OF PUBLIC ADVISORY COMMITTEE MEETINGS (§ 2.304)

An advisory committee meeting may have four separable portions as described below. Every advisory committee meeting must have at least the first portion (an open public hearing). Whether or not it also has the other three portions will depend upon the specific meeting involved.

1. *The open public hearing.* Every advisory committee meeting must include an open portion which shall constitute a public hearing on the issues pending before the advisory committee. During this portion, any interested person may present data, information, or views, orally or in writing. Section 2.312 specifies the manner in which the hearing shall be conducted.

2. *The open committee discussion.* All discussion of any pending matter by an advisory committee shall be in an open portion of its meeting, unless that portion has been closed in accordance with the provisions established in § 2.318. The Commissioner concludes that, to the maximum extent feasible, an advisory committee should conduct its discussion of pending matters in the open portion. Ordinarily, there will be no public participation during this discussion by the advisory committee, but the chairman of the advisory committee may permit such further public participation when he concludes that it would be in the public interest and helpful to the advisory committee.

## RULES AND REGULATIONS

3. *The closed presentation of data.* On occasion, it may be important for an interested person to present to an advisory committee, for its consideration, data and information which are prohibited from public disclosure pursuant to the provisions relating to public information contained in Part 4 of the agency regulations. Such presentations shall be made in a closed portion of a meeting. The Commissioner emphasizes, however, that this will be the exception rather than the rule, and will occur only when the information is clearly confidential.

4. *The closed committee deliberations.* Deliberations with respect to matters pending before an advisory committee may properly be made in a closed portion of its meeting, if the Commissioner makes an appropriate determination pursuant to § 2.318. A court has specifically held that a Food and Drug Administration advisory committee may properly conduct its deliberations in private, and other courts have similarly recognized the need to protect the confidentiality of such internal discussions in order to promote free and frank consideration of issues among government employees and consultants. See *Smart v. Food and Drug Administration* (N.D. Cal. 1974); *Washington Research Project, Inc. v. Department of Health, Education, and Welfare*, 504 F.2d 238, 246-252 (D.C. Cir. 1974); *Montrose Chemical Corp. v. Train*, 491 F.2d 63, 66-71 (D.C. Cir. 1974); *Grumman Aircraft Engineering Corp. v. Renegotiation Board*, 482 F.2d 710, 718-720 (D.C. Cir. 1973); *Wu v. National Endowment for Humanities*, 460 F.2d 1030, 1032 (5th Cir. 1972); *Soucie v. David*, 448 F.2d 1067, 1078 n.44 (D.C. Cir. 1971).

## NOTICE OF PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE (§ 2.305)

Before the first day of each month, and at least 15 days before any meeting, the Commissioner must issue a notice in the FEDERAL REGISTER containing information on all advisory committee meetings to be held during the coming month. Additional notices may also be published, at least 15 days in advance of the meeting, except that a shorter notice period may be authorized where an immediate meeting of an advisory committee is required, and no notice in the FEDERAL REGISTER is required in emergency situations. Whenever shorter notice is given or no notice is published in the FEDERAL REGISTER, public notice shall be given at the earliest time and in the most accessible form feasible.

The FEDERAL REGISTER notice shall include all relevant information on the advisory committee meeting, including the agenda items and, if any portion of the meeting is closed, the time of the open and closed portions. The name, address, and telephone number of the advisory committee executive secretary shall also be included.

Where a public hearing before a public advisory committee is used in lieu of a formal evidentiary public hearing pursuant to § 2.117, the initial notice of hearing shall be published separately in the FEDERAL REGISTER containing all of

the information described in § 2.117(e). The Commissioner may also publish such separate notices in the FEDERAL REGISTER whenever he concludes that it would be informative to do so, e.g., the notices relating to public hearings before advisory committees on intrauterine devices published in the FEDERAL REGISTER of July 15, 1974 (39 FR 25967), on reserpine published in the FEDERAL REGISTER of October 1, 1974 (39 FR 35404), and on medroxyprogesterone acetate injectable and other systemic steroidal contraceptives published in the FEDERAL REGISTER of March 21, 1975 (40 FR 12830).

In addition to the notice published in the FEDERAL REGISTER, the Food and Drug Administration will also distribute its list of advisory committee meetings to the press and will place them on its prospective public calendar.

## CHAIRMAN OF A PUBLIC ADVISORY COMMITTEE (§ 2.306)

The advisory committee chairman shall have full authority to conduct the meetings of the advisory committee. Each advisory committee shall also have an executive secretary or other designated agency employee, and an alternate, appointed by the Commissioner, who serves as staff to the advisory committee for the agency.

As required by the Federal Advisory Committee Act, a designated Federal employee shall be assigned to each advisory committee, and shall be authorized to adjourn any meeting whenever he determines adjournment to be in the public interest. No advisory committee meeting may be conducted without the presence and approval of the designated Federal employee.

## MEETINGS OF A PUBLIC ADVISORY COMMITTEE (§ 2.307)

Section 2.307 requires that there be an agenda for every advisory committee meeting. The Commissioner notes that, because the agenda must ordinarily be prepared at least 30 days in advance of a committee meeting to meet the requirement for publication in the FEDERAL REGISTER before the first day of each month and at least 15 days before the meeting, it is entirely possible that other agenda items may be added after its publication. The agency will take reasonable steps to anticipate agenda items, in order to minimize this problem. Where an agenda item is added to those published in the FEDERAL REGISTER, an attempt will be made to inform those persons known to be interested in the matter. Such changes will be announced at the beginning of the open portion of the meeting.

As a general rule, all advisory committee meetings will be held in Washington, DC, or Rockville, MD, where the Food and Drug Administration is located. A different location may be approved to obtain cost savings, or when it is at a more central location, or the majority of the advisory committee members will be there at no expense to the Food and Drug Administration for other reasons, or to facilitate increased participation on any matter, or to be near specific information or facilities relevant to the ad-

visory committee's work, e.g., a laboratory working on a particular matter.

Discussion of advisory committee proceedings by members of the committee has often been a source of confusion. The new regulations provide that such discussion is permissible, as soon as the meeting is completed and before official minutes or a report are available, within the specific rules set out in the regulations. In general, there must be no attribution of individual views or discussion relating to trade secrets or specific matters that are determined by the advisory committee or the agency to be confidential, but all other matters can be freely discussed.

#### CONSULTATION BY A PUBLIC ADVISORY COMMITTEE WITH OTHER PERSONS (§ 2.308)

An advisory committee may consult with any person who it concludes may have useful data, information, or views relating to any matter pending before it. Other interested persons may also recommend that the advisory committee consult with specific individuals, and the advisory committee may grant or deny such a request.

#### ADDITIONAL RULES FOR A PARTICULAR PUBLIC ADVISORY COMMITTEE (§ 2.309)

The Commissioner recognizes that, in addition to the rules established for all Food and Drug Administration advisory committees, any individual advisory committee may wish to adopt additional rules. Section 2.309 permits such additional rules with the concurrence of the agency, as long as they are not inconsistent with the new regulations or legal requirements.

#### COMPILATION OF MATERIALS FOR MEMBERS OF A PUBLIC ADVISORY COMMITTEE (§ 2.310)

The Food and Drug Administration has been criticized for failing to provide a comprehensive compilation of salient information and background material to all advisory committee members for their periodic review relating to their duties and responsibilities. Section 2.310 of the new regulations provides that such a compilation will be prepared and disseminated, and will contain all pertinent background information that may be helpful to the specific committee involved.

#### WRITTEN SUBMISSIONS TO A PUBLIC ADVISORY COMMITTEE (§ 2.311)

Section 2.311 permits any interested person to make written submissions to a public advisory committee before, during, or after any advisory committee meeting. Such submissions may be at the request of the advisory committee or on the initiative of any interested person. Ten copies of such submissions shall be sent to the executive secretary of the advisory committee. No copies need be sent to the Hearing Clerk.

The Commissioner shall provide to an advisory committee all data and information he concludes to be relevant to any matter pending before the advisory committee, but any member of the advisory committee shall upon request also

be provided whatever other material is available to the agency which is related to the matter. In particular, any member of the advisory committee shall be entitled to review raw data underlying any summary or report, if he wishes to do so. Raw data cannot routinely be provided to all committee members in all instances because of the massive amount of paperwork involved, but all advisory committee members who wish to review such data may do so.

#### CONDUCT OF A PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE (§ 2.312)

Under the provisions of § 2.312, no Food and Drug Administration advisory committee may meet without having an open portion for public participation which shall be a public hearing on the matters being considered by the advisory committee. The hearing shall be at least 1 hour long, unless the public participation does not last that long, and may last for whatever length of time the advisory committee chairman determines will facilitate the work of the committee.

In the past, agency notices of public advisory committee meetings have specified a 1-hour open portion, where the remainder of the meeting is closed, and have failed to point out that this is the minimum rather than the maximum time allocated for public participation. In many instances, the hearing has lasted far beyond the allotted hour, and has extended up to the entire day. Accordingly, future notices of advisory committee meetings will make this clear. A particular advisory committee meeting which is scheduled for more than one day nonetheless constitutes a single meeting for purposes of scheduling the open and closed portions.

Section 2.312 specifies the manner in which the public hearing before a public advisory committee shall be conducted. Persons who wish to be assured of an opportunity to make an oral presentation must so inform the committee executive secretary prior to the meeting. The executive secretary will then allot to each such person reasonable time for his presentation.

At the hearing, each person may use his allotted time in any reasonable way. The person making the presentation may be accompanied by others, to assist him. Persons making presentations will be taken in order, and if anyone is not present for his allotted time an attempt will be made to hear him at the conclusion of the hearing, as well as others who did not request an opportunity to make an oral presentation.

The chairman and other members of the advisory committee sit as a panel in conducting the hearing. They may question any person during or at the conclusion of his presentation, but no other person attending the hearing may conduct such questioning. The hearings shall be informal in nature, without motions or objections or other similar legal procedures. In short, the hearing will be conducted very much like hearings conducted by legislative bodies, in

the same manner as a public hearing before the Commissioner pursuant to Subpart E.

#### MINUTES AND REPORTS OF PUBLIC ADVISORY COMMITTEE MEETINGS (§ 2.313)

For every advisory committee proceeding, the executive secretary must prepare detailed minutes of the committee's activities. In the past, such minutes have at times been very detailed and at other times very general. The Commissioner has advised all executive secretaries that detailed minutes are required, and these regulations so provide.

Under the regulations, an advisory committee meeting is broken down into open and closed portions.

The open portion has two parts and includes both the open public hearing and the open advisory committee discussion. The open public hearing involves the presentation of views by interested members of the public, and any presentation of data and information by the Food and Drug Administration which are not confidential. The open portion may also include discussion by the advisory committee of all of the available data and information, to the extent that the presence of observers will not inhibit the discussion and thus interfere with the advisory committee or agency operations. The length of the open portion will vary from committee to committee, and from meeting to meeting, depending upon the agenda and other relevant factors. In general, it is the policy of the Commissioner to conduct as much of an advisory committee meeting in open session as is feasible.

The closed portion of an advisory committee meeting may include both the presentation of confidential information and closed advisory committee deliberations. Data and information that are prohibited from public disclosure pursuant to 21 U.S.C. 331(j) and 18 U.S.C. 1905, or by any provision in the public information regulations in 21 CFR Part 4, may properly be presented in such a closed portion. The person who owns such data and information may make such presentation, and may be accompanied by a reasonable number of persons to assist him. The use of this procedure will, however, be extremely rare. In accordance with 21 CFR Part 4 and the regulations referenced therein, a summary of safety and effectiveness data is itself not confidential. Accordingly, oral presentation of such data will be in open session unless it relates to matters that are truly confidential, e.g., an IND or NADA the existence of which has not previously been disclosed to the public.

The other part of a closed advisory committee meeting is the executive session, during which the advisory committee deliberations take place and the recommendations of the advisory committee are formulated. This portion is closed to permit free and open discussion of views, and formulation of the best advice possible for the consideration of the Commissioner. In addition, such closed session may involve discussion of trade se-

cret material, information that may not be released on the ground that it would invade personal privacy, and confidential regulatory issues pending before the agency.

To facilitate release, advisory committee minutes will be kept separately for three portions of the meeting: The open portions, the closed portion for presentation of confidential information, and the closed executive session for advisory committee deliberations. The minutes of a closed executive session of a meeting will not refer to advisory committee members by name, to encourage free discussion of the issues involved.

#### TRANSCRIPTS OF PUBLIC ADVISORY COMMITTEE MEETINGS (§ 2.314)

Present law does not require that a transcript or other recording be made of either open or closed portions of an advisory committee meeting. The Commissioner has concluded that each advisory committee should decide whether some type of recording should be made and, if so, by what means, e.g., stenographer or tape. Any transcript or recording of any portion of an advisory committee meeting that is made by the agency, or otherwise furnished to the agency, shall be retained by the agency and shall not be discarded or erased.

The Commissioner emphasizes, however, that a transcript or recording of a closed portion of an advisory committee meeting shall be retained as confidential by the agency and shall not be considered by the agency or included in the record of the advisory committee proceeding, for the reasons set out in the preamble to the notices discussing this subject in the context of the OTC drug review, published in the FEDERAL REGISTER of June 4 and November 8, 1974 (39 FR 19878, 39556). The Commissioner shall not refer to or otherwise consider any such transcript or recording in his review of the advisory committee recommendations and his decision on the matter involved.

#### ADMINISTRATIVE RECORD OF A PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE (§ 2.315)

Section 2.315(a) specifies the administrative record of the advisory committee proceedings with respect to a specific matter. That record shall be included as a part of the record of any administrative proceeding involving that matter.

#### EXAMINATION OF ADMINISTRATIVE RECORD AND OTHER ADVISORY COMMITTEE RECORDS (§ 2.316)

Section 2.316(a) sets out, in detail, the specific time at which the various portions of the administrative record and other advisory committee records will be made available for public disclosure.

As a general rule, data and information contained in the administrative record which were provided to the advisory committee by the agency and are exempt from public disclosure, pursuant to the public information regulations, or which were presented to the advisory committee by a person making a presentation and which are prohibited from public

disclosure pursuant to such regulations, shall not be available for public examination and copying. The sole exception to this general rule is where a public hearing before a public advisory committee is being used in lieu of a formal evidentiary hearing pursuant to the provisions of § 2.117, in which case the limited disclosure of safety and effectiveness data pursuant to § 2.5(j)(2) shall be applicable.

The new regulations require that the Public Records and Documents Center maintain a file for each advisory committee containing the principal records relating to that committee, i.e., the advisory committee charter, the list of members and their curricula vitae, the advisory committee minutes, and any formal advice or report of the advisory committee. These are the records for which public disclosure is most often sought.

#### PUBLIC INQUIRIES AND REQUESTS FOR PUBLIC ADVISORY COMMITTEE RECORDS (§ 2.317)

All requests for records shall be in accordance with the recently promulgated public information regulations, and particularly § 4.40. General inquiries may be handled by the agency's Committee Management Officer or the executive secretary of a particular advisory committee.

#### DETERMINATION TO CLOSE PORTIONS OF PUBLIC ADVISORY COMMITTEE MEETINGS (§ 2.318)

Section 2.318 sets out the circumstances under which the Commissioner may make a determination to close a portion of a public advisory committee meeting. As already noted, under no circumstances will all portions of a public advisory committee meeting be closed to the public.

The executive secretary of an advisory committee shall prepare the initial request for a determination to close a portion of an advisory committee meeting, which shall be forwarded to the agency Committee Management Officer and, from his office, to the office of the Chief Counsel and to the Commissioner. Based upon this request, the Commissioner may conclude to close a portion of the meeting, if the requirements of the regulations are satisfied, or may conclude that the portion should remain open.

The regulations set out various criteria for determining whether to close a portion of a meeting. Information prohibited from disclosure under 21 CFR Part 4 and the regulations referenced therein, e.g., trade secrets or material that would invade personal privacy, shall be discussed only in closed session. Advisory committee deliberation on regulatory decisions with respect to specific ingredients or products or pending applications for IND or NDA products will ordinarily be conducted in closed session. On the other hand, discussion of policy issues, such as general testing protocols or labeling for a class of drugs, or other information that has already been dis-

closed to the public, will be conducted only in open session.

A closed session shall be limited to the advisory committee members and employees and consultants of the Executive Branch of the Federal Government. If any other person attends such a portion, except to present confidential material, it must be opened to all interested persons. Of course, the Food and Drug Administration may properly limit attendance of consultants and employees at advisory committee meetings to those whose attendance is appropriate for the conduct of their work.

#### ADMINISTRATIVE REMEDIES (§ 2.319)

Section 2.319 provides procedures under which any person may contest action taken by an agency employee or an advisory committee relating to any aspect of Subpart D or the Federal Advisory Committee Act. If improper action has been taken, the Commissioner shall take appropriate steps to remedy the error and to prevent its recurrence.

#### APPLICABILITY TO CONGRESS (§ 2.320)

Under the Federal Advisory Committee Act, Congress stands on the same legal footing as any other member of the public. Accordingly, the provisions of Subpart D apply to Congress in the same way that they apply to any other member of the public, except that disclosure of advisory committee records to Congress shall be governed by § 4.87 of the public information regulations.

#### COMMITTEES WORKING PURSUANT TO A CONTRACT WITH THE FOOD AND DRUG ADMINISTRATION (§ 2.321)

The Department of Justice has provided an opinion to the Food and Drug Administration that, when the agency contracts with another organization to obtain advice and recommendations on particular matters, and that organization in turn utilizes a committee to prepare such advice and recommendations, the provisions of the Federal Advisory Committee Act do not apply if the governing body of that organization undertakes substantial policy and factual review of the committee's work. In short, the applicability of Subpart D of the new regulations to such committee will depend upon whether the advice obtained is the advice of the organization or of a committee of the organization.

The Commissioner has concluded, as a matter of policy, that committees working pursuant to a contract with the Food and Drug Administration should be subject to certain minimum standards regardless whether the other provisions of Subpart D are applicable to that committee. The Commissioner believes that such minimum standards should be applicable to assure that a fair procedure will be followed by such committees even though they are not subject to the specific requirements of the Federal Advisory Committee Act and Subpart D of the new regulations.

Accordingly, § 2.321(b) requires that any such committee give public notice of its meetings and agenda, and provide any

interested person an opportunity to submit relevant data, information, and views orally and in writing. Such notice may be published in the *FEDERAL REGISTER* or disseminated by any other reasonable means, but shall in any event be filed with the Hearing Clerk at least 15 days before the meeting involved. Minutes of all open sessions shall be maintained, but minutes of closed sessions are not required. Finally, the organization must apply the same principles relating to conflicts of interest as the agency does in establishing its own public advisory committees, but the organization is in no way obligated to consult with the Food and Drug Administration on such matters. Upon request, the agency will assist or provide guidance to any organization in meeting this requirement.

These minimum standards will apply only to a committee of an independent scientific or technical organization which is working pursuant to a contract initially executed with the Food and Drug Administration on or after July 1, 1975. Accordingly, such ongoing projects as the GRAS list review, being conducted by the Federation of American Societies of Experimental Biology, will not be affected. The Commissioner concludes that it would be unfair to impose such requirements retroactively upon such an organization which has entered into a project of this kind in good faith and had no advance warning that such requirements might become applicable. In all future documents relating to contracts, such requirements will clearly be spelled out so that no misunderstanding can exist.

#### APPLICATION OF ANTICANCER CLAUSES (§ 2.322)

The Food and Drug Administration has previously determined issues relating to the potential application of the anticancer clauses in the act in a number of different ways. The Commissioner has concluded that, in the future, such issues shall ordinarily be referred to the newly created Toxicology Advisory Committee, so that a consistent application of the law will be obtained.

#### QUALIFICATIONS FOR MEMBERS OF STANDING POLICY AND TECHNICAL ADVISORY COMMITTEES (§ 2.330)

Section 2.330 sets out general qualifications for advisory committee members. The new regulations recognize that representatives of particular interest groups, e.g., labor, industry, consumers, or agriculture, may properly be included on policy advisory committees, but not technical advisory committees, as voting members specifically to represent such interests, and the regulations constitute a determination pursuant to 18 U.S.C. 208(b) that no disqualifying conflict of interest exists by reason of the fact of such representation. The representational role of these members is clearly understood, and the Commissioner concludes that their viewpoint is essential for the type of general and broad issues considered by a policy advisory committee.

Advisory committee members may be removed from membership by the Commissioner for good cause. Although it is not possible to specify the precise content of "good cause," excessive unjustified absenteeism from meetings, a demonstrated bias, or a failure to abide by the advisory committee rules and regulations, will be adequate justification for removal from the advisory committee.

#### NOMINATIONS OF VOTING MEMBERS OF STANDING ADVISORY COMMITTEES (§ 2.331)

Section 2.331 provides a mechanism for any interested member of the public to nominate persons for consideration as voting members of standing advisory committees. The members of any advisory committee may be chosen from among the lists of nominees and from any other sources.

Voting members of standing technical advisory committees serve as individuals, and not as representatives of any group or organization which may have nominated them or with which they may be affiliated.

#### NOMINATIONS AND SELECTION OF NONVOTING MEMBERS OF STANDING TECHNICAL ADVISORY COMMITTEES (§ 2.332)

Section 2.332 provides a mechanism for nominating and selecting nonvoting members of standing technical advisory committees. In the past 3 years, the Commissioner has increasingly included such nonvoting members to represent consumer and industry interests on standing technical advisory committees. These members serve in a liaison function with those whom they represent.

Nonvoting consumer liaison members shall be nominated and selected by consumer organizations and other interested consumers, and nonvoting industry liaison members shall be selected by industry associations. Because they have no vote and their liaison role for particular interests is well understood, the regulations constitute a determination pursuant to 18 U.S.C. 208(b) that any financial interest they may have in the particular class which they represent does not constitute a disqualifying conflict of interest. Thus, an industry liaison representative is not disqualified because he holds stock in the regulated industry which he represents, but a consumer liaison representative would be disqualified if he were to hold stock in the regulated industry affected by the work of the technical advisory committee of which he is a member.

#### RIGHTS AND RESPONSIBILITIES OF NONVOTING MEMBERS OF ADVISORY COMMITTEES (§ 2.333)

Section 2.333 sets out the rights and responsibilities of nonvoting consumer and industry liaison members of advisory committees. In general, it is their responsibility to represent the consumer and industry interests fairly in all deliberations, but they must also exercise restraint in performing these functions and not engage in unseemly advocacy or

attempt to exert undue influence over the other members of the advisory committee.

The Commissioner notes that nonvoting consumer and industry liaison representatives have served on all of the OTC drug review advisory committees, the biologics review advisory committees, and the medical device classification panels, with enormous success. With rare exception, their conduct has been entirely dignified and proper, and they have made major contributions to the issues pending before those advisory committees.

#### AD HOC ADVISORY COMMITTEE MEMBERS (§ 2.334)

Section 2.334 provides that, when the Commissioner, in his discretion, utilizes an ad hoc advisory committee to review and consider a specific matter, he may select the members pursuant to §§ 2.331 and 2.332 or in any other appropriate manner.

#### COMPENSATION OF PUBLIC ADVISORY COMMITTEE MEMBERS (§ 2.335)

Section 2.335 provides for uniform compensation of all members of Food and Drug Administration public advisory committees, except for those who waive such compensation. The criteria under which an advisory committee member will be compensated for an agency-directed assignment when it is performed at a time other than at an advisory committee meeting are established in this regulation.

#### LIST OF STANDING ADVISORY COMMITTEES (§ 2.340)

Section 2.340 sets out a list of all current Food and Drug Administration standing advisory committees, including the date established and the function of the advisory committee. This list will be amended to add and delete advisory committees as they are formed and terminated.

#### TECHNICAL ELECTRONIC PRODUCT RADIATION SAFETY STANDARDS COMMITTEE (TEPRSSC) (§§ 2.350-2.354)

Sections 2.350 through 2.354 govern the establishment and procedures of TEPRSSC, one of the two permanent statutory advisory committees of the Food and Drug Administration. These provisions are to a large extent governed by provisions of the Radiation Control for Health and Safety Act of 1968, and have been in effect for this advisory committee for some time.

#### COLOR ADDITIVE ADVISORY COMMITTEES (§§ 2.360-2.364)

Sections 2.360 through 2.364 govern the establishment and procedures of a color additive advisory committee pursuant to section 706(b)(5)(B) of the act, as added by the Color Additive Amendments of 1960. There is a legal right to such an advisory committee for the limited purpose of reviewing the application of the anticancer clause contained in section 706 of the act to a specific color

additive, and the Commissioner may, in his discretion, also refer to any such advisory committee other issues relating to a color additive.

Section 706(b)(5)(D) of the act provides that a color additive advisory committee shall be composed of experts selected by the National Academy of Sciences or, if the NAS is unable or refuses to act, by the Secretary. The law is clear that the recommendations and advice shall be provided by the advisory committee, not by the NAS. Accordingly, the provisions of the Federal Advisory Committee Act and Subpart D of Part 2 will be fully applicable, and § 2.321, relating to committees working pursuant to a contract with the Food and Drug Administration, will not be applicable.

The Commissioner notes that section 203 of the Color Additive Amendments of 1960, which contain transitional provisions relating to commercially established colors, provided for reference of matters to a color additive advisory committee and for an opportunity for a formal evidentiary public hearing on certain matters, for a period of 2½ years after enactment of that statute. Since that time period has now expired, those provisions are no longer applicable and thus there is no right either to a color additive advisory committee or to an opportunity for a hearing on such matters at this time.

Some of the provisions contained in these new sections were previously contained in §§ 8.12 through 8.14 of the agency regulations. Those sections are therefore being revoked by these new regulations.

#### STANDING TECHNICAL PUBLIC ADVISORY COMMITTEES FOR HUMAN PRESCRIPTION DRUGS (§§ 2.370-2.373)

Sections 2.370 through 2.373 govern the use of standing technical public advisory committees to conduct public hearings on and to consider issues with respect to human prescription drugs, including antibiotic drugs and biologics. In the past few years, as the medical and scientific issues raised by the agency's review of human prescription drugs have increased in complexity, the Commissioner has increasingly relied upon the use of standing technical public advisory committees for advice and recommendations on such matters. Advisory committees of this nature have brought to the agency the experience and expertise of outstanding experts in the field. The Commissioner concludes that this use of advisory committees has important benefits for the public and the agency and should be subject to clear guidelines set out in these new regulations.

Section 2.371 establishes the criteria for those investigational and marketed drugs for which there is a high priority for review by the appropriate standing technical advisory committee. Such drugs include those which represent a significant therapeutic advance, new single chemical entities, and issues that have attracted wide public interest. An advisory committee may also request the Commissioner for an opportunity to hold a public hearing on and to review any

particular drug which falls within the pharmacological class covered by the advisory committee. Advisory committee members may be invited to bureau meetings and discussions relating to particular issues.

In the past, advice and recommendations on pending issues relating to human prescription drugs have at times been provided by advisory committees orally. This practice has led to some uncertainty about the specific opinions rendered by the advisory committee. Accordingly, § 2.372 provides that advice and recommendations given by these advisory committees shall ordinarily be in the form of a written report, which may consist of the approved minutes or a separate written document. The written report must respond to the specific issues posed to the advisory committee, and state the basis of the advice and recommendations given.

The Commissioner is aware that interested persons outside the agency may at times disagree with an important agency decision with respect to a particular drug. Section 2.373 therefore permits such interested persons to request that the agency refer any such matter to an advisory committee. The Commissioner may, of course, grant or deny any such request.

#### PUBLIC HEARING BEFORE THE COMMISSIONER (SUBPART E)

Subpart E establishes procedures governing a legislative-type public hearing during which any person may state his views, together with supporting data and information, with respect to the matters involved.

The Commissioner has concluded that a hearing of this type, which is basically the same as a hearing held by legislative bodies, is very useful when the agency is considering new regulations or broad policy or requirements which affect many interested persons. See, e.g., the notices of hearings on prescription drugs indicated for cough and allergy published in the *FEDERAL REGISTER* of May 15, 1973 (38 FR 12769), and on the tentative final order for OTC antacid drugs published in the *FEDERAL REGISTER* of January 8, 1974 (39 FR 1359). Such hearings assure concerned members of the public that the agency officials responsible for the matter will be directly presented with the issues involved, and provide agency officials with an opportunity to engage those concerned about the matter in a meaningful dialogue on those issues. See O'Keefe, A Fine New Twist—A brief Commentary on the Commissioner of Food and Drugs' First Oral Hearing, 29 Food Drug Cosmetic Law Journal 116 (March 1974).

#### SCOPE OF SUBPART (§ 2.400)

Section 2.400 provides that a public hearing before the Commissioner pursuant to Subpart E may be held in the discretion of the Commissioner, or pursuant to specific provisions in other sections of agency regulations, or in lieu of a formal evidentiary public hearing pursuant to § 2.117. The only provision presently contained in Food and Drug Administration

regulations which specifically provides for such a hearing is § 330.10(a)(8), which provides an opportunity for a public hearing before the Commissioner after the tentative final monograph is published for an over-the-counter (OTC) drug but before the final monograph is promulgated.

#### NOTICE OF A PUBLIC HEARING BEFORE THE COMMISSIONER (§ 2.401)

Section 2.401 requires that public notice of a hearing before the Commissioner be published in the *FEDERAL REGISTER*. The hearing notice shall state the purpose of the hearing and include or refer to any written document which is to be the subject matter of the hearing. If the hearing is in lieu of a formal evidentiary public hearing, the notice shall comply with the requirements of § 2.117(e).

In some instances, such a hearing will be limited to review of an existing administrative record. For example, pursuant to § 330.10(a)(10) of the regulations governing the development of OTC drug monographs, the administrative record is closed when the advisory review committee issues its report and recommendations to the Commissioner. Thereafter, no additional data or information may be submitted or considered.

#### NOTICE OF APPEARANCE; SCHEDULE FOR HEARING (§ 2.402)

After the notice appears in the *FEDERAL REGISTER*, any person interested in participating in the hearing must inform the Hearing Clerk or, if only a short period of time is involved, a specifically named Food and Drug Administration employee, of that interest. A specific amount of time shall be requested for each presentation. As promptly as possible after the time for making such requests expires, each person will be informed of the time of his presentation and the amount of time allocated for it.

#### CONDUCT OF A PUBLIC HEARING BEFORE THE COMMISSIONER (§ 2.403)

The Commissioner or his designee will preside at the hearing. Other agency employees may also accompany the presiding officer and may serve as a panel in conducting the hearing.

The hearing will be conducted in the same way that a legislative hearing is conducted. Those making presentations may be accompanied by anyone of their choosing and may present any relevant data, information, or views during their allotted time. The presiding officer and those who serve with him may ask such questions as they deem appropriate, but no other person may ask questions. Additional time may be allotted to any person, in the discretion of the presiding officer, but the time allotted for any person may not be reduced.

#### WRITTEN SUBMISSIONS PERTAINING TO A PUBLIC HEARING BEFORE THE COMMISSIONER (§ 2.404)

Following the hearing, the record shall remain open for 15 days for the filing of additional written submissions unless the notice of hearing or the presiding officer specifies otherwise.

## ADMINISTRATIVE RECORD OF A PUBLIC HEARING BEFORE THE COMMISSIONER (§ 2.405)

Section 2.405 specifies the administrative record of the hearing. Such record shall be included as part of the record of any administrative proceeding involving the matter.

## EXAMINATION OF ADMINISTRATIVE RECORD (§ 2.406)

The entire administrative record of a public hearing before the Commissioner is available for public examination and copying, pursuant to the provisions of § 2.5(j)(1), except that where this form of hearing is being used as an alternative form of hearing in lieu of a formal evidentiary public hearing the limitations in § 2.5(j)(2) and (3) will be applicable.

## REGULATORY HEARING BEFORE THE FOOD AND DRUG ADMINISTRATION (SUBPART F)

Subpart F governs all informal fact-finding hearings held by the Food and Drug Administration in determining whether any, or what type of, regulatory action should be taken with respect to a particular matter involving a specified person. This type of hearing involves consideration of direct regulatory action in a specific fact situation limited to a particular firm, whether on an administrative basis or through the courts, and does not involve the type of policy issues usually considered in a public hearing before the Commissioner pursuant to Subpart E or other general matters such as the development of regulations. The requirements for a regulatory hearing, as established in this subpart, meet or exceed all the standards for procedural due process of law delineated in *Goldberg v. Kelly*, 397 U.S. 254 (1970).

## SCOPE OF SUBPART (§ 2.500)

A regulatory hearing before the Commissioner is appropriate in two quite different types of situations. In some instances, the Commissioner may be considering a particular matter and lacks sufficient information to make a final determination as to whether any regulatory action is warranted and, if so, what type of action is appropriate. In the past, the opportunity for informal presentation of views pursuant to section 305 of the act was frequently used for this purpose. The Food and Drug Administration concluded some time ago, however, that this was an improper use of section 305 of the act, and that section 305 should be limited to situations where criminal action is seriously being considered. Accordingly, wherever criminal action is not under serious consideration but additional information is needed for a regulatory determination, the Commissioner may use the regulatory hearing procedure set out in this subpart as one method of gaining information to make a final determination on appropriate action. If the Commissioner concludes that the possibility of criminal action should be considered after a regulatory hearing is held, an opportunity for presentation of views

will be given in accordance with section 305 of the act, but under no circumstances is a regulatory hearing required prior to a section 305 citation.

In addition, under some provisions of current agency regulations, persons affected by adverse agency action have an opportunity for a hearing. Present provisions of law do not require that this be a "hearing on a record," and thus the provisions of Subpart B relating to a formal evidentiary public hearing are not required to be applied. For the most part, present regulations simply provide an opportunity for a hearing, without specifying the form of the hearing or the procedure to be followed. Accordingly, the Commissioner concludes that a specific procedure should be incorporated in Subpart F for this purpose.

Section 2.500(b) lists some 24 provisions of current agency regulations which provide a hearing, or which are being amended by these regulations to provide for a hearing, upon a determination by the Food and Drug Administration that is adverse to the interests of the persons involved. In each of these instances, the provisions of Subpart F will be applicable. The Commissioner invites all interested persons to identify, in comments on these new regulations, additional provisions of current regulations which should also be subject to an opportunity for a regulatory hearing.

The Commissioner emphasizes that the new regulations provide a right to a regulatory hearing only with respect to those specific matters listed in § 2.500(b). In all other instances, an opportunity for a regulatory hearing is solely within the discretion of the Commissioner.

## INAPPLICABILITY AND LIMITED APPLICATION (§ 2.501)

Section 2.501(a) of the new regulations provides that the informal presentation of views before reporting a criminal violation pursuant to section 305 of the act and section 5 of the Federal Milk Import Act is not governed by the provisions of Subpart F. The Commissioner intends in the near future to revise the regulations governing these presentations, in §§ 1.6 and 1210.31, to provide better guidance with respect to such matters. The Commissioner concludes that these specific statutory proceedings are intended not to be adversarial in nature, but simply to provide an opportunity for discussion at an informal conference, for which the provisions of Subpart F would be inappropriate.

Similarly, § 2.501(a) provides that the hearing held with respect to a refusal of admission of any product offered for import into the country is not governed by Subpart F. The courts have held that importation of any product subject to the act into the United States is entirely within the discretion of the Commissioner and is not subject to the requirements for an adjudicatory hearing pursuant to the Administrative Procedure Act, 5 U.S.C. 554. See *Sugarman v. Forbragd*, 267 F. Supp. 817, 825-826 (N.D. Cal. 1967), *aff'd*, 405 F.2d 1189 (9th Cir.

1968). The Commissioner concludes that, because of the large number of import detentions involved, the present procedure for informal conferences is more suited to this type of matter than is a regulatory hearing under Subpart F.

The Commissioner recognizes that other specific procedural provisions in other sections of agency regulations, such as the new procedures governing emergency permit control under Subpart A of Part 90, should continue to govern those specific proceedings. Accordingly, where other specific procedural provisions exist, they will override the provisions of Subpart F except to the extent that the provisions in Subpart F supplement but are not in conflict with them. Thus, § 2.501(b) provides that the additional procedural safeguards provided by the right to counsel, reconsideration and stay, and judicial review in Subpart F will be applicable in all instances, since no other Food and Drug Administration procedural regulations conflict with those provisions, except for the proceedings exempted in § 2.501(a).

## PRESIDING OFFICER (§ 2.505)

Section 2.505 provides that any Food and Drug Administration employee to whom the Commissioner delegates such authority, or any person designated by such employee, may serve as the presiding officer at a regulatory hearing. The presiding officer must, however, be a neutral and unbiased official. Thus, he shall not have participated in the investigation or action which is the subject of the hearing, or be directly subordinate to a person who has participated in such investigation. The Food and Drug Administration may substitute a different presiding officer for the one originally designated, without notice to the parties, since the person originally designated as the presiding officer may be unavailable when the hearing occurs.

## RIGHT TO COUNSEL (§ 2.506)

Section 2.506 guarantees to every party to a hearing the fundamental due process right to be advised and accompanied by counsel.

## REGULATORY HEARING ON THE INITIATIVE OF THE COMMISSIONER (§ 2.510)

Section 2.510 governs the procedures to be followed at a regulatory hearing held on the initiative of the Commissioner. Such a hearing shall be initiated by a notice of opportunity for hearing given by the Food and Drug Administration to the party or parties involved. Such notice shall specify the facts and action which are the subject of an opportunity for a hearing and require a response within a stated time period to a specified individual.

If no response is filed within the stated time period, the offer for a hearing shall be deemed to have been refused, and no hearing shall be held. If a hearing is requested, it shall take place at a time and location agreed upon by the parties or, in the absence of such agreement, at a time and location designated by the presiding officer.

## REGULATORY HEARING PURSUANT TO REGULATION (§ 2.511)

Section 2.511 deals with regulatory hearings initiated at the request of a party, rather than on the initiative of the Commissioner. Pursuant to the various provisions of the agency regulations listed in § 2.500(b), any person who is adversely affected by the particular action specified therein shall have a right to an opportunity for a regulatory hearing. The Food and Drug Administration is required to furnish any such person a notice of opportunity for hearing, which shall include the amount of time within which he may request a hearing. The failure to request a hearing shall be deemed to constitute a waiver of any right to a hearing.

Before the hearing, the Food and Drug Administration shall, upon request, give to the party requesting the hearing reasonable notice of the matters to be considered at the hearing, including a comprehensive statement of the basis for the decision or action taken or proposed by the Commissioner and a general summary of the information that will be presented by the agency at the hearing in support of such decision or action. The Commissioner believes that such notice is necessary in order reasonably to inform the party of the matters involved. Because the time between the request for hearing and the hearing date may be short, however, such notice may be given either orally or in writing, in the discretion of the Commissioner.

The Commissioner may take such action pending a regulatory hearing under this section as he concludes to be necessary to protect the public health, except where expressly prohibited by statute or regulation. See *Goldberg v. Kelly*, 397 U.S. 254, 263 n. 10 (1970). If action is taken and not stayed pending the hearing, the hearing on the matter will be expedited. After the hearing is concluded, a written decision will be prepared stating the reasons for whatever administrative action is taken by the Commissioner, and the basis in the record.

## HEARING PROCEDURE (§ 2.512)

Section 2.512 specifies the procedure to be used in conducting any regulatory hearing pursuant to Subpart F. A regulatory hearing will be a private hearing unless the party who requests the hearing determines otherwise. The determination to make the hearing a public hearing may be made in either of two ways. First, the party requesting the hearing may simply request that it be conducted in public, in which case this will be done. Second, if the party requesting the hearing wishes to be accompanied by any person other than an employee or consultant or other person subject to a commercial arrangement as defined in § 4.81(a), the hearing must be a public hearing and any interested person may attend.

At the hearing, employees of the agency must give a full and complete statement of the action which is the subject of the hearing, together with the

information and reasons supporting it, and may present any information relevant to the hearing. The Food and Drug Administration has the burden of proof in any hearing conducted pursuant to the specific provisions listed in § 2.500(b). The party requesting the hearing shall have the right to present any oral or written information relevant to the hearing. All parties may conduct reasonable cross-examination.

The Commissioner emphasizes that the regulatory hearing is intended to be informal in nature. The technical rules of evidence shall not apply. Accordingly, objections on the basis of hearsay, leading questions, or similar legal technicalities, shall not be heard. All information in any way reasonably related to the matter shall be included in the record.

The presiding officer shall prepare a written report of the hearing. This report may be reviewed and corrected by all parties to the hearing if time permits, i.e., if immediate action is not necessary in the public interest as a result of information obtained during the hearing. If the hearing is transcribed, such transcription shall be a part of the report of the hearing.

## ADMINISTRATIVE RECORD OF A REGULATORY HEARING (§ 2.513)

Section 2.513 specifies the record of the administrative proceeding. This record will be included as part of the record of any administrative proceeding involving the matter.

## EXAMINATION OF ADMINISTRATIVE RECORD (§ 2.154)

The availability for public disclosure of the administrative record of a regulatory hearing shall be governed by the provisions of the public information regulations. Thus, disclosure will depend upon the subject matter involved in the hearing. For example, trade secrets and information that would represent a clearly unwarranted invasion of personal privacy will not be available for public disclosure, pursuant to §§ 4.61 and 4.63. If the hearing involves an IND plan, the provisions of §§ 312.5 and 314.14 will apply, and if the hearing involves the safety of a cosmetic ingredient any safety information voluntarily submitted to the agency at the hearing would be available for public disclosure pursuant to § 4.111 (data and information submitted voluntarily to the Food and Drug Administration). Investigatory records compiled for law enforcement purposes will be made available pursuant to the provisions of § 4.64, i.e., all information disclosed to the party will immediately be available for public disclosure, except where possible criminal prosecution is involved.

## RECORD FOR ADMINISTRATIVE DECISION (§ 2.615)

For those matters where the Commissioner has offered an opportunity for a hearing in his discretion, pursuant to § 2.500(a), the Commissioner may consider all relevant data and information as well as the administrative record of the hearing in determining whether regulatory action should be undertaken and,

if so, what form of action should be taken.

With respect to those regulatory hearings which are provided pursuant to the specific provisions in the regulations cross-referenced in § 2.500(b), the administrative record of the hearing constitutes the exclusive record for decision by the Commissioner.

## RECONSIDERATION AND STAY OF ACTION (§ 2.516)

Section 2.516 provides that, following any final administrative action which is the subject of a hearing, any participant may petition for reconsideration or a stay of action pursuant to §§ 2.8 or 2.9. This excludes, of course, any decision to institute civil or criminal action in the courts.

## JUDICIAL REVIEW (§ 2.520)

The availability of judicial review with respect to any administrative action which is the subject of a hearing pursuant to this subpart shall be governed by § 2.11. The Commissioner has concluded that it is not feasible to state definitive rules with respect to the availability of judicial review of action taken as a result of a regulatory hearing, because of the different types of action that may be the subject of such a hearing. If a regulatory hearing results in a seizure or injunction action or section 305 citation and criminal prosecution in the Federal courts, the proper remedy for any aggrieved party is to contest such action in the courts. Judicial review of the Commissioner's decision to take such action is not permissible. Where the administrative action taken by the Commissioner is not final in nature, judicial review also is not permitted. Where the Commissioner takes final administrative action as a result of a regulatory hearing, however, judicial review of such final action is clearly permitted in accordance with the provisions of § 2.11. Such review would, of course, be based solely upon the administrative record of the proceeding, and would not properly consider any data, information, or arguments not presented in the course of the regulatory hearing.

## STANDARDS OF CONDUCT AND CONFLICTS OF INTEREST (SUBPART G)

Subpart G of the regulations will include, or cross-reference, all regulations governing the standards of conduct and conflicts of interest with respect to present and former employees of the Food and Drug Administration, including special government employees and employees of the Food and Drug Division of the Office of General Counsel.

## SCOPE OF SUBPART (§ 2.600)

Although Subpart G is established to include all pertinent regulations with respect to these matters for all present and former agency employees, many of these regulations are still in the process of development. Accordingly, the provisions included in Subpart G at this time represent only brief and initial statements of very general policy. The Commissioner anticipates that substantial

V 40-102 MAY 27 75

XUM

further regulations will be added to this subpart in the future, particularly relating to former employees and all special government employees.

#### REFERENCE TO DEPARTMENT REGULATIONS (§ 2.610)

All Food and Drug Administration employees are fully subject to the regulations (45 CFR Part 73) governing standards of conduct for Department of Health, Education, and Welfare employees, except that agency special government employees are subject only to Subpart L of 45 CFR Part 73. In addition, only Food and Drug Administration employees are subject to the provisions of 45 CFR Part 73a, which supplement the Department regulations. The provisions of 45 CFR Part 73a do not apply to special government employees of the Food and Drug Administration.

#### CODE OF ETHICS FOR GOVERNMENT SERVICE (§ 2.611)

Section 2.611 makes applicable to all Food and Drug Administration employees, including special government employees, the code of ethics for government service adopted by Congress in 1958. The Commissioner believes that this code embodies high ethical principles applicable to all agency employees.

#### FOOD AND DRUG ADMINISTRATION CONFLICT OF INTEREST REVIEW BOARD (§ 2.612)

Under § 2.612, the Commissioner will establish a permanent five-member Conflict of Interest Review Board which shall review and make recommendations to the Commissioner with respect to all matters brought before it relating to conflicts of interest. The Associate Commissioner for Administration shall be responsible for bringing issues to the Review Board. In addition, any individual inside or outside the agency who is the subject of an adverse determination of any kind by the Office of the Associate Commissioner for Administration shall have the right to an appeal to the Review Board with respect to that matter. The Review Board will be a permanent body whose purpose is to establish guidelines and precedents, through written decisions, guidelines, and regulations, that will govern all conflict of interest issues within the agency. Whenever feasible, the policy adopted as a result of the work of the Review Board shall be incorporated in regulations in Subpart G.

The Review Board shall be sensitive to the privacy rights of individuals with respect to the information it receives. In some instances, the only information that will be disseminated publicly will be written in a form that does not reveal the identity of the individual involved. In other instances, either pursuant to general regulations adopted by the agency or pursuant to a specific determination for a named individual, public disclosure of information related to an individual will be appropriate to provide public notice of the circumstances under which the individual is serving as a government employee or special government

employee. For example, information may routinely be filed with the Public Records and Documents Center with respect to stockholdings of agency consultants which have been determined not to be substantial, to give public notice about such holdings.

#### DUTY TO REPORT VIOLATIONS (§ 2.613)

Section 2.613 provides that all agency employees who have factual information showing or who otherwise believe that any present or former Food and Drug Administration employee has violated or is violating any provision of the laws summarized in 45 CFR Part 73 should report such information directly to the agency's Policy Management Staff (HFA-20), which is responsible for handling all matters of this type. The Commissioner advises that, under existing statutory and case law, the failure to report a violation, by itself, is not sufficient to subject an individual who knows of such violation to potential criminal liability as an accessory or accomplice. Accordingly, § 2.613(a) simply encourages reporting of violations, but no penalty is or can be imposed for failure to report under these circumstances. In considering reports submitted pursuant to this section, the Policy Management Staff will consult with the Conflict of Interest Review Board when close issues arise that require policy consideration.

The records received and generated pursuant to this section will be maintained by the agency in strictest confidence. Only those who are required to see such records in the performance of their duties will be given access to them.

The Commissioner has carefully considered the provisions in this section, and has consulted with a cross-section of employees throughout the agency on them. On the one hand, it is widely recognized that all citizens share a moral obligation to help enforce legal requirements. On the other hand, it is equally recognized that basic civil liberties must be respected, and that the rights of both the accuser and the accused must be fully protected. The Commissioner concludes that the provisions in this section strike an adequate balance between these valid concerns. No one is required to report violations, but all are encouraged to do so. Only those reports which a person is willing to put in writing will be regarded as sufficiently serious to pursue. Those written records will be carefully safeguarded, so that there will be no concern about their improper release to persons who are not required to review them in the course of their duties.

#### PERMANENT DISQUALIFICATION OF FORMER EMPLOYEES (§ 2.620)

Section 2.620 states the provisions of current law, 18 U.S.C. 207(a), with respect to permanent disqualification of former Food and Drug Administration employees on particular matters involving a specific party or parties in which the former employee participated personally and substantially. It is the intention of the Commissioner that this statutory language be supplemented in

the future by interpretive regulations to give better guidance to former employees with respect to permissible and impermissible activity.

#### TEMPORARY DISQUALIFICATION OF FORMER EMPLOYEES (§ 2.621)

Section 2.621 similarly summarizes the provisions of 18 U.S.C. 207(b) with respect to the 1-year disqualification of a former Food and Drug Administration employee on any matter which was under his official responsibility within 1 year preceding termination of such responsibility. Again, additional interpretive regulations will be issued to clarify this statutory disqualification.

#### CONFORMING CHANGES IN OTHER FOOD AND DRUG ADMINISTRATION REGULATIONS

The new procedures adopted in Part 2 of the regulations require corresponding changes in numerous other existing agency regulations in Title 21 of the Code of Federal Regulations. The following is a brief summary of these changes. The Commissioner recognizes that other conforming changes may also be appropriate, and invites comment suggesting further amendments to the agency regulations.

#### EXEMPTION FROM REQUIRED LABEL STATEMENTS

Section 1.1a has been revised to provide that exemptions from required label statements shall be adopted pursuant to Part 2.

#### EXEMPTION FROM FOOD LABELING INFORMATION REQUIREMENTS

Section 1.80d(f) has been revised to state that a petition requesting an exemption from the food labeling information requirements in that section shall be submitted pursuant to Part 2.

#### APPROVAL OF PRESCRIPTION DRUG ADVERTISEMENTS

Section 2.201 (j) (5) has been added to state that a regulatory hearing pursuant to Subpart F of Part 2 is available with respect to any determination that prior approval is required for advertisements concerning a particular prescription drug, or that a particular advertisement is not approvable. Previously, no opportunity for a hearing existed.

#### DELEGATIONS OF AUTHORITY AND ORGANIZATION

Former Subparts H and M of Part 2 have been recodified as a new Part 5. References to the Assistant General Counsel for Food and Drugs, Office of General Counsel, Department of Health, Education, and Welfare, have been revised to reflect that he now has the additional title of Chief Counsel for the Food and Drug Administration.

#### COLOR ADDITIVE ADVISORY COMMITTEES

Section 8.12 has been revised to cross-reference the new provisions relating to color additive advisory committees in §§ 2.360 through 2.364, and to revoke the prior provisions in §§ 8.12 through 8.14.

#### EXEMPTION FROM COLOR ADDITIVE CERTIFICATION

Section 8.18 has been revised to state that a petition for exemption from certification for a color additive shall be submitted pursuant to Part 2.

#### OBJECTIONS AND HEARINGS RELATING TO COLOR ADDITIVE REGULATIONS

The existing provisions in §§ 8.19 through 8.21 have been revoked, and a new § 8.19 provides that objections and hearings relating to color additive regulations shall be governed by Part 2.

#### COLOR ADDITIVE CERTIFICATION REFUSAL

Section 8.27(b) has been revised to add a sentence stating that a person who wishes to contest a refusal to certify a batch of a color additive has an opportunity for a regulatory hearing pursuant to Subpart F. Previously, no opportunity for a hearing existed.

#### CERTIFICATION SERVICE REFUSAL

Section 8.28(b) has been revised to provide that a person who wishes to contest refusal of certification service has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. The former provisions, which have been revoked, provided for a formal evidentiary public hearing. The Commissioner concludes that the statute does not require an opportunity for a formal evidentiary public hearing, and that a regulatory hearing is more appropriate for this type of proceeding.

#### INVESTIGATIONAL USE OF COLOR ADDITIVES

Section 8.33(a) has been revised to add a new sentence providing an opportunity for a regulatory hearing pursuant to Subpart F upon a refusal to permit the use of food derived from animals on which investigational color additives are used. Previously, no opportunity for a hearing existed.

#### FOOD STANDARDS

Section 10.2 has been revised to state that the procedure for establishing a food standard shall be governed by Part 2. The provisions previously contained in this section have been superseded by the more detailed provisions of Part 2.

#### FOOD STANDARD TEMPORARY PERMITS

A new paragraph (1) has been added to § 10.5 to provide that a person who wishes to contest denial, modification, or revocation of a temporary permit to vary from a standard of identity has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, no opportunity for a hearing existed.

#### STANDARDS OF QUALITY

Section 11.1(e) has been revised to state that standards of quality for foods for which there are no standards of identity may be established pursuant to Part 2 and to delete the reference to a former provision in Part 2 that has been revoked by the new regulations.

#### SPECIAL DIETARY FOODS

Section 80.1(b) (4) has been revised to delete the reference to a former provision in Part 2 that has been revoked by the new regulations.

#### EMERGENCY PERMIT CONTROL

Section 90.2(a) has been revised to refer to the provisions in Part 2 and to delete the reference to a former provision in Part 2 that has been revoked by the new regulation.

#### NUTRITIONAL QUALITY GUIDELINES FOR FOODS

Section 100.2 has been revised to refer to the provisions in Part 2 and to delete the reference to a former provision in Part 2 that has been revoked by the new regulations.

#### COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

Section 102.2(a) and (b) have been revised to refer to the provisions in Part 2 and to delete the reference to a former provision in Part 2 that has been revoked by the new regulations.

#### FOOD ADDITIVES

Sections 121.40(c) (1), 121.41(b) (1), and 121.400(c) have been revised to refer generally to the new procedures contained in Part 2 rather than to procedures previously used.

Section 121.55 has been added to state that objections and hearings relating to food additive regulations shall be governed by Part 2. All of the previous procedural provisions relating to food additives in Part 121 have been revoked.

Section 121.74 has been revised to state that the procedure for amending and repealing food additive regulations shall be governed by Part 2.

#### PRESCRIPTION EXEMPTION PROCEDURE FOR NEW DRUGS

Section 310.200(b) has been revised to replace the procedure previously set out in that provision with a reference to Part 2.

#### PHASE IV CLINICAL STUDIES

Section 310.303(b) has been revised to state that a proposal to require additional or continued studies for a new drug shall be pursuant to Part 2.

#### INVESTIGATIONAL NEW DRUGS

Section 312.1 (c) (1) and (4) and (d) has been revised to state that any person who wishes to contest any issue arising out of disqualification of an investigator and his work, and termination of an IND, has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. This replaces the prior procedure which was similar in nature but not specified in detail.

These provisions have also been revised to state that an IND plan may be terminated immediately upon a finding of a danger to health, rather than requiring an imminent hazard to health, in

order to conform them to new § 2.511(e). Section 505(i) of the act does not require the Commissioner to find an imminent hazard to health before an IND plan may be terminated.

#### LABORATORY RESEARCH ON INVESTIGATIONAL NEW DRUGS

Section 312.9(c) (2) has been revised to state that any person who wishes to contest termination of an investigational exemption for use of a new drug in laboratory research animals or in vitro tests has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, a conference was permitted but there was no opportunity for a hearing.

#### HEARINGS INVOLVING NEW DRUGS

Section 314.200 has been revised to delete material that is duplicative of requirements now contained in Subpart B of Part 2.

Section 314.201 has been added to state that hearings relating to new drugs shall be governed by Part 2. All of the prior procedural provisions relating to new drug hearings have been revoked.

Section 314.235 has been revised to conform it to the provisions of Subpart B by deleting duplicative material.

#### IN VITRO DIAGNOSTIC PRODUCTS FOR HUMAN USE

Section 328.30(a) has been revised to refer to Part 2 and to delete the reference to a former provision in Part 2 which has been revoked by the new regulations.

#### OTC DRUG REVIEW

Section 330.10(a) (11) has been revised to state that a petition to amend or repeal any OTC drug monograph shall be submitted pursuant to Part 2.

#### INSULIN

Section 429.50 has been revised to state that, upon suspension of insulin certification service, a person shall have an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, a formal evidentiary public hearing was provided. The Commissioner concludes that a formal evidentiary public hearing is not required by statute and that a regulatory hearing pursuant to Subpart F is more appropriate for this type of proceeding.

#### ANTIBIOTIC REGULATIONS

Section 430.20(a) has been revised to state that the procedures for the issuance, amendment, or repeal of antibiotic regulations shall be governed by Part 2. The remaining procedural provisions relating to antibiotic hearings have been revoked.

Section 430.20(d), relating to requests for hearings with respect to the failure to issue an antibiotic regulation, or amendment or repeal of such a regulation, has been revised to make the same modifications that has been made in § 314.200 for new drugs, to conform it to the new provisions in Subpart B.

## CERTIFICATION OF ANTIBIOTIC DRUGS

Section 431.52 has been revised to state that, upon suspension of certification service, a person shall have an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, suspension of certification service was subject to a formal evidentiary public hearing. The Commissioner concludes that the statute does not require a formal evidentiary public hearing under these circumstances and that Subpart F provides a more appropriate procedure for this type of proceeding.

## EXEMPTIONS FROM ANTIBIOTIC CERTIFICATION AND LABELING REQUIREMENTS

A number of specific sections in Part 433, relating to exemptions from antibiotic certification and labeling requirements, have been revised to provide that a person who wishes to contest adverse action by the Food and Drug Administration shall be subject to an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, these provisions stated only that such action would be subject to a hearing, without specifying the type of hearing, or did not specify that any hearing would be permitted.

The prior provisions stated that such exemptions could in some instances be revoked only after notice and opportunity for hearing. The new cross-reference to the provisions governing a regulatory hearing under Subpart F of Part 2 will mean that the Commissioner may make any such revocation effective immediately if he finds that this is necessary to protect the public health, pursuant to § 2.511(e).

## NEW ANIMAL DRUGS

A number of specific provisions in Parts 511 and 514 relating to investigational and marketed new animal drugs have been revised in the same way as their counterpart provisions relating to investigational and marketed new drugs, to refer to the new procedural provisions in Part 2. The prior procedural provisions relating to hearings have been revoked.

## LICENSING OF BIOLOGICALS

The procedural provisions in Part 601 relating to licensing of biologicals, revocation and suspension of a license, and hearings on such matters have been substantially revised, consolidated, and simplified. Hearings on denial, revocation, or suspension of biologics license shall be governed by Part 2. The procedural requirements for new drugs in § 314.200 are incorporated by reference. Previous procedural provisions relating to biologics have been revoked.

## COSMETIC LABELING

Section 701.3 (b) and (e) has been revised to refer to the provisions in Part 2 and to delete the reference to a former provision in Part 2 that has been revoked by the new regulations.

## NOTIFICATION OF DEFECTS IN ELECTRONIC PRODUCTS

Sections 1003.11(a) and 1003.31(d) have been revised to add a provision stating that a person who wishes to contest a determination that a product fails to comply or has a defect, and a denial of an exemption from the notification provisions, has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, no opportunity for a hearing existed.

## REPURCHASE, REPAIRS, OR REPLACEMENT OF ELECTRONIC PRODUCTS

Section 1004.6 has been revised to add a new provision stating that, upon denial of a plan with respect to repurchase, repair, or replacement of an electronic product, a person shall have an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. Previously, no opportunity for a hearing existed.

## HEARING UNDER THE FEDERAL IMPORT MILK ACT

A new § 1210.30 has been added to state that a person who wishes to contest denial, suspension, or revocation of a permit has an opportunity for a regulatory hearing pursuant to Subpart F of Part 2. All of the prior procedural provisions have been revoked.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act, (Sec. 201 et seq., 52 Stat. 1040; 21 U.S.C. 321 et seq.), the Public Health Service Act (sec. 1 et seq., 58 Stat. 682, as amended; 42 U.S.C. 201 et seq.), the Comprehensive Drug Abuse Prevention and Control Act of 1970 (sec. 4, 84 Stat. 1241; 42 U.S.C. 257a), the Controlled Substances Act (sec. 301 et seq., 84 Stat. 1253; 21 U.S.C. 821 et seq.), the Federal Meat Inspection Act (sec. 409(b), 81 Stat. 600; 21 U.S.C. 679(b)), the Poultry Products Inspection Act (sec. 24(b), 82 Stat. 807; 21 U.S.C. 467f(b)), the Egg Products Inspection Act (sec. 2 et seq., 84 Stat. 1620; 21 U.S.C. 1031 et seq.), the Federal Import Milk Act (44 Stat. 1101; 21 U.S.C. 141 et seq.), the Tea Importation Act (21 U.S.C. 41 et seq.), the Federal Cautic Poison Act (44 Stat. 1406; 15 U.S.C. 401-411 notes), the Fair Packaging and Labeling Act (80 Stat. 1296; 15 U.S.C. 1451 et seq.), and all other statutory authority delegated to him (21 CFR 2.120), the Commissioner amends Chapter I of Title 21 of the Code of Federal Regulations as follows:

## PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

1. Section 1.1a is revised to read as follows:

§ 1.1a Foods, drugs, devices, and cosmetics; labeling; procedure for requesting variations and exemptions from required label statements.

Section 403(e) of the act (in this Part 1, the term "act" means the Federal Food, Drug, and Cosmetic Act) provides

for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 403(i) of the act provides for the establishment by regulation of exemptions from the required declaration of ingredients where such declaration is impracticable, or results in deception or unfair competition. Section 502(b) of the act provides for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 602(b) of the act provides for the establishment by regulation of reasonable variations and exemptions for small packages from the required declaration of net quantity of contents. Section 5(b) of the Fair Packaging and Labeling Act provides for the establishment by regulation of exemptions from certain required declarations of net quantity of contents, identity of commodity, identity and location of manufacturer, packer, or distributor, and from declaration of net quantity of servings represented, based on a finding that full compliance with such required declarations is impracticable or not necessary for the adequate protection of consumers, and a further finding that the nature, form, or quantity of the packaged consumer commodity or other good and sufficient reasons justify such exemptions. The Commissioner, on his own initiative or on petition of an interested person, may propose a variation or exemption based upon any of the foregoing statutory provisions, including proposed findings if section 5(b) of the Fair Packaging and Labeling Act applies, pursuant to Part 2 of this chapter.

2. Section 1.8d(f) is revised to read as follows:

§ 1.8d Food labeling; information panel.

(f) If the label of any package of food is too small to accommodate all of the information required by §§ 1.8a, 1.8c, 1.10, 1.13, 1.17, and 1.18, and Parts 80 and 125 of this chapter, the Commissioner may establish by regulation an acceptable alternative method of disseminating such information to the public, e.g., a type size smaller than one-sixteenth inch in height, or labeling attached to or inserted in the package or available at the point of purchase. A petition requesting such a regulation, as an amendment to this paragraph shall be submitted pursuant to Part 2 of this chapter.

3. Part 2 is revised to read as follows:

## PART 2—ADMINISTRATIVE PRACTICES AND PROCEDURES

## Subpart A—General

Sec. 2.1 Scope.  
2.2 Definitions.  
2.3 Summary of administrative practices and procedures.  
2.4 Submission of documents to Hearing Clerk; computation of time; availability for public disclosure.  
2.5 Initiation of administrative proceedings.

Sec. 2.7 Citizen petition.  
2.8 Administrative reconsideration of action.  
2.9 Administrative stay of action.  
2.10 Promulgation of regulations for the efficient enforcement of the law.  
2.11 Court review of final administrative action; exhaustion of administrative remedies.  
2.12 Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing.  
2.13 Separation of functions; ex parte communications.  
2.14 Referral by court.  
2.15 Meetings and correspondence.  
2.16 Documentation of significant decisions in administrative file.  
2.17 Internal agency review of decisions.  
2.18 Dissemination of draft Federal Register notices and regulations.  
2.19 Advisory opinions.  
2.20 Food and Drug Administration regulations, guidelines, recommendations, and agreements.  
2.21 Participation in outside standard-setting activities.  
2.22 Public calendars.  
2.23 Representation by an organization.  
2.24 Settlement proposals.  
2.25 Waiver, suspension, or modification of procedural requirements.

## Subpart B—Formal Evidentiary Public Hearings

2.100 Scope of subpart.  
2.110 Initiation of a formal evidentiary public hearing involving the issuance, amendment, or revocation of a regulation.  
2.111 Initiation of a formal evidentiary public hearing involving the issuance, amendment, or revocation of an order.  
2.112 Filing objections and requests for a hearing on a regulation or order.  
2.113 Ruling on objections and requests for hearing.  
2.114 Modification or revocation of regulation or order.  
2.115 Denial of formal evidentiary public hearing in whole or in part.  
2.116 Judicial review after waiver of hearing on a regulation.  
2.117 Request for alternative form of public hearing.  
2.118 Notice of hearing; stay of action.  
2.119 Effective date of a regulation.  
2.120 Effective date of an order.  
2.121 Appearance.  
2.122 Written notice of appearance.  
2.123 Presiding officer.  
2.124 Commencement of functions.  
2.125 Authority of presiding officer.  
2.126 Disqualification of presiding officer.  
2.127 Unavailability of presiding officer.  
2.128 Filing and service of submissions.  
2.129 Petition to participate in forma pauperis.  
2.130 Advisory opinions.  
2.131 Disclosure of data and information by the participants.  
2.132 Purpose; oral and written testimony; burden of proof.  
2.133 Participation of nonparties.  
2.134 Conduct at oral hearings or conferences.  
2.135 Time and place of prehearing conference.  
2.136 Prehearing conference procedure.  
2.137 Summary decisions.  
2.138 Receipt of evidence.  
2.139 Official notice.  
2.140 Briefs and argument.  
2.141 Interlocutory appeal from ruling of presiding officer.  
2.142 Official transcript.

Sec. 2.165 Motions.  
2.170 Administrative record of a formal evidentiary public hearing.  
2.171 Examination of administrative record.  
2.172 Correction of administrative record.  
2.173 Record for administrative decision.  
2.180 Recommended decision or initial decision.  
2.181 Tentative order.  
2.182 Appeal from or review of initial decision.  
2.183 Decision by Commissioner after exceptions to the tentative order.  
2.184 Decision by Commissioner on appeal or review of initial decision.  
2.185 Reconsideration and stay of action.  
2.190 Review by the courts.  
2.191 Copies of petitions for judicial review.

## Subpart C—Public Hearing Before a Public Board of Inquiry

2.200 Scope of subpart.  
2.201 Notice of a public hearing before a Public Board of Inquiry.  
2.202 Members of a Public Board of Inquiry.  
2.203 Separation of functions; ex parte communications; administrative support.  
2.204 Submissions to a Public Board of Inquiry.  
2.205 Disclosure of data and information by the participants.  
2.206 Proceedings of a Public Board of Inquiry.  
2.207 Administrative record of a Public Board of Inquiry.  
2.208 Examination of administrative record.  
2.209 Record for administrative decision.

## Subpart D—Public Hearing Before a Public Advisory Committee

2.300 Scope of subpart.  
2.301 Establishment and renewal of public advisory committees.  
2.302 Termination of public advisory committees.  
2.303 Purpose of proceedings before a public advisory committee.  
2.304 Portions of public advisory committee meetings.  
2.305 Notice of public hearing before a public advisory committee.  
2.306 Chairman of a public advisory committee.  
2.307 Meetings of a public advisory committee.  
2.308 Consultation by a public advisory committee with other persons.  
2.309 Additional rules for a particular public advisory committee.  
2.310 Compilation of materials for members of a public advisory committee.  
2.311 Written submissions to a public advisory committee.  
2.312 Conduct of a public hearing before a public advisory committee.  
2.313 Minutes and reports of public advisory committee meetings.  
2.314 Transcripts of public advisory committee meetings.  
2.315 Administrative record of a public hearing before a public advisory committee meeting.  
2.316 Examination of administrative record and other advisory committee records.  
2.317 Public inquiries and requests for public advisory committee records.  
2.318 Determination to close portions of public advisory committee meetings.  
2.319 Administrative remedies.  
2.320 Applicability to Congress.  
2.321 Committees working pursuant to a contract with the Food and Drug Administration.  
2.322 Application of anticancer clauses.

Sec. 2.330 Qualifications for members of standing policy and technical advisory committees.  
2.331 Nominations of voting members of standing advisory committees.  
2.332 Nominations and selection of non-voting members of standing technical advisory committees.  
2.333 Rights and responsibilities of nonvoting members of advisory committees.  
2.334 Ad hoc advisory committee members.  
2.335 Compensation of public advisory committee members.  
2.340 List of standing advisory committees.  
2.350 Establishment of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC).  
2.351 Functions of TEPRSSC.  
2.352 Procedures of TEPRSSC.  
2.353 Membership of TEPRSSC.  
2.354 Conduct of TEPRSSC meetings; availability of TEPRSSC records.  
2.360 Establishment of a color additive advisory committee.  
2.361 Functions of a color additive advisory committee.  
2.362 Procedures of a color additive advisory committee.  
2.363 Membership of a color additive advisory committee.  
2.364 Fees and compensation pertaining to a color additive advisory committee.  
2.370 Establishment of standing technical public advisory committees for human prescription drugs.  
2.371 Utilization of a public advisory committee on the initiative of the Food and Drug Administration.  
2.372 Advice and recommendations in writing.  
2.373 Utilization of a public advisory committee at the request of an interested person.

## Subpart E—Public Hearing Before the Commissioner

2.400 Scope of subpart.  
2.401 Notice of a public hearing before the Commissioner.  
2.402 Notice of appearance; schedule for hearing.  
2.403 Conduct of a public hearing before the Commissioner.  
2.404 Written submissions pertaining to a public hearing before the Commissioner.  
2.405 Administrative record of a public hearing before the Commissioner.  
2.406 Examination of administrative record.

## Subpart F—Regulatory Hearing Before the Food and Drug Administration

2.500 Scope of subpart.  
2.501 Inapplicability and limited applicability.  
2.505 Presiding officer.  
2.506 Right to counsel.  
2.510 Regulatory hearing on the initiative of the Commissioner.  
2.511 Regulatory hearing pursuant to regulation.  
2.512 Hearing procedure.  
2.513 Administrative record of a regulatory hearing.  
2.514 Examination of administrative record.  
2.515 Record for administrative decision.  
2.516 Reconsideration and stay of action.  
2.520 Judicial review.

## Subpart G—Standards of Conduct and Conflict of Interest

2.600 Scope of subpart.  
2.610 Reference to Department regulations.  
2.611 Code of ethics for government service.  
2.612 Food and Drug Administration Conflict of Interest Review Board.

- Sec.  
2.613 Duty to report violations.  
2.620 Permanent disqualification of former employees.  
2.621 Temporary disqualification of former employees.

AUTHORITY: Sec. 201 et seq., Pub. L. 717, 52 Stat. 1040 as amended (21 U.S.C. 321 et seq.); sec. 1 et seq., Pub. L. 410, 58 Stat. 682 as amended (42 U.S.C. 201 et seq.); sec. 4, Pub. L. 91-513, 84 Stat. 1241 (42 U.S.C. 257a); sec. 301 et seq., Pub. L. 91-513, 84 Stat. 1253 (21 U.S.C. 821 et seq.); sec. 409(b), Pub. L. 242, 81 Stat. 600 (21 U.S.C. 679); sec. 24(b), Pub. L. 85-172, 82 Stat. 807 (21 U.S.C. 467; (b)); sec. 2 et seq., Pub. L. 91-597, 84 Stat. 1620 (21 U.S.C. 1031 et seq.); sec. 1 et seq., Pub. L. 825, 44 Stat. 1101-1103 as amended (21 U.S.C. 141 et seq.); sec. 1 et seq., Chapter 358, 29 Stat. 604-607 as amended (21 U.S.C. 41 et seq.); Pub. L. 783, 44 Stat. 1408 as amended by 74 Stat. 381 (15 U.S.C. 401-411, notes); sec. 2 et seq., Pub. L. 89-755, 80 Stat. 1296 (15 U.S.C. 1451 et seq.).

#### Subpart A—General

##### § 2.1 Scope.

(a) Part 2 governs practices and procedures applicable to all petitions, hearings, and other administrative proceedings and activities conducted by the Food and Drug Administration pursuant to the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, and other laws with respect to which authority has been delegated to the Commissioner of Food and Drugs pursuant to § 5.1 of this chapter, except to the extent that specific provisions in other sections of this chapter state different requirements with respect to a particular matter.

(b) Where a specific provision in another section of this chapter states a different requirement with respect to a particular matter (e.g., the use of a form different from the one specified in § 2.7 (b)), the sections in this Part shall apply to the extent that they do not conflict with such other provisions (e.g., the requirements for inclusion of all data and information and for translations of foreign language in § 2.5(b) shall apply regardless of which form is used).

##### § 2.3 Definitions.

(a) As used in this Part, the following terms shall have the meanings specified:

- (1) "Act" means the Federal Food, Drug, and Cosmetic Act unless otherwise indicated.
- (2) "Department" means the United States Department of Health, Education, and Welfare.
- (3) "Secretary" means the Secretary of Health, Education, and Welfare.
- (4) "Commissioner" means the Commissioner of Food and Drugs, Food and Drug Administration, United States Department of Health, Education, and Welfare, or his designee.
- (5) "Agency" means the Food and Drug Administration.
- (6) "Person" includes an individual, partnership, corporation, association, or other legal entity.
- (7) "Presiding officer" means the Commissioner or his designee or an Ad-

ministrative Law Judge appointed as provided in 5 U.S.C. 3105.

(8) "Hearing Clerk" means the Hearing Clerk of the Food and Drug Administration, United States Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852.

(9) "Proceeding" and "administrative proceeding" mean any undertaking to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action.

(10) "Party" means the bureau of the Food and Drug Administration responsible for the matter involved and every person who either has exercised a right to request or has been granted the right by the Commissioner to have a formal evidentiary public hearing pursuant to Subpart B of this Part or a regulatory hearing before the Commissioner pursuant to Subpart F of this Part, or who has waived any such right in order to obtain the establishment of a Public Board of Inquiry pursuant to Subpart C of this Part, and as a result of whose action a formal evidentiary hearing or a regulatory hearing before the Commissioner has been granted or a Public Board of Inquiry has been established.

(11) "Participant" means any person participating in any proceeding, including each party and any other interested person.

(12) "Interested person" or "any person who will be adversely affected" means any person who submits a petition or comment or objection or otherwise requests an opportunity to participate in any informal or formal administrative proceeding or court action.

(13) "Public Board of Inquiry" or "Board" means an administrative law tribunal constituted pursuant to the provisions of Subpart C of this Part.

(14) "Public advisory committee" or "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof, that is not composed wholly of full-time officers or employees of the Federal government and is established or utilized by the Food and Drug Administration to obtain advice or recommendations.

(15) "Formal evidentiary public hearing" means any hearing conducted pursuant to the provisions of Subpart B of this Part.

(16) "Public hearing before a Public Board of Inquiry" means any hearing conducted by a Board pursuant to the provisions of Subpart C of this Part.

(17) "Public hearing before a public advisory committee" means any hearing conducted by an advisory committee pursuant to the provisions of Subpart D of this Part.

(18) "Public hearing before the Commissioner" means any hearing conducted by the Commissioner or his designee pursuant to the provisions of Subpart E of this Part.

(19) "Regulatory hearing before the Food and Drug Administration" means any hearing conducted by an authorized

employee of the Food and Drug Administration pursuant to the provisions of Subpart F of this Part.

(20) "The laws administered by the Commissioner" means all the statutory provisions with respect to which authority has been delegated to the Commissioner pursuant to § 5.1 of this chapter.

(21) "Petition" means any petition, application, other document requesting the Commissioner to establish, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him.

(22) "Regulation" means any agency rule of general or particular applicability and future effect implementing or applying any law administered by the Commissioner or relating to administrative practices and procedures. Pursuant to § 2.20(a), all agency regulations shall be promulgated in the FEDERAL REGISTER and codified in the Code of Federal Regulations.

(23) "Order" means any final agency disposition, other than the issuance of a regulation, in a proceeding concerning any matter and includes action on any new drug application, new animal drug application, or biological license.

(24) "Meeting" means any oral discussion, whether by telephone or in person.

(25) "Office of the Commissioner" includes the offices of the associate and assistant commissioners and excludes the bureaus, the office of the Executive Director for Regional Operations, and all regional and district offices.

(26) "Administrative action" includes every form and kind of act, including the refusal or failure to act, involved in the implementations of the laws administered by the Commissioner, except that it does not include the referral of apparent violations to United States attorneys for the institution of civil and criminal proceedings and acts preparatory or incidental thereto.

(27) "Administrative file" or "administrative record" means the file maintained by the Food and Drug Administration, either by the Hearing Clerk or by any other agency employee, in which all documents comprising the official record of any administrative proceeding are retained.

(28) "Food and Drug Administration employee" or "Food and Drug Administration representative" shall be deemed to include members of the Food and Drug Division of the office of the General Counsel of the Department of Health, Education, and Welfare.

(b) Any term which is defined in section 201 of the Federal Food, Drug, and Cosmetic Act or Part 1 of this chapter shall have that definition.

(c) Words in the singular form shall be deemed to include the plural, words in the masculine form shall be deemed to include the feminine form, and vice versa, as the case may require.

(d) Whenever any reference is made in this Part to any person in the Food and Drug Administration, e.g., the director of a bureau, such reference shall

also be deemed to include all persons to whom that person delegated the specific function involved.

##### § 2.4 Summaries of administrative practices and procedures.

The Commissioner shall prepare for public distribution summaries of Food and Drug Administration administrative practices and procedures in terms that are readily understood in order to encourage and facilitate participation in all agency activities.

##### § 2.5 Submission of documents to Hearing Clerk; computation of time; availability for public disclosure.

(a) All submissions to the Hearing Clerk of petitions, comments, objections, notices, compilations of data and information, and any other documents pursuant to this Part or other sections in this chapter shall be filed in quintuplicate, except as otherwise specifically provided in any relevant FEDERAL REGISTER notice or in other sections of this chapter. The Hearing Clerk shall be the agency custodian of such documents.

(b) All such submissions shall be signed by the person making the submission, or by an attorney or other authorized representative on his behalf. If a submission is signed by an attorney or other authorized representative on behalf of another person, the submission shall be accompanied by a signed statement of authorization or other documentation verifying his authority to sign the submission as such person's representative, unless such authorization has previously been submitted as part of the administrative file in the same proceeding. Submissions by trade associations shall also be subject to the requirements of § 2.23(b).

(c) All data and information referred to or in any way relied upon in any such submissions shall be included in full and may not be incorporated by reference, unless previously submitted as part of the administrative file in the same proceeding.

(1) A copy of any article or other reference or source cited shall be included.

(2) If any part of the material submitted is in a foreign language, it shall be accompanied by an English translation verified under oath to be complete and accurate, together with the name, address, and a brief statement of the qualifications of the person making the translation. Translations of literature or other material in a foreign language shall be accompanied by copies of the original publication.

(3) Where relevant data or information are contained in a document also containing irrelevant matter, the irrelevant matter shall be deleted and only the relevant data or information shall be submitted.

(4) Pursuant to § 4.63 (a) and (b) of this chapter, the names and other information which would identify patients or research subjects shall be deleted from any record before it is submitted to the Hearing Clerk in order to preclude

a clearly unwarranted invasion of personal privacy.

(5) Defamatory, scurrilous, or intemperate matter shall be deleted from any record before it is submitted to the Hearing Clerk.

(6) The failure to comply with the requirements of this paragraph or any other requirement in this Part shall result in rejection of the submission for filing or, if it is filed, in exclusion from consideration of any portion of the submission which fails to comply. If a submission fails to meet any requirement of this section and such deficiency becomes known to the Hearing Clerk, the Hearing Clerk shall return the submission with a copy of the applicable regulations indicating those provisions not complied with in the submission. A deficient submission may be corrected or supplemented and subsequently filed.

(d) The filing of a submission shall mean only that the Hearing Clerk has not determined that it fails to meet the technical requirements for filing established in this section and in any other applicable sections in this chapter, e.g., § 2.7 relating to a citizen petition. The filing of a petition shall not mean or imply that it in fact meets all applicable requirements or that it contains reasonable grounds for the action requested or that the action requested is in accordance with law.

(e) All submissions to the Hearing Clerk shall be considered as submitted on the date on which they are postmarked or, if delivered in person during regular business hours, on the date on which they are so delivered, unless a provision in this Part or an applicable FEDERAL REGISTER notice specifically states that such documents must be received by a specified date, e.g., § 2.8(g) relating to a petition for reconsideration, in which case they shall be considered submitted on the date actually received.

(f) All such submissions shall be mailed or delivered in person to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, except that a submission which is required to be received by the Hearing Clerk by a specified date may be delivered in person to the Food and Drug Administration building in downtown Washington, Rm. 6819, 200 C St., SW., Washington, DC 20201 and shall be considered as received by the Hearing Clerk on the date on which it is logged in at Rm. 6819.

(g) The Food and Drug Administration ordinarily will not acknowledge or give receipt for such documents, except:

(1) Documents delivered in person or submitted by certified or registered mail with a return receipt requested.

(2) Petitions for which acknowledgment of receipt of filing is provided by regulations in this chapter or by customary practice, e.g., § 2.7(c) relating to a citizen petition.

(h) Saturdays, Sundays, and Federal legal holidays shall be included in computing the time allowed for the submission of any document, except that when such time expires on a Saturday, Sun-

day, or Federal legal holiday, such period shall be extended to include the next following business day.

(1) All submissions to the Hearing Clerk constitute a representation that, to the best of the knowledge, information, and belief of the person making the submission, all statements made in the submission are true and accurate. All such submissions are subject to the False Reports to the Government Act, 18 U.S.C. 1001, under which a willfully false statement is a criminal offense.

(j) The availability for public examination and copying of submissions to the Hearing Clerk shall be governed by the following rules:

(1) Except to the extent provided in paragraphs (j) (2) and (3) of this section, the following submissions, including all supporting material, shall be on public display and shall be available for public examination during regular business hours on Monday through Friday. Requests for copies of such submissions shall be filed and handled pursuant to the provisions of Subpart C of Part 4 of this chapter.

(i) Petitions.

(ii) Comments on petitions, on documents published in the FEDERAL REGISTER, and on similar public documents.

(iii) Objections and requests for hearings filed pursuant to Subpart B of this Part.

(iv) Material submitted at a formal evidentiary public hearing pursuant to Subpart B of this Part, a public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part, a public hearing before the Commissioner pursuant to Subpart E of this Part, or an alternative form of hearing before a public advisory committee pursuant to § 2.117(a) (2).

(v) Material placed on public display pursuant to regulations in this chapter, e.g., agency guidelines filed pursuant to § 2.20(b).

(2) (i) Material submitted with objections and requests for hearings filed pursuant to Subpart B of this Part, or at a formal evidentiary public hearing pursuant to Subpart B, a public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part, or an alternative form of public hearing before a public advisory committee or a public hearing before the Commissioner pursuant to § 2.117(a) (2) or (3), of the following types shall be on public display and shall be available for public examination during regular business hours on Monday through Friday, but shall not be available for copying or any other form of verbatim recording or transcription unless it is otherwise available for public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein:

(a) Safety and effectiveness data and information, which include all studies and tests of an ingredient or product on animals and humans and all studies and tests on the ingredient or product for identity, stability, purity, potency, bioavailability, performance, and usefulness.

## RULES AND REGULATIONS

(b) A protocol for a test or study.

(ii) Material submitted pursuant to the provisions of this paragraph (j) (2) shall be segregated from all other submitted material and clearly so marked. Any person who does not agree that such a submission is properly subject to the provisions of this paragraph (j) (2) may request a ruling thereon from the Assistant Commissioner for Public Affairs whose decision on the matter shall be final, subject to judicial review pursuant to § 4.46 of this chapter.

(iii) Material submitted pursuant to the provisions of this paragraph (j) (2) shall be retained on public display and available for public examination only for such period of time as is appropriate to permit public participation in a public hearing and any related judicial review, and shall thereafter be subject to the provisions of paragraph (j) (3) of this section.

(iv) In accordance with the policy stated in § 4.86 of this chapter, the limited availability of material pursuant to this paragraph (j) (2) shall be deemed not to constitute prior disclosure to the public as defined in § 4.81 of this chapter and no such data and information shall, if copied or otherwise recorded or transcribed in violation of the provisions of this paragraph (j) (2), be submitted to or received or considered by the Food and Drug Administration by any other person in support of a petition or other request.

(3) (i) Material prohibited from public disclosure pursuant to § 4.63 of this chapter (clearly unwarranted invasion of personal privacy) as interpreted and applied in Part 4 of this chapter and the regulations referenced therein, and material submitted with objections and requests for hearings filed pursuant to Subpart B of this Part, or at a formal evidentiary public hearing pursuant to Subpart B of this Part, a public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part, or an alternative form of public hearing before a public advisory committee or a public hearing before the Commissioner pursuant to § 2.117(a) (2) or (3), of the following types shall not be on public display, shall not be available for public examination, and shall not be available for copying or any other form of verbatim transcription unless they are otherwise available for public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein:

(a) Manufacturing methods of processes, including quality control procedures.

(b) Production, sales, distribution, and similar data and information, except any compilation of such data and information aggregated and prepared in a way that does not reveal confidential data and information.

(c) Quantitative or semiquantitative formulas.

(d) Data and information on design or construction of products.

(ii) Material submitted pursuant to the provisions of this paragraph (j) (3)

shall be segregated from all other submitted material and clearly so marked. Any person who does not agree that such a submission is properly subject to the provisions of this paragraph (j) (3) may request a ruling thereon from the Assistant Commissioner for Public Affairs whose decision on the matter shall be final, subject to judicial review pursuant to § 4.46 of this chapter.

## § 2.6 Initiation of administrative proceedings.

An administrative proceeding under the laws administered by the Commissioner may be initiated in any of the following three ways:

(a) Any interested person may petition the Commissioner to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him. Any such petition shall be either (1) in the form specified in other applicable sections in this chapter, e.g., the form for a food additive petition in § 121.51 of this chapter or for a new drug application in § 314.1 of this chapter or for a new animal drug application in § 514.1 of this chapter, or (2) in the form for a citizen petition in § 2.7.

(b) The Commissioner may on his own initiative institute a proceeding to issue, amend, or revoke a regulation or order, or to take or refrain from taking any other form of administrative action, under the laws administered by him.

The Food and Drug Administration has primary jurisdiction to make the initial determination on issues within its statutory mandate, and will request a court to dismiss, or to hold in abeyance its determination or to refer to the agency for administrative determination, any such issue which has not previously been determined by the agency or which, if it has previously been so determined, the agency concludes should be reconsidered and subject to a new administrative determination. The Commissioner may, in his discretion, utilize any of the procedures established in this Part in reviewing and making a determination on any matter on his own initiative.

(c) The Commissioner shall institute a proceeding to determine whether he should issue, amend, or revoke a regulation or order, or take or refrain from taking any other form of administrative action under the laws administered by him, whenever any court holds in abeyance or refers any such matter to him for an administrative determination and he concludes that such an administrative determination is feasible in light of agency priorities and resources.

## § 2.7 Citizen petition.

(a) The provisions of this section shall apply to any petition submitted by any person, except to the extent that specific provisions in other sections of this chapter state different requirements with respect to a particular matter.

(b) Any petition (including any attachments) shall be submitted in accordance with § 2.5 and in the following form:

-----  
(Date)  
-----

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville MD 20852.

### CITIZEN PETITION

The undersigned submits this petition pursuant to \_\_\_\_\_ (relevant statutory sections, if known) of the \_\_\_\_\_ (Federal Food, Drug, and Cosmetic Act and/or the Public Health Service Act and/or any other statutory provision with respect to which authority has been delegated to the Commissioner of Food and Drugs pursuant to 21 CFR 5.1) to request the Commissioner of Food and Drugs to \_\_\_\_\_ (issue, amend, or revoke a regulation or order or take or refrain from taking any other form of administrative action).

A. *Action Requested.*  
(1) If the petition requests the Commissioner to issue, amend, or revoke a regulation, the exact wording of the existing regulation (if any) and the proposed regulation or amendment requested.)

(2) If the petition requests the Commissioner to issue, amend, or revoke an order, a copy or the exact wording of and citation to the existing order (if any) and the exact wording requested for the proposed order.)

(3) If the petition requests the Commissioner to take or refrain from taking any other form of administrative action, the specific action or relief requested.)

B. *Statement of Grounds.*  
(A full statement of the factual and legal grounds upon which the petitioner relies. Such grounds shall include all relevant data, information, and views on which the petitioner relies, as well as representative data and information known to the petitioner which are unfavorable to the petitioner's position, and shall be submitted in a well-organized format.)

C. *Environmental Impact.*  
(An environmental impact analysis report in the form specified in 21 CFR 61(g), except for the types of actions specified in 21 CFR 61(e).)

The undersigned certifies, that, to the best of his knowledge and belief this petition includes all data, information, and views on which the petition relies, and that it includes representative data and information known to the petitioner which are unfavorable to the petition.

Very truly yours,

-----  
(Signature)  
-----

-----  
(Name of petitioner)  
-----

-----  
(Mailing address)  
-----

-----  
(Telephone number)  
-----

(c) Any petition which appears to meet the requirements of paragraph (b) of this section and § 2.5 shall be filed by the Hearing Clerk, stamped with the date of filing, and assigned a docket number. The docket number shall be used to identify the administrative file established by the Hearing Clerk for all submissions relating to the petition, as provided in this Part. All subsequent submissions relating to the matter shall refer to such docket number and shall be filed in such administrative file. Identification, similar, or related petitions may be filed together and given the same docket number. The Hearing Clerk shall promptly notify the petitioner in writing of the filing and docket number of a petition.

(d) Any interested person may submit written comments to the Hearing Clerk on any filed petition, which shall become part of the administrative file. Such comments shall specify the docket number of the petition and may support or oppose the petition in whole or in part. Any request for alternative or different administrative action shall be in the form of a separate petition.

(e) The Commissioner shall review and rule upon every petition filed pursuant to paragraph (c) of this section as promptly as is feasible, taking into consideration (1) the agency resources available to handle the category of subject matter involved, (2) the priority assigned to the petition in relation both to the category of subject matter involved and the overall work of the agency, and (3) time requirements established by statute. The Commissioner may grant or deny such a petition, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted by the petition. The petitioner shall be notified in writing of the Commissioner's decision on a petition. Such decision shall be placed in the public docket file in the office of the Hearing Clerk and may also be in the form of a notice published in the FEDERAL REGISTER.

(f) If a petition filed pursuant to paragraph (c) of this section requests the Commissioner to issue, amend, or revoke a regulation, the provisions of § 2.10 or § 2.12 shall also apply.

(g) A petitioner may supplement, amend, or withdraw his petition upon written request without agency approval prior to the time the Commissioner rules on the petition unless the petition has been referred for a hearing under Subparts B, C, D, or E of this Part. In all other instances, a petition may be supplemented, amended, or withdrawn only with approval of the Commissioner.

(h) In reviewing any matter which is the subject of a petition filed pursuant to paragraph (c) of this section, the Commissioner may, in his discretion, utilize any of the following procedures:

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this Part.

(3) A public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this Part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this Part.

(6) A regulatory hearing before the Food and Drug Administration pursuant to Subpart F of this Part.

(7) A notice published in the FEDERAL REGISTER requesting data, information, and views.

## RULES AND REGULATIONS

22989

(8) A proposal to issue, amend, or revoke a regulation, in accordance with the provisions of § 2.10 or § 2.11.

(9) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by those provisions.

(i) The record of the administrative proceeding shall consist of the following:

(1) The petition, including all data and information on which it relies, filed by the Hearing Clerk.

(2) All comments received on the petition, including all data or information submitted as a part of such comments.

(3) If the petition resulted in a proposal to issue, amend, or revoke a regulation, all of the documents specified in § 2.10(g).

(4) The record, consisting of any transcripts, minutes of meetings, reports, FEDERAL REGISTER notices, and other documents, resulting from any of the optional procedures specified in paragraph (g) of this section, except that it shall not include the transcript of any closed portion of any public advisory committee meeting.

(5) The Commissioner's decision on the petition, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(f).

(7) If any petition for reconsideration or for a stay of action is filed pursuant to paragraph (j) of this section, the administrative record specified in § 2.8 (k) or § 2.9(h) respectively.

(j) The administrative record specified in paragraph (i) of this section shall constitute the exclusive record for the Commissioner's decision. The record of the administrative proceeding shall be closed as of the date of the Commissioner's decision unless some other date for the closing of the record is specified by the Commissioner. Thereafter any interested person may submit a petition for reconsideration pursuant to § 2.8 and a petition for stay of action pursuant to § 2.9. Any person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the decision pursuant to this section.

(k) The provisions of this section shall not apply to requests, suggestions, and recommendations made informally in routine correspondence received by the Food and Drug Administration. Such correspondence does not constitute a petition within the meaning of this section unless it purports to meet the requirements of this section. Action with respect to such routine correspondence does not constitute final administrative action which is subject to judicial review pursuant to § 2.11.

(l) The Hearing Clerk shall maintain a chronological list of all petitions filed pursuant to this section and § 2.19, but excluding petitions submitted elsewhere

in the agency pursuant to § 2.6(a) (1), showing:

- (1) The docket number.
- (2) The date the petition was filed by the Hearing Clerk.
- (3) The name of the petitioner.
- (4) The subject matter involved.

## § 2.8 Administrative reconsideration of action.

(a) The Commissioner may at any time conclude to reconsider any matter, on his own initiative or on the petition of any interested person.

(b) Any interested person may request reconsideration of any part or all of a decision of the Commissioner on any petition submitted pursuant to § 2.6(a). Any such request shall be submitted in accordance with § 2.5 and in the following form no later than 30 days after the date of the decision involved.

-----  
(Date)  
-----

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852

### PETITION FOR RECONSIDERATION

Docket No. -----

The undersigned submits this petition for reconsideration of the decision of the Commissioner of Food and Drugs in Docket No. -----

A. *Decision Involved.*  
(A concise statement of the decision of the Commissioner which the petitioner wishes to have reconsidered.)

B. *Action Requested.*  
(The decision which the petitioner requests the Commissioner to make upon reconsideration of the matter.)

C. *Statement of Grounds.*  
(A full statement of the factual and legal grounds upon which the petitioner relies. Such grounds shall demonstrate that relevant data, information, and views contained in the administrative record were not previously or not adequately considered by the Commissioner. No new data, information, or views may be included in a petition for reconsideration.)

Very truly yours,

-----  
(Signature)

(Mailing address)  
-----

-----  
(Telephone number)  
-----

(c) A petition for reconsideration relating to a petition submitted pursuant to § 2.6(a) (2) shall be subject to the requirements of § 2.7 (c) and (d), except that it shall be filed in the same docket file as the petition to which it relates.

(d) The Commissioner shall promptly review a petition for reconsideration. The Commissioner may grant such a petition in any proceeding when he determines that it is in the public interest and in the interest of justice. The Commissioner shall grant a petition for reconsideration in any proceeding if he determines that all of the following apply: (1) the petition demonstrates that relevant data, information, or views contained in the administrative record were

not previously or not adequately considered by the Commissioner, (2) the petitioner's position is not frivolous and is being pursued in good faith, (3) the Petitioner has demonstrated sound public policy grounds supporting reconsideration, and (4) reconsideration is not outweighed by public health considerations or other public interests.

(e) A petition for reconsideration shall be based only on data, information, and views contained in the administrative record on which the Commissioner made his decision. Any interested person who wishes to rely upon data, information, or views not included in such administrative record shall submit it to the Commissioner with a new petition to modify the decision pursuant to § 2.6(a).

(f) The Commissioner's decision on a petition for reconsideration shall be in writing and shall be placed on public display as part of the administrative file on the matter in the office of the Hearing Clerk. A determination to grant reconsideration shall be published in the FEDERAL REGISTER if the Commissioner's original decision was published in the FEDERAL REGISTER. Any other determination to grant or to deny reconsideration may also be published in the FEDERAL REGISTER.

(g) The Commissioner will consider a petition for reconsideration only if it is submitted within 30 days of the date of the decision involved and before such petitioner brings legal action in the courts to review such action, except that such a petition shall also be considered if the Commissioner has denied a petition for stay of action and such petitioner has petitioned for judicial review of the Commissioner's action and requested the reviewing court to grant a stay pending consideration of such review. A petition for reconsideration submitted later than 30 days after the date of the decision involved shall be denied as untimely. A petition for reconsideration shall be considered as submitted on the day it is received by the Hearing Clerk.

(h) The Commissioner may on his own initiative decide to reconsider all or part of any matter at any time after it has been decided or action has been taken. If review of such matter is pending in the courts, the Commissioner may request that the court refer the matter back to the agency or hold its review in abeyance pending administrative reconsideration. The administrative record of the proceeding shall include all additional documents relating to such reconsideration.

(i) After determining to reconsider a matter, whether on the petition of an interested person or on his own initiative, the Commissioner shall review and rule on the merits of the matter pursuant to § 2.7(e). The Commissioner may reaffirm, modify, or overrule his prior decision, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted.

(j) The Commissioner's reconsideration of any matter relating to a petition submitted pursuant to § 2.6(a) (2) shall

be subject to the provisions of § 2.7(f) through (h), (j), and (k).

(k) The record of the administrative proceeding shall consist of the following:

(1) The record of the original petition specified in § 2.7(d).

(2) The petition for reconsideration, including all data and information on which it relies, filed by the Hearing Clerk.

(3) All comments received on such petition, including all data or information submitted as a part of such comments.

(4) The Commissioner's decision on such petition pursuant to paragraph (f) of this section, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(5) Any FEDERAL REGISTER notices or other documents resulting from such petition.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(f).

(7) If the Commissioner reconsiders the matter, the administrative record relating to such reconsideration specified in § 2.7(i).

#### § 2.9 Administrative stay of action.

(a) The Commissioner may stay (including extend) the effective date of any relevant action pending or following his decision on any matter, on his own initiative or on the petition of any interested person.

(b) Any interested person may request the Commissioner to stay the effective date of any administrative action. Such a stay may be requested for a specific time period or for an indefinite time period. Any such request shall be submitted in accordance with § 2.5 and in the following form no later than 30 days after the date of the decision involved.

(Date)  
Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852

#### PETITION FOR STAY OF ACTION

The undersigned submits this petition requesting that the Commissioner of Food and Drugs stay the effective date of his action with respect to the following matter.

##### A. Decision Involved.

(The specific administrative action being taken by the Commissioner for which a stay is requested, including the docket number or other citation to the action involved.)

##### B. Action Requested.

(The length of time for which the stay is requested, which may be for a specific or indefinite time period.)

##### C. Statement of Grounds.

(A full statement of the factual and legal grounds upon which the petitioner relies for the stay.)

Very truly yours,

(Signature)

(Name of petitioner)

(Mailing address)

(Telephone number)

(c) A petition for stay of action relating to a petition submitted pursuant to § 2.6(a) (2) shall be subject to the requirements of paragraphs (c) and (d) of § 2.7, except that it shall be filed in the same docket file as the petition to which it relates.

(d) Neither the filing of a petition for a stay of action pursuant to this section nor action taken by an interested person in accordance with any other administrative procedure in this part or in any other section of this chapter, e.g., the filing of a citizen petition pursuant to § 2.7 or a petition for reconsideration pursuant to § 2.8 or a request for an advisory opinion pursuant to § 2.18, shall operate to stay or otherwise delay any administrative action by the Commissioner, including enforcement action of any kind, unless one of the following applies:

(1) The Commissioner, in his discretion, determines that a stay or delay is in the public interest and stays the action.

(2) A statutory provision requires that the matter be stayed.

(3) A court orders that the matter be stayed.

(e) The Commissioner shall promptly review a petition for stay of action. The Commissioner may grant or deny such a petition, in whole or in part, and may grant such other relief or take such other action as he may determine to be warranted by the petition. The Commissioner may grant a stay in any proceeding if he determines that it is in the public interest and in the interest of justice. The Commissioner shall grant a stay in any proceeding if he determines that all of the following apply: (1) The petitioner will otherwise suffer irreparable injury, (2) the petitioner's case is not frivolous and is being pursued in good faith, (3) the petitioner has demonstrated sound public policy grounds supporting the stay, and (4) the delay resulting from the stay is not outweighed by public health considerations or other public interests.

(f) The Commissioner's decision on a petition for stay of action shall be in writing and shall be placed on public display as part of the file on the matter in the office of the Hearing Clerk. A determination to grant a stay shall be published in the FEDERAL REGISTER if the Commissioner's original decision was published in the FEDERAL REGISTER. Any other determination to grant or to deny a stay may also be published in the FEDERAL REGISTER.

(g) A petition for a stay of action submitted later than 30 days after the date of the decision involved shall be denied as untimely. A petition for a stay of action shall be considered as submitted on the day it is received by the Hearing Clerk.

(h) The record of the administrative proceeding shall consist of the following:

(1) The record of the proceeding to which the petition for stay of action is directed.

(2) The petition for stay of action, including all data and information on which it relies, filed by the Hearing Clerk.

(3) All comments received on such petition, including all data or information submitted as a part of such comments.

(4) The Commissioner's decision on such petition pursuant to paragraph (e) of this section, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the record supporting the decision.

(5) Any FEDERAL REGISTER notices or other documents resulting from such petition.

(6) All documents filed with the Hearing Clerk pursuant to § 2.15(f).

#### § 2.10 Promulgation of regulations for the efficient enforcement of the law.

(a) The Commissioner may propose and promulgate regulations for the efficient enforcement of the laws administered by him whenever he concludes that it is necessary or appropriate to do so. The issuance, amendment, or revocation of any such regulation may be initiated in any of the ways specified in § 2.6.

(1) This section shall apply to any regulation (i) not subject to § 2.12 and Subpart B of this Part or (ii) if it is subject to § 2.12 and Subpart B of this Part, to the extent that those provisions make this section applicable.

(2) A regulation proposed by an interested person in a petition submitted pursuant to § 2.6(a) shall be published by the Commissioner in the FEDERAL REGISTER as a proposal if he determines that:

(i) The petition contains facts demonstrating reasonable grounds for the proposal.

(ii) The petition contains a substantial showing that the proposal is in the public interest and will promote the objectives of the act and the agency.

(iii) The requested proposal is lawful.

(3) The Commissioner may publish two or more alternative proposed regulations on the same subject in order to obtain comment on the different alternatives.

(4) The Commissioner may publish a regulation proposed by an interested person in a petition submitted pursuant to § 2.6(a) together with the Commissioner's preliminary views on the proposal and any alternative proposal.

(b) Except as provided in paragraphs (d) and (e) of this section, any such regulation shall be the subject of a notice of proposed rule making published in the FEDERAL REGISTER.

(1) Such notice shall contain (i) a general statement in the first or second paragraph describing the substance of the document in easily understandable terms, (ii) a preamble which summarizes the proposal and the facts and policy underlying it, (iii) references to all data and information on which the Commissioner relies for the proposal (copies or a full list of which shall be a part of the administrative file on the matter in the office of the Hearing Clerk), (iv) the au-

thority under which the regulation is proposed, (v) either the terms or substance of the proposed regulation or a description of the subjects and issues involved, (vi) a proposed effective date, (vii) a reference to the existence or lack of need for an environmental impact statement pursuant to § 6.1(a) (3) (ii) or (iii) of this chapter, (viii) the time, place, and method for interested persons to submit written comments on the proposal, and a statement that comments shall be submitted in accordance with the requirements of this Part and (ix) the docket number of the matter, which shall be used to identify the administrative file established by the Hearing Clerk for all submission relating to the matter, as provided in this Part.

(2) Such proposal shall ordinarily provide 60 days for comment, although the Commissioner may reduce or extend this time period for good cause. In no event shall the time for comment be less than ten days.

(3) After publication of the notice of proposed rule making, any interested person may request the Commissioner to extend the comment period for an additional specified period of time by submitting a written request to the Hearing Clerk stating the grounds therefor. Such requests shall be pursuant to § 2.9, except that the heading shall be "REQUEST FOR EXTENSION OF COMMENT PERIOD."

(i) Any such request shall demonstrate why comments could not reasonably be submitted within the time permitted, or that important new information will shortly be available, or that sound public policy otherwise supports an extension of the time for comment. The Commissioner may grant or deny such request or may grant an extension for a time period different than that requested. Extensions of time to comment will not ordinarily be granted. An extension of time to comment may be limited to specific persons who have made and justified such a request, but shall ordinarily apply to all interested persons.

(ii) Any extension of time to comment of 30 days or longer shall be the subject of a notice published in the FEDERAL REGISTER and shall be applicable to all interested persons. Any extension of time to comment of less than 30 days shall be the subject either of a letter or memorandum filed with the Hearing Clerk or of a notice published in the FEDERAL REGISTER.

(4) All comments shall be submitted in quintuplicate to the Hearing Clerk, except that individuals may submit single copies of comments. Comments will be stamped with the date of receipt and will be numbered chronologically.

(5) Persons submitting comments critical of a proposed regulation are encouraged to include alternative wording that they believe would be preferable.

(c) After the time for comment on a proposed regulation has expired, the Commissioner shall review the entire administrative record on the matter, including all comments, and shall terminate the proceeding, issue a new proposal,

or promulgate a final regulation, by notice published in the FEDERAL REGISTER.

(1) The quality and persuasiveness of the comments shall determine the Commissioner's decision with respect to such comments. The number or length of comments shall not be a significant factor in such decision.

(2) The decision of the Commissioner with respect to the matter shall be based solely upon the administrative record.

(3) The preamble to a final regulation published in the FEDERAL REGISTER shall contain in the first and second paragraphs reference to prior notices relating to the same matter and a general statement describing the substance of the document in easily understandable terms, and shall summarize each type of comment submitted on the proposal and the Commissioner's conclusions with respect to each such type of comment. The preamble shall contain a thorough and comprehensive articulation of the reasons for the Commissioner's decision on each issue.

(4) The notice promulgating a final regulation published in the FEDERAL REGISTER shall specify the effective date. Such effective date shall be not less than 30 days after the date of publication in the FEDERAL REGISTER, except for:

(i) A regulation which grants an exemption or relieves a restriction.

(ii) Any other regulation where the Commissioner finds, and states in the notice, good cause for an earlier effective date.

(d) The provisions for notice and comment in paragraphs (b) and (c) of this section shall apply to interpretive rules and to rules of agency practice and procedure except as provided in paragraph (e) of this section. The provisions of paragraphs (b) and (c) of this section shall not apply to general statements of policy in the form of informational notices published in the FEDERAL REGISTER or to matters involving agency organization.

(e) The requirements of notice and public procedure in paragraph (b) of this section shall not apply in any of the following situations:

(1) When the Commissioner determines for good cause that they are impracticable, unnecessary, or contrary to the public interest. In such cases, the notice promulgating the regulation shall state the reasons for such determination, and shall provide an opportunity for the submission of comments to determine whether the regulation should subsequently be modified or revoked.

(2) To food additive and color additive petitions, which are subject to the provisions of § 2.110(b) (2).

(3) To new animal drug regulations, which shall be promulgated by notice pursuant to section 512(i) of the act.

(f) In addition to the notice and public procedure required pursuant to paragraph (b) of this section, the Commissioner may, in his discretion, also subject any proposed or final regulation, before or after publication in the FEDERAL REGISTER, to any of the following additional procedures, where they are reasonably applicable to the matter involved:

V  
4  
0

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this Part.

(3) A public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this Part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this Part.

(6) A notice published in the FEDERAL REGISTER requesting data, information, and views before the Commissioner determines whether to propose a regulation.

(7) A draft of a proposed regulation placed on public display in the office of the Hearing Clerk. If this procedure is used, the Commissioner shall publish an appropriate notice in the FEDERAL REGISTER stating that the document is available and specifying the time within which comments may be submitted orally or in writing on the draft of the proposed regulation.

(8) A revised proposal published in the FEDERAL REGISTER, which shall be subject to all the provisions in this section relating to proposed regulations.

(9) A tentative final regulation or tentative revised final regulation placed on public display at the office of the Hearing Clerk. If this procedure is used, the Commissioner shall publish an appropriate notice in the FEDERAL REGISTER stating that the document is available and specifying the time within which comments may be submitted orally or in writing on the tentative final regulation and shall mail a copy of the tentative final regulation and the FEDERAL REGISTER notice to each person who submitted comments on the proposed regulation.

(10) A final regulation published in the FEDERAL REGISTER which provides an opportunity for the submission of further comments to determine whether the regulation should subsequently be modified or revoked.

(11) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by the terms of those provisions.

(g) The record of the administrative proceeding shall consist of all of the following:

(1) If the regulation was initiated by a petition, the administrative record specified in § 2.7(i).

(2) If any petition for reconsideration or for a stay of action is filed, the administrative record specified in § 2.8(k) and § 2.9(h) respectively.

(3) The notice of proposed rule making published in the FEDERAL REGISTER, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the administrative record supporting the proposal.

(4) All comments received on the proposal, including all data or information submitted as a part of such comments.

(5) The notice promulgating the final regulation, including all data and information identified or filed by the Commissioner with the Hearing Clerk as part of the administrative record supporting the final regulation.

(6) The transcripts, minutes of meetings, reports, FEDERAL REGISTER notices, and other documents resulting from any of the optional procedures specified in paragraph (f) of this section, except that it shall not include any transcript of any closed portion of any public advisory committee meeting.

(7) All documents submitted to the Hearing Clerk pursuant to § 2.15(f).

(h) The record of the administrative proceeding shall be closed as of the date the Commissioner's decision is published in the FEDERAL REGISTER or otherwise made available for public disclosure unless some other date for the closing of the record is specified by the Commissioner. Thereafter any interested person may submit a petition for reconsideration pursuant to § 2.8 and a petition for stay of action pursuant to § 2.9. Any person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the final regulation.

(i) The Hearing Clerk shall maintain a chronological list of all regulations proposed and promulgated pursuant to this section and § 2.12, but excluding regulations resulting from petitions filed and assigned a docket number pursuant to § 2.7, showing:

(1) The docket number, which in the case of a petition submitted directly to a bureau shall be the number or other designation assigned by the bureau, e.g., the number assigned to a food additive petition.

(2) The name of the petitioner, if any.

(3) The subject matter involved.

#### § 2.11 Court review of final administrative action; exhaustion of administrative remedies.

(a) The provisions of this section shall apply to court review of any final administrative action taken by the Commissioner, including action taken pursuant to §§ 2.6 through 2.10 and § 2.500(b), except action subject to the provisions of § 2.12 and Subpart B of this Part.

(b) Any request that the Commissioner take or refrain from taking any form of administrative action shall first be the subject of a final administrative decision based upon a petition submitted to the Commissioner pursuant to § 2.6(a) or, where applicable, a hearing pursuant to § 2.500(b) of this Part before any legal action filed in a court complaining of the Commissioner's action or failure to act. If any court action is filed complaining of the Commissioner's action or failure to act prior to the submission of and decision on a petition pursuant to § 2.6(a) or, where applicable, a hearing pursuant to § 2.500(b) of this Part, the Commissioner will request dismissal of such court action or referral to the agency for an initial administrative determination on the grounds

of a failure to exhaust the administrative remedies provided in this Part, the lack of final agency action as required by 5 U.S.C. 701 et seq., and the lack of an actual controversy as required by 28 U.S.C. 2201.

(c) Any request that any form of administrative action be stayed shall first be the subject of an administrative decision based upon a petition for stay of action submitted to the Commissioner pursuant to § 2.9 before any request is made that a court stay such action. If any court action is filed requesting a stay of any administrative action taken by the Commissioner prior to the Commissioner's decision on a petition submitted in a timely manner pursuant to § 2.9, the Commissioner will request dismissal of such court action or referral to the agency for an initial administrative determination on the grounds of a failure to exhaust the administrative remedies provided in this subpart, the lack of final agency action as required by 5 U.S.C. 701 et seq., and the lack of an actual controversy as required by 28 U.S.C. 2201. If any court action is filed requesting a stay of any administrative action taken by the Commissioner after a petition for a stay of action is denied because it was submitted after expiration of the 30-day time period specified in § 2.9, or after the time for submitting such a petition has expired, the Commissioner will request dismissal of such court action on the ground of a failure to exhaust the administrative remedies set out in this subpart.

(d) The Commissioner's final decision on a petition submitted pursuant to § 2.6(a), on a petition for reconsideration submitted pursuant to § 2.8, on a petition for stay of action submitted pursuant to § 2.9, or on any matter involving administrative action which is the subject of an opportunity for a hearing pursuant to § 2.500(b), each constitutes final agency action reviewable in the courts pursuant to 5 U.S.C. 701 et seq. and, where appropriate, 28 U.S.C. 2201.

(1) It is the position of the Food and Drug Administration except as otherwise provided in subparagraph (2) of this paragraph, that:

(i) Any such final agency action exhausts all administrative remedies and is ripe for pre-enforcement judicial review as of the date of such final decision, unless applicable law explicitly requires that the petitioner take further action before judicial review is available.

(ii) Any interested person is affected by, and thus has standing to obtain judicial review of, such final agency action.

(iii) It is not appropriate to move to dismiss a suit for pre-enforcement judicial review of such final agency action on the ground that indispensable parties are not joined or that it is an unconsented suit against the United States if such defect could be cured by amending the complaint.

(2) The Commissioner will object to judicial review of any matter if:

(i) The matter is committed by law to the discretion of the Commissioner, e.g., a decision to recommend or not to rec-

ommend civil or criminal enforcement action under sections 302, 303, and 304 of the act.

(ii) Review is not sought in a proper court.

(e) Any interested person may request judicial review of any final decision of the Commissioner in the courts without first petitioning the Commissioner for reconsideration or for a stay of action, except that in accordance with paragraph (c) of this section such person shall request a stay by the Commissioner pursuant to § 2.9 before he may request a stay by the court.

(f) The Commissioner will take the position in any action for judicial review under 5 U.S.C. 701 et seq., whether or not it includes a request for a declaratory judgment under 28 U.S.C. 2201, or in any other case in which the validity of administrative action is properly challenged, that the validity of the action shall be determined solely on the basis of the administrative record specified in §§ 2.7(i), 2.8(k), 2.9(h), 2.10(g), and 2.513(a), or the administrative record applicable with respect to any decision or action under the regulations referenced in § 2.500(b), and that additional data, information, or views may not be considered. Any interested person who wishes to rely upon data, information, or views not included in the administrative record shall submit it to the Commissioner with a new petition to modify the action pursuant to § 2.6(a).

(g) The Commissioner requests that all petitions for judicial review of a particular matter be filed in a single United States district court. If such petitions are filed in more than one jurisdiction, the Commissioner shall take appropriate action to prevent a multiplicity of suits in various jurisdictions, such as:

(1) A request for transfer of one or more suits to consolidate separate actions, pursuant to 28 U.S.C. 1404(a) or 28 U.S.C. 2112(a).

(2) A request that actions in all but one jurisdiction be stayed pending the conclusion of one proceeding.

(3) A request that all but one action be dismissed pending the conclusion of one proceeding, with the suggestion that the other plaintiffs intervene in that one suit.

(4) A request that one of the suits be maintained as a class action in behalf of all affected persons.

(h) Upon judicial review of administrative action pursuant to this section:

(1) If a court determines that the administrative record is inadequate to support the action, the Commissioner shall determine whether he wishes to proceed with such action.

(i) If the Commissioner concludes that such action should be pursued, he shall either request that the court remand the matter to the agency to reopen the administrative proceeding and record, or on his own initiative reopen the administrative proceeding and record upon receipt of the court determination. Any such reopened administrative proceeding shall be conducted pursuant to

the provisions of this part and in accordance with any directions of the court.

(ii) If the Commissioner concludes that the public interest requires that the action remain in effect pending further administrative proceedings, he shall request that the court not stay the matter in the interim and shall expedite the further administrative proceedings.

(2) If a court determines that the administrative record is adequate, but the rationale for the action requires further elucidation:

(i) The Commissioner shall request either that such further explanation be provided in writing directly to the court without further administrative proceedings, or that the administrative proceeding be reopened pursuant to paragraph (h)(1)(i) of this section.

(ii) If he concludes that the public interest requires that the action remain in effect pending further court or administrative proceedings, he shall request that the court not stay the matter in the interim and shall expedite such further proceedings.

#### § 2.12 Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing.

(a) The Commissioner shall promulgate regulations and orders after an opportunity for a formal evidentiary public hearing, in accordance with the procedures established in Subpart B of this Part, whenever all of the following apply:

(1) The subject matter of the regulation or order involved is subject by statute to an opportunity for a formal evidentiary public hearing.

(2) The person requesting such a hearing has a right to an opportunity for a hearing and submits adequate justification for such a hearing as required by §§ 2.110 through 2.115 and other applicable provisions in this chapter, e.g., §§ 314.200, 430.20(b), 514.200, and 601.7(a).

(b) The Commissioner may order a formal evidentiary public hearing on any matter whenever he determines, in his discretion, that it would be in the public interest to do so.

(c) The statutory provisions which permit a person who would be adversely affected by administrative action an opportunity for a formal evidentiary public hearing are as follows:

(1) Section 401 of the act relating to definitions and standards for food.

(2) Section 403(b) of the act relating to regulations for labeling of foods for special dietary uses.

(3) Section 404(a) of the act relating to regulations providing for emergency permit control.

(4) Section 406 of the act relating to tolerances for poisonous substances in food.

(5) Section 409(c), (d), and (h) of the act relating to food additive regulations.

(6) Section 501(b) of the act relating to tests or methods of assay for drugs described in official compendia.

(7) Section 502(d) of the act relating to regulations designating habit-forming drugs.

(8) Section 502(h) of the act relating to regulations designating requirements for drug liable to deterioration.

(9) Section 502(n) of the act relating to prescription drug advertising regulations.

(10) Section 506(c) of the act relating to insulin regulations.

(11) Section 507(f) of the act relating to regulations for antibiotic drug certification.

(12) Section 512(n)(5) of the act relating to regulations for animal antibiotic drugs and certification requirements.

(13) Section 706(b) and (c) of the act relating to regulations for color additives listing and certification.

(14) Section 4(a) of the Fair Packaging and Labeling Act relating to food, drug, device, and cosmetic labeling.

(15) Section 5(c) of the Fair Packaging and Labeling Act relating to additional economic regulations for food, drugs, devices, and cosmetics.

(16) Section 505(d) and (e) of the act relating to new drug applications.

(17) Section 512(d), (e), (m)(3), and (m)(4) of the act relating to new animal drug applications.

(18) Section 351(a) of the Public Health Service Act relating to plant and product licenses for a biologic.

#### § 2.13 Separation of functions; ex parte communications.

(a) The provisions of this section shall apply with respect to any matter which is subject by statute to an opportunity for a formal evidentiary public hearing, as listed in § 2.12(c), and any matter subject to a public hearing before a Public Board of Inquiry pursuant to Subpart C of this Part.

(b) In the case of any matter listed in § 2.12(c) (1) through (10) and (12) through (15):

(1) Any interested person may meet or correspond with any representative of the Food and Drug Administration with respect to any such matter prior to publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry on the matter. The provisions of § 2.15 shall apply to such meetings and correspondence.

(2) Upon publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry, the following separation of functions shall apply:

(i) The bureau responsible for the matter involved in the hearing shall, as a party to the hearing, be responsible for all investigative functions and for presentation of the position of the bureau at the hearing and in any pleading or oral argument before the Commissioner. Representatives of the bureau shall not participate or advise in any decision except as witness or counsel in public proceedings. There shall be no other communication between representatives of the bureau and representatives of the office of the Commissioner with respect to the matter involved in the hearing prior to the decision of the Commis-

sioner. All members of the Food and Drug Administration other than representatives of the involved bureau shall be available to advise and participate with the office of the Commissioner in its functions relating to the hearing and the final decision.

(ii) The Chief Counsel for the Food and Drug Administration shall designate those members of his office who shall advise and participate with the bureau in its functions in the hearing. The members of the office of General Counsel so designated shall not participate or advise in any decision except as counsel in public proceedings. Such designation shall be in the form of a memorandum filed with the Hearing Clerk and made a part of the administrative record in the proceeding. There shall be no other communication between those members of the office of General Counsel so designated and any other persons in the office of General Counsel or in the Food and Drug Administration except the members of the involved bureau with respect to the matter involved in the hearing, prior to the decision of the Commissioner. All members of the office of General Counsel other than those so designated shall be available to advise and participate with the office of the Commissioner in its functions relating to the hearing and the final decision.

(iii) The office of the Commissioner shall be responsible for the agency review of and final decision on the matter, with the advice and participation of anyone in the Food and Drug Administration other than representatives of the involved bureau and those members of the office of General Counsel who have been designated to assist in the bureau's functions relating to the hearing.

(c) In the case of any matter listed in § 2.12(c) (11) and (16) through (18), the specific provisions relating to separation of functions set forth in §§ 314.200 (f), 430.20(b) (9), 514.200, and 601.7(a) of this chapter shall be applicable prior to publication in the FEDERAL REGISTER of a notice announcing a formal evidentiary public hearing or a public hearing before a Public Board of Inquiry. Upon publication of any such notice the rules in paragraph (b) (2) of this section shall apply.

(d) Between the date that separation of functions applies pursuant to paragraph (b) or (c) of this section and the date of the Commissioner's decision on the matter, communication with respect to the matter involved in the hearing shall be restricted as follows:

(1) No person shall have any ex parte communication, orally or in writing, with the presiding officer or any person representing the office of the Commissioner with respect to the matter involved in the hearing. All such communications shall be public communications, as witness or counsel, in accordance with the applicable provisions of this Part.

(2) Any participant in the hearing may submit a written communication to the office of the Commissioner with respect to a proposal for settlement. Such written communications shall be in the form of pleadings and shall be served on all other participants and filed with the Hearing Clerk in the same manner as any other pleading.

(3) Any written communication contrary to this section shall immediately be filed with the Hearing Clerk, and any oral communication contrary to this section shall immediately be recorded in a written memorandum and filed with the Hearing Clerk, as a part of the administrative record of the proceeding. Any person, including any representative of any participant in the hearing, who is involved in any such oral communication shall be made available for cross-examination during the hearing with respect to the substance of that conversation. Rebuttal testimony pertinent to any such written or oral communication shall be permitted. Any cross-examination and rebuttal testimony shall be transcribed and filed in the administrative record of the proceeding.

#### § 2.14 Referral by court.

(a) The provisions of this section shall apply whenever any Federal, State, or local court holds in abeyance, or refers to the Commissioner, any matter for an initial administrative determination pursuant to § 2.6(c) or § 2.11(b).

(b) The Commissioner shall promptly agree or decline to accept such referral. Whenever feasible in light of agency priorities and resources, the Commissioner shall agree to accept any such referral and shall institute a proceeding to determine the matter so referred.

(c) In reviewing such a matter, the Commissioner may, in his discretion, utilize any of the following procedures: and correspondence pursuant to § 2.15.

(1) Conferences, meetings, discussions, and correspondence pursuant to § 2.15.

(2) A formal evidentiary public hearing pursuant to Subpart B of this Part.

(3) A hearing before a Public Board of Inquiry pursuant to Subpart C of this Part.

(4) A public hearing before a public advisory committee pursuant to Subpart D of this Part.

(5) A public hearing before the Commissioner pursuant to Subpart E of this Part.

(6) A regulatory hearing before the Food and Drug Administration pursuant to Subpart F of this Part.

(7) A notice published in the FEDERAL REGISTER requesting data, information, and views before the Commissioner makes his decision on it.

(8) Any other specific public procedure established by the provisions in other sections of this chapter and explicitly made applicable to the matter by those provisions.

(d) If the Commissioner's review of the matter results in the proposal of a regulation, the provisions of § 2.10 or § 2.12 shall also apply.

#### § 2.15 Meetings and correspondence.

(a) In addition to the public hearings and proceedings established by the provisions of this Part and in other sections of this chapter, meetings may be held and correspondence may be exchanged between representatives of the Food and Drug Administration and any interested person outside the Food and Drug Administration with respect to any matter within the jurisdiction of the laws administered by the Commissioner. Action with respect to such meetings and correspondence does not constitute final administrative action which is subject to judicial review pursuant to § 2.11.

(b) The Commissioner may conclude, in his discretion, that it would be in the public interest to hold an open public meeting to discuss a matter (or class of matters) pending before the Food and Drug Administration, at which any interested person may participate.

(1) The Commissioner shall give public notice through the public calendar described in § 2.21(b) of the time and place of the meeting and of the matters to be discussed, and may also publish such notice in the FEDERAL REGISTER.

(2) The meeting shall be conducted informally, i.e., any interested person may attend and participate fully in the discussion without giving prior notice to the agency or requesting time to make a presentation.

(3) No transcript or recording of any such meeting shall be required. A written memorandum summarizing the substance of the meeting shall be prepared by a representative of the Food and Drug Administration.

(c) Any meeting with any person outside the Department, including any person in the Executive or Legislative Branch of the Federal Government, relating to a pending court case, administrative hearing, or other regulatory action or decision, which involves more than a brief description of the matter shall be summarized in a written memorandum which shall be filed in the administrative file on the matter.

(d) Every person outside the Federal Government has a right to request and obtain a private meeting with a representative of the Food and Drug Administration in agency offices to discuss any matter in which he is interested.

(1) The person requesting such a meeting may be accompanied by a reasonable number of employees, consultants, or other persons with whom he has a commercial arrangement within the meaning of § 4.81(a) of this chapter. Neither the Food and Drug Administration nor any other person may require the attendance of any person who is not an employee of the Executive Branch of the Federal Government without the agreement of the person requesting the meeting. Any person may attend by mutual consent of the person requesting the meeting and the Food and Drug Administration.

(2) The Food and Drug Administration shall determine which representatives of the Food and Drug Administration shall attend the meeting. The person

requesting the meeting may request but not require or preclude the attendance of any specific Food and Drug Administration employee.

(3) Whenever appropriate (e.g., the meeting involved a matter covered by paragraph (c) of this section or any other important matter, a decision on an issue, or statements or advice or conclusions to which future reference may be required as part of an administrative record), a written memorandum summarizing the substance of the meeting shall be prepared by a representative of the Food and Drug Administration.

(4) Any person who wishes to attend a specific private meeting, but who is not permitted to attend because the person requesting the meeting or the Food and Drug Administration does not grant permission for such attendance, or because it is conducted by telephone, may request and obtain a separate meeting with the Food and Drug Administration to discuss the same matter or any additional matter.

(e) Food and Drug Administration employees have a responsibility to meet with all segments of the public in order to promote the objectives of the act and the agency. In pursuing this responsibility the following general policy shall apply where agency employees are invited by persons outside the Federal Government to attend or participate in meetings outside agency offices as representatives of the agency.

(1) A person outside the Executive Branch of the Federal Government may invite an agency representative to attend or participate in a meeting outside agency offices. The agency representative is not obligated to attend or participate in any such meeting, but may do so where he concludes that it is in the public interest and will promote the objectives of the act and the agency.

(2) An agency representative may request that any such meeting be an open meeting when he concludes that this would be in the public interest. The agency representative may agree to decline to participate in any such meeting which is held as a private meeting, depending upon which action he concludes will best serve the public interest.

(3) An agency representative shall not knowingly participate in any meeting which is closed on the basis of sex, race, or religion.

(4) Any such meeting, whether open or closed, shall be subject to the requirements of paragraph (d) (3) of this section with respect to memoranda summarizing the substance of the meeting.

(f) Representatives of the Food and Drug Administration may initiate a meeting or correspondence with any person outside the Federal Government with respect to any matter relating to the laws administered by the Commissioner.

(1) Any meeting initiated by the Food and Drug Administration which involves a small number of interested persons, e.g., a meeting with a petitioner or with two manufacturers of a particular product which requires additional testing or with a trade association employee to dis-

cuss an industry labeling problem, may be a private meeting. Any meeting initiated by the Food and Drug Administration which involves a large number of interested persons, e.g., 10 manufacturers of an ingredient to discuss appropriate testing or labeling, shall be held as an open conference or meeting pursuant to paragraph (b) of this section.

(2) Whenever appropriate (e.g., the meeting involved a matter covered by paragraph (c) of this section or any other important matter, a decision on an issue, or statements or advice or conclusions to which future reference may be required as part of the administrative record), a written memorandum summarizing the substance of any meeting shall be prepared by a representative of the Food and Drug Administration.

(g) Any person who participates in any meeting described in paragraphs (b) through (f) of this section may prepare and submit to the Food and Drug Administration for inclusion in the administrative file a written memorandum summarizing the substance of the meeting.

(h) All memoranda of such meetings prepared by a representative of the Food and Drug Administration or by any other person and all correspondence which relate to any matter pending before the agency shall promptly be filed in the relevant administrative file and made a part of the administrative record of the proceeding.

(i) Any meeting with a representative of Congress relating to a pending or potential investigation, inquiry, or hearing by a congressional committee or a member of Congress shall be summarized in a written memorandum which shall be forwarded to the Food and Drug Administration, Office of Legislative Services. This provision shall not restrict the right of any agency employee to participate in any such meeting.

(j) Any meeting of an advisory committee shall be subject to the requirements of Subpart D of this Part.

(k) Pursuant to 42 U.S.C. 2631(a) (8), a log or summary shall be made of all meetings held between representatives of the Food and Drug Administration and representatives of industry and other interested parties with respect to implementation of the Radiation Control for Health and Safety Act of 1968.

#### § 2.16 Documentation of significant decisions in administrative file.

(a) The provisions of this section shall apply to every significant Food and Drug Administration decision on any matter under the laws administered by the Commissioner, whether it is raised formally, e.g., by a petition, or informally, e.g., by correspondence.

(b) The Food and Drug Administration employees responsible for handling any matter shall be responsible for assuring the completeness of the administrative file relating to it. Such file:

(1) Shall contain appropriate documentation of the basis for the decision, including relevant evaluations, reviews, memoranda, letters, opinion of consult-

ants, minutes of meetings, and all other written documents pertinent to the matter.

(2) Shall contain the recommendations and decisions of individual employees, including supervisory personnel, responsible for handling the matter.

(i) Such recommendations and decisions shall reveal any significant controversies or differences of opinion and their resolution.

(ii) Any agency employee working on a matter shall have the opportunity to record his views on that matter in a written memorandum, which shall be included in the file.

(c) All written documents placed in such an administrative file:

(1) Shall relate to the factual, scientific, legal, or related issues under consideration.

(2) Shall be dated and signed by the author.

(3) Shall be directed to the file, to appropriate supervisory personnel, and to other appropriate employees, and shall show all persons to whom copies were sent.

(4) Shall avoid defamatory language, intemperate remarks, undocumented charges, or irrelevant matters (e.g., personnel complaints).

(5) Shall, if it records the views, analyses, recommendations, or decisions of any agency employee in addition to the author, be given to such other employees.

(6) Shall, once completed (i.e., typed in final form, dated, and signed), not be altered, added to, or removed. Subsequent additions to, or revisions of, any such document shall be accomplished by the preparation of a new document.

(d) Memoranda or other documents prepared by agency employees not contained in the administrative file shall have no status or effect.

(e) All Food and Drug Administration employees working on a matter shall have access to the administrative file on that matter, as appropriate for the conduct of their work. Reasonable restrictions may be placed upon such access to assure the proper cataloging and storage of documents, the availability of the file to others, and the completeness of the file for review.

#### § 2.17 Internal agency review of decisions.

(a) Any decision of a Food and Drug Administration employee other than the Commissioner on any matter, e.g., an informal opinion on the need for further animal toxicology tests to support a food additive regulation or new drug application, is subject to review by the employee's supervisor under any of the following circumstances:

(1) At the request of the employee.

(2) On the initiative of the supervisor.

(3) At the request of any interested person outside the agency.

(4) As required by duly promulgated delegations of authority.

(b) Such review shall be accomplished by consultation between the employee and the supervisor or by review of the administrative file on the matter, or both.

Such review shall ordinarily follow the established agency channels of supervision or review for that matter.

(c) Any interested person outside the agency may request internal agency review of any such decision through the established agency channels of supervision or review for that matter. Personal review of such matters by bureau directors or the office of the Commissioner shall take place for any of the following purposes:

(1) To resolve an issue which cannot be resolved at lower levels within the agency;

(2) Between two parts of a bureau or other component of the agency, or

(3) Between two bureaus or other components of the agency, or

(4) Between the agency and an interested person outside the agency.

(2) To review policy matters requiring the attention of bureau or agency management.

(3) In unusual situations requiring an immediate review in the public interest.

(4) As required by duly promulgated delegations of authority.

(d) Internal agency review of any such decision shall be based upon the data and information available in the administrative file. In the event that any interested person presents new data or information not contained in such file, the matter shall be returned to the appropriate lower level within the agency for a reevaluation based upon such new information.

#### § 2.18 Dissemination of draft Federal Register notices and regulations.

(a) Any representative of the Food and Drug Administration may discuss orally or in writing with any interested person ideas and recommendations for Federal Register notices or regulations. The Food and Drug Administration welcomes assistance in developing ideas for, and in gathering the data and information to support, notices and regulations.

(b) Once it is determined that a proposed notice or regulation will be prepared, the general concepts may be discussed by a representative of the Food and Drug Administration with any interested person. Details of a draft of a proposed notice or regulation may be discussed with any person outside the Executive Branch of the Federal Government only with the specific permission of the Commissioner. A draft of a proposed notice or regulation or its preamble, or any portion thereof, may be furnished to an interested person outside the Executive Branch of the Federal Government only if it is made available to all interested persons by a notice published in the Federal Register.

(c) After publication of a proposed regulation in the Federal Register, and before preparation of a draft of the final regulation, a representative of the Food and Drug Administration may discuss the proposal with any interested person to understand and resolve questions raised and concerns expressed about the proposal.

(d) Details of a draft of a final notice or regulation may be discussed with any interested person outside the Executive Branch of the Federal Government only with the specific permission of the Commissioner. A draft of a final notice or regulation or its preamble, or any portion thereof, may be furnished to an interested person outside the Executive Branch of the Federal Government only if it is made available to all interested persons by a notice published in the Federal Register, except as otherwise provided in paragraphs (g) and (j) of this section.

(1) The final notice or regulation and its preamble shall be prepared solely on the basis of the administrative record.

(2) If any additional technical information from a person outside the Executive Branch of the Federal Government is necessary to draft the final notice or regulation or its preamble, it shall be requested by the Food and Drug Administration in general terms and furnished directly to the Hearing Clerk to be included as part of the administrative record.

(3) If direct discussion by the Food and Drug Administration of a draft of a final notice or regulation or its preamble is required with a person outside the Executive Branch of the Federal Government, appropriate protective procedures will be undertaken to make certain that a full and impartial administrative record is established. Such procedures may include:

(i) The scheduling of an open public meeting conducted pursuant to § 2.15(b) at which any interested person may participate in review of and comment on the draft document.

(ii) The preparation of a tentative final regulation or tentative revised final regulation pursuant to § 2.10(f) (9), on which all interested persons will be given an additional period of time for oral and written comment.

(e) After a final regulation is published in the Federal Register, a representative of the Food and Drug Administration may discuss any aspect of it with any interested person.

(f) In addition to the requirements of this section, the provisions of § 2.13 shall apply to the promulgation of any regulation subject to the provisions of § 2.12 and Subpart B of this Part.

(g) A draft of a final food additive, color additive, or new animal drug regulation or a proposed or final antibiotic regulation may be furnished to the petitioner for comment on the technical accuracy of such regulation. Every meeting with a petitioner relating to such a draft shall be recorded in a written memorandum, and all such memoranda and correspondence shall be filed with the Hearing Clerk as part of the administrative record of the regulation, pursuant to the provisions of § 2.15.

(h) Pursuant to 42 U.S.C. 263f, the Commissioner is required to consult with interested persons in the development of, and with the Technical Electronic

Product Radiation Safety Standards Committee (TEPRSSC) before prescribing, any performance standard for an electronic product. Accordingly, the Commissioner shall publish in the Federal Register an announcement when a proposed or final performance standard, including any amendment thereof, is being considered for an electronic product, and thereafter any draft of any such document shall be furnished to any interested person upon request and may be discussed in detail with any interested person at any time.

(1) The provisions of § 2.15 shall apply to meetings and correspondence relating to draft Federal Register notices and regulations.

(j) The provisions of this section restricting discussion and disclosure of draft Federal Register notices and regulations shall not apply to those situations covered by §§ 4.83 through 4.89 of this chapter.

#### § 2.19 Advisory opinions.

(a) Any person may request an advisory opinion from the Commissioner with respect to any matter of general applicability in which he is interested.

(1) Such request shall be granted whenever feasible.

(2) Such request may be denied if any of the following apply:

(i) The request contains incomplete information on which to base an informed advisory opinion.

(ii) The Commissioner concludes that an advisory opinion cannot reasonably be given on the matter involved.

(iii) The matter is adequately covered by a prior advisory opinion or a regulation.

(iv) The request covers a particular product or ingredient or label and does not raise a policy issue of broad applicability.

(v) The Commissioner otherwise concludes, in his discretion, that an advisory opinion would not be in the public interest.

(b) A request for an advisory opinion shall be submitted in accordance with § 2.5, shall be subject to the provisions of § 2.7(e) through (i), and shall be in the following form:

(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852

#### REQUEST FOR ADVISORY OPINION

The undersigned submits this request for an advisory opinion of the Commissioner of Food and Drugs with respect to \_\_\_\_\_ (the general nature of the matter involved).

A. Issues Involved.

(A concise statement of the issues and questions on which an opinion is requested.)

B. Statement of Facts and Law.

(A full statement of all facts and legal points relevant to the request.)

The undersigned certifies that, to the best of his knowledge and belief, this request includes all data, information, and views relevant to the matter, whether favorable or unfavorable to the position of the undersigned, which is the subject of the request.

Very truly yours,

(Signature)

(Person making request)

(Mailing address)

(Telephone number)

(c) The Commissioner may, in his discretion, handle any oral or written request to the agency as a request for an advisory opinion, in which case the request shall be filed with the Hearing Clerk and shall be subject to the provisions of this section.

(d) Any statement of policy or interpretation made in any of the following documents shall constitute an advisory opinion:

(1) Any portion of a Federal Register notice other than a proposed or final regulation, e.g., a notice to manufacturers or a preamble to a proposed or final regulation.

(2) Trade Correspondence (TC) Nos. 1-431 and 1A-8A issued by the Food and Drug Administration between 1938 and 1946.

(3) Compliance Policy Guides issued by the Food and Drug Administration beginning in 1968 and codified in the Compliance Policy Guides manual.

(4) Other documents specifically identified as advisory opinions, e.g., advisory opinions on the performance standard for diagnostic x-ray systems, issued prior to July 1, 1975, and filed in a permanent public file for such prior advisory opinions maintained in the Public Records and Documents Center.

(5) Guidelines issued by the Food and Drug Administration pursuant to § 2.20 (b).

(e) An advisory opinion represents the formal position of the Food and Drug Administration on the matter involved, and except as provided in paragraph (f) of this section obligates the agency to follow it until it is amended or revoked. The Commissioner shall not recommend legal action against any person or product with respect to any action taken in conformity with an advisory opinion which has not been amended or revoked.

(f) In unusual situations involving an immediate and significant danger to health, the Commissioner may take appropriate civil enforcement action contrary to an advisory opinion issued pursuant to this section prior to amending or revoking such advisory opinion as provided in paragraph (g) of this section. Such action shall be taken only with the approval of the Commissioner, which may not be delegated. Appropriate amendment or revocation of the advisory opinion involved shall be expedited.

(g) An advisory opinion may be amended or revoked at any time after it has been issued. Notice of such amendment or revocation shall be given in the same manner in which notice was originally given of the advisory opinion or in the Federal Register, and in any event shall be placed on public display as part of the file on the matter in the office of the Hearing Clerk.

inally given of the advisory opinion or in the Federal Register, and in any event shall be placed on public display as part of the file on the matter in the office of the Hearing Clerk.

(h) Action undertaken or completed in conformity with an advisory opinion issued pursuant to this paragraph which has subsequently been amended or revoked shall remain acceptable to the Food and Drug Administration unless the Commissioner determines that substantial public interest considerations preclude such continued acceptance. Whenever possible, an amended or revoked advisory opinion shall state when it has been determined that action previously undertaken or completed in conformity with a prior advisory opinion does not remain acceptable, and any transition period that may be applicable.

(i) Any interested person may submit written comments on an advisory opinion or modified advisory opinion. Three copies of any comments shall be sent to the Hearing Clerk for inclusion in the public file on the advisory opinion. Such comments shall be considered in determining whether further modification of an advisory opinion is warranted.

(j) An advisory opinion may be used in administrative or court proceedings to illustrate acceptable and unacceptable procedures or standards, but not as a legal requirement.

(k) A statement made or advice provided by an employee of the Food and Drug Administration shall constitute an advisory opinion only if it is issued in writing pursuant to this section. A statement or advice given by a Food and Drug Administration employee orally, or given in writing but not pursuant to this section or § 2.20, is an informal communication that represents the best information and opinion available to that employee at that time but does not constitute an advisory opinion, does not necessarily represent the formal position of the Food and Drug Administration, and thus does not bind or otherwise obligate or commit the agency to the views expressed.

§ 2.20 Food and Drug Administration regulations, guidelines, recommendations, and agreements.

(a) Regulations. All Food and Drug Administration regulations having general applicability and legal effect shall be promulgated in the Federal Register pursuant to § 2.10 or § 2.12 and codified in the Code of Federal Regulations. Regulations may contain provisions which will be enforced as legal requirements, or which are intended only as guidelines and recommendations, or both. The dissemination of draft notices and regulations shall be subject to the provisions of § 2.17.

(b) Guidelines. All Food and Drug Administration guidelines having general applicability shall be included in the public file of guidelines established by the Hearing Clerk, pursuant to this paragraph, unless they have been published in the Federal Register as regulations

pursuant to paragraph (a) of this section.

(1) Guidelines establish principles or practices of general applicability and do not include decisions or advice limited to particular situations. Guidelines relate to such matters as performance characteristics, preclinical and clinical test procedures, manufacturing practices, product standards, scientific protocols, compliance criteria, ingredient specifications, labeling, or other technical or policy criteria. Guidelines state procedures or standards of general applicability which are not legal requirements but which are acceptable to the Food and Drug Administration for a subject matter which falls within the laws administered by the Commissioner, e.g., a protocol for a particular type of animal toxicity test or human clinical trial.

(2) A person may rely upon a guideline with assurance that it is acceptable to the Food and Drug Administration, or may follow different procedures or standards. Where a person chooses to use different procedures or standards, he may, but is in no instance required to, discuss the matter in advance with the Food and Drug Administration to prevent the expenditure of money and effort on activity that may later be determined to be unacceptable.

(3) Use of testing guidelines established by the Food and Drug Administration assures acceptance of a test as scientifically valid, if properly conducted, but does not assure approval of any ingredient or product so tested. The results of any such test or other available information may require disapproval or that additional testing be undertaken.

(4) A guideline represents the formal position of the Food and Drug Administration on the matter involved, and except as provided in paragraph (b) (3) of this section obligates the agency to follow it until it is amended or revoked. The Commissioner shall not recommend legal action against any person or product with respect to any action taken in conformity with a guideline issued pursuant to this section that has not been amended or revoked.

(5) In unusual situations involving an immediate and significant danger to health, the Commissioner may take appropriate civil enforcement action contrary to a guideline issued pursuant to paragraph (b) of this section prior to amending or revoking such guideline as provided in paragraph (b) (5) of this section. Such action shall be taken only with the approval of the Commissioner, which may not be delegated. Appropriate amendment or revocation of the guideline involved shall be expedited.

(6) A guideline shall be included in the public file upon approval of the guideline by the relevant bureau director and publication by the Commissioner in the Federal Register of a notice of its availability. The notice shall state (i) the title of the guideline, (ii) the subject matter it covers, and (iii) the office or individual responsible for maintaining the guideline.

(5) A guideline may be amended or revoked upon approval of the amended guideline or revocation of the guideline by the relevant bureau director and publication by the Commissioner in the *FEDERAL REGISTER* of a notice of such amendment or revocation. The notice shall state (i) the title of the guideline, (ii) the subject matter it covers, and (iii) the office or individual responsible for maintaining the guideline. All original guidelines and subsequent amendments shall be retained in the public file on a permanent basis so that a complete record of the development of each guideline remains available.

(6) Action undertaken or completed in conformity with a guideline issued pursuant to paragraph (b) of this section which has subsequently been amended or revoked shall remain acceptable to the Food and Drug Administration unless the Commissioner determines that substantial public interest considerations preclude such continued acceptance. Such determination may be made at the time of or subsequent to amendment or revocation of the guideline. Whenever possible, the notice of an amended or revoked guideline published pursuant to paragraph (b) (3) of this section shall state when it has been determined that action previously undertaken or completed in conformity with a prior guideline does not remain acceptable, and any transition period that may be applicable.

(7) The notice of a guideline or amended or revoked guideline published pursuant to paragraph (b) (2) or (3) of this section shall state that any interested person may submit written comments on the guideline or amended guideline. Two copies of any comments shall be sent to the Public Records and Documents Center for inclusion in the public file on the guideline and two copies shall be sent to the office or individual designated in the notice as responsible for maintaining the guideline. Such comments shall be considered in determining whether further amendments to or re-institution of a guideline are warranted.

(8) A guideline may be used in administrative or court proceedings to illustrate acceptable and unacceptable procedures or standards, but not as establishing a legal requirement.

(9) A statement relating to acceptable procedures or standards given by a Food and Drug Administration employee orally, or in writing but not pursuant to § 2.19 of this section, is an informal communication that represents the best information and opinion available to that employee at that time but does not constitute a guideline, does not necessarily represent the formal position of the Food and Drug Administration, and thus does not bind or otherwise obligate the agency to the views expressed.

(10) Because of the large number of analytical methods involved in Food and Drug Administration activities, their length and complexity, and the volume and frequency of amendment, the provisions of this paragraph shall not apply to such material except to the extent that the Commissioner concludes, in his dis-

cretion, that particular analytical methods should be included in the public file for a particular purpose. Food and Drug Administration analytical methods are available for public disclosure pursuant to the provisions of Part 4 of this chapter.

(11) The dissemination of draft guidelines shall be subject to the same provisions as the dissemination of draft notices and regulations pursuant to § 2.18.

(c) *Recommendations.* In addition to the guidelines subject to paragraph (b) of this section, the Food and Drug Administration often formulates and disseminates recommendations about matters which are authorized by, but do not involve direct regulatory action under, the laws administered by the Commissioner, e.g., model state and local ordinances, or personnel practices for reducing radiation exposure, issued pursuant to 42 U.S.C. 243 and 263d(b). Such recommendations may, in the discretion of the Commissioner, be handled pursuant to the procedures established in paragraph (b) of this section, except that such recommendations shall be included in a separate public file of recommendations established by the Public Records and Documents Center and shall be separated from the guidelines in the notice of availability published in the *FEDERAL REGISTER*, or be published in the *FEDERAL REGISTER* as regulations pursuant to paragraph (a) of this section.

(d) *Agreements.* All formal agreements, memoranda of understanding, or other similar written documents executed by the Food and Drug Administration and another person shall be included in the public file on agreements established by the Public Records and Documents Center pursuant to § 4.108 of this chapter. Any such document not included in the public file shall be deemed to be rescinded and shall have no force or effect whatever.

#### § 2.21 Participation in outside standard-setting activities.

(a) *General.* This section applies to participation by Food and Drug Administration employees in any standard-setting activities outside the Food and Drug Administration. Standard-setting activities include such matters as the development of performance characteristics, testing methodology, manufacturing practices, product standards, scientific protocols, compliance criteria, ingredient specifications, labeling, or other technical or policy criteria. The Food and Drug Administration encourages employee participation in outside standard-setting activities that are in the public interest.

(b) *Standard-setting activities by other Federal government agencies.* (1) Any Food and Drug Administration employee may participate in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS-3763 "Request for approval of appointment as liaison representative."

(2) The Form PHS-3763 and all pertinent background information describing such activities shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) If any members of the public are invited by the Food and Drug Administration to present views to, or to accompany, the Food and Drug Administration employee at any meeting, such invitations shall be extended to a representative sampling of the public, including consumer groups, industry associations, professional societies, and academic institutions.

(4) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(c) *Standard-setting activities by State and local government agencies and by United Nations organizations and other international organizations and foreign governments pursuant to treaty.*

(1) Any Food and Drug Administration employee may participate in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS-3763.

(2) The Form PHS-3763 and all pertinent background information describing such activities shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) The availability for public disclosure of records relating to such activities shall be governed by the regulations in Part 4 of this chapter.

(4) If any members of the public are invited by the Food and Drug Administration to present views to, or to accompany, the Food and Drug Administration employee at any meeting, such invitations shall be extended to a representative sampling of the public, including consumer groups, industry association, professional societies, and academic institutions.

(5) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(d) *Standard-setting activities by private groups and organizations.* (1) Any Food and Drug Administration employee may engage in such activities after the approval by the appropriate bureau director or the Commissioner of Form PHS-3763. A request for such official participation shall be made by the group or organization in writing, shall describe the scope of the activity involved, and shall demonstrate that the minimum standards set out in paragraph (d) (5) of this section are met by the activity involved. Except as provided in paragraph (d) (7) of this section, any such request that is granted shall be the subject of a letter from the Commissioner or the bureau director to the organization stating:

(i) Whether participation by the individual will be as a voting or nonvoting liaison representative.

(ii) That participation by the individual shall not conote Food and Drug

Administration agreement with, or endorsement of, any decisions reached.

(iii) That participation by the individual disqualifies him from serving as the deciding official on the standard involved if it should later come before the Food and Drug Administration. The "deciding official" is the person who signs a document ruling upon such standard.

(2) The letter requesting official Food and Drug Administration participation, the Form PHS-3763, and the Commissioner's or bureau director's letter, together with all pertinent background information describing the activities involved, shall be included in the public file on standard-setting activities established in the Public Records and Documents Center.

(3) The availability for public disclosure of records relating to such activities shall be governed by the regulations in Part 4 of this chapter.

(4) A Food and Drug Administration employee appointed as the liaison representative to such an activity shall refer all requests for information about or participation in the activity involved to the group or organization responsible for such activity.

(5) The following minimum standards shall apply to all outside private standard-setting activities in which Food and Drug Administration employees participate.

(i) The activities shall be based upon consideration of sound scientific and technological information, shall permit revision on the basis of new information, and shall be designed to protect the public against unsafe, ineffective, or deceptive products or practices.

(ii) The activities and resulting standards shall not be designed for the economic benefit of any company, group, or organization, shall not be used as devices for such antitrust violations as fixing prices or hindering competition, and shall not involve establishment of certification or specific approval of individual products or services.

(iii) The group or organization responsible for the standard-setting activities shall have a procedure through which any interested person shall have an opportunity to provide information and views on the activities and standards involved, without the payment of fees, and such information and views shall be considered. The manner in which this is accomplished, including whether such presentation shall be in person or in writing, shall be decided by the group or organization responsible for the activities.

(6) Membership of a Food and Drug Administration employee in an organization that also conducts standard-setting activities does not invoke the provisions of this paragraph unless the employee participates in such standard-setting activities. Participation in any standard-setting activity shall be subject to the provisions of this paragraph.

(7) The Commissioner may determine in writing that, because direct involvement by the Food and Drug Administration in a particular standard-setting

activity is in the public interest and will promote the objectives of the act and the agency, such participation shall be exempt from the requirements set forth in paragraph (d) (1) (ii) and/or (iii) of this section. Any such determination shall be included in the public file on standard-setting activities established by the Public Records and Documents Center and in any relevant administrative file. Such activities may include the establishment and validation of analytical methods for regulatory use, drafting uniform laws and regulations, and the development of recommendations concerning public health and preventive medicine practices by national and international organizations.

(8) Because of the close daily cooperation between the Food and Drug Administration and the association of State and local government officials listed below, and the large number of agency employees who are members of or work with these associations, such participation in the activities of these associations shall be exempt from the provisions of paragraphs (d) (1) through (d) (7) of this section, except that a list of all committees and other groups of these associations shall be included in the public file on standard-setting activities established in the Public Records and Documents Center:

- (i) Association of Food and Drug Officials.
- (ii) International Association of Milk, Food and Environmental Sanitarians, Inc.
- (iii) Conference of Radiation Control Program Directors.
- (iv) Association of American Feed Control Officials, Inc.
- (v) National Environmental Health Association.
- (vi) National Conference on Weights and Measures.
- (vii) American Public Health Association.
- (viii) Conference of State Sanitary Engineers.
- (ix) National Conference on Interstate Milk Shipments.
- (x) National Shellfish Sanitation Program.
- (xi) Interstate Seafood Seminar.
- (xii) Association of Official Analytical Chemists.

#### § 2.22 Public calendars.

(a) *Prospective public calendar of public proceedings.* (1) A public calendar shall be prepared and made publicly available each week showing, to the extent feasible, for the following 4 weeks all public meetings, public conferences, public hearings, public advisory committee meetings, public seminars, and other public proceedings of the Food and Drug Administration, and other significant public events involving the Food and Drug Administration, e.g., congressional hearings and trial or argument of court cases.

(2) A copy of this public calendar shall be placed on public display in the following places:

- (i) Office of the Hearing Clerk.

(ii) Office of the Assistant Commissioner for Public Affairs.

(iii) A central place in each bureau.

(iv) A central place in each field office.

(v) A central place at the National Center for Toxicological Research.

(b) *Retrospective public calendar of meetings.* (1) A public calendar shall be prepared and made publicly available each week showing for the previous week all meetings with persons outside the Federal government and other significant events involving the representatives of the Food and Drug Administration designated under paragraph (b) (3) of this section, except that telephone conversations shall be included on an optional basis and meetings with the working press and with on-site contractors shall not be included.

(2) Such calendar shall include all meetings, conferences, seminars, social events sponsored by the regulated industry, and speeches. The calendar shall specify the date, the person involved, and the subject matter involved. Where more than one Food and Drug Administration representative is in attendance, only the presiding or head representative shall report the meeting on the public calendar. If a large number of persons are involved, the name of each need not be specified. Meetings the existence of which would prejudice law enforcement activities (e.g., a meeting with an informant) or invade privacy (e.g., a meeting with a candidate for possible employment in the Food and Drug Administration) shall not be reported.

(3) The following Food and Drug Administration representatives and their deputies shall be subject to the requirements of paragraphs (b) (1) and (2) of this section:

- (i) Commissioner of Food and Drugs.
- (ii) Deputy Commissioner.
- (iii) Associate Commissioners.
- (iv) Assistant Commissioners.
- (v) Executive Director for Regional Operations.
- (vi) Director, Office of Legislative Services.
- (vii) Director, National Center for Toxicological Research.
- (viii) Bureau Directors.
- (ix) Chief Counsel for the Food and Drug Administration.

(4) A copy of this public calendar shall be placed on public display in the following places:

- (i) Office of the Hearing Clerk.
- (ii) Office of the Assistant Commissioner for Public Affairs.
- (iii) A central place in each bureau.
- (iv) A central place in each field office.
- (v) A central place at the National Center for Toxicological Research.

#### § 2.23 Representation by an organization.

(a) An organization may represent its members by filing petitions, comments, and objections, and otherwise participating in any administrative proceeding subject to this Part.

(b) Any such petitions, comments, objections, or other representation by a trade association shall be on behalf of its

members and shall constitute a representation on behalf of each member of the trade association, except those specifically excluded by name in any such submission.

(1) Every petition, comment, objection, or other representation by a trade association in an administrative proceeding shall have attached thereto a current list of all of the members of such trade association, or shall refer to such a list that is placed on permanent file with the Hearing Clerk and is kept current by the trade association.

(2) The filing by a trade association of an objection or request for hearing pursuant to §§ 2.110 through 2.112 shall not provide to any member any legal right with respect to such objection or request for hearing that the member may exercise in its own name. All subsequent action by the trade association with respect to such objection or request for hearing shall bind each member except to the extent that any member independently files its own objection or request for hearing.

(c) In any court proceeding in which an organization participates, the Commissioner will take appropriate legal measures to have the case brought or considered as a class action or otherwise as binding upon all members of the organization except those specifically excluded by name for the reason that the organization does not represent their views. Regardless whether the case is brought or considered as a class action or as otherwise binding upon all members of the organization except those specifically excluded by name, the Commissioner will take the position in any subsequent suit involving the same issues and any member of the organization that such issues are precluded from further litigation by such member pursuant to the doctrines of collateral estoppel or res judicata.

#### § 2.24 Settlement proposals.

At any time in the course of any proceeding subject to this Part, any person may propose settlement of any of the issues involved. All participants in any proceeding shall have an opportunity to consider any proposed settlement. Unaccepted proposals of settlement and related matters, e.g., proposed stipulations not agreed to, shall not be admissible in evidence in any administrative proceeding of the Food and Drug Administration. The Food and Drug Administration will oppose the admission in evidence of any such information in any court proceeding or in any other administrative proceeding.

#### § 2.25 Waiver, suspension, or modification of procedural requirements.

The Commissioner or the presiding officer, with respect to matters pending before him, may on his own initiative or at the request of any participant waive, suspend, or modify any provision in Subparts B through F of this Part applicable to the conduct of a public hearing by announcement at the hearing or by notice in advance of the hearing, if he deter-

mines that no participant will be prejudiced, the ends of justice will thereby be served, and such action is in accordance with law.

#### Subpart B—Formal Evidentiary Public Hearings

##### § 2.100 Scope of subpart.

Subpart B governs the procedures applicable whenever any of the following applies:

(a) A person has a right to an opportunity for a hearing under the provisions of the laws administered by the Commissioner specified in § 2.12(c).

(b) The Commissioner concludes, in his discretion, that it would be in the public interest to hold a formal evidentiary public hearing on any matter, or class of matters, of importance pending before the Food and Drug Administration.

##### INITIATION OF PROCEEDINGS

#### § 2.110 Initiation of a formal evidentiary public hearing involving the issuance, amendment, or revocation of a regulation.

(a) An administrative proceeding in which there is an opportunity for a formal evidentiary public hearing pursuant to sections 409(f), 502(n), 507(f), 512(n)(5), 701(e), or 706(d) of the act or sections 4 or 5 of the Fair Packaging and Labeling Act involving the issuance, amendment, or revocation of a regulation shall be initiated:

(1) By the Commissioner on his own initiative, e.g., as provided in § 121.72 for food additives, or

(2) By a petition from an interested person:

(i) In the form specified in other applicable sections in this chapter, e.g., the form for a color additive petition in § 8.4 of this chapter or the form for an antibiotic petition in § 431.50 of this chapter, or

(ii) If no form is specified in other applicable sections of this chapter, in the form specified in § 2.7.

(b) Upon receiving a petition submitted pursuant to paragraph (a) (2) of this section, the Commissioner shall:

(1) If it involves any matter subject to section 701(e) of the act or sections 4 or 5 of the Fair Packaging and Labeling Act, and meets the requirements for filing, follow the provisions of § 2.10 (b) through (f).

(2) If it relates to a color additive or food additive, and the petition meets the requirements for filing in §§ 8.4, 8.5, and 121.51 through 121.53 of this chapter, publish a notice of filing of the petition in the FEDERAL REGISTER within 30 days after the petition is filed in lieu of a notice of proposed rule making.

(c) The Commissioner may issue, amend, or revoke an antibiotic regulation without the requirements of notice and public procedure in § 2.10(b) or delayed effective date in § 2.10(c) (4) on his own initiative or as a result of a petition containing the required evidence of safety and effectiveness when the regulation is technical in nature, interested persons have been consulted, and there

are no significant points of controversy, or when the regulation imposes safety requirements which the Commissioner concludes are important for the public health.

(d) The notice published in the FEDERAL REGISTER promulgating the regulation shall state the time, place, and method for adversely affected persons to submit objections and requests for hearing, and that objections and requests for hearing shall be submitted in accordance with the requirements of this Part.

(e) On or before the 30th day after the date of the publication in the FEDERAL REGISTER of a final regulation, or of a notice withdrawing a proposal initiated by a petition pursuant to § 2.6(a), subject to this section, any person who would be adversely affected if such regulation were placed in effect may submit written objections thereto to the Commissioner and may make a written request for a formal evidentiary public hearing on the stated objections. This 30-day period shall not be extended by the Commissioner. In the case of any petition or proposal to issue, amend, or repeal a color additive regulation after publication of the final regulation, if referral of such petition or proposal is made to an advisory committee in accordance with section 706(b) (5) (C) of the act, written objections and requests for a hearing may be submitted on or before the 30th day after the date on which the Commissioner publishes his order confirming or modifying his previous order.

#### § 2.111 Initiation of a formal evidentiary public hearing involving the issuance, amendment, or revocation of an order.

(a) An administrative proceeding in which there is an opportunity for a formal evidentiary public hearing pursuant to sections 505 (d) or (e), 512 (d), (e), (m) (3), or (m) (4) of the act, or section 351(a) of the Public Health Service Act, involving the issuance, amendment, or revocation of an order shall be initiated:

(1) By the Commissioner on his own initiative, or

(2) By a petition submitted in the form specified in other applicable sections in this chapter, e.g., § 314.1(c) for new drug applications, § 514.1 for new animal drug applications, § 514.2 for applications for animal feeds, or § 601.3 for licenses for biologic products, or

(3) By a petition from an interested person in the form specified in § 2.7.

(b) A notice of opportunity for hearing on any proposal to deny or revoke approval of an order or any part thereof shall be published in the FEDERAL REGISTER together with an explanation of the grounds for the proposed action. The notice of opportunity for hearing shall state the time, place, and method for adversely affected persons to submit requests for hearing, and that requests for hearing shall be submitted in accordance with the requirements of this Part. The applicant for or holder of the approval or license that is the subject of the order in question and all other persons subject

to the notice shall have 30 days after issuance of the notice within which to request a hearing on the proposed action pursuant to the provisions of §§ 314.200, 514.200, and 601.7(a) of this chapter. This 30-day period shall not be extended by the Commissioner.

(c) In considering the issuance, amendment, or revocation of an order, the Commissioner may use any applicable optional procedure specified in § 2.7 (g).

#### § 2.112 Filing objections and requests for a hearing on a regulation or order.

(a) Objections to agency action and requests for a hearing submitted pursuant to § 2.110(d) shall be submitted to the Hearing Clerk and shall be accepted for filing if they comply with all of the following conditions:

(1) Objections and requests for a hearing shall be submitted on or before the day specified in § 2.110(d).

(2) Each objection to a specific provision of the Commissioner's regulation or proposed order shall be separately numbered.

(3) Each numbered objection shall specify with particularity the provision of the regulation or proposed order to which objection is made.

(4) Each numbered objection on which a hearing is requested shall specifically so state. The failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection.

(5) Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. The failure to include such description and analysis for any particular objection shall constitute a waiver of the right to a hearing on that objection, but such description and analysis shall be used only for the purpose of determining whether a hearing has been justified pursuant to § 2.113 and shall not limit the evidence that may be presented if a hearing is granted.

(1) A copy of any report, article, survey, or other written document relied upon shall be submitted.

(ii) A summary of the nondocumentary testimony to be presented by any witnesses relied upon shall be submitted.

(b) Requests for hearing submitted pursuant to § 2.111(b) shall be submitted to the Hearing Clerk and shall be accepted for filing if they comply with all of the following conditions:

(1) Requests for hearing shall be submitted on or before the 30th day after the date of publication of the notice of opportunity for hearing in the FEDERAL REGISTER.

(2) Requests for hearing shall comply with the requirements specified in §§ 314.200, 514.200, and 601.7(a) of this chapter.

(c) Any objection or request for a public hearing which meets the requirements of this section shall be filed by the

Hearing Clerk in the relevant docket file. If an objection or request for a public hearing fails to meet the requirements of this section and the deficiency becomes known to the Hearing Clerk, the Hearing Clerk shall return it with a copy of the applicable regulations, indicating those provisions not complied with. A deficient objection or request for a hearing may be supplemented and subsequently filed if submitted within the 30-day time period specified in § 2.110(d) or § 2.111(b).

(d) If an objection to a regulation issued pursuant to a petition submitted pursuant to § 2.110(a) (2) is submitted by a person other than the petitioner and is filed by the Hearing Clerk, the petitioner may submit a written reply thereto to the Hearing Clerk.

#### § 2.113 Ruling on objections and requests for hearing.

(a) As promptly as is feasible the Commissioner shall review all objections and requests for hearing filed pursuant to § 2.112 and shall determine:

(1) Whether any of the objections or requests for hearing filed justify modification or revocation of the regulation or order involved pursuant to § 2.114.

(2) If a formal evidentiary public hearing has been requested, whether it has been justified as required by this section.

(3) If a public hearing has been requested before a Public Board of Inquiry pursuant to Subpart C of this Part, or before a public advisory committee pursuant to Subpart D of this Part, or before the Commissioner pursuant to Subpart E of this Part, whether it has been justified.

(b) A request for a formal evidentiary public hearing shall be granted on a matter involving the issuance, amendment, or revocation of a regulation or order if, based upon the data, information, and views contained in his objection and request for hearing, a person has shown that all of the following are true:

(1) There is a genuine and substantial issue of fact for resolution at a hearing. A hearing will not be granted on issues of policy or law.

(2) The factual issue is capable of being resolved by available and specifically identified reliable evidence. A hearing will not be granted on the basis of mere allegations or denials or general descriptions of positions and contentions.

(3) The data and information identified in the objection and request for hearing, if established at a hearing, would be adequate to justify resolution of the factual issue in the way sought by the person. A hearing will be denied if the Commissioner concludes that, even assuming the truth and accuracy of all of the data and information submitted in support of the objection and request for hearing, they are insufficient to justify the factual determination urged.

(4) Resolution of the factual issue in the way sought by the person is adequate to justify the action requested. A hearing will not be granted on factual issues that are not determinative or controlling

with respect to the action requested, e.g., when the Commissioner concludes that his action would be the same even if the factual issue were resolved in the way sought, or in the case of a request that a final regulation include a provision not reasonably encompassed within the proposal. A hearing will be granted upon proper objection and request for hearing when a food standard or other regulation is shown to have the effect of excluding or otherwise affecting a product or ingredient, but not when such standard or regulation does not have such an effect.

(5) The action requested is not on its face inconsistent with or in violation of any provision in the act or any regulation in this chapter particularizing statutory standards. The proper procedure in such circumstances is for the person requesting the hearing to petition for an amendment or waiver of the regulation involved, e.g., a hearing will be denied with respect to withdrawal of approval of a new drug application which is not in compliance with an applicable OTC drug monograph promulgated pursuant to the procedures established in Part 330 of this chapter or which is not supported by evidence of effectiveness meeting the requirements of §§ 314.111(a) (5) and 330.10(a) (4) (ii) of this chapter on the ground that the procedure is to petition for an amendment to the monograph pursuant to § 330.10(a) (11) of this chapter, or to obtain approval of a deviation pursuant to § 330.11 of this chapter, or to request a waiver of the requirements for proof of effectiveness as provided in §§ 314.111(a) (5) and 330.10(a) (4) (ii) of this chapter.

(6) All of the conditions and requirements specified in other applicable provisions of this chapter, e.g., §§ 2.5, 2.111, 2.112, 314.200, 430.20(b), 514.200, and 601.7(a), and in the notice promulgating the final regulation or the notice of opportunity for hearing are fully met.

(c) In making his determination pursuant to paragraph (a) of this section, the Commissioner may use any of the optional procedures specified in § 2.7(g) and in other applicable provisions of this chapter, e.g., §§ 314.200, 430.20(b), 514.200, and 601.7(a).

(d) Where a person files an objection and request for hearing pursuant to §§ 2.110 through 2.112 relating to a regulation or order, it is uncertain whether a hearing has been justified pursuant to the principles established in paragraph (b) of this section, and the Commissioner concludes that summary decision against the person requesting a hearing should be considered, he may serve upon such person by registered mail a proposed order denying a hearing. Such person shall have 30 days after receipt of such proposed order to demonstrate that the submission justifies a hearing.

#### § 2.114 Modification or revocation of regulation or order.

If the Commissioner determines upon review of an objection or request for hearing filed pursuant to §§ 2.110 through 2.112 that the regulation or order involved in the proceeding should properly

## RULES AND REGULATIONS

to § 2.111(b) requests a hearing and others do not, the Commissioner may issue a final order covering all such drug products at once or may issue more than one final order covering different drug products at different times.

## APPEARANCE AND PRACTICE

## § 2.130 Appearance.

(a) Any interested person may appear in person or by or with counsel or other duly qualified representative in any formal evidentiary public hearing and, subject to § 2.155, may be heard with respect to all matters relevant to the issues under consideration.

(b) Any person appearing in a representative capacity in any such hearing shall submit a signed statement of authorization or other documentation verifying his authority to do so.

## § 2.131 Written notice of appearance.

(a) Any interested person desiring to appear at any formal evidentiary public hearing shall, within 30 days after publication of the notice of hearing in the FEDERAL REGISTER pursuant to § 2.117, file with the Hearing Clerk in accordance with § 2.5 a written notice of appearance in the form specified in paragraph (b) of this section. The notice shall state with particularity the person's interest in the proceeding and shall set forth the issues on which the person desires to be heard.

(b) The form of the written notice of appearance shall be as follows:

(Date)

Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852

## NOTICE OF APPEARANCE

Docket No. -----

Pursuant to the provisions of 21 CFR 2.121 governing the procedure in this matter, please enter the appearance of:

(Name)

(Street address)

(City and State)

(Telephone number)

on behalf of:

(Name)

(Street address)

(City and State)

(Telephone number)

The following statements are made as part of this notice of appearance.

A. *Specific Interest.* (A statement of the specific interest of the person in the proceeding, including the specific issues of fact concerning which the person desires to be heard.)

B. *Commitment to Participate.* (A statement that the person will present documentary evidence or testimony at the hearing and will comply with the requirements of 21 CFR 2.153, or, in the case of a hearing before a Public Board of Inquiry, with the requirements of 21 CFR 2.205.)

C. *Statement of Representation.* (If the person is appearing in a representative capacity, a statement that he is authorized to do so. A signed statement of authorization or other documentation verifying his authority shall be attached.)

(Signed)

(c) All notices, pleadings, documents, and other submissions to be served upon a person in the course of the hearing pursuant to § 2.151 shall be mailed to the address shown in the notice of appearance or delivered in person to the person specified in the notice of appearance.

(d) A written notice of appearance may be amended by filing a new written notice of appearance and serving it upon all participants in the hearing.

(e) No person may participate in any aspect or at any stage of a formal evidentiary public hearing if he has not filed a written notice of appearance or if his notice of appearance has been stricken pursuant to paragraph (g) of this section.

(f) The presiding officer may, upon motion, permit a person to file a written notice of appearance in the hearing after the 30-day time period for filing such notices has expired, but only upon a showing of good cause as to why such a notice was not filed within such time period.

(g) The presiding officer may strike the appearance of any person, after giving him an opportunity to show cause why his appearance should not be stricken, for nonparticipation in the hearing, for failure to comply with any requirement of this subpart, e.g., disclosure of information as required by § 2.153 or the prehearing order issued pursuant to § 2.158, or for violation of the rules of conduct established in § 2.156. Any person whose appearance has been stricken may petition the Commissioner for interlocutory review of such action.

## PRESIDING OFFICER

## § 2.140 Presiding officer.

A presiding officer shall preside over every formal evidentiary public hearing held pursuant to this subpart. The presiding officer shall be the Commissioner, a member of the office of the Commissioner to whom the Commissioner has delegated the responsibility for the matter involved, or an Administrative Law Judge qualified under 5 U.S.C. 3105 and designated by the Commissioner to conduct the hearing in the notice of hearing or in a later notice published pursuant to § 2.118(a) (6) of this chapter.

## § 2.141 Commencement of functions.

The functions of the presiding officer shall commence upon his designation and terminate upon the forwarding of the recommended decision or the filing of the initial decision pursuant to § 2.180.

## § 2.142 Authority of presiding officer.

The presiding officer shall have the authority and duty to conduct a fair and expeditious hearing and to maintain

order. He shall have all powers necessary to these ends, including, but not limited to, the power to:

(a) Arrange and issue notice of the date, time, and place of oral hearings and conferences and, upon proper notice, to change the date, time, and place of oral hearings and conferences previously set.

(b) Establish the methods and procedures to be used in the development of evidentiary facts, including the procedures specified in § 2.158(b) and to rule upon the need for oral testimony and cross-examination pursuant to § 2.154 (b).

(c) Prepare, after considering the views of the participants, written statements of areas of factual disagreement among the participants.

(d) Hold conferences to settle, simplify, or determine the issues in a hearing or to consider other matters that may facilitate the expeditious disposition of the hearing.

(e) Administer oaths and affirmations.

(f) Regulate the course of the hearing and govern the conduct of participants therein.

(g) Examine witnesses and inform witnesses that they must fully respond to all questions or have all of their testimony stricken.

(h) Rule on, admit, exclude, or limit evidence.

(i) Establish the time for filing motions, petitions, briefs, findings, or other submissions.

(j) Rule on motions and other procedural matters pending before him.

(k) Rule on motions for summary decision in accordance with § 2.159.

(l) Order that the hearing be conducted in stages in cases where the number of parties is large or the issues are numerous and complex.

(m) Waive, suspend, or modify any rule in this subpart pursuant to § 2.25 if he determines that no party will be prejudiced, the ends of justice will be thereby served, and such action is in accordance with law.

(n) Strike the appearance of any person pursuant to § 2.131(g) or exclude any person from the hearing pursuant to § 2.156 or otherwise take reasonable disciplinary action.

(o) Take any action permitted to the presiding officer as authorized by this Subpart B or in conformance with law for the maintenance of order at the hearing and for the expeditious, fair, and impartial conduct of the proceeding.

## § 2.143 Disqualification of presiding officer.

(a) Any participant in the proceeding may, by motion made to the presiding officer, request that the presiding officer disqualify himself and withdraw from the proceeding. The presiding officer shall rule upon any such motion and shall promptly certify the motion and his ruling thereon to the Commissioner for interlocutory review.

(b) A presiding officer shall withdraw from any proceeding in which he deems himself disqualified for any reason.

## § 2.144 Unavailability of presiding officer.

(a) In the event that the presiding officer is unable to act for any reason whatever, the powers and duties to be performed by him in connection with any proceeding shall be assigned by the Commissioner to another presiding officer. Such substitution shall have no effect on any aspect of the hearing, except as the new presiding officer may order pursuant to the provisions of this subpart.

(b) Any motion predicated upon such substitution shall be made within 10 days thereafter.

## HEARING PROCEDURES

## § 2.150 Filing and service of submissions.

(a) All submissions, including pleadings, relating to a formal evidentiary public hearing shall be filed with the Hearing Clerk pursuant to § 2.5.

(b) A copy of each such submission shall be served by the person making the submission upon each other participant in the proceeding, except that submissions of documentary data and information may but are not required to be served upon each participant. Any transmittal letter, pleading, summary, statement of position, certification pursuant to paragraph (d) of this section, or other similar document accompanying a submission of documentary data and information shall be served upon each participant pursuant to this paragraph.

(c) Service pursuant to this section shall be accomplished by mailing it to the address shown in the notice of appearance or by personal delivery.

(d) All submissions pursuant to this section shall be accompanied by a signed certification stating the extent to which the submission has been served on each participant, or is exempt from such service, pursuant to paragraph (b) of this section.

(e) No written submission or other portion of the administrative record shall be held in confidence, except as provided in § 2.171.

## § 2.151 Petition to participate in forma pauperis.

(a) Any participant who believes that compliance with the filing and service requirements of this section constitutes an unreasonable financial burden shall submit to the Commissioner a petition to participate in forma pauperis.

(b) Such petition shall be pursuant to § 2.7, except that the heading shall be "REQUEST TO PARTICIPATE IN FORMA PAUPERIS, DOCKET NO. -----" Pursuant to the guidelines established in § 4.43 (b) and (c) of this chapter, such petition shall demonstrate that either (i) the person is indigent and his participation has a strong public interest justification, or (ii) such participation is in the public interest because it can be considered primarily as benefiting the general public.

(c) The Commissioner may, in his discretion, grant or deny such petition. If such petition is granted, the participant

## RULES AND REGULATIONS

23005

may file only one copy of each submission with the Hearing Clerk, and it shall be the responsibility of the Hearing Clerk, at agency expense, to make sufficient additional copies for the administrative record and to serve a copy upon each other participant.

## § 2.152 Advisory opinions.

Prior to or during the pendency of any formal evidentiary public hearing any person may request the Commissioner for an advisory opinion as to the applicability to a specific situation of any regulation or order under consideration in an administrative proceeding. Requests for such opinions shall be made pursuant to § 2.19.

## § 2.153 Disclosure of data and information by the participants.

(a) Before the notice of hearing is published pursuant to § 2.118, the director of the bureau responsible for the matters involved in the hearing shall submit to the Hearing Clerk:

(1) The relevant portions of the administrative record of the proceeding up to that time. Those portions of the administrative record of the proceeding which are not relevant to the issues to be considered at the public hearing shall not be placed on public display and shall not be part of the administrative record of that proceeding.

(2) All documents in his files containing factual data and information, whether favorable or unfavorable to his position, which relate to the issues involved in the hearing.

(3) All other documentary data and information on which he relies.

(4) A narrative statement of his position on the factual issues stated in the notice of hearing and the type of evidence he intends to introduce in the hearing in support of his position.

(5) A signed statement that, to the best of his knowledge and belief, the submission complies with the requirements of this section.

(b) Within 60 days after the notice of hearing is published in the FEDERAL REGISTER pursuant to § 2.118, each participant shall submit to the Hearing Clerk all data and information specified in paragraphs (a) (2) through (5) of this section, and any objections with respect to the completeness of the administrative record filed pursuant to paragraph (a) (1) of this section.

(c) The submissions required by paragraphs (a) and (b) of this section may be supplemented later in the proceeding, with the approval of the presiding officer, upon a showing that the material contained in the supplement was not reasonably known or available when the submission was made or that the relevance of the material contained in the supplement could not reasonably have been foreseen at that time.

(d) The failure to comply with the provisions of this section in the case of a participant shall constitute a waiver of the right to participate further in the hearing and in the case of a party shall also constitute a waiver of the right to a hearing.

(e) Any documentary data and information submitted by one participant may be referenced by another. Participants are encouraged to exchange and consolidate lists of documentary evidence prior to reproducing it for submission to the Hearing Clerk in order to reduce duplicative submissions. If a particular document is bulky or is in limited supply and cannot reasonably be reproduced, and it constitutes relevant evidence, a participant may request the presiding officer for permission to submit a reduced number of copies to the Hearing Clerk.

(f) The presiding officer shall rule on questions relating to this section.

## § 2.154 Purpose; oral and written testimony; burden of proof.

(a) A formal evidentiary public hearing is held for the purpose of receiving evidence relating to an issue of fact determining the validity of a regulation or order subject to such a hearing. The objective of such a hearing is the fair determination of facts in a manner consistent with the right of all interested persons to participate and the public interest in expeditiously concluding controversies over matters affecting the public health and welfare.

(b) To achieve this objective, the evidence at a formal evidentiary public hearing shall be developed to the maximum feasible extent through written submissions, including written direct testimony which may be in narrative or in question-and-answer form, written cross-examination, and such other methods for the testing and proper evaluation of factual propositions as the presiding officer determines are necessary for a full and true disclosure of relevant evidentiary facts.

(1) In a hearing held pursuant to section 409(f), 502(n), 507(f), 512(n), 701 (e), or 706(d) of the act or section 4 or 5 of the Fair Packaging and Labeling Act involving the issuance, amendment, or revocation of a regulation:

(i) All direct testimony shall be submitted in writing, except upon a showing that written direct testimony is insufficient to adduce testimony for a full and true disclosure of relevant evidentiary facts and that the participant will be prejudiced by denial of a request to present oral direct testimony.

(ii) Oral cross-examination of witnesses shall be permitted only upon a showing that the cross-examination requested is necessary because alternative means of developing relevant evidentiary facts are insufficient to adduce testimony required for a full and true disclosure of relevant evidentiary facts, and that the party requesting an opportunity for oral cross-examination will be prejudiced by denial of the request.

(2) In a hearing held pursuant to section 505 (d) or (e) or 512 (d), (e), (m) (3), or (4) of the act, or section 351 (a) of the Public Health Service Act, involving the issuance, amendment, or revocation of an order, the issues may have general applicability and depend upon general facts that do not concern any particular action of a specific party, e.g., the safety or effectiveness of a class

of drug products, or may have specific applicability to past action and depend upon particular facts concerning only that party, e.g., the applicability of a grandfather clause to a particular brand of a drug or the failure of a particular manufacturer to meet required manufacturing and processing specifications or other general standards.

(i) Where the proceeding involves general issues, all direct testimony shall be submitted in writing, except upon a showing that written direct testimony is insufficient to adduce testimony for a full and true disclosure of relevant evidentiary facts and that the participant will be prejudiced by denial of a request to present oral direct testimony. Where the proceeding involves particular issues, each party shall determine whether, and the extent to which, he wishes to present his direct testimony orally or in writing.

(ii) Oral cross-examination of witnesses shall be permitted only upon a showing that the cross-examination requested is necessary because alternative means of developing relevant evidentiary facts are insufficient to adduce testimony required for a full and true disclosure of relevant evidentiary facts, and that the party requesting opportunity for oral cross-examination will be prejudiced by denial of the request.

(3) All oral and written testimony of witnesses shall be under oath.

(c) In considering whether a request for cross-examination of a particular witness has been justified, the presiding officer shall take into account the following factors:

(1) The extent to which a full and true disclosure with respect to any disputed issue of fact can be achieved through the presentation of additional direct evidence.

(2) The extent to which there are circumstantial guarantees of the trustworthiness of the direct evidence sought to be made the subject of cross-examination.

(3) Whether the particular person's testimony sought to be made the subject of cross-examination is required for the resolution of any disputed issue of fact.

(4) Whether a dispute concerns facts in contrast to the inferences and conclusions to be drawn from the facts.

(5) Whether the direct evidence sought to be made the subject of cross-examination is relevant and material to the issues of fact as to which the hearing has been justified.

(d) Except as provided in paragraph (e) of this section, in any formal evidentiary public hearing involving the issuance, amendment, or revocation of a regulation or order, the originator of the proposal or petition or of any significant modification thereof shall be, within the meaning of 5 U.S.C. 556(d), the proponent of the regulation or order, and accordingly shall have the burden of proof. Any participant who proposes the substitution of a new provision for a provision objected to shall have the burden of proof in relation to the new provision so proposed.

(e) At any formal evidentiary public hearing involving the issuance, amendment, or revocation of a regulation or order relating to the safety or effectiveness of a drug, food additive, or color additive, the participant who is contending that the product is safe or effective or both and who is requesting approval or contesting withdrawal of approval shall have the burden of proof in establishing safety or effectiveness or both and thus the right to approval. The burden of proof remains on such participant in an amendment or revocation proceeding.

#### § 2.155 Participation of nonparties.

(a) A nonparty participant shall have the right:

(1) To attend all conferences (including the prehearing conference), oral proceedings, and arguments held in connection with or as part of a formal evidentiary public hearing.

(2) To submit written testimony and documentary evidence for inclusion in the record.

(3) To file written objections, briefs, and other pleadings.

(4) To present oral argument.

(b) A nonparty participant shall not have the right:

(1) To submit written interrogatories.

(2) To conduct cross-examination.

(c) Any person whose petition is the subject of the hearing shall have the same rights as a party.

(d) The presiding officer may, in his discretion, permit a nonparty participant additional rights when he concludes that the participant's interests would not be adequately protected otherwise or that broader participation is required for a full and true disclosure of relevant evidentiary facts, but the rights of a nonparty participant shall in no event exceed the rights of a party.

#### § 2.156 Conduct at oral hearings or conferences.

All participants in a formal evidentiary public hearing shall conduct themselves with dignity and observe judicial standards of practice and ethics. They shall not indulge in personal attacks, unseemly wrangling, or intemperate accusations or characterizations. A representative of any party shall use his best efforts to restrain his client from improprieties in connection with any proceeding. Disrespectful, disorderly, or contemptuous language or contemptuous conduct, refusal to comply with directions, continued use of dilatory tactics, or refusal to adhere to reasonable standards of orderly and ethical conduct during any such hearing, shall constitute grounds for immediate exclusion from the proceeding at the direction of the presiding officer.

#### § 2.157 Time and place of prehearing conference.

A prehearing conference shall commence at the date, time, and place announced in the notice of hearing or in a later notice, published in the FEDERAL REGISTER pursuant to § 2.118(a)(8). At

that conference the presiding officer shall establish the methods and procedures to be used in developing the evidence, determine reasonable time periods for the conduct of the hearing, and designate the times and places for the production of witnesses for direct and cross-examination if leave to conduct oral examination is granted on any issue, insofar as is practicable at that time.

#### § 2.158 Prehearing conference procedure.

(a) All participants in a formal evidentiary hearing shall appear at the prehearing conference, which shall not commence until after the time for disclosure of data and information specified in § 2.153 has expired, fully prepared to discuss in detail and resolve all matters specified in paragraph (b) of this agenda as may be issued by the Commissioner or the presiding officer.

(1) All participants shall cooperate fully at all stages of the proceeding to achieve the objective of a fair and expeditious hearing, through advance preparation for the prehearing conference, including communications between the participants, requests for information at the earliest possible time, and the commencement of preparation of testimony. The failure of any participant to appear at the prehearing conference or to raise any matters that could reasonably be anticipated and resolved at the prehearing conference shall not be permitted to delay the progress of the hearing and shall constitute a waiver of the rights of the participant with regard thereto, including all objections to the agreements reached, actions taken, or rulings issued by the presiding officer with regard thereto, and may be grounds for striking his appearance pursuant to § 2.131.

(2) Each participant shall bring to the prehearing conference the following specific information, which shall be filed with the Hearing Clerk pursuant to § 2.151:

(i) Any additional data or information to supplement the submission filed pursuant to § 2.153, which may be filed if approved pursuant to § 2.153(c).

(ii) A list of all witnesses whose testimony will be offered, orally or in writing, at the hearing, together with a full curriculum vitae for each such witness. Additional witnesses may later be identified, with the approval of the presiding officer, upon a showing that the witness was not reasonably available at the time of the prehearing conference or that the relevance of his views could not reasonably have been foreseen at that time.

(iii) All prior written statements, which shall include articles and any written statement signed or adopted, or a recording or transcription of an oral statement made, by the persons who have been identified as witnesses if all of the following conditions apply:

(a) The statement is available without making request of the witness or any other person.

(b) The statement relates to the subject matter of the witness' testimony.

(c) The statement either was made before the time the person agreed to become a witness or has been made publicly available by the person.

(b) The presiding officer shall conduct a prehearing conference for the following purposes:

(1) To determine and reduce to writing the areas of factual disagreement which are to be considered at the formal evidentiary hearing. The presiding officer may:

(i) Require each participant to prepare and file written statements of position on the areas of disagreement described in the notice of hearing.

(ii) Require each participant to summarize the testimony which he proposes to present in support of his position, and to describe and justify any additional documentary evidence not included with the submission pursuant to § 2.153 and expected to be introduced.

(iii) Consider oral or written argument with respect to the areas of disagreement described in the notice of hearing or with respect to objections thereto.

(iv) Hold conferences off the record in an effort to reach agreement as to factual questions on which disagreement exists, except that all statements as to areas of disagreement shall be reduced to writing or be the subject of a verbatim transcript approved by the participants.

(2) To identify the most appropriate techniques for the development of the evidence on issues in controversy in addition to the submissions pursuant to § 2.153, and the manner and sequence in which they will be used, including, where oral examination is to be conducted, the sequence in which witnesses will be produced for, and the time and place of, the oral examination. The methods and procedures which the presiding officer may consider for use in developing the evidence include but are not limited to:

(i) Submission of narrative statements of position on each factual issue in controversy.

(ii) Submission of evidence or identification of previously submitted evidence in support of such statements, such as affidavits, verified statements of fact, data, studies, reports, and any other type of written material.

(iii) Identification of all witnesses and submission of testimony of such witnesses.

(iv) Exchange of written interrogatories directed to particular witnesses for the purpose of developing the evidence on particular disputed facts.

(v) Written requests to any party for the production of additional documentation, data, or other information relevant and material to the facts in issue.

(vi) Submission of written questions to be orally propounded by the presiding officer to a specific witness.

(vii) Isolation of disputed facts as to which oral examination and/or cross-examination is appropriate pursuant to § 2.154(b).

(3) To group participants with substantially like interests for purposes of

eliminating duplicative or repetitive development of the evidence, making and arguing motions and objections, including motions for summary decision, filing briefs, and presenting oral argument.

(4) To hear and determine objections to the admission into evidence of data and information submitted pursuant to § 2.153.

(5) To investigate the possibility of obtaining stipulations and admissions of facts.

(6) To consider such other matters and take such other action as may aid in the expeditious disposition of the proceeding.

(c) The presiding officer shall prepare a written prehearing order reciting the actions taken at the prehearing conference and setting forth the schedule for the hearing. Such order shall include a written statement of the areas of factual agreement and disagreement and of the methods and procedures to be used in developing the evidence and the respective duties of the parties in connection therewith. Such order shall control the subsequent course of the hearing unless modified by the presiding officer for good cause shown.

#### § 2.159 Summary decisions.

(a) Any participant in a formal evidentiary public hearing may, after commencement of the hearing, submit to the Hearing Clerk pursuant to § 2.150 a motion with or without supporting affidavits for a summary decision in his favor with respect to any issue under consideration. Any other participant may, within 10 days after service of the motion, which time may be extended for an additional 10 days by the presiding officer for good cause shown, serve opposing affidavits or countermove for summary decision. The presiding officer may, in his discretion, set the matter for argument and call for the submission of briefs.

(b) The presiding officer shall grant such motion if the objections, requests for hearing, other pleadings, affidavits, and any material filed in connection with the hearing, or matters officially noticed, show that there is no genuine issue as to any material fact and that a participant is entitled to summary decision.

(c) Affidavits shall set forth such facts as would be admissible in evidence and shall show affirmatively that the affiant is competent to testify to the matters stated therein. When a motion for summary decision is made and supported as provided in this section, a participant opposing the motion may not rest upon mere allegations or denials or general descriptions of positions and contentions. His response, by affidavits or as otherwise provided in this section, must set forth specific facts showing that there is a genuine issue of fact for the hearing.

(d) Should it appear from the affidavits of a participant opposing the motion that he cannot, for sound reasons stated, present by affidavit facts essential to justify his opposition, the presiding officer may deny the motion for summary decision or may order a continuance to permit affidavits or additional evidence

to be obtained or may make such order as is just.

(e) If on motion under this motion a summary decision is not rendered upon the whole case or for all the relief asked, and development of evidentiary facts is found necessary, the presiding officer shall make an order specifying the facts that appear without substantial controversy and directing further evidentiary proceedings. The facts so specified shall be deemed established.

(f) Any participant may obtain interlocutory review by the Commissioner of a summary decision of the presiding officer.

#### § 2.160 Receipt of evidence.

(a) A formal evidentiary public hearing consists of the development of evidence and the resolution of factual issues in the manner set forth in the procedures established in this subpart and in the order issued by the presiding officer after the prehearing conference.

(b) All orders issued by the presiding officer, transcripts of oral hearings or arguments, written statements of position, written direct testimony, written interrogatories and the responses thereto, and any other data, studies, reports, documentation, information, and other written material of any kind submitted in the proceeding shall be a part of the administrative record of the hearing, and shall be placed on public display in the office of the Hearing Clerk promptly upon receipt in that office, except as provided in § 2.171.

(c) A written submission to the record shall be admissible as evidence unless a participant objects and the presiding officer excludes it as inadmissible.

(1) The presiding officer shall exclude written evidence as inadmissible only on the following grounds:

(i) The evidence is a document that is not authentic, or

(ii) Exclusion of part or all of the written evidence of a participant is necessary or appropriate to enforce the requirements of this subpart.

(2) The presiding officer shall not exclude any written evidence as inadmissible on the ground that it is irrelevant, immaterial, or repetitive. All such written evidence shall be admitted even if it is of no probative value. Irrelevant or immaterial written evidence shall be regarded as such and shall not be given weight or probative value because of its admission.

(3) Any written evidence excluded by the presiding officer as inadmissible shall remain a part of the administrative record, as an offer of proof, for purposes of judicial review.

(d) Oral testimony, whether on direct or on cross-examination, shall be admissible as evidence unless a participant objects and the presiding officer excludes it as inadmissible.

(1) The presiding officer shall exclude oral evidence as inadmissible only on the following grounds:

(i) The oral evidence is irrelevant, immaterial, or repetitive, or

XUM

(ii) Exclusion of part or all of the oral evidence of a participant is necessary or appropriate to enforce the requirements of this subpart.

(2) Whenever oral evidence is excluded by the presiding officer as inadmissible, the participant offering such evidence may make an offer of proof, which shall be part of the record. The offer of proof shall consist of a brief statement, which the presiding officer may require to be in writing, describing the evidence excluded. Upon review, the Commissioner may reopen the hearing to permit such evidence to be admitted if he determines that its exclusion was erroneous and prejudicial.

(e) All participants shall be responsible for apprising themselves of the contents of the administrative record in timely fashion for purposes of formulating objections to the admissibility of any item into evidence and evaluating the need for the submission of additional evidence.

(f) The presiding officer shall, on his own initiative as the circumstances warrant, or upon the motion of any participant for good cause shown, schedule conferences to monitor the progress of the hearing, narrow and simplify the issues, and consider and rule on motions, requests, and other matters concerning the development of the evidence.

(g) The presiding officer shall conduct such proceedings as are necessary for the taking of oral testimony, for the oral examination of witnesses by the presiding officer on the basis of written questions previously submitted to him by the parties, and for the conduct of cross-examination of witnesses by the parties. The presiding officer shall screen written questions submitted to him to be asked orally of witnesses in order to exclude irrelevant or repetitious questions. The presiding officer shall limit oral cross-examination to prevent irrelevant or repetitious questions.

(h) The presiding officer shall order that the proceedings be closed for the taking of oral testimony relating to matters specified in § 2.5(j) (3). Participation in such closed proceedings shall be limited to the witness, his counsel, and Federal Government Executive Branch employees and special government employees. Such closed proceedings shall be permitted only for such oral testimony as directly relates to matters specified in § 2.5(j) (3) and shall not include other matters.

(i) Any party may at any time move for an order that the taking of evidence be concluded. Such motion shall be granted unless within 10 days of service thereof a participant files an opposition to such motion, supported by an affidavit stating that he wishes to submit, or by specified means adduce, additional evidence on facts relevant to the issues at the hearing, describing the nature of such evidence, and estimating the time necessary to submit or adduce it. In the event that such an opposition is filed, the presiding officer may (1) grant the motion if it appears that the evidence described in the affidavit filed in support of

the opposition does not relate to relevant facts or is duplicative or cumulative of evidence already on record at the hearing, (2) deny the motion, or (3) grant the motion but postpone its effect to a specified date in order that the participant opposing it may submit or adduce the evidence described in the affidavit. Upon the denial of a motion made under this paragraph, or the granting of a motion with a postponed effective date, no participant may submit additional evidence unless he has filed an opposition to the motion, and any participant who has filed an opposition shall confine the submission of additional evidence to the matters set forth in the affidavit in support of the opposition.

#### § 2.161 Official notice.

(a) Upon motion of any participant, the presiding officer shall take official notice of official publications of the Food and Drug Administration and other Federal agencies and of any technical, scientific, or other fact that is not subject to reasonable dispute in that it is capable of accurate and ready determination by resort to sources whose accuracy cannot reasonably be questioned.

(b) The presiding officer may take official notice of matters whether requested to do so or not.

(c) Where official notice is requested to be taken or is taken of a material fact not appearing in the evidence of record, any participant, on timely request, shall be afforded an opportunity to show the contrary.

#### § 2.162 Briefs and argument.

(a) As soon as possible after the completion of the taking of evidence, the presiding officer shall announce a schedule for the filing of briefs. Briefs shall include a statement of position on each issue as supported by the evidence of record, with specific and complete citations to the evidence, together with citations of points of law relied upon. Briefs shall contain proposed findings of fact and conclusions of law.

(b) The presiding officer may permit the presentation of oral argument at his discretion and in such manner as he believes is both practical and fair.

(c) Briefs and oral argument shall attempt to refrain from disclosing specific details of written and oral testimony and documents relating to matters specified in § 2.5(j) (3), but any reference essential to resolution of the issues involved shall be permitted.

#### § 2.163 Interlocutory appeal from ruling of presiding officer.

(a) Except as provided in paragraph (b) of this section and in §§ 2.131(g), 2.143(a), 2.159(f), and 2.165(c), where an interlocutory appeal is specifically authorized by this subpart, rulings of the presiding officer may not be appealed to the Commissioner prior to his consideration of the entire administrative record of the hearing.

(b) Any ruling of the presiding officer shall be the subject of an interlocutory appeal to the Commissioner where the presiding officer certifies on the record or

in writing that such an interlocutory appeal is necessary to prevent exceptional delay, expense, or prejudice to any participant, or substantial harm to the public interest.

(c) Where an interlocutory appeal is made to the Commissioner, any participant may file a brief with the Commissioner within such period as the Commissioner directs. Oral argument will be heard only at the discretion of the Commissioner.

#### § 2.164 Official transcript.

(a) Any oral testimony given at a formal evidentiary public hearing shall be reported verbatim. The presiding officer will make provision for a stenographic record of the testimony and for such copies of the transcript thereof as he requires for his own purpose.

(b) One copy of such transcript shall be placed on public display in the office of the Hearing Clerk upon receipt, where it may be reviewed by any interested person.

(c) Any person desiring a copy of the transcript of the testimony taken at the hearing or of any part thereof shall be entitled to the same, except as provided in § 2.171, upon application to the official reporter and payment of the costs thereof or pursuant to the provisions of Part 4 of this chapter.

#### § 2.165 Motions.

(a) Any participant may make a motion, including any request, to the presiding officer with respect to any matter relating to the proceeding. All motions shall be filed pursuant to § 2.150, except those made in the course of an oral hearing before the presiding officer.

(b) Within 10 days after service of any such motion, which may be shortened to 3 days or extended for an additional 10 days by the presiding officer for good cause shown, any participant in the proceeding may file a response to the motion.

(c) The presiding officer shall rule upon such motion and may certify such motion, together with his ruling, to the Commissioner for interlocutory review.

#### ADMINISTRATIVE RECORD

##### § 2.170 Administrative record of a formal evidentiary public hearing.

(a) The record of the administrative proceeding shall consist of the following:

(1) The order or regulation which gave rise to the hearing.

(2) All objections and requests for hearing filed by the Hearing Clerk pursuant to §§ 2.110 through 2.112.

(3) The notice of hearing published pursuant to § 2.118.

(4) All notices of appearance filed pursuant to § 2.131.

(5) All FEDERAL REGISTER notices pertinent to the proceeding.

(6) All submissions filed pursuant to § 2.151, e.g., the submissions required by § 2.153, all other documentary evidence and written testimony, pleadings, statements of position, briefs, and other similar documents.

(7) The transcript, written order, and all other documents relating to the pre-

hearing conference, prepared pursuant to § 2.158.

(8) All documents relating to any motion for summary decision pursuant to § 2.159.

(9) All documents of which official notice is taken pursuant to § 2.161.

(10) All pleadings filed pursuant to § 2.162.

(11) All documents relating to any interlocutory appeal pursuant to § 2.163.

(12) All transcripts prepared pursuant to § 2.164.

(13) Any other documents relating to the hearing and filed with the Hearing Clerk by the presiding officer or any participant.

(b) The record of the administrative proceeding shall be closed:

(1) With respect to the taking of evidence, at the time specified in § 2.160 (g).

(2) With respect to pleadings, at the time specified in § 2.162(a) for the filing of briefs.

(c) The presiding officer may, in his discretion, reopen the record to receive further evidence at any time prior to the filing of a recommended or initial decision.

##### § 2.171 Examination of administrative record.

The availability for public examination and copying of each document which is a part of the administrative record of the hearing shall be governed by the provisions of § 2.5(j). Each document which is available for public examination or copying shall be placed on public display in the office of the Hearing Clerk promptly upon receipt in that office.

##### § 2.172 Correction of administrative record.

After the close of the taking of evidence, the presiding officer shall afford witnesses, participants, and their counsel time, not longer than 30 days except in unusual cases, in which to submit written proposed corrections of the transcript of any oral testimony taken at the hearing, pointing out errors that may have been made in transcribing the testimony. The presiding officer shall promptly thereafter order such corrections made as in his judgment are required to make the transcript conform to the testimony.

##### § 2.173 Record for administrative decision.

The administrative record of the hearing specified in § 2.170 shall constitute the exclusive record for decision.

##### RECOMMENDED, INITIAL, TENTATIVE, AND FINAL DECISIONS

##### § 2.180 Recommended decision or initial decision.

(a) Within 90 days after the filing of briefs and any oral argument pursuant to § 2.162, the presiding officer shall prepare and file a recommended decision or initial decision based solely upon the administrative record of the hearing.

(1) The presiding officer shall prepare a recommended decision if the notice

of hearing so states pursuant to § 2.118 (a) (10).

(2) The presiding officer shall prepare an initial decision if the notice of hearing so states pursuant to § 2.118(a) (10) or if the notice of hearing is silent on the matter.

(b) The recommended decision or initial decision shall contain:

(1) Findings of fact based upon relevant, material, and reliable evidence of record.

(2) Conclusions of law.

(3) A full articulation of the reasons for the findings and conclusions, including a discussion of the significant factual and legal contentions made by any participant.

(4) Full citations to the administrative record supporting the findings and conclusions.

(5) An appropriate regulation or order supported by substantial evidence of record and based upon the findings of fact and conclusions of law.

(6) An effective date for the regulation or order.

(c) The recommended decision or initial decision shall attempt to refrain from disclosing specific details of written and oral testimony and documents relating to matters specified in § 2.5(j) (3), but any reference essential to resolution of the issues involved shall be permitted.

(d) If the presiding officer prepares a recommended decision he shall forward it, together with the certified record of the hearing, to the Commissioner.

(e) If the presiding officer prepares an initial decision:

(1) It shall be filed with the Hearing Clerk and served upon all participants.

(2) The initial decision shall become the decision of the Commissioner unless within 30 days after it is filed with the Hearing Clerk a participant in the proceeding files with the Hearing Clerk a notice of appeal to the Commissioner pursuant to § 2.182(a) or the Commissioner, on his own initiative, files with the Hearing Clerk a notice of review pursuant to § 2.182(d).

##### § 2.181 Tentative order.

(a) If the presiding officer prepares a recommended decision, as soon as practicable after it is received the Commissioner either shall adopt it as his tentative order or shall prepare a different tentative order. The tentative order shall contain findings of fact and conclusions of law as set forth in § 2.180 (b) and (c), and shall be filed with the Hearing Clerk and served upon all participants.

(b) The tentative order shall specify a reasonable time, ordinarily not to exceed 60 days, within which any participant may file exceptions. The exceptions shall point out with particularity the alleged errors in the tentative order and shall contain a specific reference to the items in the record on which exceptions are based. Such exceptions may be accompanied by a memorandum or brief in support thereof. If oral argument on the exceptions is desired, such a request shall be made with the exceptions.

(c) After the exceptions are filed the Commissioner shall determine whether he wishes to hear oral argument on the matter. If the Commissioner concludes that he should hear oral argument on the matter, the participants shall be informed of the date, time, and place for such oral argument, the amount of time that will be allotted to each participant for such oral argument, and the issues to be addressed.

##### § 2.182 Appeal from or review of initial decision.

(a) If the presiding officer files an initial decision, any participant in a proceeding may appeal it to the Commissioner by filing a notice of appeal with the Hearing Clerk within 30 days after the initial decision is filed. If any participant appeals the initial decision, all participants shall have an equal opportunity to participate in the appeal.

(b) Promptly after a notice of appeal is filed with the Hearing Clerk, the Commissioner shall inform all participants of the date by which they may file briefs, stating exceptions to or agreement with the initial decision and supporting reasons therefor, the time for which shall be not less than 30 nor more than 60 days following such notice. Reply briefs may be filed only with the express permission of the Commissioner.

(c) If oral argument on the appeal is desired, such a request shall be made with the briefs. After the briefs are filed the Commissioner shall determine whether he wishes to hear oral argument on the matter. If the Commissioner concludes that he should hear oral argument on the matter, the participants shall be informed of the date, time, and place for such oral argument, the amount of time that will be allotted to each participant for such oral argument, and the issues to be addressed.

(d) Within 40 days after the initial decision is filed, the Commissioner may file with the Hearing Clerk a notice stating that he will review the initial decision on his own initiative. Such review shall proceed pursuant to the provisions of paragraph (b) of this section.

##### § 2.183 Decision by Commissioner after exceptions to the tentative order.

If the presiding officer prepares a recommended decision and the Commissioner files a tentative order, as soon as practicable after the time for filing exceptions to the tentative order has passed, the Commissioner shall publish in the FEDERAL REGISTER his final order in the proceeding. The final order shall meet the requirements established in § 2.180 (b) and (c).

##### § 2.184 Decision by Commissioner on appeal or review of initial decision.

(a) If the presiding officer files an initial decision and a notice of appeal or review is filed pursuant to § 2.182, the presiding officer shall certify to the Commissioner the full administrative record of the proceeding, which shall include all briefs filed pursuant to § 2.162 and the initial decision.

V40-102 MAY 27 75

(b) On appeal from or review of the initial decision, the Commissioner shall have all the powers he would have in making the initial decision. The Commissioner may, on his own initiative or on the motion of any participant, remand the proceeding to the presiding officer with specific directions, e.g., to receive further evidence relating to a particular issue, where he concludes that such action is necessary for a proper decision in the matter.

(c) The scope of the issues on appeal shall be the same as the scope of the issues at the public hearing unless the Commissioner specifies otherwise.

(d) As soon as practicable after the filing of briefs and any oral argument, the Commissioner shall issue in the FEDERAL REGISTER his final decision in the proceeding based solely upon the administrative record of the hearing. Such final decision shall meet the requirements established in § 2.180 (b) and (c).

(e) The Commissioner may adopt the initial decision as the final decision, in whole or in part, if he concludes, after reviewing the administrative record, that it meets all the requirements specified in § 2.180 (b) and (c) and represents a sound, reasonable, and fair decision based upon all relevant factual, legal, and policy considerations.

#### § 2.185 Reconsideration and stay of action.

Following publication of the final decision, any participant may petition the Commissioner for reconsideration of any part or all of such decision pursuant to § 2.8 or may petition for a stay of such decision pursuant to § 2.9.

#### JUDICIAL REVIEW

##### § 2.190 Review by the courts.

(a) The Commissioner's final decision constitutes final agency action from which any participant may petition for judicial review pursuant to the statutory provisions governing the matter involved. Before requesting an order from a court for relief pending review, any participant seeking court review shall first submit a petition for a stay of action pursuant to § 2.9.

(b) The Food and Drug Administration will request consolidation in a single court of all petitions for judicial review related to a particular matter pursuant to 28 U.S.C. 2112(a).

##### § 2.191 Copies of petitions for judicial review.

The Chief Counsel for the Food and Drug Administration has been designated by the Secretary as the officer upon whom copies of petitions for judicial review shall be served. Such officer shall be responsible for filing in the court the record of the proceedings on which the final decision is based. The record of the proceeding shall be certified by the Commissioner.

#### Subpart C—Public Hearing Before a Public Board of Inquiry

##### § 2.200 Scope of subpart.

Subpart C governs the practices and procedures applicable whenever:

(a) The Commissioner concludes, in his discretion, that it is in the public interest to hold a public hearing before a Public Board of Inquiry, hereinafter referred to as a "Board," with respect to any matter, or class of matters, of importance pending before the Food and Drug Administration.

(b) Pursuant to specific provisions in other sections of this chapter, a matter pending before the Food and Drug Administration is subject to a public hearing before a Board.

(c) A person who has a right to an opportunity for a formal evidentiary public hearing under Subpart B of this Part waives that opportunity and in lieu thereof requests pursuant to § 2.117 of this Part the establishment of a Board to act as an administrative law tribunal with respect to the matters involved, and the Commissioner, in his discretion, accepts this request.

##### § 2.201 Notice of a public hearing before a Public Board of Inquiry.

If the Commissioner determines that a Board should be established to conduct a public hearing on any matter, he shall publish in the FEDERAL REGISTER a notice of hearing setting forth the following information:

(a) If the hearing is pursuant to § 2.200 (a) or (b), all applicable information described in § 2.117(e).

(1) If any written document is to be the subject matter of the hearing, it shall be published as part of the notice, or reference shall be made to it if it has already been published in the FEDERAL REGISTER, or the notice shall state that the document is available from the Hearing Clerk or an agency employee designated in the notice.

(2) For purposes of any such hearing, all participants who file a notice of appearance pursuant to § 2.117(e) (6) (ii) shall be deemed to be parties and shall be entitled to participate in selection of the Board pursuant to § 2.203(b).

(b) If the hearing is in lieu of a formal evidentiary hearing as provided in § 2.200(c), all of the information described in § 2.117(e).

##### § 2.202 Members of a Public Board of Inquiry.

(a) All members of a Board shall have medical, technical, scientific, or other qualifications relevant to the issues to be considered at the hearing, shall be subject to the conflict of interest rules applicable to special government employees, and shall be free from bias or prejudice with respect to the issues involved. A member of a Board may be a full-time or part-time Federal government employee or may serve on a Food and Drug Administration advisory committee but except with the agreement of all parties

shall not currently be a full-time or part-time employee of the Food and Drug Administration or otherwise act as a special government employee of the Food and Drug Administration.

(b) The director of the bureau of the Food and Drug Administration responsible for the matter which is the subject of a public hearing before a Board, the other parties to the proceeding, and any person whose petition is the subject of the hearing, shall, within 30 days after publication of the notice of hearing in the FEDERAL REGISTER, each submit to the Hearing Clerk the names and full curricula vitae of five nominees for members of the Board. Nominations shall state that the nominee is aware of the nomination, is interested in becoming a member of the Board, and appears to have no conflict of interest.

(1) All such persons may in consultation with each other agree upon a single list of five qualified nominees.

(2) Within 10 days after receipt of such names of nominees, such persons may submit comments to the Hearing Clerk on whether the nominees of the other persons meet the criteria established in paragraph (a) of this section.

(3) In addition to being filed with the Hearing Clerk, the lists of nominees and comments thereon shall be submitted to the persons who have the right to submit a list of nominees pursuant to this paragraph but not to all participants. They shall be held in confidence by the Hearing Clerk as part of the administrative record of the proceeding and shall not be available for public disclosure, and shall similarly be held in confidence by all persons who submit or receive them. This portion of the administrative record shall remain confidential but shall be available for judicial review in the event that it becomes relevant to any issue before a court.

(c) After reviewing the lists of nominees and any comments thereon, the Commissioner shall choose three qualified persons as members of a Board. One member shall be chosen from the lists of nominees submitted by the director of the bureau and any person who is not a party and whose petition is the subject of the hearing. The second member shall be chosen from the lists of nominees submitted by the other parties. The Commissioner shall then choose the third member from any source, who shall be the Chairman of the Board.

(1) If the Commissioner is unable to find a qualified person with no conflict of interest from among a list of nominees submitted, or if additional information is needed, the Commissioner shall request from the party involved the submission of such additional nominees or information as is necessary to choose a qualified person nominated by that person.

(2) If a person fails to submit a list of nominees as required by paragraph (b) of this section, the Commissioner may choose a qualified person in lieu of a person nominated by that person with-

out further consultation with that person.

(3) The Commissioner shall announce the members of a Board by filing a memorandum in the record of the proceeding and sending a copy to each participant who has filed a notice of appearance.

(d) In lieu of the procedure for selection of the members of a Board specified in paragraphs (b) and (c) of this section, the director of the bureau, the other party or parties to the proceeding, and any person whose petition is the subject of the hearing, may agree that any standing advisory committee listed in § 2.330 shall constitute the Board for a particular proceeding, or may mutually agree on any other procedure for selection of the members of the Board, or the number of members of the Board, subject to the approval of the Commissioner.

(e) The members of a Board shall serve as consultants to the Commissioner and shall be special government employees or government employees. A Board shall function as an administrative law tribunal with the consent of the parties involved in the proceeding and is not an advisory committee subject to the requirements of the Federal Advisory Committee Act or Subpart D of this Part.

(f) The chairman of a Board shall have the authority of a presiding officer set out in § 2.142.

##### § 2.203 Separation of functions; ex parte communications; administrative support.

(a) All proceedings of a Board shall be subject to the provisions of § 2.13, relating to separation of functions and ex parte communications. Representatives of the participants in any proceeding before a Board shall have no contact with the members of the Board, except as participants in such proceeding, and shall not participate in the deliberations of the Board.

(b) Administrative support for a Board shall be provided only by the office of the Commissioner and the Chief Counsel for the Food and Drug Administration.

##### § 2.204 Submissions to a Public Board of Inquiry.

(a) All submissions relating to a hearing before a Board shall be filed with the Hearing Clerk pursuant to § 2.5.

(b) A copy of any such submission shall be sent by the person making the submission to each participant in the proceeding, except as provided in §§ 2.202 (b) (3) and 2.207(c) and except that submissions of documentary data and information may but are not required to be sent to each participant. Any transmittal letter, summary, statement of position, certification pursuant to paragraph (d) of this section, or similar document accompanying a submission of documentary data and information shall be sent to each participant pursuant to this paragraph.

(c) Any such submission shall be sent as required by paragraph (b) of this section by mailing it to the address shown in the notice of appearance or by personal delivery.

(d) All submissions pursuant to this section shall be accompanied by a signed certification stating the extent to which the submission has been served on each participant, or is exempt from such service, pursuant to paragraph (b) of this section.

(e) No written submission or other portion of the administrative record shall be held in confidence, except as provided in §§ 2.202(b) (3) and 2.207(c).

(f) Any participant who believes that compliance with the requirements of this section constitutes an unreasonable financial burden shall submit to the Commissioner a petition to participate in forma pauperis.

(1) Such petition shall be pursuant to § 2.7, except that the heading shall be "REQUEST TO PARTICIPATE IN FORMA PAUPERIS, DOCKET NO. \_\_\_\_\_" Pursuant to the guidelines established in § 4.43 (b) and (c) of this chapter, such petition shall demonstrate that either (i) the person is indigent and his participation has a strong public interest justification, or (ii) such participation is in the public interest because it can be considered primarily as benefiting the general public.

(2) If the Commissioner grants such petition, the participant may file only one copy of each submission with the Hearing Clerk, and it shall be the responsibility of the Hearing Clerk to make sufficient additional copies for the administrative record and to serve a copy upon each other participant.

##### § 2.205 Disclosure of data and information by the participants.

(a) Before the notice of hearing is published pursuant to § 2.201, the director of the bureau responsible for the matters involved in the hearing shall submit to the Hearing Clerk:

(1) The relevant portions of the existing administrative record of the proceeding. Those portions of the administrative record of the proceeding which are not relevant to the issues to be considered at the public hearing shall not be submitted to the Hearing Clerk or placed on public display and shall not be part of the administrative record of the proceeding.

(2) A list of all persons whose views will be presented orally or in writing at the hearing.

(3) All documents in his files containing factual data and information, whether favorable or unfavorable to his position, which relate to the issues involved in the hearing.

(4) All other documentary data and information on which he relies.

(5) A signed statement that, to the best of his knowledge and belief, the submission complies with the requirements of this section.

(b) Within 60 days after the notice of hearing is published pursuant to § 2.201, each participant shall submit to the Hearing Clerk all data and information specified in paragraph (a) (2) through (5) of this section, and any objections with respect to the completeness of the administrative record filed pursuant to paragraph (a) (1) of this section.

(c) The submissions required by paragraphs (a) and (b) of this section may be supplemented later in the proceeding, with the approval of the Board, upon showing that the views of the persons or the material contained in the supplement were not known or reasonably available when the initial submission was made or that the relevance of the views of the persons or the material contained in the supplement could not reasonably have been foreseen.

(d) The failure to comply with the provisions of this section in the case of a participant shall constitute a waiver of the right to participate further in the hearing and in the case of a party shall constitute a waiver of the right to a hearing.

(e) The Chairman of the Board shall rule on questions relating to this section. Any participant dissatisfied with any such ruling may request the Commissioner for an interlocutory review of that ruling.

##### § 2.206 Proceedings of a Public Board of Inquiry.

(a) The purpose of a Board is to review medical, scientific, and technical issues fairly and expeditiously in order to reach a reasonable decision that is sound from a medical, scientific, and technical standpoint. The proceedings of a Board shall be conducted in the manner of a scientific inquiry rather than as a legal trial.

(b) Prior to the first hearing of a Board, all participants in the hearing shall have submitted to the Hearing Clerk the data and information required to be disclosed pursuant to § 2.205, subject to the sanctions specified in § 2.205(d).

(c) The Chairman of a Board shall call the first hearing of the Board at a reasonable time subsequent to receipt of the data and information specified in paragraph (b) of this section. Notice of the time and location of such hearing shall be published in the FEDERAL REGISTER at least 15 days in advance and the hearing shall be open to the public. The director of the bureau, the other parties, and all other participants shall have an opportunity at the first hearing to make an oral presentation of the data, information, and views which in their opinion are pertinent to resolution of the issues being considered by a Board. The Chairman shall determine the order in which these presentations shall be made. Each initial presentation shall be made without interruption from other participants, but members of the Board may ask any questions that they wish. At the conclusion of each presentation, each of the other participants may briefly state questions and criticism of the presentation and may request that the Board conduct further questioning with respect to specified matters. The Chairman and members of the Board may then ask further questions, and the Chairman may permit any other participant in the proceeding to ask questions if he determines this will facilitate resolution of the issues.

(d) The hearing shall be informal in nature, and the rules of evidence shall not apply. No motions or objections relating to the admissibility of data, information, and views shall be made or considered, but other participants may comment upon or rebut all such data, information, and views. No participant may interrupt the presentation of another participant for any reason.

(e) Within 30 days after the first hearing of a Board is concluded, each participant in the proceeding may submit in writing such rebuttal data, information, and views as he believes relevant to the issues, in accordance with the requirements of § 2.206. The Chairman shall thereafter schedule a second hearing of a Board if requested and justified by any participant. A second hearing, and any subsequent hearing, shall be called only if the Chairman concludes that it is necessary for the full and fair presentation of information that cannot otherwise adequately be considered and for the proper resolution of the issues involved. Notice of the time and location of any such subsequent hearings shall be published in the FEDERAL REGISTER at least 15 days in advance of the date of such hearing and the hearings shall be open to the public.

(f) A Board may consult with any person who it concludes may have data, information, or views relevant to resolution of the issues involved.

(1) Such consultation shall occur only at an announced hearing of a Board, and all participants shall have the right to be present and to suggest or, with the permission of the Chairman, conduct questioning of such consultants and to present rebuttal data, information, and views, as provided in paragraphs (c) and (d) of this section, except that written statements may be submitted to the Board with the consent of all participants.

(2) Any participant may submit to the Board a request that it consult with specific persons who may have data, information, or views relevant to the resolution of the issues. Such requests shall state the reasons why the person named should be consulted and why the views of that person cannot reasonably be furnished to the Board by any means other than having the Food and Drug Administration arrange for his appearance at a hearing of the Board. The Board may, in its discretion, grant or deny such a request.

(g) All hearings of a Board at which presentations of data, information, and views are made shall be transcribed. All such hearings shall be open to the public, except that the presentation of data and information which are prohibited from public disclosure pursuant to the provisions of § 2.5(j) (3) shall be closed to all persons except the persons making and participating in the presentation and Federal Government Executive Branch employees and special government employees. At least a majority of the members of the Board shall be present at every hearing. The executive sessions of a Board, during which a Board deliber-

ates on the issues, shall be closed and shall not be transcribed. The report of the Board shall be voted upon by all members of the Board.

(h) All legal issues shall be referred to the Chief Counsel for the Food and Drug Administration for resolution.

(i) After the conclusion of all public hearings a Board shall announce that the record is closed with respect to the gathering of data and information. The Board shall provide an opportunity for all participants to submit a written statement of their positions, with proposed findings and conclusions, and may, in its discretion, provide an opportunity for participants to summarize their positions orally to assist the Board in its deliberations on the issues involved.

(j) At the conclusion of its deliberations, a Board shall prepare its decision on the issues, which shall include specific findings and references supporting and explaining its conclusions, and a detailed statement of the reasoning on which the conclusions are based. Any member of the Board may file a separate report with additional or dissenting views.

#### § 2.207 Administrative record of a Public Board of Inquiry.

(a) The administrative record of a hearing before a Board shall consist of the following:

(1) All relevant FEDERAL REGISTER notices.

(2) All written submissions pursuant to § 2.204.

(3) The transcripts of all hearings of the Board.

(4) The recommended or initial decision of the Board.

(b) The record of the administrative proceeding shall be closed:

(1) With respect to the gathering of information and data, at the time specified in § 2.206(i).

(2) With respect to pleadings, at the time specified in § 2.206(i) for the filing of a written statement of position with proposed findings and conclusions.

(c) The Board may, in its discretion, reopen the record to receive further evidence at any time prior to the filing of a recommended or initial decision.

#### § 2.208 Examination of administrative record.

(a) The availability for public examination and copying of each document which is a part of the administrative record of the hearing shall be governed by the provisions of § 2.5(j). Each document which is available for public examination or copying shall be placed on public display in the office of the Hearing Clerk promptly upon receipt in that office.

(b) Lists of nominees and comments thereon submitted pursuant to § 2.202 (b) (3) shall be subject to the provisions of § 2.5(j) (3).

#### § 2.209 Record for administrative decision.

The administrative record of the hearing specified in § 2.207(a) shall constitute the exclusive record for decision.

#### Subpart D—Public Hearing Before a Public Advisory Committee

##### GENERAL

##### § 2.300 Scope of subpart.

(a) Subpart D governs the practices and procedures applicable whenever:

(1) The Commissioner concludes, in his discretion, that it is in the public interest for a standing or ad hoc policy or technical public advisory committee, hereinafter an "advisory committee" or "committee," to hold a public hearing and to review and make recommendations with respect to any matter or class of matters of importance pending before the Food and Drug Administration, and for interested persons to present data, information, and views at an oral public hearing before the advisory committee.

(2) Pursuant to specific provisions in other sections of this chapter, a matter pending before the Food and Drug Administration is subject to a public hearing before an advisory committee. Such specific provisions are:

(i) Section 2.350 relating to review of a performance standard for an electronic product by the Technical Electronic Product Radiation Safety Standards Committee.

(ii) Section 2.360 relating to review of the safety of color additives.

(iii) Section 2.370 relating to review of the safety and effectiveness of human prescription drugs.

(iv) Section 330.10 of this chapter relating to review of the safety and effectiveness of over-the-counter drugs.

(v) Section 601.25 of this chapter relating to review of the safety and effectiveness of biological drugs.

(3) A person who has a right to an opportunity for a formal evidentiary public hearing under Subpart B of this Part waives that opportunity and in lieu thereof requests pursuant to § 2.117 a public hearing before a public advisory committee pursuant to this subpart, and the Commissioner, in his discretion, accepts this request.

(b) In determining whether a group is a "public advisory committee" as defined in § 2.3(a) (14) and thus subject to the requirements of this subpart and of the Federal Advisory Committee Act, the following guidelines shall be used:

(1) An advisory committee may be a standing advisory committee or an ad hoc advisory committee. All standing advisory committees shall be listed in § 2.340.

(2) An advisory committee may be a policy advisory committee or a technical advisory committee. A policy advisory committee advises on broad and general matters. A technical advisory committee advises on specific regulatory issues.

(3) An advisory committee includes any subgroup thereof when it is working on behalf of the committee. An advisory committee may have members and consultants.

(4) A committee composed entirely of full-time Federal government employees is not an advisory committee.

(5) An advisory committee shall ordinarily have a fixed membership, a de-

finied purpose of providing advice to the agency on a particular subject, regular or periodic meetings, and an organizational structure, e.g., a chairman and staff, and shall serve as a source of independent expertise and advice rather than as a representative of or advocate for any particular interest.

(i) A group of persons convened on an ad hoc basis to discuss a matter of current interest to the agency, but which has no continuing function or organization, does not involve substantial special preparation, and does not as a group issue a report to or advise the agency, is not an advisory committee.

(ii) A group of two or more agency consultants meeting with the agency on an ad hoc basis is not an advisory committee.

(iii) A group of experts who are employed by a private company or a trade association which has been requested by the agency to provide its views on a regulatory matter pending before the agency is not an advisory committee.

(iv) A consulting firm hired by the agency to provide advice regarding a matter is not an advisory committee.

(6) An advisory committee which is utilized by the agency is subject to the requirements of this subpart even though it was not established by the agency. In general, a committee is "utilized" by the agency when the agency requests advice or recommendations from the committee on a specific matter in order to obtain an independent review and consideration of the matter, and not when the agency is merely seeking the comments of all interested persons or of persons who have a specific interest in the matter involved.

(i) A committee formed by an independent scientific or technical organization is utilized by the agency if the agency requests the advice of that committee rather than of the parent organization, or if the circumstances show that the advice given is that of the committee and not of the parent organization. A committee formed by an independent scientific or technical organization is not utilized by the agency if the agency requests advice of the organization rather than of a committee and if the recommendations of any committee formed in response to the agency's request for advice are subject to substantial independent policy and factual review by the governing body of the parent organization.

(ii) A committee is not utilized by the agency if it provides only data and information, as contrasted with advice or opinions or recommendations.

(iii) The Food and Drug Administration is charged with seeking out the views of all segments of the public on enforcement of the laws administered by the Commissioner. The fact that a group of individuals or a committee meets regularly with the agency, e.g., a monthly meeting with consumer representatives, does not make that group or committee an advisory committee. Thus, the provisions of this subpart are not applicable to routine meetings, discussions, and other dealings, including exchanges

of views, between the agency and any committee representing or advocating the particular interests of consumers, industry, professional organizations, or others.

(7) The inclusion of one or two agency consultants who are special government employees on an internal agency committee does not make that committee an advisory committee.

(8) A Public Board of Inquiry established under Subpart C of this Part or other similar group convened by agreement between the parties to a regulatory proceeding pending before the Food and Drug Administration, to review and prepare an initial decision on the issue in lieu of a formal evidentiary public hearing, is acting as an administrative law tribunal and is not an advisory committee.

(9) An open public conference or meeting conducted pursuant to § 2.15(b) is not an advisory committee meeting.

(c) The provisions of this subpart apply only when a committee convenes to conduct committee business. Site visits, social gatherings, informal discussions by telephone or during meals or while traveling or at other professional functions, or other similar activities do not constitute a meeting.

(d) An advisory committee which is utilized but not established by the Food and Drug Administration shall be subject to the provisions of this subpart only to the extent of such utilization, and not with respect to any other activities of such committee.

(e) Any conference or meeting between an employee of the Food and Drug Administration and a committee or group which is not an advisory committee shall be subject to the provisions of § 2.15 or other provisions specifically applicable to such committee or group, e.g., Subpart C of this Part for a Public Board of Inquiry.

(f) The provisions of this subpart shall apply to all Food and Drug Administration advisory committees, except to the extent that specific statutory requirements provide otherwise for a particular committee, e.g., the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC) and the Board of Tea Experts.

#### § 2.301 Establishment and renewal of public advisory committees.

(a) A public advisory committee may be established or renewed whenever it is necessary or appropriate for such an advisory committee to hold a public hearing and to review and make recommendations on any matter pending before the Food and Drug Administration. Before an advisory committee is established or renewed it shall first be approved by the Department pursuant to 45 CFR Part 11 and the Office of Management and Budget pursuant to duly promulgated procedures.

(b) Upon the establishment or renewal of an advisory committee, the Commissioner shall issue in the FEDERAL REGISTER a notice certifying that the establishment or renewal of the advisory

committee is in the public interest and stating the structure, function, and purposes of the advisory committee and, if it is a standing advisory committee, shall amend § 2.340 to add it to the list of standing advisory committees. The notice shall be published in the FEDERAL REGISTER at least 15 days prior to the filing of the advisory committee charter pursuant to paragraph (c) of this section.

(c) No advisory committee shall meet or take any action until its charter is prepared and filed as required by section 9(c) of the Federal Advisory Committee Act. This requirement shall be met by an advisory committee utilized by the Food and Drug Administration, even though it is not established by the agency, prior to such utilization.

(d) An advisory committee not required by law will be established or utilized only if it is in the public interest and only if its functions could not reasonably be performed by other existing advisory committees or by the Food and Drug Administration directly.

(e) An advisory committee shall:

(1) Have a clearly defined purpose.

(2) Have a membership that is balanced fairly in terms of the points of view represented in light of the functions to be performed. Although proportional representation is not required, there shall be no discrimination on the basis of race, color, national origin, religion, age, or sex in the selection of advisory committee members.

(3) Be constituted and utilized procedures designed to assure that its advice and recommendations are not inappropriately influenced by any special interest or by the Food and Drug Administration, and are the result of the advisory committee's independent judgment.

(4) Have an adequate staff. The Commissioner shall designate an executive secretary and alternate for every advisory committee, who shall be employees of the Food and Drug Administration. The executive secretary shall be responsible for all staff support for the advisory committee unless other agency employees are specifically designated for this function with respect to particular advisory committees.

(5) Whenever feasible, include representatives of the public interest.

#### § 2.302 Termination of public advisory committees.

(a) A standing advisory committee shall be terminated when it is no longer needed and in any event shall terminate not later than 2 years following its date of establishment unless it is renewed for an additional 2-year period. An advisory committee may be renewed for as many 2-year periods as the public interest requires. The requirements for establishment of an advisory committee pursuant to § 2.301 shall also apply to renewal of an advisory committee.

(b) Upon termination of any advisory committee the Commissioner shall issue in the FEDERAL REGISTER a notice announcing the termination and the reasons therefor and, if it is a standing

advisory committee, amending § 2.340 to delete it from the list of standing advisory committees.

(c) The Technical Electronic Product Radiation Safety Standards Committee is a permanent statutory advisory committee established by section 358(f)(1) (A) of the Public Health Service Act (42 U.S.C. 263f(f)(1)(A)), as added by the Radiation Control for Health and Safety Act of 1968, and is not subject to the termination and renewal provisions of paragraph (a) of this section, except that a new charter shall be prepared and filed at the end of each 2-year period as provided in § 2.301(c).

(d) The Board of Tea Experts is a permanent statutory advisory committee established by the Tea Importation Act (21 U.S.C. 42), and is not subject to the termination and renewal provisions of paragraph (a) of this section, except that a new charter shall be prepared and filed at the end of each 2-year period as provided in § 2.301(c).

(e) Color additive advisory committees are required to be established under the circumstances specified in section 706(b)(5) (C) and (D) of the act. A color additive advisory committee is subject to the termination and renewal requirements of the Federal Advisory Committee Act and of this subpart.

#### § 2.303 Purpose of proceedings before a public advisory committee.

(a) An advisory committee shall be utilized to conduct public hearings on matters of importance that come before the Food and Drug Administration, to review the issues involved, and to provide advice and recommendations to the Commissioner on such matters.

(b) The Commissioner shall have sole discretion with respect to action to be taken and policy to be expressed on any matter considered by an advisory committee.

#### § 2.304 Portions of public advisory committee meetings.

An advisory committee meeting shall have the following separable portions:

(a) *The open public hearing.* Every advisory committee meeting shall include an open portion which shall constitute a public hearing during which any interested person may present data, information, or views, orally or in writing, relevant to the advisory committee's agenda or other work. Such hearing shall be conducted in accordance with § 2.312.

(b) *The open committee discussion.* An advisory committee shall discuss any matter pending before it in an open portion of its meeting unless the meeting has been closed with respect to that matter pursuant to § 2.318. To the maximum extent feasible, consistent with the policy expressed in § 2.318, an advisory committee shall conduct its discussion of pending matters in an open portion. No public participation is permissible during this portion of the meeting except with the consent of the chairman of the advisory committee.

(c) *The closed presentation of data.* Data and information which are prohibited from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein shall be presented to the advisory committee in a closed portion of its meeting. If such data and information are presented in the form of a summary which is not prohibited from public disclosure, such presentation shall not be made in a closed portion of its meeting.

(d) *The closed committee deliberations.* Deliberations with respect to matters pending before an advisory committee may be made in a closed portion of its meeting upon an appropriate determination by the Commissioner pursuant to § 2.318.

#### § 2.305 Notice of public hearing before a public advisory committee.

(a) Before the first day of each month, and at least 15 days before any meeting so announced, the Commissioner shall publish a notice in the FEDERAL REGISTER containing information on all advisory committee meetings to be held during the subsequent month. Any advisory committee meetings for that month called subsequent to the publication of the general monthly notice shall be announced in the FEDERAL REGISTER on an individual basis at least 15 days in advance. The Commissioner may authorize an exception to the notice requirements of this section in an emergency or for other reasons requiring an immediate meeting of an advisory committee, in which case public notice shall be given at the earliest time and in the most accessible form feasible including, whenever possible, publication in the FEDERAL REGISTER.

(b) The FEDERAL REGISTER notice shall include:

(1) The name of the advisory committee.

(2) The date, time, and place of the meeting.

(3) The general function of the advisory committee.

(4) A list of all agenda items, showing whether each will be discussed in an open or closed portion of the meeting.

(5) If any portion of the meeting is closed, a statement of the time of the open and closed portions.

(6) The nature of the subjects to be discussed during, and the reasons for closing, any closed portion of the meeting.

(7) The time specifically set aside for oral statements by interested persons and for other public participation.

(8) The name, address, and telephone number of the advisory committee executive secretary and any other agency employee designated as responsible for the administrative support for the advisory committee.

(9) A statement that written submissions may be made to the advisory committee at any time. Such submissions shall be made pursuant to § 2.311(c).

(10) Where a notice is published in the FEDERAL REGISTER less than 15 days

before a meeting, an explanation for the lateness of the notice.

(c) If a public hearing before a public advisory committee is being used in lieu of a formal evidentiary public hearing as provided in § 2.300(a)(3), an initial notice of hearing shall be published separately in the FEDERAL REGISTER containing all the information described in § 2.117(e). Such a separate notice may also be published in the FEDERAL REGISTER with respect to any other public hearing before a public advisory committee when the Commissioner concludes, in his discretion, that it would be informative to the public.

(d) A list of public advisory committee meetings shall be distributed to the press by the Assistant Commissioner for Public Affairs.

(e) All public advisory committee meetings shall be included on the public calendar described in § 2.21(a).

#### § 2.306 Chairman of a public advisory committee.

(a) The advisory committee chairman shall have the authority to conduct hearings and meetings, including the authority to adjourn any hearing or meeting whenever he determines adjournment to be in the public interest, to discontinue discussion of a particular matter, to conclude the open portion of a meeting, or to take any other action in furtherance of a fair and expeditious hearing or meeting.

(b) If the chairman is not a full-time employee of the Food and Drug Administration, the executive secretary of the advisory committee or other designated agency employee, or his alternate, shall be the designated Federal employee who is assigned to the advisory committee. The designated Federal employee is also authorized to adjourn any hearing or meeting whenever he determines adjournment to be in the public interest.

#### § 2.307 Meetings of a public advisory committee.

(a) No advisory committee may conduct a meeting except at the call or with the advance approval of, and with an agenda approved by, the designated Federal employee or his alternate. No such meeting shall be held in the absence of such designated Federal employee.

(1) If any matter is added to the agenda after its publication in the FEDERAL REGISTER pursuant to § 2.303(b)(4), an attempt shall be made to so inform any person known to be interested in such matter, and the addition of such matter shall be announced at the beginning of the open portion of the meeting.

(2) The advisory committee meeting shall be conducted in accordance with the approved final agenda insofar as is practical.

(b) Advisory committee meetings shall be held at places that are reasonably accessible to members of the public. All advisory committee meetings shall be held in Washington, DC, or Rockville, MD, or the immediate vicinity, unless the Commissioner receives a written request from the advisory committee for,

and approves, a different location. A different location may be approved when one or more of the following applies:

(1) The total cost of the meeting to the government will be reduced.

(2) A substantial number of the advisory committee members will be at the location at no expense to the Food and Drug Administration for other reasons, e.g., for a meeting of a professional association.

(3) It is a central location which is more readily accessible to advisory committee members.

(4) There is a need for increased participation available at that location.

(5) The advisory committee wishes to review work or facilities in a specific location.

(c) Advisory committee members may, with the approval of the Food and Drug Administration, conduct onsite visits relevant to the work of the advisory committee.

(d) A quorum for an advisory committee shall be a majority of the current voting members of the advisory committee, except as provided in § 2.352(c) for TEPRSSC. Any matter before the advisory committee shall be decided by a majority vote of the voting members present at the time, except that the designated Federal official may require that any final report be voted upon by all current voting members of the advisory committee. Any current voting member of the advisory committee may file a separate report with additional or minority views.

(e) Subject to availability of space, any interested person may attend any portion of any advisory committee meeting which is not closed.

(f) Whenever feasible, meetings shall be held in government facilities or other facilities involving the least expense to the public. The size of the meeting room shall be reasonable, considering such factors as the size of the advisory committee, the number of members of the public who could be expected to attend a particular meeting, the number of persons who attended or sought to attend similar meetings in the past, and the resources and facilities available.

(g) Any portion of a meeting shall be closed by the advisory committee chairman when matters which have been determined by the Commissioner to be closed in accordance with § 2.318 are to be discussed. Where a portion of the meeting is closed, the closed portion shall be held after the conclusion of the open portion whenever practicable.

(h) Any advisory committee member may take notes during advisory committee meetings and report and discuss advisory committee deliberations after a meeting is completed and before official minutes or a report are available, within such rules and regulations as are adopted by the Food and Drug Administration and by the advisory committee with the concurrence of the Food and Drug Administration, including all of the following:

(1) There shall be no attribution of individual views expressed in a closed session or revealing of numerical votes.

(2) There shall be no reporting or discussion with respect to any particular matter where the advisory committee or the Food and Drug Administration specifically so directs, e.g., where deliberations are incomplete or involve a sensitive regulatory decision which requires preparation for implementation.

(3) There shall be no reporting or discussion with respect to data or information prohibited from public disclosure pursuant to § 2.316.

(4) Any notes or minutes kept or report prepared by any advisory committee member shall have no status or effect whatever unless adopted as or incorporated into the official minutes or report by the advisory committee. It shall be the responsibility of each advisory committee member to make certain that the official minutes and reports are complete and accurate and fully reflect what happened at any meeting he attended.

#### § 2.308 Consultation by a public advisory committee with other persons.

(a) An advisory committee may consult with any person who may have data, information, or views relevant to any matter pending before the advisory committee.

(b) Any interested person may submit to the advisory committee a written request that it consult with specific persons who may have data, information, or views relevant to any matter pending before the advisory committee. Such request shall state why the specified person should be consulted and why the views of that person cannot reasonably be furnished to the advisory committee by any other means. The advisory committee may, in its discretion, grant or deny such a request.

#### § 2.309 Additional rules for a particular public advisory committee.

(a) In addition to the rules established for all Food and Drug Administration advisory committees in this subpart, any advisory committee may, with the concurrence of the designated Federal official, adopt additional rules which are not inconsistent with this subpart or with applicable legal requirements.

(b) Such additional rules shall be included in the minutes of the meeting when adopted and in the materials compiled pursuant to § 2.310 and shall be available for public disclosure pursuant to § 2.317(c).

#### § 2.310 Compilation of materials for members of a public advisory committee.

The Commissioner shall prepare and provide to all advisory committee members a compilation of materials bearing upon an advisory committee member's duties and responsibilities, including:

(a) All applicable conflict of interest laws and regulations and a summary of their principal provisions.

(b) All applicable laws and regulations relating to trade secrets and con-

fidential commercial or financial information that may not be disclosed publicly and a summary of their principal provisions.

(c) All applicable laws, regulations, and guidelines relating to the subject matter covered by the advisory committee and a summary of their principal provisions.

(d) All applicable laws, regulations, advisory committee charters, FEDERAL REGISTER notices, curricula vitae, rules adopted by the advisory committee, and other material relating to the formation, composition, and operation of the advisory committee, and a summary of their principal provisions.

(e) Instructions on whom to contact when any questions arise.

(f) Such other material relating to the Food and Drug Administration and the subject matter covered by the committee as may facilitate the work of the advisory committee.

#### § 2.311 Written submissions to a public advisory committee.

(a) Ten copies of all written submissions for an advisory committee shall be sent to the executive secretary of the advisory committee, unless an applicable FEDERAL REGISTER notice or other regulations in this chapter specify otherwise. All such submissions shall be subject to the provisions of § 2.5, except that no copies need be sent to the Hearing Clerk.

(b) At the request of an advisory committee, or on his own initiative, the Commissioner may at any time issue in the FEDERAL REGISTER a notice requesting the submission to the advisory committee of written data, information, and views pertinent to any matter being reviewed by an advisory committee. Such notice may specify the format in which the submission shall be made, the number of copies to be submitted, and the time within which submission shall be made.

(c) Any interested person may submit to an advisory committee written data, information, or views on any matter being reviewed by that advisory committee. Voluminous data shall be accompanied by a summary.

(1) Any such submission shall be distributed to each advisory committee member, either by mail or at the next advisory committee meeting, and shall be considered by the advisory committee in its review of the matter.

(2) An advisory committee may establish, and shall give public notice of, a cut-off date after which submissions relating to any matter shall no longer be received or considered.

(d) The Commissioner shall provide to an advisory committee all data and information he concludes to be relevant to any matter being reviewed by the advisory committee. Any member of the advisory committee shall, upon request, also be provided any additional material available to the Food and Drug Administration which he believes appropriate for an independent judgment on the matter, e.g., raw data underlying any summary or report, or a briefing on the legal aspects of the matter.

### § 2.312 Conduct of a public hearing before a public advisory committee.

(a) For each advisory committee meeting, the open portion for public participation which constitutes a public hearing pursuant to § 2.30(a) shall be at least 1 hour long unless the public participation does not last that long, and may last for whatever longer time the advisory committee chairman determines will facilitate the work of the advisory committee. The **FEDERAL REGISTER** notice published pursuant to § 2.303 shall designate the time specifically reserved for such public hearing, which shall ordinarily be the first portion of the meeting. Further public participation in any open portion of the meeting pursuant to § 2.304(b) shall be solely at the discretion of the advisory committee chairman.

(b) Any interested person who wishes to be assured of the right to make an oral presentation at a particular advisory committee hearing shall so inform the executive secretary of the advisory committee or other designated agency employee, orally or in writing, prior to the advisory committee meeting.

(1) Such person shall state the general nature of the presentation and the approximate time requested. Whenever possible, all written data and information to be discussed by that person at the advisory committee hearing shall be furnished in advance to the executive secretary or other designated agency employee. Such written material shall be mailed to the advisory committee members in advance of the committee meeting if time permits, and otherwise will be distributed to the advisory committee members when they arrive for the meeting. Such mailing or distribution shall be undertaken only by the agency unless the agency specifically permits the person making the presentation to mail or distribute such material.

(2) Prior to the advisory committee hearing, the executive secretary or other designated agency employee shall determine the amount of time allocated to each person for his oral presentation and the time that oral presentation is scheduled to begin. Each such person shall be so informed in writing, or if the time prior to the hearing is short, by telephone. Joint presentations may be required by persons with common interests.

(c) The chairman of the advisory committee shall preside at the hearing pursuant to § 2.306 and shall be accompanied by other advisory committee members who shall serve as a panel in conducting the hearing.

(d) Each person may use his allotted time in whatever way he wishes, consistent with a reasonable and orderly hearing. A person may be accompanied by any number of additional persons, and may present any written data, information, or views for inclusion in the record of the hearing, subject to the requirements of § 2.311(c).

(e) If a person is not present at the time specified for his presentation, the persons following will appear in order.

An attempt will be made to hear any such person at the conclusion of the hearing. Any interested persons attending the hearing who did not request an opportunity to make an oral presentation shall be given an opportunity to make an oral presentation at the conclusion of the hearing, in the discretion of the chairman of the advisory committee, to the extent that time permits.

(f) The chairman and other members of the advisory committee may question any person during or at the conclusion of his presentation. No other person attending the hearing may question a person making a presentation. The chairman may allot additional time to any person when he concludes that it is in the public interest, but may not reduce the time allotted for any person without his consent.

(g) Public participants may question an advisory committee member only with that advisory committee member's permission and only about matters before the advisory committee.

(h) The hearing shall be informal in nature, and the rules of evidence shall not apply. No motions or objections relating to the admissibility of data, information, and views shall be made or considered, but other participants may comment upon or rebut all such data, information, and views. No participant may interrupt the presentation of another participant at any hearing for any reason.

### § 2.313 Minutes and reports of public advisory committee meetings.

(a) The executive secretary or other designated agency employee shall prepare detailed minutes of all advisory committee meetings, except that less detailed minutes may be prepared for open portions of meetings which are transcribed or recorded by the agency. Their accuracy shall be approved by the advisory committee and certified by the advisory committee chairman. Such approval and certification may be accomplished by mail and by telephone.

(b) The minutes shall include:

- (1) The time and place of the meeting.

- (2) The advisory committee members, committee staff, and agency employees present, and the names and affiliations or interests of public participants in the meeting.

- (3) A copy of or reference to all written information made available for consideration by the advisory committee at such proceedings.

- (4) A complete and accurate description of matters discussed and conclusions reached. Such description shall be kept separately for the following portions of the meeting to facilitate their public disclosure: The open portions specified in § 2.304 (a) and (b), any closed portion during which a presentation is made pursuant to § 2.304(c), and any closed deliberative portion pursuant to § 2.304(d).

The minutes of a closed deliberative portion of a meeting shall not refer to advisory committee members by name, except upon their request, or to data or information described in § 2.316(b). Any

such inadvertent references which do occur shall be deleted prior to public disclosure.

(5) A copy of or reference to all reports received, issued, or approved by the advisory committee.

(6) The extent to which the meeting was open and closed to the public.

(7) The extent of public participation, including a list of members of the public who presented oral or written statements.

(c) For all advisory committee meetings any portion of which is closed, either (1) the minutes of the closed portion shall be available for public disclosure pursuant to § 2.316(a) (6) (i), or (2) if pursuant to § 2.316(a) (6) (ii) such minutes are not promptly available, the executive secretary or other designated agency employee shall prepare a brief summary of the matters considered in such manner as is informative to the public, consistent with the policy of 5 U.S.C. 552(b).

(d) Where a significant portion of the meetings of an advisory committee is closed, the advisory committee shall issue a report at least annually setting forth a summary of its activities and such related matters as would be informative to the public consistent with the policy of 5 U.S.C. 552(b). Such report shall be a compilation of or be prepared from the individual reports on closed portions of meetings prepared pursuant to paragraph (c) of this section.

(e) The executive secretary of each advisory committee or other designated agency employee shall, with the approval of the advisory committee, prepare an annual report describing its membership, functions, recommendations, and other actions.

### § 2.314 Transcripts of public advisory committee meetings.

(a) A transcript or recording is not required for any portion of an advisory committee meeting.

(b) Each advisory committee shall decide whether any portion or all of its meetings shall be transcribed or recorded and, if so, by what means. Any such transcription or recording shall be arranged by the agency.

(c) If a transcript or recording of an open portion of an advisory committee meeting is made by the Food and Drug Administration, or is made by any interested person and is submitted to the Food and Drug Administration, it shall be included in the record of the advisory committee proceedings.

(d) If a transcript or recording of any closed portion of an advisory committee meeting is made by the Food and Drug Administration, it shall not be included in the administrative record of the advisory committee proceedings. Any such transcript or recording shall be retained as confidential by the Food and Drug Administration and shall not be discarded or erased. The chairman of the advisory committee may, in his discretion, permit discussion without transcription or recording during any closed portion of an advisory committee meeting that is otherwise being transcribed or recorded.

(e) Any transcript or recording of an advisory committee meeting or portion thereof which is publicly available pursuant to this section shall be available at actual cost of duplication, which shall be, where applicable, the fees established in § 4.42 of this chapter. The Food and Drug Administration may furnish the requested transcript or recording for copying to a private contractor who shall charge directly for the cost of copying pursuant to § 4.51 of this chapter.

(f) Any person attending any open portion of an advisory committee meeting may, consistent with the orderly conduct of the meeting, record or otherwise take his own transcript of the meeting. No person attending any closed portion of any advisory committee meeting may record or otherwise take his own transcript of the meeting, except for an official transcript or recording arranged by the Food and Drug Administration.

### § 2.315 Administrative record of a public hearing before a public advisory committee.

(a) Advice or recommendations of an advisory committee shall be given only on matters covered in the administrative record of the advisory committee's proceedings. Except as specified otherwise in regulations in this chapter, such administrative record shall consist of all of the following:

- (1) Any transcript or recording that was made of any open portion of a meeting relating to the matter.

- (2) The minutes of all portions of all advisory committee meetings relating to the matter, after any deletions pursuant to § 2.313(b) (4).

- (3) All written submissions made to and data and information considered by the advisory committee relating to the matter.

- (4) All reports made by the advisory committee relating to the matter.

(b) The record of the administrative proceeding shall be closed at the time the advisory committee renders its advice or recommendations or at any earlier time specified by the advisory committee or in other sections in this chapter.

### § 2.316 Examination of administrative record and other advisory committee records.

(a) The administrative record and other advisory committee records shall be available for public disclosure pursuant to the provisions of Part 4 of this chapter, except as provided in paragraph (b) of this section, at the following time:

- (1) The written information made available for consideration by the advisory committee at any meeting, at the same time.

- (2) The transcript or recording of any open portion of a meeting, as soon as it is available.

- (3) The minutes of any open portion of a meeting, after they have been approved by the advisory committee and certified by the advisory committee chairman.

(4) The brief summary of any closed portion of a meeting prepared pursuant to § 2.313(c), as soon as it is available.

(5) All written data, information, or views submitted to the advisory committee at any open portion of a meeting, as soon as they are so submitted.

(6) The minutes or portions thereof of any closed executive portion of a meeting:

- (i) For any matter not directed to be maintained as confidential pursuant to § 2.307(h) (2), after they have been approved by the advisory committee and certified by the advisory committee chairman.

- (ii) For any matter directed to be maintained as confidential pursuant to § 2.307(h) (2), after the advice or report of the advisory committee relevant to those minutes or portions thereof is acted upon by the Commissioner, or upon a determination by the Commissioner that such minutes or portions thereof may be made available for public disclosure without undue interference with agency or advisory committee operations.

(7) Any formal advice or report of the advisory committee, after it has been acted upon, i.e., approved, disapproved, or rejected as inadequate, by the Commissioner, or upon a determination by the Commissioner that such formal advice or report may be made available for public disclosure without undue interference with agency and/or advisory committee operations. Such formal advice or report may be retained as confidential while it is under active advisement.

(8) Any other advisory committee records relating to the matter involved, except transcripts and recordings of closed portions of advisory committee meetings, after the advice or report of the advisory committee relevant to those records is acted upon by the Commissioner, or upon a determination by the Commissioner that such records may be made available for public disclosure without undue interference with agency or advisory committee operations.

(b) The following data and information contained in the administrative record shall not be available for public examination or copying except as provided in § 2.117(g):

- (1) Material provided to the advisory committee by the Food and Drug Administration which is exempt from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein.

- (2) Material provided to the advisory committee by a person making a presentation described in § 2.304(c) and which is prohibited from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein.

- (c) The Public Records and Documents Center shall maintain a file for each advisory committee containing the following principal records of that advisory committee for ready access by the public: The advisory committee charter, a list of advisory committee members

and their curricula vitae, the minutes of advisory committee meetings, and any formal advice or report of the advisory committee.

### § 2.317 Public inquiries and requests for public advisory committee records.

(a) Public inquiries on general advisory committee matters, except requests for records, shall be directed to: Committee Management Officer (HFS-20), Office of the Associate Commissioner for Science, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852.

(b) Public inquiries on matters relating to a specific advisory committee, except requests for records, shall be directed to the executive secretary of the advisory committee or other designated agency employee as listed in the **FEDERAL REGISTER** notices published pursuant to § 2.303.

(c) All requests for public advisory committee records, including minutes, shall be made to the Food and Drug Administration Public Records and Documents Center pursuant to § 4.40 and the related provisions of Part 4 of this chapter.

### § 2.318 Determination to close portions of public advisory committee meetings.

(a) No advisory committee meeting shall be entirely closed. A portion of an advisory committee meeting may be closed only pursuant to a determination made in writing by the Commissioner, stating the reasons therefor, in accordance with this section.

(b) The executive secretary of an advisory committee or other designated agency employee shall prepare the initial request for a determination to close a portion of an advisory committee meeting, specifying the matter(s) to be discussed during the closed portion and the reasons why the portion should be closed. The Commissioner, based upon this request and with the concurrence of the Chief Counsel, shall determine whether to close a portion of an advisory committee meeting. Such a determination may be made with respect to a single meeting or, where appropriate, a series of meetings. The reasons for closing a portion of a meeting shall be made in the **FEDERAL REGISTER** notice of the meeting published pursuant to § 2.305 in accordance with the following rules:

- (1) Any determination to close a portion of a meeting shall restrict such closing to the shortest possible time consistent with the policy established in this section.

- (2) Portions of meetings devoted to the review, discussion, evaluation, or ranking of grant applications, contract proposals, or performance by grantees and contractors shall be closed.

- (3) Portions of meetings during which matters are considered that are prohibited from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations reference therein shall be closed.

(4) Portions of meetings during which matters are considered that are exempt from public disclosure pursuant to 5 U.S.C. 552(b) may be closed if the Commissioner determines that:

(i) It involves discussion of existing documents falling within 5 U.S.C. 552(b) (1) through (4) and (6) through (9) or matters that, if in writing, would fall within 5 U.S.C. 552(b) (1) through (4) and (6) through (9).

(ii) It involves discussion of existing documents falling within 5 U.S.C. 552(b) (5) and § 4.62 of this chapter (inter-agency or intragovernment memoranda or letters which would not be available by law to a party other than an agency in litigation with the agency) or matters that, if in writing, would fall within 5 U.S.C. 552(b) (5) and § 4.62 of this chapter, and it is essential to close such portion of such meeting to protect the free exchange of internal views and to avoid undue interference with agency or advisory committee operations.

(5) Examples of portions of advisory committee meetings which ordinarily may be closed include the review, discussion, and evaluation of specific investigational or marketed drugs and devices which are intended to result in recommendations for regulatory decisions under the laws administered by the Commissioner, deliberative sessions to formulate advice and recommendations to the agency, review of confidential data and information, consideration of matters involving investigatory files compiled for law enforcement purposes, and review of matters involving personal privacy.

(6) Examples of advisory committee meetings which ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices, consideration of labeling requirements for a class of marketed drugs and devices, review of data and information on specific investigational or marketed drugs and devices which have previously been made public, and presentation of any other data or information which is not exempt from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein.

(7) No portion of an advisory committee meeting devoted to matters other than those designated in paragraph (b) (1) through (4) of this section may be closed, and no portion of a meeting of the Technical Electronic Product Radiation Safety Standards Committee may be closed, except in accordance with § 2.354.

(8) A matter which is properly considered in an open portion of an advisory committee meeting may instead be considered in a closed portion only if it is so inextricably intertwined with matters to be discussed in a closed portion that it is not feasible to separate them or discussion of the matter in an open portion would compromise or impinge upon the matters to be discussed in the closed portion.

(c) A closed portion of an advisory committee meeting shall be attended only

by advisory committee members and Federal Government Executive Branch employees and consultants, except as provided in § 2.304(c) for presentation of data and information which are prohibited from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein. Any person making a presentation described in § 2.304(c) may be accompanied by a reasonable number of employees, consultants, or other persons with whom he has a commercial arrangement within the meaning of § 4.81(a) of this chapter. If any person other than an advisory committee member or a Federal Government Executive Branch employee or special government employee or a person making a presentation described in § 2.304(c) attends a portion of an advisory committee meeting, that portion shall be open to attendance by any interested person.

#### § 2.319 Administrative remedies.

Any person who alleges noncompliance by the Commissioner or an advisory committee with any provision of this subpart or the Federal Advisory Committee Act may pursue the following administrative remedies:

(a) If the person objects to any action, including a failure to act, other than denial of access to an advisory committee document, he shall submit a petition in the form and pursuant to the requirements specified in § 2.7. The provisions of § 2.11 relating to exhaustion of administrative remedies shall be applicable.

(1) If the person objects to past action, the petition shall be submitted within 30 days after the action objected to. If the Commissioner determines that there was noncompliance with any provision of this subpart or of the Federal Advisory Committee Act, he shall grant any appropriate relief and shall take appropriate steps to prevent its recurrence in the future.

(2) If the person objects to proposed future action, the Commissioner shall expedite his review of the petition and shall make a reasonable effort to render a decision prior to the action which is the subject of the petition.

(3) If the person objects to action that is imminent or is occurring and which could not reasonably have been anticipated in advance, e.g., the closing of a portion of a meeting which is made known for the first time on the day of the meeting, the matter may be handled by an oral petition in lieu of a written petition.

(b) If the person objects to a denial of access to an advisory committee document, administrative review shall be pursued in accordance with the procedures established by the Department of Health, Education, and Welfare under 45 CFR 5.82.

#### § 2.320 Applicability to Congress.

The provisions of this subpart shall apply to Congress, individual members of Congress, and other employees or representatives of Congress, in the same way that they apply to any other member of

the public, except that disclosure of advisory committee records to Congress shall be governed by the provisions of § 4.87 of this chapter.

#### § 2.321 Committees working pursuant to a contract with the Food and Drug Administration.

(a) The Food and Drug Administration may enter into contracts with independent scientific or technical organizations to obtain advice and recommendations on particular matters, and such organizations may in turn undertake such work through existing or new committees. Whether a particular committee working pursuant to such a contract is a public advisory committee and thus subject to all of the provisions of the Federal Advisory Committee Act and this subpart will depend upon application of the criteria and principles established in § 2.300(b).

(b) The following minimum standards shall apply to any committee of an independent scientific or technical organization which is working pursuant to a contract initially executed with the Food and Drug Administration subsequent to July 1, 1975, but which is determined not to be a public advisory committee:

(1) The committee shall give public notice of its meetings and agenda, and shall provide any interested person an opportunity to submit data, information, and views, in writing at any time, and orally at specified times, relevant to the matter which is the subject of the contract. Such notice may be published in the FEDERAL REGISTER or disseminated by any other reasonable means, and shall in any event be filed with the Hearing Clerk not less than 15 days before the meeting. The length of time permitted for oral presentations and the extent to which the committee meets in open session other than for such oral presentations is in the discretion of the committee.

(2) Minutes of all open sessions shall be maintained, to which shall be attached all written submissions made to the committee in open session. After approval, such minutes shall be forwarded to the Hearing Clerk and placed on public display. The extent to which the committee maintains minutes of closed sessions is at the discretion of the committee.

(3) In selecting the members of the Committee, the organization involved shall apply the same principles relating to conflicts of interest as the Food and Drug Administration does in establishing a public advisory committee. Such principles are set out or cross-referenced in this subpart and in Subpart G of this Part. Upon request, the Food and Drug Administration will assist or provide guidance to any such organization in meeting this requirement.

#### § 2.322 Application of anticancer clauses.

Whenever the Commissioner concludes that it is appropriate to obtain an independent review of any scientific issue involving application of the anticancer clauses in section 409(c) (3) (A), 512(d) (1) (H), or 706(b) (5) (B) of the act, in-

cluding whether a substance has been found to induce cancer when ingested by man or animal, and whether a substance has been found, after appropriate tests other than ingestion, to induce cancer in man or animal, he shall ordinarily refer such matter to the Toxicology Advisory Committee which shall hold a public hearing and provide advice and recommendations to the Commissioner on such matter, except as specifically required by the provisions of section 706(b) (5) (C) of the act and § 2.363(a) (2) relating to color additives.

#### MEMBERS OF PUBLIC ADVISORY COMMITTEE

##### § 2.330 Qualifications for members of standing policy and technical advisory committees.

(a) Members of policy advisory committees, which advise the Commissioner on broad and general matters, shall possess the following qualifications:

(1) Policy advisory committee members shall possess diverse interests, education, training, and experience. Technical expertise in the subject matter with which the advisory committee is involved shall not be a requirement.

(2) Policy advisory committee members are special government employees and subject to the conflict of interest laws and regulations. The Commissioner has determined that, because members representing particular interests, e.g., a representative of labor, industry, consumers, or agriculture, are included on advisory committees specifically for the purpose of representing such interests, any financial interest covered by 18 U.S.C. 208(a) in the class which the member represents is irrelevant to the services which the government expects from them and thus is hereby exempted pursuant to 18 U.S.C. 208(b) as too remote and inconsequential to affect the integrity of their services.

(3) All members of policy advisory committees shall be voting members.

(b) Members of technical advisory committees, which advise on specific regulatory issues, shall possess the following qualifications:

(1) Voting members of technical advisory committees:

(i) Shall possess expertise in the particular subject matter with which the committee is concerned. Members shall have diverse professional education, training, and experience so that the committee will reflect a balanced composition of sufficient scientific expertise to handle the problems that come before it.

(ii) Are special government employees, subject to the conflict of interest laws and regulations.

(2) The Commissioner may, in his discretion, provide for nonvoting members of a technical advisory committee to serve as representatives of and liaison with interested organizations. Nonvoting members of technical advisory committees:

(i) Shall be selected by the interested organizations, as provided in § 2.332. Technical expertise in the subject matter with which the advisory committee is involved shall not be a requirement.

(ii) Are special government employees subject to the conflict of interest laws and regulations, except as provided in § 2.332(e).

(c) No person may serve as a voting or nonvoting member on more than one Food and Drug Administration advisory committee unless the Commissioner determines in writing that such dual membership will facilitate the work of the committees involved and is in the public interest.

(d) Members of Food and Drug Administration advisory committees and the chairman thereof shall be appointed from among those nominated pursuant to §§ 2.331 and 2.333 and from any other sources by the Secretary, the Assistant Secretary for Health, or the Commissioner, pursuant to duly promulgated procedures and delegations of authority.

(e) Members appointed to an advisory committee shall continue to serve for the duration of the advisory committee, or until their terms of appointment expire, they resign, or are removed from membership by the Commissioner.

(f) An advisory committee member may be removed from membership by the Commissioner for good cause. Good cause shall include excessive unjustified absenteeism from advisory committee meetings, a demonstrated bias which interferes with the ability to render objective advice, failure to abide by the procedures established in this subpart, or violation of other applicable rules and regulations, e.g., for nonvoting members, the provisions of § 2.333(c).

##### § 2.331 Nominations of voting members of standing advisory committees.

(a) The Commissioner shall publish one or more notices in the FEDERAL REGISTER each year requesting nominations for voting members of all existing standing advisory committees. Each such notice shall list separately the standing advisory committees covered by the notice in which it is known that vacancies will occur during the next 12 months and in which vacancies are not expected but may occur. The notice shall invite the submission of nominations for voting members for any vacancies from any interested individual as well as from consumer, industry, and professional organizations for the advisory committees listed.

(b) The notice published in the FEDERAL REGISTER announcing the establishment of a new standing advisory committee pursuant to § 2.301(b) shall invite the submission of nominations for voting members for such advisory committee.

(c) Any interested person may nominate one or more qualified persons as a member of a particular advisory committee. Nominations shall specify the advisory committee for which the nominee is recommended. A complete curriculum vitae of the nominee shall be included. Nominations shall state that the nominee is aware of the nomination, is willing to serve as a member of the advisory committee, and appears to have

no conflict of interest which would preclude committee membership.

(d) Voting members of standing technical advisory committees shall serve as individuals and not as representatives of any group or organization which nominated them or with which they may be affiliated.

##### § 2.332 Nominations and selection of nonvoting members of standing technical advisory committees.

(a) The provisions of this section shall apply whenever the Commissioner concludes, in his discretion, that a standing technical advisory committee should include nonvoting members in order to represent and serve as a liaison with interested individuals and organizations.

(b) Except where the Commissioner determines otherwise, non-voting members of a standing technical advisory committee shall be limited to one member selected by consumer groups and organizations and one person selected by industry groups and organizations.

(c) With respect to any nonvoting member representing consumer interests, the Commissioner shall publish a notice in the FEDERAL REGISTER requesting nominations for each specific standing technical advisory committee for which he has determined that nonvoting members are appropriate.

(1) A period of 60 days shall be permitted for submission of such nominations for that particular advisory committee. Any interested person may nominate one or more qualified persons as a nonvoting member of a particular advisory committee to represent consumer interests. Interested persons may, in addition, nominate one or more qualified persons for general consideration as a nonvoting member of any advisory committee to represent consumer interests. All nominations shall be submitted in writing to Director, Office of Consumer Programs (HFG-1), Office of Assistant Commissioner for Professional and Consumer Programs, Food and Drug Administration, Rm. 15B-41, 5600 Fishers Lane, Rockville, MD 20852.

(2) A complete curriculum vitae of any nominee shall be included. Nominations shall state that the nominee is aware of the nomination, is willing to serve as a member of an advisory committee, and appears to have no conflict of interest. If a nominee is interested only in a particular advisory committee, the nomination shall so state. If a nominee is interested in becoming a member of any advisory committee, the nomination shall so state. Nominations which do not comply with the requirements of this paragraph shall not be considered.

(3) The Director, Office of Consumer Affairs, shall compile a list of organizations representing consumers or otherwise involved in consumer affairs, who shall be entitled to vote upon the nominees. Any organization which qualifies as a consumer organization may be included on such list upon request.

(4) After the time for nominations has expired, the curriculum vitae of

each of the nominees shall be sent to each of the organizations on the list compiled pursuant to paragraph (c)(3) of this section and to any other person submitting a nomination, together with a ballot to be filled out and returned within 30 days. After the time for return of the ballots has expired, the ballots shall be counted and the nominee who has received the highest number of votes shall be selected as the nonvoting member representing consumer interests for that particular advisory committee. In the event of a tie, the Commissioner shall select the winner by lot from among those tied for the highest number of votes.

(d) With respect to any nonvoting member representing industry interests, the Commissioner shall issue in the *Federal Register*, for each specific standing technical advisory committee for which he has determined that nonvoting members are appropriate, a notice requesting that any industry organization interested in participating in the selection of an appropriate nonvoting member representing industry interests send a letter stating that interest to the Food and Drug Administration employee designated in the notice within 30 days. After the time for such expression of interest has expired, a letter shall be sent to each organization which has expressed such an interest, attaching a complete list of all such organizations, and stating that it is their responsibility to consult with each other in selecting a single nonvoting member representing industry interests for that particular advisory committee within 60 days after receipt of the letter. If no such individual is so selected within that period of time, the Commissioner shall select the nonvoting member representing industry interests to serve on that advisory committee.

(e) The Commissioner has determined that, because nonvoting members representing consumer and industry interests are included on advisory committees specifically for the purpose of representing such interests and have no vote, any financial interest covered by 18 U.S.C. 208(a) in the class which the member represents is irrelevant to the services which the government expects from them and thus is hereby exempted pursuant to 18 U.S.C. 208(b) as too remote and inconsequential to affect the integrity of their services.

#### § 2.333 Rights and responsibilities of nonvoting members of advisory committees.

(a) A nonvoting member of an advisory committee selected to represent and serve as a liaison with interested individuals, associations, and organizations, shall have the same rights as any other advisory committee member except that:

(1) A nonvoting member shall not vote on any matter before the advisory committee except such procedural matters as additional rules adopted pursuant to § 2.309(a), approval of minutes pursuant to § 2.313(a), decisions relating to transcripts pursuant to § 2.314(b), and future meeting dates.

(2) A nonvoting member shall not have access to data and information that constitute a trade secret or confidential commercial or financial information as defined in § 4.61 of this chapter.

(b) A nonvoting member of an advisory committee is subject to, and shall abide by, all rules and regulations adopted by the Food and Drug Administration and the advisory committee.

(c) It is the responsibility of the nonvoting consumer and industry members of an advisory committee to represent the consumer and industry interests in all deliberations.

(1) A nonvoting member does not represent any particular organization or group, but rather represents all interested persons within the class which he is selected to represent. Accordingly, any interested person within the class represented by that nonvoting member shall have access to all written statements or oral briefings related to the committee prepared by the nonvoting member for distribution to any person outside the advisory committee.

(2) The nonvoting member shall review all official advisory committee minutes to assure their completeness and accuracy.

(3) The nonvoting member shall act as a liaison and conduit between the advisory committee and the interested persons whom he represents, and shall transmit requests for information from the committee and relevant data, information, and views to the committee. He shall take the initiative in contacting interested persons whom he represents, to seek out relevant data, information, and views, and to relate the progress of the advisory committee.

(4) A nonvoting industry member shall represent all members of the industry, and not any particular association, company, product, or ingredient. If a matter comes before the committee that directly or indirectly affects the company which employs the nonvoting industry member, he shall so inform the committee but need not absent himself during the discussion or decline to participate in the discussion. A nonvoting industry member shall not discuss his company's position as such, but may discuss any matter in general terms. All presentations and discussions of scientific data and their interpretation on behalf of a company shall occur in open session, except as provided in § 2.305(c).

(5) A nonvoting member of an advisory committee shall not make any presentation to that advisory committee during a hearing conducted by that advisory committee.

(6) Although a nonvoting member is serving in a representative capacity, he shall exercise restraint in performing his functions and shall not engage in unseemly advocacy or attempt to exert undue influence over the other members of the committee.

(d) A nonvoting member of an advisory committee may be removed by the Commissioner for failure to comply with the provisions of this section as well as § 2.330(f).

#### § 2.334 Ad hoc advisory committee members.

In selecting members of an ad hoc advisory committee, the Commissioner may utilize the procedures established in §§ 2.331 and 2.332 or any other procedure he concludes to be appropriate under the circumstances.

#### § 2.335 Compensation of public advisory committee members.

(a) All voting and nonvoting advisory committee members shall (1) be appointed as special government employees, except for members of the Technical Electronic Product Radiation Safety Standards Committee, and (2) receive a consultant fee and be reimbursed for their travel expenses, including per diem in lieu of subsistence, unless such compensation and reimbursement is waived.

(b) An advisory committee member, notwithstanding his primary residence, while in attendance at meetings of the full committee, or of a subcommittee, will be paid whether the meetings are held in the Washington, DC area or elsewhere.

(c) An advisory committee member who participates in any agency-directed assignment will be paid at an hourly rate when he performs his work at his home, place of business, or in a Food and Drug Administration facility located within his commuting area, and at a daily rate when he is required to travel outside of his commuting area to perform his assignment. An advisory committee member will not be paid for time spent on normal preparation for a committee meeting.

(1) An agency-directed assignment which meets the following criteria:

(i) An activity which requires undertaking a definitive study. The activity must produce a tangible end product, usually a written report. Examples are:

(a) an analysis of the risks and benefits of the use of a class of drugs or a report on a specific problem generated by an IND or NDA; (b) the performance of similar investigations or analysis of complex industry submissions to support advisory committee deliberations other than normal meeting preparation; (c) the preparation of a statistical analysis leading to an estimate of toxicologically safe dose levels; and (d) the design or analysis of animal studies of toxicity, mutagenicity, teratogenicity, or carcinogenicity.

(ii) The performance of an IND or NDA review or similar review.

(2) An advisory committee member who undertakes a special assignment, the end product of which does not represent the end product of the advisory committee, but rather of his own assignment, can be compensated. Should such preparatory work by advisory committee members collectively result in an end product of the advisory committee, this is to be considered normal meeting preparation and advisory committee members are not to be compensated for this work.

(d) Salary while in travel status is authorized when an advisory committee member has his ordinary pursuits interrupted for the substantial portion of an additional day beyond the day or days on which he performs services, and as a consequence he sustains a loss in his regular compensation. This applies on weekends and holidays if the special government employee suffers a loss in income he would otherwise earn on that day. For travel purposes, a substantial portion of a day is defined as 50 percent of the working day, and the traveler will be paid at a daily rate.

member has his ordinary pursuits interrupted for the substantial portion of an additional day beyond the day or days on which he performs services, and as a consequence he sustains a loss in his regular compensation. This applies on weekends and holidays if the special government employee suffers a loss in income he would otherwise earn on that day. For travel purposes, a substantial portion of a day is defined as 50 percent of the working day, and the traveler will be paid at a daily rate.

#### STANDING ADVISORY COMMITTEES

##### § 2.340 List of standing advisory committees.

The following standing advisory committees have been established for the Food and Drug Administration.

(a) *Office of the Commissioner*—(1) *Board of Tea Experts*. (i) Date established: March 2, 1897.

(ii) Function: Advises on establishment of uniform standards of purity, quality, and fitness for consumption of all tea imported into the United States pursuant to 21 U.S.C. 42.

(2) *National Advisory Food and Drug Committee*. (i) Date established: November 15, 1974.

(ii) Function: Reviews and evaluates agency programs and advises on policy matters of national significance as they relate to the statutory mission of the Food and Drug Administration in the areas of foods, drugs, cosmetics, medical devices, biological products, and electronic products. Reviews and makes recommendations on applications for grants-in-aid for research projects relevant to the mission of the Food and Drug Administration as required by law.

(3) *Toxicology Advisory Committee*. (i) Date established: December 9, 1974.

(ii) Function: Reviews and evaluates available data relating to the evaluation of the safety of chemicals present in foods, drugs, cosmetics, and medical devices. Advises on the safety of specific human drugs, animal drugs, color and food additives, cosmetic components, and components of devices. Recommends the development of standardized methodologies for the toxicity testing of such materials.

(b) *Bureau of Biologics*. (1) Advisory review panels for biological products, and dates established. (i) *Bacterial Vaccines and Bacterial Antigens Panel*. Established December 22, 1972.

(ii) *Bacterial Vaccines and Toroids Panel*. Established April 16, 1973.

(iii) *Viral Vaccines and Rickettsial Vaccines Panel*. Established April 16, 1973.

(iv) *Skin Test Antigens Panel*. Established August 24, 1973.

(v) *Allergenic Extracts Panel*. Established August 24, 1973.

(vi) *Blood and Blood Derivatives Panel*. Established August 24, 1973.

(2) Function: Reviews and evaluates available data concerning the safety and effectiveness of biological products.

(c) *Bureau of Drugs*—(1) *Anti-Infective Agents Advisory Committee*. (i) Date established: August 30, 1967.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in infectious diseases.

(2) *Arthritis Advisory Committee*. (i) Date established: April 5, 1974.

(ii) Function: Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in arthritic conditions.

(3) *Biometric and Epidemiological Methodology Advisory Committee*. (i) Date established: March 7, 1968.

(ii) Function: Reviews and evaluates scientific studies and data with respect to, and otherwise advises the Commissioner on, epidemiological and biometric methodology.

(4) *Cardiovascular and Renal Advisory Committee*. (i) Date established: August 27, 1970.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in cardiovascular and renal disorders.

(5) *Controlled Substances Advisory Committee*. (i) Date established: September 27, 1973.

(ii) Function: Advises the Commissioner regarding the scientific and medical evaluation of all information gathered by the Department of Justice and the Department of Health, Education, and Welfare with regard to safety, effectiveness, and abuse potential of drugs or other substances classified as stimulants, sedatives, hypnotics, or analgesics, and recommends actions to be taken with regard to control of such substances.

(6) *Dental Drug Products Advisory Committee*. (i) Date established: June 6, 1972.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the practice of dentistry.

(7) *FDA/NIDA Drug Abuse Research Advisory Committee*. (i) Date established: March 9, 1967.

(ii) Function: Advises the Food and Drug Administration on action to be taken with respect to investigational use of substances with abuse potential. Advises the National Institute on Drug Abuse on supplies of substances for clinical studies and on quantities of substances for animal and in vitro studies. Advises FDA and NIDA on development of broad outlines for studies of substances with abuse potential and on new methods and tests in animals and man by which the dependence liability of investigational drugs may be estimated.

(8) *Endocrinology and Metabolism Advisory Committee*. (i) Date established: August 27, 1970.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in endocrine and metabolic disorders.

(9) *Gastrointestinal Drugs Advisory Committee*. (i) Date established: January 3, 1974.

(ii) Function: Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in gastrointestinal diseases.

(10) *Neurologic Drugs Advisory Committee*. (i) Date established: June 4, 1974.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in neurologic disease.

(11) *Obstetrics and Gynecology Advisory Committee*. (i) Date established: August 31, 1965.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the practice of obstetrics and gynecology.

(12) *Oncologic Drugs Advisory Committee*. (i) Date established: October 24, 1973.

(ii) Function: Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the treatment of cancer.

(13) *Ophthalmic Drugs Advisory Committee*. (i) Date established: September 20, 1971.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in diseases and disorders of the eye.

(14) *Psychopharmacological Agents Advisory Committee*. (i) Date established: June 4, 1974.

(ii) Function: Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in the practice of psychiatry and related fields.

(15) *Pulmonary Allergy and Clinical Immunology Advisory Committee*. (i) Date established: February 17, 1972.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the treatment of pulmonary disease and diseases with allergic and/or immunologic mechanisms.

(16) *Radioactive Pharmaceuticals Advisory Committee*. (i) Date established: August 30, 1967.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the practice of nuclear medicine.

(17) *Respiratory and Anesthetic Drugs Advisory Committee*. (i) Date established: March 23, 1966.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the field of anesthesiology.

(18) *Surgical Drugs Advisory Committee*. (i) Date established: September 14, 1971.

(ii) Function: Reviews and evaluates available data concerning safety and effectiveness of marketed and investigational prescription drugs for use in the field of surgery.

(19) *Advisory review panels for over-the-counter (OTC) drugs.* (1) Dates established.

(a) *Antimicrobial Panel.* Established March 16, 1972.

(b) *Internal Analgesic Panel.* Established August 31, 1972.

(c) *Cold, Cough, Allergy, Bronchodilator, and Antiasthmatic Panel.* Established September 19, 1972.

(d) *Sedative, Tranquilizer, and Sleep Aid Panel.* Established September 19, 1972.

(e) *Laxative, Antidiarrheal, Antiemetic, and Emetic Panel.* Established December 27, 1972.

(f) *Topical Analgesic Panel.* Established December 27, 1972.

(g) *Dentifrice and Dental Care Panel.* Established December 27, 1972.

(h) *Hemorrhoidal Panel.* Established April 16, 1973.

(i) *Ophthalmic Panel.* Established April 16, 1973.

(j) *Contraceptive and Other Vaginal Drug Products Panel.* Established June 27, 1973.

(k) *Oral Cavity Panel.* Established July 16, 1973.

(l) *Antiperspirant Panel.* Established July 16, 1973.

(m) *Miscellaneous Internal Drug Products Panel.* Established July 16, 1973.

(n) *Miscellaneous External Drug Products Panel.* Established July 16, 1973.

(o) *Vitamin, Mineral, and Hematinic Panel.* Established July 16, 1973.

(i) *Function:* Reviews and evaluates available data concerning the safety and effectiveness of nonprescription drug products.

(d) *Bureau of Medical Devices and Diagnostic Products.* (1) *Advisory review panels for medical devices, and dates established.*

(i) *Cardiovascular Panel.* Established March 22, 1972.

(ii) *Orthopaedic Panel.* Established April 25, 1972.

(iii) *Diagnostic Products Advisory Committee.* Established August 9, 1972.

(iv) *Dental Panel.* Established October 3, 1972.

(v) *Anesthesiology Panel.* Established October 3, 1972.

(vi) *Gastroenterology and Urological Panel.* Established April 16, 1973.

(vii) *Obstetrical and Gynecological Panel.* Established April 16, 1973.

(viii) *Radiology Panel.* Established October 15, 1973.

(ix) *Neurology Panel.* Established October 15, 1973.

(x) *General Hospital Panel.* Established October 15, 1973.

(xi) *Physiatry Panel.* Established October 15, 1973.

(xii) *General and Plastic Surgery Panel.* Established October 15, 1973.

(xiii) *Ear, Nose, and Throat Panel.* Established October 15, 1973.

(xiv) *Ophthalmic Panel.* Established October 15, 1973.

(2) *Function:* Reviews and evaluates available data concerning the safety and effectiveness of devices currently in use

and makes recommendations for their regulation.

(e) *Bureau of Radiological Health—* (1) *Medical Radiation Advisory Committee.* (i) Date established: October 31, 1963.

(ii) *Function:* Advises on the formulation of policy and development of a coordinated program related to the application of ionizing radiation in the healing arts.

(2) *Technical Electronic Product Radiation Safety Standards Committee.*

(i) Date established: October 18, 1968.

(ii) *Function:* Advises on technical feasibility, reasonableness, and practicability of performance standards for electronic products to control the emission of radiation pursuant to 42 U.S.C. 263 (f) (1) (A).

(3) *Radiation Bio-Effects and Epidemiology Advisory Committee.* (i) Date established: October 21, 1971.

(ii) *Function:* Advises on the total research program of laboratory and epidemiological studies of biological effects and health implications of exposure to radiation.

(f) *National Center for Toxicological Research, Science Advisory Board.* (1) Date established: June 2, 1973.

(2) *Function:* Advises on establishment of an implementation of a research program that will assist the Commissioner of Food and Drugs and the Administrator, Environmental Protection Agency, in fulfilling their regulatory responsibilities.

TECHNICAL ELECTRONIC PRODUCTS RADIATION SAFETY STANDARDS COMMITTEE

§ 2.350 *Establishment of the Technical Electronic Product Radiation Safety Standards Committee (TEPRSSC).*

The Technical Electronic Product Radiation Standards Committee (TEPRSSC), consisting of 15 members, is established pursuant to the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263f (f) (1) (A)). The purpose of TEPRSSC is to provide consultation with the Commissioner before he prescribes any performance standard for an electronic product, as required by law.

§ 2.351 *Functions of TEPRSSC.*

(a) In performing its function of advising the Commissioner, TEPRSSC:

(1) May propose electronic product radiation safety standards to the Commissioner for his consideration.

(2) Shall provide consultation to the Commissioner on all performance standards proposed for consideration under 42 U.S.C. 263f.

(3) May make recommendations to the Commissioner on any other matters it deems necessary or appropriate in fulfilling the purposes of the act.

(b) Responsibility for action with respect to performance standards under 42 U.S.C. 263f rests with the Commissioner, after receiving the advice of TEPRSSC.

§ 2.352 *Procedures of TEPRSSC.*

(a) When the Commissioner is considering promulgation of a performance

standard for an electronic product, or any amendment of an existing standard, he shall, prior to issuance of a proposed regulation in the FEDERAL REGISTER, submit to TEPRSSC the proposed standard or amendment under consideration, together with other relevant information to aid TEPRSSC in its deliberations.

(b) The agenda and other material to be considered at any meeting shall be sent to members whenever possible at least 2 weeks prior to the meeting.

(c) Ten members shall constitute a quorum, provided at least three members from each group specified in 42 U.S.C. 263f (f) (1) (A) and in § 2.353 (a), i.e., government, industry, and the public, are present.

(d) The chairman of TEPRSSC shall ordinarily submit to the Commissioner a report of the committee's consideration of any proposed performance standard for an electronic product within 60 days after such consideration. If the chairman believes that more time is needed, he shall so inform the Director of the Bureau of Radiological Health in writing, in which case an additional 30 days will be allowed to make the report.

(e) The provisions of §§ 2.300 through 2.319 shall be applicable to TEPRSSC, except where other provisions are specifically included in §§ 2.350 through 2.354.

§ 2.353 *Membership of TEPRSSC.*

(a) The members shall be appointed by the Commissioner after consultation with public and private associations and organizations concerned with the technical aspect of electronic product radiation safety. TEPRSSC shall consist of fifteen members, each of whom shall be technically qualified by training and experience in one or more fields of science or engineering applicable to electronic product radiation safety, as follows:

(1) Five members shall be selected from government agencies, including State and Federal governments.

(2) Five members shall be selected from the affected industries after consultation with industry representatives.

(3) Five members shall be selected from the general public, of whom at least one shall be a representative of organized labor.

(b) The Commissioner shall appoint a committee member as chairman of TEPRSSC.

(c) Appointments of members shall be for a term of 3 years or as specified by the Commissioner.

(1) The chairman shall be appointed for a term concurrent with his term as a member of TEPRSSC. If the chairmanship becomes vacant without adequate notice, the executive secretary may appoint a committee member as temporary chairman pending appointment of a new chairman by the Commissioner.

(2) Members shall not be reappointed for a second consecutive full term.

(d) A person otherwise qualified for membership shall not be eligible for selection as a member of TEPRSSC from government agencies or the general public if the Commissioner determines that

he does not meet the requirements of the conflict of interest laws and regulations.

(e) Retention of membership is conditioned upon:

(1) The member's continued status as a member of the group from which he was selected as specified in paragraph (a) of this section.

(2) The absence of any conflict of interest during the term of membership as specified in paragraph (d) of this section.

(3) Active participation in TEPRSSC activities.

(f) Appointment as a member of TEPRSSC shall be conditioned upon a certification from the prospective member that he:

(1) Agrees to the procedures and criteria as specified in this subpart.

(2) Has no conflict of interest as specified in paragraph (d) of this section.

(3) Will notify the executive secretary of TEPRSSC prior to any change in his representative status on TEPRSSC which may be contrary to the conditions of his appointment.

(g) Members of TEPRSSC who are not full-time officers or employees of the United States shall, in accordance with 42 U.S.C. 210(c), receive compensation pursuant to the provisions of § 2.335.

§ 2.354 *Conduct of TEPRSSC meetings; availability of TEPRSSC records.*

(a) In accordance with 42 U.S.C. 263 (f) (1) (B), all proceedings of TEPRSSC shall be open, except as provided in paragraph (b) of this section, and shall be recorded, and the record of each such proceeding shall be available for public inspection.

(b) The provisions of paragraph (a) of this section with respect to open meetings shall not apply where TEPRSSC:

(1) Consider any information which contains or relates to a trade secret or other matter referred to in 18 U.S.C. 1905 and thus in accordance with 42 U.S.C. 263(e) may not be publicly disclosed.

(2) Meets in executive session to formulate and vote on its recommendations or to consider administrative matters.

COLOR ADDITIVE ADVISORY COMMITTEES

§ 2.360 *Establishment of a color additive advisory committee.*

The Commissioner shall establish a color additive advisory committee whenever:

(a) The Commissioner concludes, in his discretion, that it would be in the public interest for a color additive advisory committee to review and make recommendations with respect to the safety of any color additive on which important issues are pending before the Food and Drug Administration, and for interested persons to present data, information, and views at an oral public hearing before a color additive advisory committee.

(b) Any person who would be adversely affected by the issuance, amendment, or repeal of a regulation listing a color additive requests that any issue relating

to the safety of the color additive arising under section 706(b) (5) (B) of the act because of the color additive's potential or actual carcinogenicity and requiring the exercise of scientific judgment be referred to a color additive advisory committee.

(1) The provisions of paragraph (b) of this section are inapplicable to any issue arising under the transitional provisions in section 203 of the Color Additive Amendments of 1960 relating to provisional listing of commercially established colors. Any color additive advisory committee to consider any such matter shall be established pursuant to the provisions of paragraph (a) of this section.

(2) A request for establishment of a color additive advisory committee shall be pursuant to § 2.7. The Commissioner may deny any such petition if inadequate grounds are stated for establishment of a color additive advisory committee. A request for establishment of a color additive advisory committee may not rest on mere allegations or denials, but must set forth specific facts showing there is a genuine and substantial issue of fact that requires scientific judgment and justifies a hearing before a color additive advisory committee. When it conclusively appears from the request for a color additive advisory committee that the matter is premature or that it does not involve an issue arising under section 706(b) (5) (B) of the act or there is no genuine and substantial issue of fact requiring scientific judgment or for any other reason a color additive advisory committee is not justified, the Commissioner may deny the establishment of a color additive advisory committee.

(3) Establishment of a color additive advisory committee on the request of an interested person shall be conditioned upon receipt of the applicable fee specified in § 2.364.

(4) Any person so adversely affected may request referral of such a matter to a color additive advisory committee at any time before, or within 30 days after, publication of an order of the Commissioner acting upon a color additive petition or proposal.

§ 2.361 *Functions of a color additive advisory committee.*

(a) A color additive advisory committee shall review all available information relating to the matter referred to it, including all data and information contained in any pertinent color additive petition and in Food and Drug Administration files. All such data and information so reviewed shall be placed on public display and available for review at the office of the Hearing Clerk.

(b) The Commissioner shall specify to the color additive advisory committee, in writing, the issues on which review and recommendations are requested.

(c) The date of the first meeting of a color additive advisory committee, following receipt of the administrative record by each of the committee members, shall be designated as the beginning of the period allowed for consideration of the matter by the color additive advisory

committee. Within 60 days after that first meeting, unless the time is extended as provided in paragraph (d) of this section, the chairman of the color additive advisory committee shall certify to the Commissioner the report containing the recommendations of the color additive advisory committee, including any minority report. The report shall state the recommendations of the color additive advisory committee and the reasons or basis for such recommendations. The report shall include copies of all material considered by the color additive advisory committee in addition to the administrative record furnished to it.

(d) If the chairman concludes that the color additive advisory committee needs additional time, he shall so inform the Commissioner in writing and may certify the report of the color additive advisory committee to the Commissioner within 90 days instead of 60 days.

(e) More than one matter may be handled by a color additive advisory committee concurrently.

§ 2.362 *Procedures of a color additive advisory committee.*

(a) A color additive advisory committee shall be subject to all the requirements of the Federal Advisory Committee Act and this subpart.

(b) All interested persons shall have a right to consult with the color additive advisory committee reviewing a matter, and to submit data, information, and views to a color additive advisory committee, in accordance with the procedures established in this subpart.

§ 2.363 *Membership of a color additive advisory committee.*

(a) The member of a color additive advisory committee shall be selected in the following manner:

(1) If a color additive advisory committee is established for purposes that do not include review of an issue arising under section 706(b) (5) (B) of the act, or is established on the initiative of the Commissioner, the Commissioner may utilize the procedure established in paragraph (a) (2) of this section to select the members, or may utilize an existing standing advisory committee listed in § 2.340, or may establish a new advisory committee pursuant to the provisions of this subpart. Once the Commissioner has established a color additive advisory committee pursuant to this paragraph and has referred to it a matter relating to a color additive, no interested person may subsequently request that an additional or different color additive advisory committee be established to review and make recommendations with respect to that color additive.

(2) If the Commissioner establishes a color additive advisory committee to review an issue arising under section 706(b) (5) (B) of the act on the request of an interested person, it shall be established pursuant to the following requirements.

(i) Except as provided in paragraph (a) (2) (ii) and (iii) of this section, the Commissioner shall request the National Academy of Sciences to select the mem-

bers of a color additive advisory committee from among experts qualified in the subject matter to be reviewed by the committee, and of adequately diversified professional backgrounds. The Commissioner shall appoint one of the members so selected as the chairman.

(ii) If the National Academy of Sciences is unable or refuses to select the members of a color additive advisory committee, the Commissioner shall select such members, who shall ordinarily be the Toxicology Advisory Committee in accordance with § 2.322.

(iii) If the Commissioner and the requesting party agree, the provisions of section 706(b)(5)(D) of the act may be waived and the matter may be referred to any standing advisory committee listed under § 2.340 or to any advisory committee established pursuant to any other procedure that is mutually agreeable, which shall ordinarily be the Toxicology Advisory Committee in accordance with § 2.322. Once the Commissioner has so established a color additive advisory committee and has referred to it a matter relating to a color additive, no interested person may subsequently request that an additional or different color additive advisory committee be established to review and make recommendations with respect to that color additive.

(b) Members of a color additive advisory committee shall be subject to the requirements of the Federal Advisory Committee Act and this subpart, except that no member of a color additive advisory committee shall by reason of such membership alone be a special government employee or be subject to the conflict of interest laws and regulations.

#### § 2.364 Fees and compensation pertaining to a color additive advisory committee.

(a) In the event of a referral of any matter to a color additive advisory committee, all costs related thereto, including personal compensation of committee members, travel, materials, and other costs, shall be borne by the person requesting the referral, such costs to be assessed on the basis of actual cost to the government. The compensation of such costs shall include personal compensation of color additive advisory committee members at a rate not to exceed \$128.80 per member per day.

(b) In the case of a request for referral to a color additive advisory committee, a special advance deposit shall be made in the amount of \$2,500.00. Where required, further advances in increments of \$2,500.00 each shall be made upon request of the Commissioner. All deposits for referrals to a color additive advisory committee in excess of actual expenses shall be refunded to the depositor.

(c) All deposits and fees required by the regulations in this section shall be paid by money order, bank draft or certified check drawn to the order of the Food and Drug Administration, collectable at par in Washington, DC. All deposits and fees shall be forwarded to the Associate Commissioner for Administration.

tion. Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20852, whereupon after making appropriate record thereof they will be transmitted to the Treasurer of the United States for deposit in the special account "Salaries and Expenses, Certification, Inspection, and Other Services, Food and Drug Administration."

(d) The Commissioner may waive or refund such fees in whole or in part when, in his judgment, such action will promote the public interest. Any person who believes that payment of these fees will work a hardship on him may petition the Commissioner pursuant to § 2.7 to waive or refund the fees.

#### PUBLIC ADVISORY COMMITTEES FOR HUMAN PRESCRIPTION DRUGS

##### § 2.370 Establishment of standing technical public advisory committees for human prescription drugs.

The standing technical advisory committees for human prescription drugs are established to advise the Commissioner:

(a) Generally on the safety and effectiveness, including the labeling and advertising, and regulatory control of any of the human prescription drugs falling within the pharmacologic class covered by the advisory committee and on the scientific standards appropriate for a determination of safety and effectiveness in that class of drugs.

(b) Specifically on any particular matter involving a human prescription drug pending before the Food and Drug Administration, including whether the available data and information are adequate to support a determination that:

(1) A particular IND study may properly be conducted.

(2) A particular drug meets the statutory standard for proof of safety and effectiveness necessary for approval or continued approval for marketing.

(3) A particular drug is properly classified as a new drug, an old drug, or a banned drug.

##### § 2.371 Utilization of a public advisory committee on the initiative of the Food and Drug Administration.

(a) Any matter involving a human prescription drug under review within the agency may, in the discretion of the Commissioner, be the subject of a public hearing and continuing or periodic review by the appropriate standing technical advisory committee for human prescription drugs. The Commissioner's determinations with respect to the agenda of such an advisory committee shall be based upon the priorities of the various matters pending before the agency which fall within the pharmacologic class covered by that advisory committee.

(b) High priority for such hearing and review by the appropriate standing technical advisory committee for human prescription drugs shall be given to the following types of human prescription drugs:

(1) Investigational drugs which are potential therapeutic advances over currently marketed products from the standpoint of safety or effectiveness, or which

pose significant safety hazards, or which present narrow benefit-risk considerations requiring a close judgmental decision in regard to approval for marketing, or which have a novel delivery system or formulation, or which are the subject of major scientific or public controversy, or which may be subject to special regulatory requirements such as a limitation on clinical trials, a patient followup requirement, post-marketing Phase IV studies, distributional controls, or boxed warnings.

(2) Marketed drugs for which an important new use has been discovered, or which pose newly discovered safety hazards, or which are the subject of major scientific or public controversy, or which may be subject to important regulatory actions such as withdrawal of approval for marketing, boxed warnings, distributional controls, or newly required scientific studies.

(c) The advisory committee may request the Commissioner for an opportunity to hold a public hearing and to review any matter involving a human prescription drug which falls within the pharmacologic class covered by the advisory committee. The Commissioner shall, after consulting with the advisory committee on such request, grant or deny the request in light of the priorities of the other matters pending before the advisory committee. Whenever feasible, consistent with the other work of the advisory committee, such a request shall be granted.

(d) For any drug which meets any of the criteria established in paragraph (b) of this section, one or more members of or consultants to the appropriate advisory committee may be selected for more detailed monitoring of the matter and consultation with the Food and Drug Administration on behalf of the committee. Such member or consultant may be invited by the agency to attend appropriate meetings and shall assist the bureau in any briefing of the committee with respect to that matter.

(e) An advisory committee may obtain advice and recommendations from the Toxicology Advisory Committee, the Biometric and Epidemiological Methodology Advisory Committee, and from such other agency advisory committees, consultants and experts as the advisory committee and the bureau conclude would facilitate the work of the advisory committee.

(f) Presentation of all relevant data and information relating to any such matter shall be made in open session unless it relates to an IND the existence of which has not previously been disclosed to the public as defined in § 4.81 of this chapter or is otherwise prohibited from public disclosure pursuant to the provisions of Part 4 of this chapter and the regulations referenced therein. The provisions of §§ 314.14, 431.71, and 601.51 of this chapter shall determine whether, and the extent to which, relevant data and information shall be made available for public disclosure, summarized and discussed in open session but not otherwise made available for public disclosure,

or not in any way discussed or disclosed in open session or otherwise disclosed to the public.

##### § 2.372 Advice and recommendations in writing.

Advice and recommendations given by an advisory committee with respect to a specific drug or a class of drugs shall ordinarily be in the form of a written report. Such written report may consist of the approved minutes of the meeting or a separate written report. Such written report shall respond to the specific issues or questions which the Commissioner has addressed to the advisory committee, and shall state the basis of the advice and recommendations of the advisory committee.

##### § 2.373 Utilization of a public advisory committee at the request of an interested person.

Any interested person may request, pursuant to § 2.7 of this Part, that a specific matter relating to a particular human prescription drug be submitted to an appropriate advisory committee for a hearing and review and recommendations. Any such request shall demonstrate the importance of the matter and the reasons why it should be submitted for a hearing and at that time. The Commissioner may, in his discretion, grant or deny any such request.

#### Subpart E—Public Hearing Before the Commissioner

##### § 2.400 Scope of subpart.

Subpart E governs the practices and procedures applicable whenever:

(a) The Commissioner concludes, in his discretion, that it is in the public interest to permit interested persons to present data, information, and views at a public hearing on any particular matter, or class of matters, of importance pending before the Food and Drug Administration.

(b) Pursuant to specific provisions in other sections of this chapter, a matter pending before the Food and Drug Administration is subject to a public hearing before the Commissioner. Such specific provisions are in § 330.10(a)(8) of this chapter relating to review of the safety, effectiveness, and labeling of over-the-counter drugs.

(c) A person who has right to an opportunity for a formal evidentiary public hearing under Subpart B of this Part waives that opportunity and in lieu thereof requests pursuant to § 2.117 of this Part a public hearing before the Commissioner pursuant to this Subpart E, and the Commissioner, in his discretion, accepts this request.

##### § 2.401 Notice of a public hearing before the Commissioner.

(a) If the Commissioner determines that a public hearing before the Commissioner should be held on any matter, he shall publish in the FEDERAL REGISTER a notice of hearing setting forth the following information:

(1) If the hearing is pursuant to § 2.400 (a) or (b):

(i) The purpose of the hearing and the subject matter to be considered. If any written document is to be the subject matter of the hearing, it shall be published as part of the notice, or reference shall be made to it if it has already been published in the FEDERAL REGISTER, or the notice shall state that the document is available from the Hearing Clerk or an agency employee designated in the notice.

(ii) The time, date, and place of the hearing, or a statement that such information shall be contained in a subsequent notice published in the FEDERAL REGISTER.

(2) If the hearing is in lieu of a formal evidentiary hearing pursuant to § 2.400 (c), all of the information described in § 2.117(e) of this Part.

(b) The scope of the hearing shall be determined by the notice of hearing and any specific provisions in other sections of this chapter. If any such specific provision, e.g., § 330.10(a)(10) of this chapter, limits a hearing to review of an existing administrative record, data and information not already included in the record shall not be submitted or considered at the hearing.

##### § 2.402 Notice of appearance; schedule for hearing.

(a) The notice of hearing shall provide interested persons an opportunity to file a written notice of appearance with the Hearing Clerk within a specified period of time in the form and pursuant to the requirements specified in § 2.131. If the public interest requires that such a hearing be conducted within a short period of time, the notice may name a specific Food and Drug Administration employee, together with his telephone number, to whom an oral notice of appearance shall be given. A written or oral notice of appearance shall be received by the Hearing Clerk, or other designated person, by the close of business of the day specified in the notice.

(b) A notice of appearance shall state the approximate amount of time requested by the person for his presentation. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations.

(c) Promptly after expiration of the time specified in the notice for the filing of a notice of appearance, the Commissioner shall determine the amount of time allocated to each such person for his oral presentation and the time that oral presentation is scheduled to begin. Each such person shall be so informed in writing or, if the time prior to the hearing is short, by telephone. The Commissioner may require joint presentations by persons with common interests.

(d) The Commissioner shall prepare a hearing schedule showing the persons making oral presentations and the time allotted to each such person, which shall be filed with the Hearing Clerk and mailed or telephoned to each such person and, if time permits, published in the FEDERAL REGISTER.

##### § 2.403 Conduct of a public hearing before the Commissioner.

(a) The Commissioner or his designee shall preside at the hearing, except where specific provisions in other sections of this chapter require that the Commissioner preside personally. The presiding officer may be accompanied by other Food and Drug Administration employees or other Federal government employees designated by the Commissioner, who may serve as a panel in conducting the hearing.

(b) The hearing shall be transcribed.

(c) Each person may use his allotted time in whatever way he wishes, consistent with a reasonable and orderly hearing. A person may be accompanied by any number of additional persons, and may present any written data, information, or views for inclusion in the record of the hearing, subject to the requirements of § 2.404.

(d) If a person is not present at the time, specified for his presentation, the persons following will appear in order. An attempt will be made to hear any such person at the conclusion of the hearing. Any other interested persons attending the hearing who did not request an opportunity to make an oral presentation shall be given an opportunity to make an oral presentation at the conclusion of the hearing, in the discretion of the presiding officer, to the extent that time permits.

(e) The presiding officer and any other persons serving with him as a panel may question any person during or at the conclusion of his presentation. No other person attending the hearing may question a person making a presentation. The presiding officer may allot additional time to any person when he concludes that it is in the public interest, but may not reduce the time allotted for any person without their consent.

(f) The hearing shall be informal in nature, and the rules of evidence shall not apply. No motions or objections relating to the admissibility of data, information, and views shall be made or considered, but other participants may comment upon or rebut all such data, information, and views. No participant may interrupt the presentation of another participant at any hearing for any reason.

##### § 2.404 Written submissions pertaining to a public hearing before the Commissioner.

Any interested person may submit data, information, or views on the matter that is the subject of the hearing in writing to the Hearing Clerk, pursuant to § 2.5. The record of the hearing shall remain open for 15 days after the hearing is held for any additional written submissions, unless the notice of the hearing specifies otherwise or the presiding officer rules otherwise at the hearing.

##### § 2.405 Administrative record of a public hearing before the Commissioner.

(a) The administrative record of a public hearing before the Commissioner shall consist of the following:

V 40-102 MAY 27 75

XUM

(1) All relevant FEDERAL REGISTER notices, including any documents to which they refer.

(2) All written submissions pursuant to § 2.404.

(3) The transcript of the oral hearing.

(b) The record of the administrative proceeding shall be closed at the time specified in § 2.404.

#### § 2.406 Examination of administrative record.

The availability for public examination and copying of each document which is a part of the administrative record of the hearing shall be governed by the provisions of § 2.511. Each document which is available for public examination or copying shall be placed on public display in the office of the Hearing Clerk promptly upon receipt in that office.

#### Subpart F—Regulatory Hearing Before the Food and Drug Administration

##### § 2.500 Scope of subpart.

Subpart F governs the practices and procedures applicable whenever:

(a) The Commissioner is considering any regulatory action, including a refusal to act, and concludes, in his discretion, on his own initiative or at the suggestion of any person, to offer an opportunity for a regulatory hearing before he makes a decision or takes action.

(b) Any provision in any regulation of this chapter provides any person with an opportunity for a hearing with respect to any regulatory action, including proposed action, and such regulation either specifically provides an opportunity for a regulatory hearing pursuant to this subpart or provides an opportunity for a hearing but does not specify the procedures for such hearing and such procedures are not specified in other provisions of this chapter. Such sections are:

(1) Section 202.1(j)(5), relating to approval of prescription drug advertisements.

(2) Section 8.27(b), relating to refusal to certify a batch of a color additive.

(3) Section 8.28(b), relating to suspension of certification service for a color additive.

(4) Section 8.33(a), relating to use of food containing a new color additive.

(5) Section 10.5(d), relating to a temporary permit to vary from a food standard.

(6) Section 121.75(b), relating to use of food containing an investigational food additive.

(7) Section 511.1(b)(5), relating to use of food containing an investigational new animal drug.

(8) Section 511.1(c)(1), relating to termination of an INAD for an investigator.

(9) Section 511.1(c)(4) and (d), relating to termination of an INAD for a sponsor.

(10) Section 514.210, relating to suspension of certification service for a veterinary antibiotic drug.

(11) Section 312.1(c)(1), relating to whether an investigator is entitled to receive investigational new drugs.

(12) Sections 312.1(c)(4) and (d), relating to termination of an IND for a sponsor.

(13) Section 312.9(c), relating to termination of an IND for tests in vitro and in laboratory research animals for a sponsor.

(14) Section 429.50, relating to suspension of certification service for an antibiotic drug.

(15) Section 433.2(d), relating to exemption from certification for an antibiotic drug.

(16) Section 433.12(b)(5), relating to an exemption from labeling for a certifiable antibiotic drug.

(17) Section 433.13(b), relating to an exemption from manufacturing use for a certifiable antibiotic drug.

(18) Section 433.14(b), relating to an exemption for storage for a certifiable antibiotic drug.

(19) Section 433.15(b), relating to an exemption for processing for a certifiable antibiotic drug.

(20) Section 433.16(b), relating to an exemption for repackaging for a certifiable antibiotic drug.

(21) Section 1003.11(a)(3), relating to the failure of an electronic product to comply with an applicable standard or to a defect in an electronic product.

(22) Section 1003.31(d), relating to denial of an exemption from notification requirements for an electronic product which fails to comply with an applicable standard.

(23) Section 1004.6, relating to plan for repurchase, repair, or replacement of an electronic product.

(24) Section 1210.30, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(25) Any other provision in the regulations in this chapter under which a party who is adversely affected by regulatory action is entitled to an opportunity for a hearing, and no other procedural provisions in this part are by regulation applicable to such hearing.

(26) Section 1210.31, relating to plan for repurchase, repair, or replacement of an electronic product.

(27) Section 1210.32, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(28) Section 1210.33, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(29) Section 1210.34, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(30) Section 1210.35, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(31) Section 1210.36, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(32) Section 1210.37, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(33) Section 1210.38, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(34) Section 1210.39, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(35) Section 1210.40, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(36) Section 1210.41, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(37) Section 1210.42, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(38) Section 1210.43, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(39) Section 1210.44, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(40) Section 1210.45, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(41) Section 1210.46, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

(42) Section 1210.47, relating to denial, suspension, or revocation of a permit under the Federal Import Milk Act.

sections include Subpart A of Part 90 of this chapter, relating to emergency permit control.

##### § 2.505 Presiding officer.

(a) Any Food and Drug Administration employee to whom the Commissioner delegates such authority, or any other agency employee designated by an employee to whom such authority is delegated, may serve as the presiding officer at and conduct a regulatory hearing pursuant to the provisions of this subpart.

(b) The presiding officer shall be free from bias or prejudice and shall not have participated in the investigation or action that is the subject of the hearing or be subordinate to a person who has participated in such investigation or action.

(c) A different presiding officer may be substituted for the one originally designated pursuant to §§ 2.510 and 2.511 without notice to the parties.

##### § 2.506 Right to counsel.

Any party to a hearing pursuant to this subpart shall have the right at all times to be advised and accompanied by counsel.

##### § 2.510 Regulatory hearing on the initiative of the Commissioner.

(a) A regulatory hearing on the initiative of the Commissioner pursuant to § 2.500(a) shall be initiated by a notice of opportunity for hearing from the Food and Drug Administration.

(1) Such notice shall be sent by registered mail, telegram, telex, personal delivery, or any other mode of written communication.

(2) Such notice shall specify the facts and the action that are the subject of the opportunity for a hearing.

(3) Such notice shall state that the notice of opportunity for hearing and the hearing are governed by the provisions of this subpart.

(4) Such notice shall state the time within which a hearing shall be requested, shall be signed by the Food and Drug Administration employee who will be the presiding officer in the event a hearing is held, and shall state the name, address, and telephone number of the presiding officer.

(b) Any person offered an opportunity for a hearing shall have the amount of time specified in the notice, which shall be not less than 3 working days after receipt of such notice, within which to request a hearing. Such request may be filed by registered mail, telegram, telex, personal delivery, or any other mode of written communication, addressed to the presiding officer. If no response is filed within such time, the offer shall be deemed to have been refused and no hearing shall be held.

(c) If a hearing is requested, such hearing shall take place at a time and location agreed upon by the party requesting the hearing and the presiding officer or, if such agreement cannot be reached, at a reasonable time and location designated by the presiding officer.

(d) A notice of opportunity for hearing under this section shall not operate

to delay or stay any administrative action, including enforcement action of any kind, by the agency unless the Commissioner, in his discretion, determines that delay or a stay is in the public interest.

##### § 2.511 Regulatory hearing pursuant to regulation.

(a) A regulatory hearing pursuant to a regulation listed in § 2.500(b) shall be initiated by a notice of opportunity for hearing from the Food and Drug Administration.

(1) Such notice shall be sent by registered mail, telegram, telex, personal delivery, or any other mode of written communication.

(2) Such notice shall specify the facts and the action that are the subject of the opportunity for hearing, and shall state whether the action is or is not being taken pending the hearing pursuant to paragraph (e) of this section.

(3) Such notice shall state that the notice of opportunity for hearing and the hearing are governed by the provisions of this subpart.

(4) Such notice shall state the time within which a hearing shall be requested, and shall state the name, address, and telephone number of the Food and Drug Administration employee to whom any request for hearing shall be addressed.

(b) Any person offered an opportunity for hearing shall have the amount of time specified in the notice, which shall be not less than 3 working days after receipt of such notice, within which to request a hearing. Such request may be filed by registered mail, telegram, telex, personal delivery, or any other mode of written communication, addressed to the presiding officer. If no response is filed within such time, the offer shall be deemed to have been refused and no hearing shall be held.

(c) If a hearing is requested, the Commissioner shall designate a presiding officer and such hearing shall take place at a time and location agreed upon by the party requesting the hearing and the presiding officer or, if such agreement cannot be reached, at a reasonable time and location designated by the presiding officer. The hearing may not be required to be held at a time less than two working days subsequent to receipt of the request for hearing.

(d) Before the hearing, the Food and Drug Administration shall give to the party requesting the hearing reasonable notice of the matters to be considered at the hearing, including a comprehensive statement of the basis for the decision or action taken or proposed that is the subject of the hearing and a general summary of the information that will be presented by the Food and Drug Administration at the hearing in support of such decision or action. Such information may be given orally or in writing, in the discretion of the Commissioner.

(e) The Commissioner may take such action pending a hearing pursuant to this section as he concludes is necessary to protect the public health, except where expressly prohibited by statute or regulation.

lation. A hearing to consider action already taken, and not stayed by the Commissioner, shall be conducted on an expedited basis.

(f) On the basis of the administrative record of the hearing specified in § 2.513(a), the Commissioner shall issue a written decision stating the reasons for his administrative action and the basis in the record.

##### § 2.512 Hearing procedure.

(a) A regulatory hearing may be conducted in private or may be a public hearing, as determined by the party requesting the hearing.

(1) The party requesting the hearing shall inform the presiding officer or other designated agency employee at the time that he requests the hearing, whether it will be a private or public hearing. If the party requesting the hearing fails to state whether the hearing shall be private or public, it shall be a private hearing.

(2) If the hearing is a private hearing, no persons other than the party requesting the hearing, his counsel and witnesses, and an employee or consultant or other person subject to a commercial arrangement as defined in § 4.81(a) of this chapter, and Food and Drug Administration representatives, shall be entitled to attend.

(3) If the hearing is a public hearing, it shall be announced on the public calendar described in § 2.21(a) whenever feasible, and any interested person who attends the hearings may participate to the extent of presenting relevant information.

(b) A regulatory hearing shall be conducted by a presiding officer. Employees of the Food and Drug Administration shall first give a full and complete statement of the action which is the subject of the hearing, together with the information and reasons supporting it, and may present any oral or written information relevant to the hearing. The party requesting the hearing shall then have the right to present any oral or written information relevant to the hearing. All parties may confront and conduct reasonable cross-examination of any person (except for the presiding officer and counsel for the parties) who makes any statement with respect to the matter at the hearing.

(c) The hearing shall be informal in nature, and the rules of evidence shall not apply. No motions or objections relating to the admissibility of data, information, and views shall be made or considered, but any other party may comment upon or rebut all such data, information, and views.

(d) The Commissioner may, in his discretion, order the hearing to be transcribed. The party requesting the hearing shall have the right to have the hearing transcribed, at his expense, in which case a copy of such transcription shall be furnished to the Food and Drug Administration and included with the presiding officer's report of the hearing. Any transcription of the hearing shall

be included with the presiding officer's report of the hearing.

(e) The presiding officer shall prepare a written report of the hearing. All written material presented at the hearing shall be attached to the report. Whenever time permits, the parties to the hearing shall be given the opportunity to review and offer corrections to the presiding officer's report of the hearing.

##### § 2.513 Administrative record of a regulatory hearing.

(a) The record of the administrative proceeding shall consist of the following:

(1) The notice of opportunity for hearing and the response thereto.

(2) All written data, information, and views submitted to the presiding officer at the hearing.

(3) Any transcript of the hearing.

(4) The presiding officer's report of the hearing.

(b) The record of the administrative proceeding shall be closed with respect to the submission of data, information, and views, at the close of the hearing, unless the presiding officer specifically permits additional time for a further submission.

##### § 2.514 Examination of administrative record.

The availability for public disclosure of each document which is a part of the administrative record of a regulatory hearing shall be governed by the provisions of Part 4 of this chapter and the regulations referenced therein.

##### § 2.515 Record for administrative decision.

(a) With respect to any matter which is subject to an opportunity for a hearing pursuant to §§ 2.500(a) and 2.510, the administrative record of the hearing specified in § 2.513(a) shall be considered by the Commissioner together with all other relevant data and information available to the Food and Drug Administration in determining whether regulatory action should be taken and, if so, what form of regulatory action should be taken.

(b) With respect to any matter which is subject to an opportunity for a hearing pursuant to §§ 2.500(b) and 2.511, the administrative record of the hearing specified in § 2.513(a) shall constitute the exclusive record for decision.

##### § 2.516 Reconsideration and stay of action.

Following any final administrative action which is the subject of a hearing pursuant to this subpart or any provision referenced in § 2.501(b), any party may petition the Commissioner for reconsideration of any part or all of such decision or action pursuant to § 2.8 or may petition for a stay of such decision or action pursuant to § 2.9.

##### § 2.520 Judicial review.

The availability of judicial review with respect to any regulatory action which is the subject of a hearing pursuant to this subpart shall be governed by the provisions of § 2.11.

## RULES AND REGULATIONS

## Subpart G—Standards of Conduct and Conflicts of Interest

## § 2.600 Scope of subpart.

Subpart G governs the standards of conduct for, and establishes regulations to prevent conflicts of interest by, all Food and Drug Administration employees.

## § 2.610 Reference to Department regulations.

(a) The provisions of 45 CFR Part 73, establishing standards of conduct for all Department employees, are fully applicable to all Food and Drug Administration employees, except that such regulations shall be applicable to special government employees, i.e., consultants to the Food and Drug Administration, only to the extent stated in Subpart L of 45 CFR Part 73.

(b) The provisions of 45 CFR Part 73a supplement the Department standards of conduct and apply only to Food and Drug Administration employees except special government employees.

## § 2.611 Code of ethics for government service.

The following code of ethics, adopted by Congress on July 11, 1958, shall apply to all Food and Drug Administration employees:

## CODE OF ETHICS FOR GOVERNMENT SERVICE

Any person in Government service should:

1. Put loyalty to the highest moral principles and to country above loyalty to persons, party, or Government department.

2. Uphold the Constitution, laws, and legal regulations of the United States and of all governments therein and never be a party to their evasion.

3. Give a full day's labor for a full day's pay; giving to the performance of his duties his earnest effort and best thought.

4. Seek to find and employ more efficient and economical ways of getting tasks accomplished.

5. Never discriminate unfairly by the dispensing of special favors or privileges to anyone, whether for remuneration or not; and never accept, for himself or his family, favors or benefits under circumstances which might be construed by reasonable persons as influencing the performance of his governmental duties.

6. Make no private promises of any kind binding upon the duties of office, since a Government employee has no private word which can be binding on public duty.

7. Engage in no business with the Government, either directly or indirectly, which is inconsistent with the conscientious performance of his governmental duties.

8. Never use any information coming to him confidentially in the performance of governmental duties as a means for making private profit.

9. Expose corruption wherever discovered.

10. Uphold these principles, ever conscious that public office is a public trust.

## § 2.612 Food and Drug Administration Conflict of Interest Review Board.

(a) The Commissioner shall establish a permanent five-member Conflict of Interest Review Board, which shall review and make recommendations to the Commissioner on all specific or policy matters relating to conflicts of interest arising within the Food and Drug Administration that are forwarded to it by (1) the Associate Commissioner for Administration or (2) anyone who is the subject of an adverse determination by the Associate Commissioner for Administration on any matter arising under the conflict of interest laws, except a determination of an apparent violation of law. The Director, Division of Personnel Management, Office of the Associate Commissioner for Administration, shall serve as executive secretary of the Review Board.

(b) It shall be the responsibility of every Food and Drug Administration employee with whom any specific or policy issue relating to conflicts of interest is raised, or who otherwise wishes to have any such matter resolved, to forward the matter to the Associate Commissioner for Administration for resolution, except that reporting of apparent violations of law are governed by § 2.613.

(c) All general policy relating to conflicts of interest shall be established in guidelines pursuant to the provisions of § 2.19(b) and whenever feasible shall be incorporated in regulations in this subpart.

(d) All decisions relating to specific individuals shall be placed in a public file established for this purpose by the Public Records and Documents Center, e.g., a determination that a consultant may serve on an advisory committee with specific limitations or with public disclosure of stock holdings, except that such determination shall be written in a way that does not identify the individual in the following situations:

(1) A determination that an employee must dispose of prohibited financial interests or refrain from incompatible outside activities in accordance with established Department or agency regulations.

(2) A determination that a proposed consultant is not eligible for employment by the agency.

(3) A determination that public disclosure of any information would constitute an unwarranted invasion of personal privacy in violation of § 4.63 of this chapter.

## § 2.613 Duty to report violations.

(a) The Policy Management Staff, Associate Commissioner for Administration, is responsible for obtaining factual information for the Food and Drug Administration on any matter relating to allegations of misconduct, impropriety, conflict of interest, or other violations of Federal statutes by agency personnel.

(b) Any Food and Drug Administration employee who has factual information showing or who otherwise believes that any present or former Food and Drug Administration employee has violated or is violating any provision of this subpart or of 45 CFR Parts 73 or 73a or of any statute listed in Appendix A to 45 CFR Part 73 should report such information directly to the Policy Management Staff. Any such reports shall be in writing or shall with the assistance of the Policy Management Staff be reduced to writing, and shall be promptly investigated.

(c) Any report pursuant to paragraph (b) of this section and any records relating to an investigation of such reports shall be maintained in strict confidence in the files of the Policy Management Staff, shall be exempt from public disclosure, and may be reviewed only by authorized Food and Drug Administration employees who are required to do so in the performance of their duties.

## § 2.620 Permanent disqualification of former employees.

No former Food and Drug Administration employee, including a special government employee, shall knowingly act as agent or attorney for anyone other than United States in connection with any judicial or other proceeding, application, request for a ruling or other determination, contract, claim, controversy, charge, accusation, or other particular matter involving a specific party or parties in which the United States is a party or has a direct and substantial interest and in which he participated personally and substantially through decision, approval, disapproval, recommendation, rendering of advice, investigation, or otherwise as a Food and Drug Administration employee.

## § 2.621 Temporary disqualification of former employees.

Within 1 year after termination of employment with the Food and Drug Administration, no former Food and Drug Administration employee, including a special government employee, shall appear personally before the Food and Drug Administration or other federal agency or court as agent or attorney for any person other than the United States in connection with any proceeding or matter in which the United States is a party or has a direct and substantial interest and which was under his official responsibility at any time within one year preceding termination of such responsibility. The term "official responsibility" means the direct administrative or operating authority, whether intermediate or final, and either exercisable alone or with others, and either personally or through subordinates, to approve, disapprove, or otherwise direct government action.

4. A new Part 5—Delegations of Authority and Organization, consisting of the redesignated Subparts H and M of Part 2, is established as follows:

## PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

## Subpart A—Delegations of Authority to the Commissioner of Food and Drugs

Sec. 5.1 Delegations from the Secretary and Assistant Secretary.

## Subpart B—Redelegations of Authority from the Commissioner of Food and Drugs

5.20 General redelegations of authority from the Commissioner to other officers of the Food and Drug Administration.

5.21 Delegations regarding hearings and review boards.

5.22 Delegations regarding imports.

## RULES AND REGULATIONS

Sec. 5.23 Delegations regarding certification of true copies and use of Department seal.

5.24 Delegations regarding disclosure of official records.

5.25 Delegations regarding certification of color additives.

5.26 Delegations regarding certification of insulin.

5.27 Delegations regarding certification of antibiotic drugs.

5.28 Delegations regarding approved new animal drug applications and approved new animal drug application supplements for new animal drugs.

5.29 Delegations regarding approval of new-drug applications and new-drug application supplements for drugs for human use.

5.30 Delegations regarding issuance of notices relating to proposals to refuse approval or to withdraw approval of new drug applications and new drug application supplements for drugs for human use.

5.31 Delegation regarding designation of official master and working standards for antibiotic drugs.

5.32 Delegations regarding emergency functions.

5.33 Delegations regarding enforcement activities.

5.34 Delegations regarding certification following inspections.

5.35 Delegations regarding grants and fellowships.

5.36 Delegation regarding issuance, amendment, or repeal of regulations pertaining to antibiotic drugs for human use.

5.37 Delegation regarding issuance of notices of filing of petitions, and notices of proposed rule making pertaining to food standards, food additives, and color additives.

5.38 Delegations regarding termination of exemptions for new drugs for investigational use in human beings or in animals.

5.39 Delegations regarding detention of meat, poultry, eggs, and related products.

5.40 Delegations regarding approval of schools providing food-processing instruction.

5.41 Delegations regarding issuance of reports of minor violations.

5.42 Delegations relating to granting and withdrawing variances from performance standards for electronic products.

5.43 Delegations relating to exemptions from performance standards for electronic products.

5.44 Delegations relating to testing programs and methods of certification and identification for electronic products.

5.45 Delegations relating to notification of defects in, and repair or replacements of, electronic products.

5.46 Delegations relating to manufacturer's resident import agents.

5.47 Delegations relating to requiring manufacturers to provide data to ultimate purchasers of electronic products.

5.48 Delegations relating to directing dealers and distributors of electronic products to provide data to manufacturers.

5.49 Delegations relating to acceptance of assistance from State and local authorities for enforcement of radiation control legislation and regulations.

Sec. 5.50 Delegations regarding issuance and revocation of licenses for the propagation or manufacture and preparation of biological products.

## Subpart C—Organization

5.100 Headquarters.

5.105 Chief Counsel for the Food and Drug Administration and Assistant General Counsel for Food and Drugs, Office of General Counsel, Department of Health, Education, and Welfare.

5.110 FDA Public Records and Documents Center.

5.111 FDA Hearing Clerk.

5.115 Field structure.

## Subpart A—Delegations of Authority to the Commissioner of Food and Drugs

## § 5.1 Delegations from the Secretary and Assistant Secretary.

(a) The Assistant Secretary for Health has redelegated to the Commissioner of Food and Drugs with authority to redelegate (35 FR 606 as amended) all authority delegated to him by the Secretary of Health, Education, and Welfare as follows:

(1) Functions vested in the Secretary under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), the Filled Milk Act (21 U.S.C. 61-63), the Federal Import Milk Act (21 U.S.C. 141 et seq.), the Tea Importation Act (21 U.S.C. 41 et seq.), the Federal Cautic Poison Act (44 Stat. 1406), and The Fair Packaging and Labeling Act (15 U.S.C. 1451 et seq.), pursuant to section 12 of Reorganization Plan No. IV and Reorganization Plan No. 1 of 1953, including authority to administer oaths vested in the Secretary of Agriculture by 7 U.S.C. 2217.

(2) Functions vested in the Secretary under section 301 (Research and Investigation); section 307 (International Cooperation); section 310 (Health Education and Information); section 311 (Federal-State Cooperation); and section 314(f) (Interchange of Personnel with States) of the Public Health Service Act (42 U.S.C. 241, 242, 242a, 243, 246(f)) which relate to the functions of the Food and Drug Administration.

(3) Functions vested in the Secretary under sections 354 through 360F of the Public Health Service Act (42 U.S.C. 263b through 263n) which relate to electronic product radiation control.

(4) Functions vested in the Secretary under section 361 of the Public Health Service Act (42 U.S.C. 264) which relate to the law enforcement functions of the Food and Drug Administration concerning the following products and activities: biologicals (including blood and blood products); interstate travel sanitation (except interstate transportation of etiologic agents under 42 CFR 72.25); food (including milk and food service sanitation and shellfish sanitation); and drugs, devices, cosmetics, and electronic products, and other items of products regulated by the Food and Drug Administration.

(5) Functions vested in the Secretary under sections 351 and 352 of the Public Health Service Act (42 U.S.C. 262 and 263) which relate to biological products.

(6) Functions vested in the Secretary pertaining to section 302(a) of the Public Health Service Act (42 U.S.C. 242(a)) which relate to the determination and reporting requirements with respect to the medicinal and scientific requirements of the United States for controlled substances.

(7) Functions vested in the Secretary pertaining to section 303 of the Public Health Service Act (42 U.S.C. 242a) which relate to the authorization of persons engaged in research on the use and effect of drugs to protect the identity of their research subjects with respect to drugs scheduled under Public Law 91-513 for which a notice of claimed exemption for an investigational new drug is filed with the Food and Drug Administration and with respect to all drugs not scheduled under Public Law 91-513.

(8) Functions vested in the Secretary pertaining to section 4 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (84 Stat. 1241) which relate to the determination of the safety and effectiveness of drugs or to approve new drugs to be used in the treatment of narcotic addicts.

(9) Functions vested in the Secretary pertaining to section 303(f) of the Controlled Substances Act (21 U.S.C. 823(f)) which relate to the determination of the qualifications and competency of practitioners wishing to conduct research with controlled substances listed in Schedule I of the Act, and the merits of the research protocol.

(10) Functions vested in the Secretary pertaining to provisions of the Controlled Substances Act (21 U.S.C. 801 et seq.) which relate to administration of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.).

(11) Functions vested in the Secretary under section 409(b) of the Federal Meat Inspection Act (21 U.S.C. 679(b)) which relate to the detention of any carcass, part thereof, meat, or meat product of cattle, sheep, swine, goats, or equines.

(12) Functions vested in the Secretary under section 24(b) of the Poultry Products Inspection Act (21 U.S.C. 467f(b)) which relate to the detention of any poultry carcass, part thereof, or poultry product.

(13) Functions vested in the Secretary under the Egg Products Inspection Act (21 U.S.C. 1031 et seq.).

(14) Functions vested in the Secretary by amendments to the foregoing statutes subsequent to Reorganization Plan No. 1 of 1953.

(15) Function of issuing all regulations of the Food and Drug Administration. The reservation of authority contained in Chapter 2-000 of the Department Organization Manual shall not apply.

(16) Functions vested in the Secretary under Executive Order 11490, section 1103(5), and those portions of sections 1103(1), 1103(3), 1103(4), 3001(2), 3001(3), 3002(1), 3002(2), 3002(3), 3004, and 3009 which relate to food, drugs, and biologicals. In the performance of these emergency functions the Commissioner shall coordinate his activities with the Administrator, Health Services and Men-

V 40-102 MAY 27 75

XUM

tal Health Administration, in order that preemergency plans shall be developed in consonance with postattack organization plans and structure of the Department for the Emergency Health Service.

(17) Function vested in the Secretary of authorizing and approving miscellaneous and emergency expenses of enforcement activities.

(18) Function vested in the Secretary under the Federal Advisory Committee Act, Public Law 92-463, to make determinations that advisory committee meetings are concerned with matters listed in section 552(b) of title 5, U.S.C. and therefore may be closed to the public for those committees under the administrative jurisdiction of the Commissioner of Food and Drugs. This authority may not be redelegated. This authority is to be exercised in accordance with the requirements of the Act and only with respect to the following:

(i) Meetings, to the extent that they directly involve review, discussion or consideration of records of the Department which are exempt from disclosure under 5 U.S.C. 552(b) (4), (6), and (7), namely, (a) records containing trade secrets and commercial or financial information obtained from a person and privileged or confidential; (b) personnel, medical and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (c) investigatory files compiled for law enforcement purposes;

(ii) Meetings to the extent that they involve the review, discussion, and evaluation of specific drugs and devices regulated by FDA which are intended to result in recommendations for regulatory decisions under the Federal Food, Drug, and Cosmetic Act and which are concerned with matters listed in 5 U.S.C. 552(b) (4), (5), and (7);

(iii) Meetings held for the sole purpose of considering and formulating advice which the committee will give or any final report it will render. *Provided:*

(a) The meetings will involve solely the internal expression of views and judgments of the members and it is essential to close the meeting or portions thereof to protect the free exchange of such views and avoid undue interference with agency or committee operations, and such views if reduced to writing would be protected from mandatory disclosure under section 552(b) (5) of title 5 U.S.C.;

(b) The meeting is closed for the shortest time necessary, summarizing the work of the committee during the closed sessions, and a report, prepared by the executive secretary will be made available promptly to the public.

(c) When feasible, the public is given a timely opportunity to present relevant information and views to the committee; and

(d) Concurrence for closing the meetings for such purpose is obtained from the Office of the General Counsel and the Office of Public Affairs.

(19) Functions vested in the Secretary under the second sentence of section 309 (Health Conferences) of the Public

Health Service Act (42 U.S.C. 242n) to call for a conference and invite as many health authorities and officials of State or local public or private agencies or organizations as deemed necessary or proper on subjects related to the functions of the Food and Drug Administration.

(20) Functions vested in the Secretary under section 501 (Gifts) of the Public Health Service Act (42 U.S.C. 219) to accept offers of unconditional gifts, of other than real property, provided such gifts are of \$1,000 value or less and the total costs associated with acceptance of property will not exceed the cost of purchasing a similar item and the cost of normal care and maintenance.

(21) Functions vested in the Secretary under section 362 of the Public Health Service Act (42 U.S.C. 265) which relate to the prohibition of the introduction of foods, drugs, devices, cosmetics, and electronic products and other items or products regulated by the Food and Drug Administration into the United States when it is determined that it is required in the interest of public health when such functions relate to the law enforcement functions of the Food and Drug Administration.

(b) The Chief Counsel for the Food and Drug Administration and Assistant General Counsel in charge of the Division of Food and Drugs, Office of General Counsel, Department of Health, Education, and Welfare, has been authorized to report apparent violations to the Department of Justice for the institution of criminal proceedings, pursuant to section 305 of the Federal Food, Drug, and Cosmetic Act, section 4 of the Federal Import Milk Act, and section 9(b) of the Federal Cautic Poison Act.

(c) The Assistant Secretary for Health has redelegated to the Commissioner of Food and Drugs, with authority to redelegate, the authority delegated to him by the Assistant Secretary for Administration and Management: (1) To certify true copies of any books, records, papers, or other documents on file within the Department, or extracts from such; to certify that true copies are true copies of the entire file of the Department; to certify the complete original record or to certify the nonexistence of records on file within the Department; and to cause the Seal of the Department to be affixed to such certifications and to agreements, awards, citations, diplomas, and similar documents.

(2) To establish volunteer service programs and accept volunteer services for use in the operation of a health care facility or the provision of health care under section 223 of the Public Health Service Act (42 U.S.C. 217b).

#### Subpart B—Redelegations of Authority From the Commissioner of Food and Drugs

§ 5.20 General redelegations of authority from the Commissioner to other officers of the Administration.

(a) Final authority of the Commissioner of Food and Drugs is redelegated as set forth in this subpart. Further redelegation of the authority vested herein

is not authorized. Authority redelegated herein to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis, unless prohibited by a restriction written into the document designating him as "acting" or unless not legally permissible.

(b) The Deputy Commissioner of Food and Drugs and the Associate Commissioner for Compliance are authorized to perform all the functions of the Commissioner of Food and Drugs.

#### § 5.21 Delegations regarding hearings and review boards.

(a) The Directors and Deputy Directors of Bureaus, Regional Food and Drug Directors, Deputy Regional Food and Drug Directors, and District Directors are authorized to designate officials to hold informal hearings which relate to their assigned functions under sections 305, 404(b), and 801(a) of the Federal Food, Drug, and Cosmetic Act, section 6 of the Fair Packaging and Labeling Act, section 9(b) of the Federal Cautic Poison Act, and section 5 of the Federal Import Milk Act. Officials so designated are delegated authority vested in the Secretary of Agriculture by 7 U.S.C. 2217 (43 Stat. 803) to administer or to take from any person an oath, affirmation, affidavit, or deposition for use in any prosecution or proceeding under or in enforcement of any law as cited in this section.

(b) The Director, Deputy Director, and Associate Director of the Bureau of Biologics are authorized to appoint review boards as provided by § 601.41 of this chapter.

(c) The Director and Deputy Director of the Bureau of Radiological Health are authorized to hold hearings under section 360(a) of the Public Health Service Act, and to designate officials to hold informal hearings under section 360(a) of the act.

#### § 5.22 Delegations regarding imports.

(a) The Regional Food and Drug Directors, Deputy Regional Food and Drug Directors, and District Directors are authorized to designate officials who may request, under section 801(a) of the Federal Food, Drug, and Cosmetic Act, from the Secretary of the Treasury samples of foods, drugs, devices or cosmetics imported, or offered for import, in order to determine whether such articles are in compliance with the act.

(b) The Director and Deputy Director of the Bureau of Radiological Health, and the Director of the Division of Compliance of that Bureau are authorized to request, under section 360(a) of the Public Health Service Act, from the Secretary of the Treasury samples of electronic products imported or offered for import in order to determine whether such articles are in compliance with that act.

(c) The Director and Deputy Director of the Bureau of Radiological Health, and the Director of the Division of Compliance of that Bureau may, under section 360(b) of the Public Health Service Act, exempt persons from issuing a

certification as required by section 358 (h) of the act, for electronic products imported into the United States for testing, evaluation, demonstration, or training, which will not be introduced into commerce and upon completion of their function, will be destroyed or exported in accord with Bureau of Customs regulations.

(d) The Regional Food and Drug Directors, Deputy Regional Food and Drug Directors, and District Directors are authorized to exercise all of the functions of the Commissioner of Food and Drugs under section 362 of the Public Health Service Act (42 U.S.C. 265) that relate to the prohibition of the introduction of foods, drugs, devices, cosmetics, and electronic products and other items or products regulated by the Food and Drug Administration into the United States when it is determined that it is required in the interest of public health, and such functions relate to the law enforcement functions of the Food and Drug Administration.

#### § 5.23 Delegations regarding certification of true copies and use of Department seal.

(a) The following officials are authorized to certify true copies of or extracts from any books, records, papers, or other documents on file within the Food and Drug Administration, to certify that copies are true copies of the entire file, to certify the complete original record, or to certify the nonexistence of records on file within the Administration, and to cause the seal of the Department to be affixed to such certifications:

(1) Associate and Deputy Associate Commissioners.

(2) Assistant and Deputy Assistant Commissioners.

(3) Director of the Executive Secretariat.

(4) Director and Deputy Director of the Office of Legislative Services.

(5) The FDA Regulations Officer and their alternates of the Office of the Associate Commissioner for Compliance.

(6) Directors and Deputy Directors of Bureaus and Executive Director and Deputy Executive Director of Regional Operations.

(7) Director of the Office of Planning and Evaluation, the Associate Director and Deputy Associate Director for Compliance, and the Directors of the Divisions of: Methadone Monitoring; Drug Product Quality; Drug Labeling Compliance; and Drug Manufacturing of the Bureau of Drugs.

(8) Associate Director for Management, the Associate Director and Deputy Associate Director for Compliance, and the Directors of the Divisions of: Regulatory Guidance; Food Technology; and Food Service of the Bureau of Foods.

(9) Associate Director and the Director of the Division of Compliance of the Bureau of Biologics.

(10) Director and Deputy Director of the Division of Compliance of the Bureau of Veterinary Medicine.

(11) Associate Director for Administration of the Bureau of Radiological Health, and the Director of the Division of Compliance of that Bureau.

(12) Assistant Director for Program Operations and the Director of the Division of Compliance of the Bureau of Medical Devices and Diagnostic Products.

(b) The following officials are authorized to cause the seal of the Department to be affixed to agreements, awards, citations, diplomas, and similar documents.

(1) Associate and Deputy Associate Commissioners.

(2) The Director of the Division of Personnel Management of the Office of Administration and the Chief of the Career Development and Training Branch of that Division and Office.

(c) The Federal Register Writer and his alternates of the Office of Compliance are authorized to certify true copies of Federal Register documents.

#### § 5.24 Delegations regarding disclosure of official records.

(a) The following officials are authorized to make determinations to disclose official records and information in accordance with Part 4 of this chapter.

(1) The Director and Deputy Director of the Bureau of Drugs, and the Associate Director and Deputy Associate Director for Compliance and the Directors of the Divisions of: Methadone Monitoring; Drug Product Quality; Drug Labeling Compliance; and Drug Manufacturing of that Bureau.

(2) The Director and Deputy Director of the Bureau of Foods, and the Associate Director and Deputy Associate Director for Compliance and the Director of the Division of Regulatory Guidance of that Bureau.

(3) The Director and Deputy Director of the Bureau of Veterinary Medicine and the Director and Deputy Director of the Division of Compliance of that Bureau.

(4) The Director and Deputy Director, Bureau of Radiological Health, and the Director of the Division of Electronic Products and the Director of the Division of Compliance of that Bureau.

(5) The Director and Deputy Director of the Bureau of Biologics, and the Associate Director and the Director of the Division of Compliance of that Bureau.

(6) The Director and Deputy Director of the Bureau of Medical Devices and Diagnostic Products and the Director of the Division of Compliance of that Bureau.

(b) The Chief of the Drug Listing Branch of the Division of Drug Labeling Compliance of the Bureau of Drugs is authorized to sign affidavits regarding the presence or absence of records of Registration of Drug Establishments.

(c) The Chief of the Records Section of the Administrative Services Branch, Division of Management Services, Office of Administration, is authorized to sign affidavits regarding the presence or absence of records in the files of that section.

#### § 5.25 Delegations regarding certification of color additives.

The Director and Deputy Director of the Bureau of Foods, the Associate Director and Deputy Associate Director for Technology, and the Director and Deputy Director of the Division of Color Technology of that Bureau are authorized to certify batches of color additives for use in foods, drugs, or cosmetics, under section 706 of the Federal Food, Drug, and Cosmetic Act.

#### § 5.26 Delegations regarding certification of insulin.

The Director, Deputy Director, and the Associate Director and Deputy Associate Director for Compliance of the Bureau of Drugs, the Director and Deputy Director of the Division of Drug Product Quality of that Bureau, and the Chief and Assistant Chief of the Certification Services Branch of that Division and Bureau are authorized to certify or reject batches of drugs containing insulin, pursuant to section 506(a) of the Federal Food, Drug, and Cosmetic Act.

#### § 5.27 Delegations regarding certification of antibiotic drugs.

The Director, Deputy Director, and the Associate Director and Deputy Associate Director for Compliance of the Bureau of Drugs, the Director and Deputy Director of the Division of Drug Product Quality of that Bureau, and the Chief and Assistant Chief of the Certification Services Branch of that Division and Bureau are authorized to certify or reject batches of antibiotic drugs, or any derivative of these drugs, pursuant to sections 507(a) and 512(n) of the Federal Food, Drug, and Cosmetic Act.

#### § 5.28 Delegations regarding approved new animal drug applications and approved new animal drug application supplements for new animal drugs.

The Director of the Bureau of Veterinary Medicine is authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the approval of new animal drug applications, and new animal drug application supplements, for new animal drugs submitted pursuant to section 512 of the Federal Food, Drug, and Cosmetic Act. The Director of the Division of Veterinary Medical Review of the Bureau of Veterinary Medicine is authorized to perform for functions of the Commissioner with regard to the approval of applications for animal feeds containing new animal drugs.

#### § 5.29 Delegations regarding approval of new-drug applications and new-drug application supplements for drugs for human use.

(a) The Director, Deputy Director, and Associate Director for New Drug Evaluation of the Bureau of Drugs are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the approval of new-drug applications and new-drug application supplements which are for drugs for human

use and have been submitted pursuant to section 505 of the Federal Food, Drug, and Cosmetic Act.

(b) The Directors of the Divisions of: Anti-Infective Drug Products; Cardio-Renal Drug Products; Surgical-Dental Drug Products; Metabolism and Endocrine Drug Products; Neuropharmacological Drug Products; Oncology and Radiopharmaceutical Drug Products; and Drug Advertising of the Bureau of Drugs are authorized to perform all the functions of the Commissioner with regard to the approval of new-drug application supplements which are for drugs for human use and have been submitted pursuant to section 505 of the Federal Food, Drug, and Cosmetic Act.

§ 5.30 Delegations regarding issuance of notices relating to proposals to refuse approval or to withdraw approval of new drug applications and new drug application supplements for drugs for human use.

The Director of the Bureau of Drugs is authorized to issue notices of an opportunity for a hearing on proposals to refuse approval or to withdraw approval of new drug applications and new drug application supplements for drugs for human use submitted pursuant to section 505 of the Federal Food, Drug, and Cosmetic Act and to issue notices of denial or withdrawal of approval when opportunity for hearing has been waived.

§ 5.31 Delegation regarding designation of official master and working standards for antibiotic drugs.

The Director, Deputy Director, and Associate Director for Pharmaceutical Research and Testing of the Bureau of Drugs, and the Director of the National Center for Antibiotics Analysis of that Bureau are authorized to designate official Food and Drug Administration master and working standards for antibiotic drugs under § 430.5 of this chapter.

§ 5.32 Delegations regarding emergency functions.

Each Regional Food and Drug Director is authorized, during any period when normal channels of direction are disrupted between the Food and Drug Administration headquarters and his region, to fully represent the Food and Drug Administration within his region in consonance with the Department of Health, Education, and Welfare regional emergency plans and to exercise the authority of the Commissioner for supervision of and direction to all Food and Drug Administration activities and use of resources within his region for continuity and for Federal Emergency Health Service operations. These same officials are authorized to provide in Regional Emergency Plans for the delegation of Food and Drug Administration regional authorities to heads of field activities when such activities are cut off from national and regional headquarters.

§ 5.33 Delegations regarding enforcement activities.

(a) Duly appointed and authorized inspectors, officers, and employees of the

Food and Drug Administration who have been issued the Food and Drug Administration official credentials consisting of FD Form 200a entitled "Identification Record" and FD Form 200b entitled "Specification of General Authority" are designated by the Commissioner of Food and Drugs:

(1) To conduct examinations, inspections, and investigations; to collect and obtain samples; to have access to and to copy and verify records; and to supervise compliance operations, for the enforcement of the Federal Food, Drug, and Cosmetic Act, the Fair Packaging and Labeling Act, the Federal Cautic Poison Act, the Import Milk Act, the Filled Milk Act, the Tea Importation Act, the Radiation Control for Health and Safety Act of 1968, and section 361 of the Public Health Service Act.

(2) To administer oaths and affirmations under section 1 of the Act of January 31, 1925 (Ch. 124, 43 Stat. 803); sections 12 to 15 of Reorganization Plan No. IV, effective June 30, 1940; and Reorganization Plan No. 1 of 1953, effective April 11, 1953.

(b) Duly appointed and authorized inspectors, officers, and employees of the Food and Drug Administration who have been issued the Food and Drug Administration official credentials consisting of FD Form 200a entitled "Identification Record" and FD Form 200c entitled "Specification of General and Special Authority" are designated by the Commissioner of Food and Drugs:

(1) To perform the duties enumerated in paragraph (a) (1) and (2) of this section.

(2) As officers and employees having the authority to request and the authority to have access to and copy and verify records and reports required by sections 505 (i) and (j), 507 (d) and (g), and 512 (i) and (m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (i) and (j), 357 (d) and (g), and 360b (i) and (m)).

(c) The Food and Drug Administration official credentials referred to in paragraphs (a) and (b) of this section are described as follows:

(1) FD Form 200a entitled "Identification Record" bears a color photograph, description, and signature of the bearer, an identification number, an expiration date, the Department of Health, Education, and Welfare seal with blue imprint centered to the left of the photograph and the Food and Drug Administration symbol centered to the right of the photograph.

(2) FD Form 200b entitled "Specification of General Authority" bears the holder's name, his general authority, an identification number, an expiration date, and the Commissioner's signature.

(3) FD Form 200c entitled "Specification of General and Special Authority" bears the holder's name, his general and special authority, an identification number, an expiration date, and the Commissioner's signature and is superimposed in the lower right corner with a red, white, and blue stripe imprint.

(4) Both FD Form 200b and FD Form 200c bear the name of the Department of Health, Education, and Welfare, Public Health Service, and Food and Drug Administration and are superimposed with the Department seal with blue imprint.

(d) The Director and Deputy Director of the Bureau of Radiological Health are authorized to refuse admission of non-complying electronic product imports and to notify the Secretary of the Treasury of such refusal under section 360(a) of the Public Health Service Act and are authorized to refuse or to grant permission and time extensions to bring such products into compliance, and are authorized to supervise or designate an official to supervise such operations under section 360(b) of the act.

(e) The Director and Deputy Director of the Bureau of Radiological Health and the Director of the Division of Compliance of that Bureau are authorized to perform all of the functions of the Commissioner of Food and Drugs under section 360A(a) of the Public Health Service Act relating to electronic product safety and inspection of electronic product manufacturers' premises, and to perform all of the functions of the Commissioner of Food and Drugs under section 360A(b) of the act relating to the establishment, maintenance, and inspection of electronic product manufacturers' records.

(f) The Director and Deputy Director of the Bureau of Radiological Health are authorized to designate officials to make accident and investigation reports under section 360A(d) of the Public Health Service Act.

(g) The Director, Deputy Director, and Associate Director of the Bureau of Biologics and the Director of the Division of Compliance of that Bureau may authorize, pursuant to section 351(c) of the Public Health Service Act (42 U.S.C. 262 (c)), any officer, agent, or employee to enter and inspect any establishment which is subject to the provisions of section 351 of the act (42 U.S.C. 262).

§ 5.34 Delegations regarding certification following inspections.

Regional Food and Drug Directors, Deputy Regional Food and Drug Directors, and District Directors are authorized to issue certificates of sanitation under 42 CFR 72.181.

§ 5.35 Delegations regarding grants and fellowships.

(a) The Associate and Deputy Associate Commissioner for Science are authorized to approve or disapprove all applications for grants and fellowships and to select officials to serve as program managers to exercise scientific oversight and to monitor grantee progress.

(b) The Associate and Deputy Associate Commissioner for Administration and the Director and Deputy Director of the Division of Contracts and Grants Management of the Office of the Associate Commissioner for Administration are authorized to execute grant awards upon approval by the Associate or Deputy As-

sociate Commissioner for Science under sections 301, 308, 311, and 356 of the Public Health Service Act, and to notify grantees of officials who will serve as the FDA program manager for their grant.

§ 5.36 Delegation regarding issuance, amendment, or repeal of regulations pertaining to antibiotic drugs for human use.

The Director and Deputy Director of the Bureau of Drugs and the Assistant Director for Regulatory Affairs are authorized to perform all of the functions of the Commissioner of Food and Drugs under section 507 of the Federal Food, Drug, and Cosmetic Act regarding the issuance, amendment, or repeal of regulations pertaining to antibiotic drugs for human use.

§ 5.37 Delegation regarding issuance of notices of filing of petitions and notices of proposed rulemaking pertaining to food standards, food additives, and color additives.

The Director of the Bureau of Foods is authorized to perform all the functions of the Commissioner of Food and Drugs under sections 401, 409, and 706 of the Federal Food, Drug, and Cosmetic Act regarding the issuance of notices of filing of petitions and notices of proposed rulemaking pertaining to food standards, food additives, and color additives.

§ 5.38 Delegations regarding termination of exemptions for new drugs for investigational use in human beings, in laboratory research animals or in vitro tests, or in animals.

(a) The Director and Deputy Director of the Bureau of Drugs are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of exemptions for new drugs for investigational use in human beings under § 312.1 and in laboratory research animals or in vitro tests under § 312.9 of this chapter, except those which pertain to a biological product subject to the licensing provisions of section 351 of the Public Health Service Act (42 U.S.C. 262). The Associate Director and Deputy Associate Director for New Drug Evaluation and the Directors of the Divisions of: Anti-Infective Drug Products; Cardio-Renal Drug Products; Surgical-Dental Drug Products; Metabolism and Endocrine Drug Products; Neuropharmacological Drug Products; and Oncology and Radiopharmaceutical Drug Products of the Bureau of Drugs are authorized to notify sponsors and invite correction prior to termination action on such exemptions.

(b) The Director, Deputy Director, and Associate Director of the Bureau of Biologics are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of those exemptions for new drugs for investigational use in human beings under § 312.1 and in laboratory research animals or in vitro tests under § 312.9 of this chapter pertaining to a biological product subject to the licensing provisions of section 351 of the Public Health Service Act (42 U.S.C. 262).

(c) The Director and Deputy Director of the Bureau of Veterinary Medicine are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of exemptions for new animal drugs for investigational use in animals under § 511.1 of this chapter.

§ 5.39 Delegations regarding detention of meat, poultry, eggs, and related products.

The Regional Food and Drug Directors, Deputy Regional Food and Drug Directors, and District Directors are authorized to perform and to designate other officials to perform all the functions of the Commissioner of Food and Drugs under:

(a) Section 409(b) of the Federal Meat Inspection Act (21 U.S.C. 679(b)) which relate to the detention of any carcass, part thereof, meat, or meat product of cattle, sheep, swine, goats, or equines.

(b) Section 24(b) of the Poultry Products Inspection Act (21 U.S.C. 467f(b)) which relate to the detention of any poultry carcass, part thereof, or poultry product.

(c) The Egg Products Inspection Act (21 U.S.C. 1031 et seq.)

§ 5.40 Delegations regarding approval of schools providing food-processing instruction.

The Director and Deputy Director of the Bureau of Foods are authorized to perform all of the functions of the Commissioner of Food and Drugs under § 128b.10 of this chapter regarding the approval of schools giving instruction in retort operations, processing systems operations, aseptic processing and packaging systems operations, and container closure inspections.

§ 5.41 Delegations regarding issuance of reports of minor violations.

(a) The following officials are authorized to perform all the functions of the Commissioner of Food and Drugs under section 306 of the Federal Food, Drug, and Cosmetic Act regarding the issuance of written notices or warnings:

(1) The Director and Deputy Director of the Bureau of Drugs and the Associate Director and Deputy Associate Director for Compliance of that Bureau.

(2) The Director and Deputy Director of the Bureau of Foods and the Associate Director and Deputy Associate Director for Compliance of that Bureau.

(3) The Director and Deputy Director of the Bureau of Veterinary Medicine and the Director and Deputy Director of the Division of Compliance of that Bureau.

(4) The Director and Deputy Director of the Bureau of Medical Devices and Diagnostic Products and the Director of the Division of Compliance of that Bureau.

(5) The Director and Deputy Director of the Bureau of Biologics, and the Associate Director and the Director of the Division of Compliance of that Bureau.

(b) The Director and Deputy Director of the Bureau of Radiological Health are authorized to perform all the functions

of the Commissioner of Food and Drugs under section 360C(d) of the Public Health Service Act regarding the issuance of written notices or warnings.

§ 5.42 Delegations relating to granting and withdrawing variances from performance standards for electronic products.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to grant and withdraw variances from the provisions of performance standards for electronic products established in Subchapter J of this chapter.

§ 5.43 Delegations relating to exemptions from performance standards for electronic products.

The Director of the Bureau of Radiological Health is authorized to exempt from performance standards any electronic product intended solely or predominantly for departments or agencies of the United States under section 358 (a) (5) of the Public Health Service Act.

§ 5.44 Delegations relating to testing programs and methods of certification and identification for electronic products.

The Director and Deputy Director of the Bureau of Radiological Health and the Director of the Division of Compliance of that Bureau are authorized to review and evaluate industry testing programs under section 358(g) of the Public Health Service Act, and to approve or disapprove alternate methods of certification and identification and to disapprove testing programs upon which certification is based under section 358(h) of the act.

§ 5.45 Delegations relating to notification of defects in, and repair or replacement of, electronic products.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to perform all the functions of the Commissioner of Food and Drugs relating to notification of defects in, and repair or replacement of, electronic products under section 359 of the Public Health Service Act and under §§ 1003.11, 1003.22, 1003.31, 1004.2, 1004.3, 1004.4, and 1004.6 of this chapter. The Director of the Division of Compliance of the Bureau of Radiological Health is authorized to notify manufacturers of defects in, and noncompliance of, electronic products under section 359(e) of the Public Health Service Act.

§ 5.46 Delegations relating to manufacturer's resident import agents.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to reject manufacturers' designations of resident import agents pursuant to § 1005.25(b) of this chapter.

§ 5.47 Delegations relating to requiring manufacturers to provide data to ultimate purchasers of electronic products.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to require manufacturers to

## RULES AND REGULATIONS

provide performance and technical data to the ultimate purchaser of electronic products under section 360A(c) of the Public Health Service Act.

§ 5.43 Delegations relating to directing dealers and distributors of electronic products to provide data to manufacturers.

The Director and Deputy Director of the Bureau of Radiological Health and the Director of the Division of Compliance of that Bureau and the Regional Food and Drug Directors are authorized to direct dealers and distributors of electronic products to furnish information on first purchasers of such products to the manufacturer of the product under section 360A(f) of the Public Health Service Act.

§ 5.49 Delegations relating to acceptance of assistance from State and local authorities for enforcement of radiation control legislation and regulations.

The Director and Deputy Director of the Bureau of Radiological Health are authorized to accept assistance from State and local authorities engaged in activities related to health or safety or consumer protection on a reimbursable basis or otherwise, under section 360E of the Public Health Service Act.

§ 5.50 Delegations regarding issuance and revocation of licenses for the propagation or manufacture and preparation of biological products.

The Director and Deputy Director of the Bureau of Biologics and the Associate Director of that Bureau are authorized to issue licenses under section 351 of the Public Health Service Act (42 U.S.C. 262) for propagation or manufacture and preparation of biological products as specified in the act, and to revoke such licenses at the manufacturer's request.

## Subpart C—Organization

§ 5.100 Headquarters.

The central organization of the Food and Drug Administration consists of the following:

OFFICE OF THE COMMISSIONER<sup>1</sup>

Commissioner of Food and Drugs.  
Deputy Commissioner.  
Administrative Law Judge.  
Associate Commissioner for Compliance.  
Hearing Clerk.  
Associate Commissioner for Medical Affairs.  
Associate Commissioner for Science.  
Associate Commissioner for Administration.  
Assistant Commissioner for Public Affairs.  
Assistant Commissioner for Planning and Evaluation.  
Assistant Commissioner for Professional and Consumer Programs.

BUREAU OF BIOLOGICS<sup>1</sup>

Office of the Director.  
Division of Compliance.  
Division of Virology.  
Division of Blood and Blood Products.  
Division of Control Activities.  
Division of Pathology.  
Division of Bacterial Products.

<sup>1</sup> Mailing address: 5600 Fishers Lane, Rockville, MD 20852.

<sup>2</sup> Mailing address: 8800 Rockville Pike, Bethesda, MD 20014.

BUREAU OF DRUGS<sup>1</sup>

Office of the Director.  
Office of Planning and Evaluation.  
Associate Director for Drug Monographs.  
Division of OTC Drug Evaluation.  
Division of Biopharmaceutics.  
Division of Generic Drug Monographs.  
Associate Director for Biometrics and Epidemiology.  
Division of Biometrics.  
Division of Poison Control.  
Division of Drug Experience.  
Associate Director for Compliance.  
Division of Methadone Monitoring.  
Division of Drug Product Quality.  
Division of Drug Labeling Compliance.  
Division of Drug Manufacturing.  
Associate Director for Pharmaceutical Research and Testing.  
Division of Drug Biology.  
Division of Drug Chemistry.  
National Center for Antibiotics Analysis.  
National Center for Drug Analysis.  
Associate Director for New Drug Evaluation.  
Division of Anti-Infective Drug Products.  
Division of Cardiac-Renal Drug Products.  
Division of Surgical-Dental Drug Products.  
Division of Metabolism and Endocrine Drug Products.  
Division of Neuropharmacological Drug Products.  
Division of Oncology and Radiopharmaceutical Drug Products.  
Division of Drug Advertising.  
Associate Director for Information Systems.  
Division of Drug Information Resources.  
Division of Information Systems Design.  
Medical Library.

BUREAU OF FOODS<sup>1</sup>

Office of the Director.  
Associate Director for Compliance.  
Division of Regulatory Guidance.  
Division of Compliance Programs.  
Division of Industry Programs.  
Division of Food and Color Additives.  
Associate Director for Sciences.  
Division of Chemistry and Physics.  
Division of Toxicology.  
Division of Pathology.  
Division of Microbiology.  
Division of Mathematics.  
Associate Director for Technology.  
Division of Food Technology.  
Division of Chemical Technology.  
Division of Color Technology.  
Division of Cosmetics Technology.  
Associate Director for Nutrition and Consumer Sciences.  
Division of Consumer Studies.  
Division of Food Service.  
Division of Nutrition.

BUREAU OF MEDICAL DEVICES AND DIAGNOSTIC PRODUCTS<sup>1</sup>

Office of the Director.  
Division of Compliance.  
Division of Diagnostic Product Standards and Research.

## PART 6—ENVIRONMENTAL IMPACT CONSIDERATIONS

§ 6.1 [Amended]

5. In Part 6, by amending § 6.4(a) (2) to change the reference to "§ 2.121" to read "Subpart B of Part 5".

## PART 8—COLOR ADDITIVES

6. In Part 8 § 8.12 is revised to read as follows:

§ 8.12 Advisory committee on the applicability of the anticancer clause.

All requests for and procedures governing any advisory committee on the

## RULES AND REGULATIONS

anticancer clause shall be subject to the provisions of Subpart D of Part 2, and particularly §§ 2.360 through 2.364, of this chapter.

§§ 8.13, 8.14 [Revoked].

7. Sections 8.13 and 8.14 are revoked.  
8. Sections 8.18 and 8.19 are revised to read as follows:

§ 8.18 Petition for exemption from certification.

A manufacturer, packer, or distributor of a color additive or color additive mixture may petition for an exemption from certification pursuant to Part 2 of this chapter. Any such petition shall show why such certification is not necessary for the protection of public health.

§ 8.19 Procedure for objections and hearings.

(a) Objections and hearings relating to color additive regulations under sections 706 (b) and (c) of the act shall be governed by Part 2 of this chapter.

(b) The fees specified in § 8.50 shall be applicable.

§§ 8.20, 8.21 [Revoked].

9. Sections 8.20 and 8.21 are revoked.  
10. Section 8.27 is amended by adding a sentence at the end of paragraph (b) to read as follows:

§ 8.27 Certification.

(b) . . . Any person who contests such refusal shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

11. Section 8.28(b) is revised to read as follows:

§ 8.28 Authority to refuse certification service.

(b) Any person who contests suspension of service shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

12. Section 8.33 is amended by adding a sentence at the end of paragraph (a) to read as follows:

§ 8.33 Exemption of color additives for investigational use.

(a) . . . Any person who contests a refusal to grant such authorization shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

## PART 10—DEFINITIONS AND STANDARDS FOR FOOD

13. In Part 10, § 10.2 is revised to read as follows:

§ 10.2 Procedure for establishing a food standard.

(a) The procedure for establishing a food standard under section 401 of the act shall be governed by Part 2 of this chapter.

(b) Any petition for a food standard shall show that the proposal if adopted, would promote honesty and fair dealing in the interest of consumers.

(c) Any petition for a food standard shall assert that the petitioner commits himself to substantiate the information in the petition by evidence in a public hearing, if such a hearing becomes necessary.

(d) If a petitioner fails to appear, or to substantiate the information in his petition, at a public hearing on the matter, the Commissioner may either (1) withdraw the regulation and terminate the proceeding or (2) if he concludes that it is in accordance with the requirements of section 401 of the act, continue the proceeding and introduce evidence to substantiate such information.

14. A new paragraph (1) is added to § 10.5 to read as follows:

§ 10.5 Temporary permits for interstate shipment of experimental packs of food varying from the requirements of definitions and standards of identity.

(1) Any person who contests denial, modification, or revocation of a temporary permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

## PART 11—STANDARDS OF QUALITY FOR FOODS FOR WHICH THERE ARE NO STANDARDS OF IDENTITY

15. In Part 11, § 11.1(e) is revised to read as follows:

§ 11.1 General principles.

(e) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may establish, amend, or repeal, under Subpart B of this Part, a regulation prescribing a standard of quality for a food pursuant to Part 2 of this chapter.

## PART 80—DEFINITIONS AND STANDARDS OF IDENTITY FOR FOOD FOR SPECIAL DIETARY USES

16. In Part 80, § 80.1(b) (4) is revised to read as follows:

§ 80.1 Dietary supplements of vitamins and minerals: definition, identity, label statements.

(b) . . .

(4) Addition to or amendment of the list of permissible combinations of vitamins and/or minerals contained in paragraph (b)(1) of this section may be proposed by the Commissioner of Food and Drugs, on his own initiative, or upon petition by an interested person pursuant to Part 2 of this chapter. Any such petition shall include scientific data of a human nutritional and/or technological nature to support such addition or amendment as being consistent with the definition and purpose of dietary sup-

plements as described by this section. The Commissioner, upon request, may extend the effective date of this section with respect to any particular product or class of products pending consideration and any administrative or court proceedings relating to any such petition, and may set a new effective date upon completion of the matter.

#### PART 90—EMERGENCY PERMIT CONTROL

17. In Part 90, § 90.2(a) is revised to read as follows:

§ 90.2 Establishment of requirements for exemption from section 404 of the act.

(a) Whenever the Commissioner finds after investigation that the distribution in interstate commerce of any class of food may, by reason of contamination with microorganisms during the manufacture, processing, or packing thereof in any locality, be injurious to health, and that such injurious nature cannot be adequately determined after such articles have entered interstate commerce, he shall promulgate regulations in Subpart B of this part establishing requirements and conditions governing the manufacture, processing, or packing of the food necessary to protect the public health. Such regulations may be proposed by the Commissioner on his own initiative or in response to a petition from any interested person pursuant to Part 2 of this chapter.

#### PART 100—NUTRITIONAL QUALITY GUIDELINES FOR FOODS

18. In Part 100, § 100.2 is revised to read as follows:

§ 100.2 Petitions.

The Commissioner of Food and Drugs, on his own initiative, on the advice of the National Academy of Sciences or other experts, or on behalf of any interested person who has submitted a petition, may issue a proposal to issue, amend, or revoke a regulation prescribing a nutritional quality guideline for a class of foods, pursuant to Part 2 of this chapter.

#### PART 102—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

19. In Part 102, § 102.2 is revised to read as follows:

§ 102.2 Petitions.

(a) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may publish a proposal to issue, amend, or revoke, under Subpart B of this Part, a regulation prescribing a common or usual name for a food, pursuant to Part 2 of this chapter.

(b) If the principal display panel of a food for which a common or usual name regulation is established is too small to accommodate all mandatory requirements, the Commissioner may establish by regulation an acceptable alternative, e.g., a smaller type size. A petition requesting such a regulation, which would amend the applicable regulation, shall be submitted pursuant to Part 2 of this chapter.

#### PART 121—FOOD ADDITIVES

20. In Part 121, the introductory text of § 121.40(c) (1) is revised to read as follows:

§ 121.40 Affirmation of generally recognized as safe (GRAS) status.

(c) (1) Persons seeking the affirmation of GRAS status of substances as provided for in § 121.3(e), except those subject to the NAS-NRC GRAS list survey (36 FR 20546), shall submit a petition for GRAS affirmation pursuant to Part 2 of this chapter. Such petition shall contain information to establish that the GRAS criteria as set forth in § 121.3(b) have been met, in the following form:

21. Section 121.41(b) (1) is revised to read as follows:

§ 121.41 Determination of food additive status.

(b) (1) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may issue a notice in the FEDERAL REGISTER proposing to determine that a substance is not GRAS and is a food additive subject to section 409 of the act. Any petition shall include all relevant data and information of the type described in § 121.74(b). The Commissioner will place all of the data and information on which he relies on public file in the office of the Hearing Clerk and will include in the FEDERAL REGISTER notice the name of the substance, its known uses, and a summary of the basis for the determination.

22. Section 121.55 is revised to read as follows:

§ 121.55 Procedure for objections and hearings.

Objections and hearings relating to food additive regulations under section 409 (c), (d), or (h) of the act shall be governed by Part 2 of this chapter.

§§ 121.56, 121.57, 121.58, 121.59, 121.60, 121.61, 121.62, 121.63, 121.64, 121.65, 121.66, 121.67, 121.68, 121.69, 121.70, 121.71, 121.72, 121.73 [Revoked]

23. Sections 121.56, 121.57, 121.58, 121.59, 121.60, 121.61, 121.62, 121.63, 121.64, 121.65, 121.66, 121.67, 121.68, 121.69, 121.70, 121.71, and 121.73 are revoked.

24. Section 121.72(b) is revised to read as follows:

§ 121.72 Adoption of regulation on initiative of Commissioner.

(b) Action upon a proposal made by the Commissioner shall proceed as provided in Part 2 of this chapter.

25. Section 121.74 is revised to read as follows:

§ 121.74 Procedure for amending and repealing tolerances or exemptions from tolerances.

(a) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may propose the issuance of a regulation amending or repealing a regulation pertaining to a food additive or granting or repealing an exemption for such additive.

(b) Any such petition shall include an assertion of facts, supported by data, showing that new information exists with respect to the food additive or that new uses have been developed or old uses abandoned, that new data are available as to toxicity of the chemical, or that experience with the existing regulation or exemption may justify its amendment or repeal. New data shall be furnished in the form specified in § 121.51 for submitting petitions.

26. The introductory text of § 121.4000 (c) is revised to read as follows:

§ 121.4000 General.

(c) The Commissioner, on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter, may propose an interim food additive regulation. A final order promulgating an interim food additive regulation shall provide that continued use of the substance in food is subject to each of the following conditions:

#### PART 202—PRESCRIPTION DRUG ADVERTISING

13. In Part 202, a new paragraph (j) (5) to § 202.1 is added to read as follows:

§ 202.1 Prescription drug advertisements.

(j) . . . . .

(5) The sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter with respect to any determination that prior approval is required for advertisements concerning a particular prescription drug, or that a particular advertisement is not approvable.

#### PART 310—NEW DRUGS

13a. In Part 310, § 310.200(b) to read as follows:

§ 310.200 Prescription-exemption procedure.

(b) Prescription-exemption procedure for drugs limited by a new drug application. Any drug limited to prescription use under section 503(b) (1) (C) of the act shall be exempted from prescription-dispensing requirements when the Commissioner finds such requirements are not necessary for the protection of

the public health by reason of the drug's toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use, and he finds that the drug is safe and effective for use in self-medication as directed in proposed labeling. A proposal to exempt a drug from the prescription-dispensing requirements of section 503(b) (1) (C) of the act may be initiated by the Commissioner or by any interested person. Any interested person may file a petition seeking such exemption, which petition may be pursuant to Part 2 of this chapter, or in the form of a supplement to an approved new drug application.

29. Section 310.303(b) is revised to read as follows:

§ 310.303 Continuation of long term studies, records, and reports on certain drugs for which new drug applications have been approved.

(b) A proposal to require additional or continued studies with a drug for which a new drug application has been approved may be made by the Commissioner on his own initiative or on the petition of any interested person, pursuant to Part 2 of this chapter. Prior to issuance of such a proposal, the applicant will be provided an opportunity for a conference with representatives of the Food and Drug Administration. When appropriate, investigators or other individuals may be invited to participate in the conference. All requirements for special studies, records, and reports will be published in § 310.304.

#### PART 312—NEW DRUGS FOR INVESTIGATIONAL USE

30. In Part 312, § 312.1 (c) (1) and (4), (d), and (g) are revised to read as follows:

§ 312.1 Conditions for exemption of new drugs for investigational use.

(c) (1) Whenever the Food and Drug Administration has information indicating that an investigator has repeatedly or deliberately failed to comply with the conditions of these exemption regulations outlined in Form FD-1572 or FD-1573, set forth in paragraph (a) (12) and (13) of this section, or has submitted to the sponsor of the investigation false information in his Form FD-1572 or FD-1573 or in any required report, the Director, Bureau of Drugs, will furnish the investigator written notice of the matter complained of in general terms and offer him an opportunity to explain the matter in an informal conference and/or in writing. If an explanation is offered but not accepted by the Bureau of Drugs, the investigator shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter, on the question

of whether the investigator is entitled to receive investigational new drugs.

(4) If the Commissioner determines, after the unreliable data submitted by the investigator are eliminated from consideration, that the data remaining are inadequate to support a conclusion that it is reasonably safe to continue the investigation, he will notify the sponsor who shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter. If a danger to the public health exists, however, he shall terminate the exemption forthwith and notify the sponsor of the termination. In such event the sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on the question of whether the exemption should be reinstated.

(d) If the Director, Bureau of Drugs, finds that:

(1) The submitted "Notice of claimed investigational exemption for a new drug" contains an untrue statement of a material fact or omits material information required by said notice; or

(2) The results of prior investigations made with the drug are inadequate to support a conclusion that it is reasonably safe to initiate or continue the intended clinical investigations with the drug; or

(3) There is substantial evidence to show that the drug is unsafe for the purposes and in the manner for which it is offered for investigational use; or

(4) There is convincing evidence that the drug is ineffective for the purposes for which it is offered for investigational use; or

(5) The methods, facilities, and controls used for the manufacturing, processing, and packing of the investigational drug are inadequate to establish and maintain appropriate standards of identity, strength, quality, and purity as needed for safety and to give significance to clinical investigations made with the drug; or

(6) The plan for clinical investigations of the drugs described under section 10 of the "Notice of claimed investigational exemption for a new drug" is not a reasonable plan in whole or in part, solely for a bona fide scientific investigation to determine whether or not the drug is safe and effective for use; or

(7) The clinical investigations are not being conducted in accordance with the plan submitted in the "Notice of claimed investigational exemption for a new drug"; or

(8) The drug is not intended solely for investigational use, since it is being or is to be sold or otherwise distributed for commercial purposes not justified by the requirements of the investigation; or

(9) The labeling or other informational material submitted for the drug as required by section 7 of the "Notice

of claimed investigational exemption for a new drug" or any other labeling of the drug disseminated within the United States by or on behalf of the sponsor fails to contain an accurate description of prior investigations or experience and their results pertinent to the safety and possible usefulness of the drug, including all relevant hazards, contraindications, side-effects, and precautions; or any promotional materials disseminated within the United States by or on behalf of the sponsor contains any representation or suggestion that the drug is safe or that its usefulness has been established for the purposes for which it is offered for investigations; or

(10) The sponsor fails to submit accurate reports of the progress of the investigations with significant findings at intervals not exceeding 1 year; or

(11) The sponsor fails promptly to investigate and inform the Food and Drug Administration and all investigators of newly found serious or potentially serious hazards, contraindications, side-effects, and precautions pertinent to the safety of the new drug;

he shall notify the sponsor and invite his immediate correction or explanation. A conference will be arranged with the Bureau of Drugs if requested. If the Bureau of Drugs does not accept the explanation or the correction submitted by the sponsor, the sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on the question of whether his exemption should be terminated. Such hearing shall be requested within 10 days after receipt of notification that the explanation or correction is not acceptable. After evaluating all the available information including any explanation and or correction submitted by the sponsor, if the Commissioner determines that the exemption should be terminated he shall notify the sponsor of the termination of the exemption and the sponsor shall recall unused supplies of the drug. If at any time the Commissioner concludes that continuation of the investigation presents a danger to the public health, he shall terminate the exemption forthwith and notify the sponsor of the termination. The Commissioner will inform the sponsor that the exemption is subject to reinstatement on the basis of additional submissions that eliminate such danger and will afford the sponsor an opportunity for a regulatory hearing before the Commissioner pursuant to Subpart F of Part 2 of this chapter on the question of whether the exemption should be reinstated. The sponsor shall recall the unused supplies of the drug upon notification of the termination.

(g) A "Notice of Claimed Investigational Exemption for a New Drug" which pertains to a product subject to the licensing provisions of the Public Health Service Act of July 1, 1944 (53 Stat. 682, as amended; 42 U.S.C. 201 et seq.), shall be submitted initially to the Director,

Bureau of Biologics, 8800 Rockville Pike, Bethesda, MD 20014. Amendments of or supplements to such notice, and progress reports, consultations, or other communications with regard to the investigation, shall be directed to the Bureau of Biologics, which monitors the development of biological products subject to license under section 351 of the Public Health Service Act. A sponsor for a "Notice of Claimed Investigational Exemption for a New Drug" pertaining to such biologic shall substitute in reading this § 312.1 "Bureau of Biologics" for "Bureau of Drugs," wherever it appears.

31. Section 312.9(c)(2) is revised to read as follows:

§ 312.9 New drugs for investigational use in laboratory research animals or in vitro tests.

(c) \*\*\*

(2) The continuance of the investigation is unsafe or otherwise contrary to the public interest or the drug is used for purposes other than bona fide scientific investigation. He shall notify the sponsor and invite his immediate correction. If the conditions of the exemption are not immediately met, the sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter. If the exemption is terminated, the sponsor shall recall or have destroyed the unused supplies of the drug.

#### PART 314—NEW DRUG APPLICATIONS

32. In Part 314, § 314.200 is revised to read as follows:

§ 314.200 Notice of opportunity for hearing; notice of appearance and request for hearing; grant or denial of hearing.

(a) The notice to the applicant, and to all other persons who manufacture or distribute identical, related, or similar drug products as defined in § 310.6 of this chapter, of an opportunity for a hearing on a proposal by the Director of the Bureau of Drugs to refuse to approve an application or to withdraw the approval of an application will state the reasons for his action and the grounds upon which he proposes to issue his order.

(1) Such notice may be general (i.e., simply summarizing in a general way the information resulting in the notice) or specific (i.e., either referring to specific requirements in the statute and regulations with which there is a lack of compliance, or providing a detailed description and analysis of the specific facts resulting in the notice).

(2) The notice will be published in the FEDERAL REGISTER and will state that the applicant, and other persons subject to the notice pursuant to § 310.6 of this chapter, has 30 days after the date of publication of the notice within which he is required to file a written notice of appearance and request for hearing if he elects to avail himself of the opportunity for a hearing. The failure to file such a

written notice of appearance and request for hearing within that 30 days constitutes an election by the applicant, and other persons subject to the notice pursuant to § 310.6 of this chapter, not to avail himself of the opportunity for a hearing.

(3) It is the responsibility of every manufacturer or distributor of a drug product to review every notice of opportunity for hearing published in the FEDERAL REGISTER to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of such a notice to a specific product he manufactures or distributes that may be identical, related, or similar by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance, HFD-310, 5600 Fishers Lane, Rockville, MD 20852. If such an opinion is requested, the time for filing an appearance and request for hearing and supporting studies and analyses shall begin as of the date of receipt of the opinion from the Food and Drug Administration.

(b) The notice of opportunity for hearing shall be provided to applicants and to other persons subject to the notice pursuant to § 310.6 of this chapter:

(1) To any person who has submitted a new drug application, by delivering the notice in person or by sending it by registered or certified mail to the last address shown in the new drug application.

(2) To any person who has not submitted a new drug application but who is subject to the notice pursuant to § 310.6 of this chapter, by publication of the notice in the FEDERAL REGISTER.

(c) (1) If the applicant, or any other person subject to the notice pursuant to § 310.6 of this chapter, elects to avail himself of the opportunity for a hearing, he shall file with the Hearing Clerk (1) within 30 days after the date of the publication of the notice (or of the date of receipt of an opinion requested pursuant to paragraph (a)(3) of this section) a written notice of appearance and request for hearing, and (ii) within 60 days after the date of publication of the notice, unless a different period of time is specified in the notice of opportunity for hearing, the studies on which he relies to justify a hearing as specified in paragraph (d) of this section. The raw data underlying a study submitted may be incorporated by reference from a prior submission as part of a new drug application or other report.

(2) No data or analysis submitted after such 60 days will be considered in determining whether a hearing is warranted unless they are derived from well-controlled studies begun prior to the date of the notice of opportunity for hearing, the results of which were not in existence during that 60 days. Exceptions may be made on the basis of a showing of inadvertent omission and hardship. All studies in progress, the results of which the person requesting the hearing intends later to submit in support of the request for hearing, shall be listed. A copy of the complete protocol, a list of the participant-

ing investigators, and a brief status report of the studies shall be included in the submission made pursuant to paragraph (c)(1)(ii) of this section.

(3) Any other interested person who is not subject to the notice of opportunity for hearing may also submit comments on the proposal to withdraw approval of the new drug application. Such comments shall be submitted within the time and pursuant to the requirements specified in this section.

(d) A request for hearing shall be supported by a submission as specified in paragraph (c)(1)(ii) of this section containing the studies (including all protocols and underlying raw data) on which the person relies to justify a hearing with respect to his drug product.

(1) If effectiveness is at issue, a request for hearing shall be supported only by adequate and well-controlled clinical studies meeting all of the precise requirements of § 314.111(a)(5) and, for combination drug products, § 300.50 of this chapter, or by other studies not meeting those requirements for which a waiver has been previously granted by the Food and Drug Administration pursuant to the provisions of § 314.111(a)(5). All adequate and well-controlled clinical studies on the drug product known to the person requesting the hearing shall be submitted. Any unfavorable analyses, views, or judgments with respect to such studies known to such person shall also be submitted. No other data, information, or studies shall be submitted.

(2) Such submission shall include a factual analysis of all studies submitted. If effectiveness is at issue, such analysis shall specify how each such study accords, on a point-by-point basis, with each criterion required for an adequate well-controlled clinical investigation established in § 314.111(a)(5) and, if the product is a combination drug product, with each of the requirements for a combination drug established in § 300.50 of this chapter, or shall be accompanied by an appropriate waiver previously granted by the Food and Drug Administration. If a study deals with a drug entity or dosage form, or condition of use, or mode of administration other than the one(s) in question, such fact(s) shall be clearly stated. Any study conducted on the final marketed form of the drug product shall be so designated.

(3) Such analysis shall be submitted in the following format, except that the required information relating either to safety or to effectiveness shall be omitted if the notice of opportunity for hearing does not raise any issue with respect to that aspect of the drug; and information on compliance with § 300.50 shall be omitted if the drug product is not a combination drug product. Submissions not made in this format or not containing the required analyses will not be considered and will result in denial of a hearing, except that minor technical deficiencies may be excused if it is apparent that a good faith attempt has been made to comply with the requirements of this section and any deficiencies noted are immediately corrected upon request.

#### I. Safety data.

##### A. Animal safety data.

###### 1. Individual active component(s).

###### a. Controlled studies.

###### b. Partially controlled or uncontrolled studies.

###### 2. Combinations of the individual active components.

###### a. Controlled studies.

###### b. Partially controlled or uncontrolled studies.

##### B. Human safety data.

###### 1. Individual active component(s).

###### a. Controlled studies.

###### b. Partially controlled or uncontrolled studies.

###### c. Documented case reports.

###### d. Pertinent marketing experiences that may influence a determination as to the safety of each individual active component.

###### 2. Combinations of the individual active components.

###### a. Controlled studies.

###### b. Partially controlled or uncontrolled studies.

###### c. Documented case reports.

###### d. Pertinent marketing experiences that may influence a determination as to the safety of combinations of the individual active components.

#### II. Effectiveness data.

##### A. Individual active components: Controlled studies, with an analysis showing clearly how each study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5).

##### B. Combinations of individual active components.

###### 1. Controlled studies, with an analysis showing clearly how such study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5).

###### 2. An analysis showing clearly how each requirement of § 300.50 of this chapter has been satisfied.

#### III. A summary of the data and views setting forth the medical rationale and purpose for the drug and its ingredients and the scientific basis for the conclusion that the drug and its ingredients have been proven safe and/or effective for the intended use. If there is an absence of controlled studies in the material submitted, or the requirements of any element of § 300.50 of this chapter or § 314.111(a)(5) have not been fully met, such fact(s) shall be clearly stated, and a waiver obtained pursuant to § 314.111(a)(1) shall be enclosed.

#### IV. A statement signed by the person responsible for such submission, that it includes in full (or incorporates by reference as permitted in § 314.200(c)(2)) all studies and information specified in § 314.200(d). (Warning: A willfully false statement is a criminal offense, 18 U.S.C. 1001).

(e) A notice of opportunity for hearing encompasses all issues relating to the legal status of the drug product(s) subject to it, including identical, related, and similar drug products as defined in § 310.6 of this chapter. Any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act, or because it is exempt from part or all of the new drug provisions of the act pursuant to section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962, or for any other reason shall be stated in a notice of appearance and request for hearing pursuant to paragraph (c)(1)(i) of this section and supported by a

submission pursuant to paragraph (c)(1)(ii) of this section and shall be the subject of an administrative determination by the Commissioner. The failure of any person subject to a notice of opportunity for a hearing, including any person who manufactures or distributes an identical, related, or similar drug product as defined in § 310.6 of this chapter, to submit a notice of appearance and request for hearing or to raise all such contentions on which he relies shall constitute a waiver of any such contentions not so raised.

(1) A contention that a drug product is generally recognized as safe and effective within the meaning of section 201(p) of the act must be supported by submission of the same quantity and quality of scientific evidence as is required to obtain approval of a new drug application for the product, unless a waiver has been obtained from such requirement for effectiveness (as provided in § 314.111(a)(5)) and/or safety for good cause shown. Such submission shall be in the format and with the analyses required by paragraph (d) of this section. The failure to submit such scientific evidence or a submission that is not in the format or does not contain the analyses required by paragraph (d) of this section shall constitute a waiver of any such contention. General recognition of safety and effectiveness shall ordinarily be based upon published studies which may be corroborated by unpublished studies and other data and information.

(2) A contention that a drug product is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938 contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962, shall be supported by submission of evidence of past and present quantitative formulas, labeling, and evidence of marketing, on which reliance is made for such contention. The failure to submit such formulas, labeling, and evidence of marketing in the following format shall constitute a waiver of any such contention.

#### I. Formulation.

##### A. A copy of each pertinent document or record to establish the exact quantitative formulation of the drug (both active and inactive ingredients) on the date of initial marketing of the drug.

B. A statement whether such formulation has at any subsequent time been changed in any manner. If any such change has been made, the exact date, nature, and rationale for each change in formulation, including any deletion or change in the concentration of any active ingredient and/or inactive ingredient, shall be submitted, together with a copy of each pertinent document or record to establish the date and nature of each such change including but not limited to the formula which resulted from each such change. If no such change has been made, a copy of representative documents or records showing the formula at representative points in time shall be submitted to support the statement.

#### II. Labeling.

A. A copy of each pertinent document or record to establish the identity of each item of written, printed, or graphic matter used

as labeling on the date the drug was initially marketed.

B. A statement whether such labeling has at any subsequent time been discontinued or changed in any manner. If such discontinuance or change has been made, the exact date, nature, and rationale for each discontinuance or change and a copy of each pertinent document or record to establish each such discontinuance or change shall be submitted, including but not limited to the labeling which resulted from each such discontinuance or change. If no such discontinuance or change has been made, a copy of representative documents or records showing labeling at representative points in time shall be submitted to support the statement.

#### III. Marketing.

A. A copy of each pertinent document or record to establish the exact date the drug was initially marketed.

B. A statement whether such marketing has at any subsequent time been discontinued. If such marketing has been discontinued, the exact date of each such discontinuance shall be submitted, together with a copy of each pertinent document or record to establish each such date.

#### IV. Verification.

A statement signed by the person responsible for such submission, that all appropriate records have been searched and to the best of his knowledge and belief it includes a true and accurate presentation of the facts (Warning: A willfully false statement is a criminal offense, 18 U.S.C. 1001).

(3) No drug product, including any active ingredient, which is identical, related, or similar, as defined in § 310.6, to a drug product, including any active ingredient for which a new drug application is or at any time has been effective or deemed approved, or approved under section 505 of the act, will be determined to be exempt from part or all of the new drug provisions of the act.

(4) A contention that a drug product is not a new drug for any other reason must be supported by submission of such factual records, data, and information as is necessary and appropriate to support such contention.

(5) It is the responsibility of every person who manufactures or distributes a drug product in reliance upon a "grandfather" provision(s) of the act to maintain in his files, organized as required by this paragraph, the data and information necessary fully to document and support such status.

(f) Upon receipt of any request for hearing, the Director of the Bureau of Drugs shall prepare an analysis of the request and a proposed order ruling upon the matter. The analysis and proposed order, the request for hearing, and any proposed order denying a hearing and response pursuant to paragraph (g)(2) or (3) of this section, shall be submitted to the office of the Commissioner for independent review and decision. No representative of the Bureau of Drugs shall participate or advise in the review and decision by the Commissioner. The office of the General Counsel shall observe the same separation of functions.

(g) A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing with

5

respect to the particular drug product(s) specified in the request for hearing.

(1) Where a specific notice of opportunity for hearing as defined in paragraph (a)(1) of this section is used, it shall state that, if it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the refusal to approve the application or the withdrawal of approval of the application, e.g., no adequate and well-controlled clinical investigations meeting each of the precise elements of § 314.111(a)(5) and, for a combination drug product, § 300.50 of this chapter, showing effectiveness have been identified, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing. Any such order entering summary judgment shall set forth the Commissioner's findings and conclusions in detail and shall specify why each study submitted fails to meet the requirements of the statute and regulations or why the request for hearing does not raise a genuine and substantial issue of fact or shall specify the requirements of this section with respect to format or analyses with which there is a lack of compliance.

(2) Where a general notice of opportunity for hearing (as defined in paragraph (a)(1) of this section) is used and the Director of the Bureau of Drugs concludes that summary judgment against the person(s) requesting a hearing should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information, and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(3) Where a general or specific notice of opportunity for hearing is used and the person(s) requesting a hearing submits data or information of a type required by the statute and regulations, and the Director of the Bureau of Drugs concludes that summary judgment against such person(s) should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information, and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(4) If review of the data, information, and analyses submitted warrants the conclusion that the ground(s) cited in the notice are not valid, e.g., that substantial evidence of effectiveness exists, the Commissioner shall deny the hearing, enter summary judgment for the person(s) requesting the hearing, and rescind the notice of opportunity for hearing.

(5) If a hearing is requested and is justified the hearing will commence no more than 90 days after the expiration of such 30 days unless the parties otherwise agree in the case of denial of approval, and as soon as practicable in the case of withdrawal of approval.

(6) A hearing shall be granted if there exists a genuine and substantial issue of fact or if the Commissioner concludes, in his discretion, that a hearing would otherwise be in the public interest.

(7) If the manufacturer or distributor of a drug product that may be an identical, related, or similar drug product requests and is granted a hearing, the issue whether the product is in fact identical, related, or similar to the drug subject to new drug application is properly encompassed within the hearing.

(8) A request for hearing, and any subsequent grant or denial of a hearing, shall be applicable only to the particular drug product(s) named in such documents.

(h) Any drug product subject to a notice of opportunity for hearing, including any identical, related, or similar drug product as defined in § 310.6 of this chapter, for which an opportunity for a hearing is waived or for which a hearing is denied shall promptly be the subject of a notice withdrawing the new drug application approval and declaring all such products unlawful. The Commissioner may, in his discretion, defer or stay such action pending a ruling on any related request for a hearing or pending any related hearing or other administrative or judicial proceeding.

33. A new § 314.201 is added to read as follows:

§ 314.201 Procedure for hearings.

Hearings relating to new drugs under section 505 (d) and (e) of the act shall be governed by Part 2 of this chapter.

§§ 314.202, 314.203, 314.204, 314.205, 314.206, 314.220, 314.221, 314.222, 314.230, 314.231, 314.232 [Revoked].

34. Sections 314.202, 314.203, 314.204, 314.205, 314.206, 314.220, 314.221, 314.222, 314.230, 314.231 and 314.232 are revoked.

35. Section 314.235 is revised to read as follows:

§ 314.235 Judicial review.

(a) The transcript and record shall be certified by the Commissioner. In any case in which the Commissioner enters an order without a hearing pursuant to § 314.200(g), the requests for hearing together with the data and information submitted and the Commissioner's findings and conclusions shall be included in the record certified by the Commissioner.

(b) Judicial review of an order withdrawing approval of a new drug application, whether or not a hearing has been held, may be sought by a manufacturer or distributor of an identical, related, or similar drug product, as defined in § 310.6 of this chapter, in a United States court of appeals pursuant to section 505 (h) of the act.

#### PART 328—IN VITRO DIAGNOSTIC PRODUCTS FOR HUMAN USE

36. In Part 328, § 328.30(a) is revised to read as follows:

§ 328.30 Procedure for establishing, amending or repealing standards.

(a) Basis for standards and available approaches to developing standards. Whenever in the judgment of the Commissioner the establishment of a product class standard is necessary to reduce or eliminate unreasonable risk of illness or injury associated with exposure to or use of an in vitro diagnostic product and there are no other more practicable means to protect the public from such risk, he may propose such a standard. In proposing a product class standard he shall consider, and publish in the FEDERAL REGISTER findings on, the degree of risk or injury associated with the use of the product, the availability of information relating to the sciences upon which the products or their uses are based, the approximate number of products subject to the standard, the medical need for the products, and the probable effect of the standard upon the utility, cost, or availability of the product, and available means of achieving the objective of the standard with a minimal disruption of supply and of reasonable manufacturing and other commercial practices. Three procedures are available for developing product class standards and may be proposed on the initiative of the Commissioner or by petition of interested persons, pursuant to Part 2 of this chapter:

- (1) An existing standard may be utilized.
- (2) Interested persons outside of the Food and Drug Administration may develop a proposed standard or
- (3) the Food and Drug Administration may develop the standard.

#### PART 330—OVER-THE-COUNTER (OTC) HUMAN DRUGS WHICH ARE GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED

37. In Part 330, § 330.10(a)(11) is revised to read as follows:

§ 330.10 Procedures for classifying OTC drugs as generally recognized as safe and effective and not misbranded, and for establishing monographs.

(a) . . .

(11) Amendment of monographs. The Commissioner may propose on his own initiative to amend or repeal any monograph established pursuant to this section. Any interested person may petition the Commissioner for such proposal, pursuant to Part 2 of this chapter. The Commissioner may deny the petition if he finds a lack of safety or effectiveness employing the standards in paragraph (a)(4) of this section (in which case the appeal provisions of paragraph (a)(10) of this section shall apply) or he may issue a proposed amendment or repeal in the FEDERAL REGISTER if he finds general recognition of safety and effectiveness employing the standards in paragraph (a)(4) of this section (in which case the provisions of paragraph (a)(6), (7), (8), and (9) of this section shall apply). A new drug application may be submitted in lieu of or in addition to a petition under this paragraph.

graph (a)(4) of this section (in which case the provisions of paragraph (a)(6), (7), (8), and (9) of this section shall apply). A new drug application may be submitted in lieu of or in addition to a petition under this paragraph.

#### PART 429—DRUGS COMPOSED WHOLLY OR PARTLY OF INSULIN

38. In Part 429, § 429.50 is revised to read as follows:

§ 429.50 Hearing procedure.

Hearings pursuant to § 429.47 shall be governed by Subpart F of Part 2 of this chapter.

#### PART 430—ANTIBIOTIC DRUGS: GENERAL

39. In Part 430, § 430.20 is revised to read as follows:

§ 430.20 Procedure for the issuance, amendment, or repeal of regulations.

(a) The procedures for the issuance, amendment, or repeal of regulations under section 507 of the act shall be governed by Part 2 of this chapter.

(b) (1) The Commissioner, on his own initiative or on the application or request of any interested person, may publish in the FEDERAL REGISTER a notice of proposed rule making and order to issue, amend, or repeal any regulation contemplated by section 507 of the act. Such notice and order may be general (i.e., simply summarizing in a general way the information resulting in the notice and order) or specific (i.e., either referring to specific requirements in the statute and regulations with which there is a lack of compliance, or providing a detailed description and analysis of the specific facts resulting in the notice and order).

(2) An opportunity shall be given for interested persons to submit written comments and to request an informal conference on the proposal, unless such notice and opportunity for comment and informal conference have already been provided in connection with the announcement of the reports of the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, to persons who will be adversely affected, or as provided in §§ 2.10(e) or 2.110(b)(2) of this chapter. The time for requesting an informal conference shall be 30 days unless otherwise specified in the notice of proposed rule making. If an informal conference is requested and granted, those persons participating in the conference shall be provided an additional 30 days for comment, beginning the date of the conference, unless otherwise specified in the proposal.

(3) It is the responsibility of every manufacturer or distributor of an antibiotic drug product to review every proposal published in the FEDERAL REGISTER to determine whether it covers any product he manufactures or distributes.

(4) After considering the written comments, the results of any conference, and the data available, the Commissioner will publish an order in the FEDERAL REGISTER

acting on the proposal, with opportunity for any person who will be adversely affected to file objections, to request a hearing, and to show reasonable grounds for the hearing. Any such person who elects to avail himself of the opportunity for a hearing shall file with the Hearing Clerk (1) within 30 days after the date of publication of the order a written notice of appearance and request for hearing, and (ii) within 60 days after the date of publication of the order, unless a different period of time is specified in the order, the studies on which he relies to justify a hearing as specified in paragraph (b)(6) of this section. The raw data underlying a study submitted may be incorporated by reference from a prior submission as part of an antibiotic application, or other applications or reports.

(5) No data or analysis submitted after such 60 days will be considered in determining whether a hearing is warranted unless they are derived from well-controlled studies begun prior to the date of the order, the results of which were not in existence during that 60 days. Exceptions may be made on the basis of a showing of inadvertent omission and hardship. All studies in progress, the results of which the person requesting the hearing intends later to submit in support of the request for hearing, shall be listed. A copy of the complete protocol, a list of the participating investigators, and a brief status report of the studies shall be included in the submission made pursuant to paragraph (b)(4) (ii) of this section.

(6) A request for hearing shall be supported by a submission as specified in § 314.200(c)(1)(ii) of this chapter containing the studies (including all underlying raw data) on which the person relies to justify a hearing with respect to his drug product.

(1) If effectiveness is at issue, a request for hearing shall be supported only by adequate and well-controlled clinical studies meeting all of the precise requirements of § 314.111(a)(5) of this chapter and, for combination drug products, § 300.50 of this chapter, or by other studies not meeting those requirements for which a waiver has been previously granted by the Food and Drug Administration pursuant to the provisions of § 314.111(a)(5) of this chapter. All adequate and well-controlled clinical studies on the drug product known to the person requesting the hearing shall be submitted. Any unfavorable analyses, views, or judgments with respect to such studies known to such person shall also be submitted. No other data, information, or studies shall be submitted.

(ii) Such submission shall include a factual analysis of all studies submitted. If effectiveness is at issue, such analysis shall specify how each such study accords, on a point-by-point basis, with each criterion required for an adequate and well-controlled clinical investigation established in § 314.111(a)(5) of this chapter and, if the product is a combination drug product, with each of the requirements for a combination drug es-

tablished in § 300.50 of this chapter, or shall be accompanied by an appropriate waiver previously granted by the Food and Drug Administration. If a study deals with a drug entity or dosage form, or condition of use, or mode of administration other than the one(s) in question, such fact(s) shall be clearly stated. Any study conducted on the final marketed form of the drug product shall be so designated.

(iii) Such analysis shall be submitted in the following format, except that information relating to safety or effectiveness shall be omitted if the order does not raise any issue with respect to that aspect of the drug; and information on compliance with § 300.50 of this chapter shall be omitted if the drug product is not a combination drug product. Submissions not made in this format or not containing the required analyses will not be considered and will result in denial of hearing, except that minor technical deficiencies may be excused if it is apparent that a good faith attempt has been made to comply with the requirements of this section and any deficiencies noted are immediately corrected upon request.

- I. Safety data.
  - A. Animal safety data.
  1. Individual active component(s).
  - a. Controlled studies.
  - b. Partially controlled or uncontrolled studies.
  2. Combinations of the individual active components.
    - a. Controlled studies.
    - b. Partially controlled or uncontrolled studies.
  - B. Human safety data.
    1. Individual active component(s).
    - a. Controlled studies.
    - b. Partially controlled or uncontrolled studies.
    - c. Documented case reports.
    - d. Pertinent marketing experiences that may influence a determination as to the safety of each individual active component.
    2. Combinations of the individual active components.
      - a. Controlled studies.
      - b. Partially controlled or uncontrolled studies.
      - c. Documented case reports.
      - d. Pertinent marketing experiences that may influence a determination as to the safety of combinations of the individual active components.
- II. Effectiveness data.
  - A. Individual active components: Controlled studies, with an analysis showing clearly how each such study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5) of this chapter.
  - B. Combinations of individual active components.
    1. Controlled studies with an analysis showing clearly how each such study satisfies, on a point-by-point basis, each of the criteria required by § 314.111(a)(5) of this chapter.
    2. An analysis showing clearly how each requirement of § 300.50 of this chapter has been satisfied.
- III. A summary of the data and views setting forth the medical rationale and purpose for the drug and its ingredients and the scientific basis for the conclusion that the drug and its ingredients have been proven safe and/or effective for the intended use. If there is an absence of controlled studies in the material submitted, or the re-

requirements of any element of § 300.50 of this chapter or § 314.111(a)(5) of this chapter have not been fully met, such fact(s) shall be clearly stated, and a waiver obtained pursuant to § 314.111(a)(5) of this chapter shall be enclosed.

IV. A statement signed by the person responsible for such submission, that it includes in full (or incorporates by reference as permitted in § 430.20(b)(4)) all studies and information specified in § 430.20(b). (Warning: A willfully false statement is a criminal offense, 18 U.S.C. 1001.)

(7) Upon receipt of any request for hearing, the Director of the Bureau of Drugs shall prepare an analysis of the request and a proposed order ruling upon the matter. The analysis and proposed order, the request for hearing, and any proposed order denying a hearing and response pursuant to paragraph (b)(8)(ii) or (iii) of this section, shall be submitted to the office of the Commissioner for independent review and decision. No representative of the Bureau of Drugs shall participate or advise in the review and decision by the Commissioner. The office of the General Counsel shall observe the same separation of functions.

(8) A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact with respect to the particular drug product(s) which is specified in the request for hearing that requires a hearing.

(i) Where a specific proposal or order (as defined in paragraph (b)(1) of this section) is used, the order published in the *FEDERAL REGISTER* shall state that, if it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that there is no genuine and substantial issue of fact which precludes the action taken on the proposal, e.g., no adequate and well-controlled clinical investigations meeting each of the precise elements of § 314.111(a)(5) of this chapter and, for a combination drug product, § 300.50 of this chapter, showing effectiveness have been identified, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests a hearing, making findings and conclusions, denying a hearing. Any such order entering summary judgment shall set forth the Commissioner's findings and conclusions in detail and shall specify why each study submitted fails to meet the requirements of the statute and regulations or why the request for hearing otherwise does not raise a genuine and substantial issue of fact or shall specify the requirements of this paragraph with respect to format or analyses with which there is a lack of compliance.

(ii) Where a general notice or order (as defined in paragraph (b)(1) of this section) is used and the Director of the Bureau of Drugs concludes that summary judgment against the person(s) requesting a hearing should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a

hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(iii) Where a general or specific notice or order is used and the person(s) requesting a hearing submits data or information of a type required by the statute and regulations, and the Director of the Bureau of Drugs concludes that summary judgment against such person(s) should be considered, he shall serve upon such person(s) by registered mail a proposed order denying a hearing. Such person(s) shall have 60 days after receipt of such proposed order to respond with sufficient data, information, and analyses to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing.

(iv) If review of the data, information, and analyses submitted warrants the conclusion that the basis for the order is not valid, e.g., that substantial evidence of effectiveness exists, the Commissioner shall deny the hearing, enter summary judgment for the person(s) requesting the hearing, and revoke the order. If a hearing is not requested, the order will become effective as published.

(v) If a hearing is requested and justified, the provisions of Part 2 of this chapter shall apply to such hearing.

(vi) A hearing shall be granted if there exists a genuine and substantial issue of fact or if the Commissioner concludes, in his discretion, that a hearing would otherwise be in the public interest.

(9) The repeal of any regulation constitutes a revocation of all outstanding certificates based upon such regulation. However, the Commissioner may, in his discretion, defer or stay such action pending a ruling on any related request for a hearing or pending any related hearing or other administrative or judicial proceeding.

(c) Whenever any interested person submits an application or request pursuant to provisions of section 507 of the act, or regulations promulgated thereunder, which application or request contemplates the issuance, amendment, or repeal of any regulation, and such person has been informed in writing that such application or request is not approvable, or whenever such person has received no written communication advising whether or not such application is approvable by the 180th day after its submission, such interested person may file a petition proposing the issuance, amendment, or repeal of such regulation under the provisions of section 507(f) of the act and Part 2 of this chapter. The Commissioner shall cause the regulation proposed in such petition to be published in the *FEDERAL REGISTER* within 60 days of the receipt of an acceptable petition and further proceedings shall be in accord with the provisions of sections 507(f) and 701(f) and (g) of the act and Part 2 of this chapter.

(d)(1) No regulation providing for the certification of any batch of any drug composed wholly or in part of any kind

of penicillin, streptomycin, chlortetracycline, chloramphenicol, bacitracin, or any other antibiotic drug, or any derivative thereof, intended for use by man shall be promulgated and no existing regulation will be continued in effect unless it is established by substantial evidence that the drug will have such characteristics of identity, strength, quality, and purity necessary to adequately insure safety and efficacy of use. "Substantial evidence" has been defined by Congress to mean "evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug involved, on the basis of which it could fairly and responsibly be concluded by such experts that the drug will have the effectiveness it purports and is represented to have under the conditions prescribed, recommended or suggested in the labeling thereof." This definition is made applicable to a number of antibiotic drugs by section 507(h) of the act and it is the test of efficacy that will be applied in promulgating, amending, or repealing regulations for the certification of all antibiotics under section 507(a) of the act as well.

(2) The scientific essentials of an adequate and well-controlled clinical investigation are described in § 314.111(a)(5) of this chapter.

#### PART 431—CERTIFICATION OF ANTIBIOTIC DRUGS

40. In Part 431, § 431.52 is revised to read as follows:

##### § 431.52 Hearings.

Any person who contests the suspension of certification service under § 431.51 shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

#### PART 433—EXEMPTIONS FROM ANTIBIOTIC CERTIFICATION AND LABELING REQUIREMENTS

41. In Part 433, § 433.2 (c) and (d) are revised to read as follows:

##### § 433.2 Conditions on the effectiveness of exemptions from certification.

(c) If the Commissioner repeals or suspends an exemption for an antibiotic drug, the approved new drug application, or an exemption from batch certification requirements, a notice to that effect and the reasons therefor will be published in the *FEDERAL REGISTER*.

(d) Any person who contests the revocation or suspension or denial of reinstatement of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

42. Section 433.12(b)(4) is revised and adding a paragraph (b)(5) to read as follows:

##### § 433.12 Exemption for labeling.

(b) . . . . .  
(4) When the Commissioner finds that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit.

(5) Any person who contests the denial or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

43. Section 433.13(b) is revised to read as follows:

##### § 433.13 Exemption for manufacturing use.

(b) An application for such a permit shall be in a form specified by the Commissioner, shall give the name and location of the establishment in which such drug is to be used and shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such shipment or delivery;

(2) A written statement signed by the operator of such establishment showing that he has adequate facilities for the manufacture of such other drug; such statement shall contain an agreement that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof and showing the quantity and batch mark of each batch of such other drug manufactured by him and the disposition thereof; that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records; and

(3) A written agreement signed by the person who will own the drug after its manufacture is completed that he will request certification of each batch thereof unless it is exempt under section 801(d) of the act or §§ 433.12, 433.14, 433.16, or 433.17, and that he will not remove any of such drug from such establishment unless it complies with section 502(1) of the act or the certification requirements of section 512(n) of the act or is so exempt or is returned to him for labeling.

When the Commissioner finds that such application contains any untrue statement of a material fact or that any provision of any such agreement has been

violated, he may revoke such permit. Any person who contests the denial or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

44. Section 433.14(b) is revised to read as follows:

##### § 433.14 Exemption for storage.

(b) An application for such a permit shall be in a form specified by the Commissioner, and shall give the name and location of the warehouse in which such drug is to be stored. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will request certification of each batch thereof unless it is exempt under section 801(d) of the act or §§ 433.12, 433.13, or 433.16, that he will not remove any of such drug from such warehouse unless it complies with section 502(1) of the act or the certification requirements of section 512(n) of the act or is so exempt or, if certification is refused unless it is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured; that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug to such warehouse, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such shipment or delivery; and

(2) A written statement signed by the operator of such warehouse showing that he has adequate facilities for such storage; such statement shall contain an agreement that he will hold each shipment or other delivery of such drug intact, under such conditions as will not cause failure of the drug to comply with the requirements for certification, that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof, that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records.

If the applicant keeps complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug from such warehouse and the name and post-office address of the person to whom such shipment or delivery was made, the agreement to keep records of such disposals, to make such records available, and to afford opportunity for checking their correctness may be included in the applicant's agreement and omitted from that of the operator. When the Commis-

sioner finds that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit. Any person who contests the denial or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

45. Section 433.15(b) is revised to read as follows:

##### § 433.15 Exemption for processing.

(b) An application for such a permit shall be in a form specified by the Commissioner and shall give the name and location of the establishment in which such processing is to be done. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, potency, and batch mark of each shipment and other delivery of any such solution to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such shipment or delivery;

(2) A written agreement signed by the operator of such establishment showing that he has adequate facilities for such processing; such statement shall contain an agreement that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof, that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records; and

(3) A written agreement signed by the person who will own the drug after the processing is completed that he will request certification of each batch thereof unless it is exempt under section 801(d) of the act or §§ 433.12, 433.13, 433.14, 433.16, or 433.17, and that he will not remove any of such drug from such establishment unless it complies with section 502(1) of the act or the certification requirements of section 512(n) of the act or is so exempt.

When the Commissioner finds that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit. Any person who contests the denial or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

46. Section 433.16(b) is revised to read as follows:

## RULES AND REGULATIONS

## § 433.16 Exemption for repacking.

(b) An application for such a permit shall be in a form specified by the Commissioner, and shall give the name and location of the establishment in which such repacking is to be done. Such application shall be accompanied by:

(1) A written agreement signed by the applicant that he will keep complete records showing the date, quantity, and batch mark of each shipment and other delivery of any such drug to such establishment, and that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of each shipment or delivery;

(2) A written statement signed by the operator of such establishment showing that he has adequate facilities for such repacking; such statement shall contain an agreement that he will keep complete records showing the date of receipt by him and the quantity and batch mark of each such shipment and delivery and the disposition thereof, that he will make such records available to any officer or employee of the Food and Drug Administration at any reasonable hour within 3 years after the date of such disposition, and that he will accord full opportunity to such officer or employee to make inventories of stocks on hand and otherwise check the correctness of such records; and

(3) A written agreement signed by the person who will own the drug after the repacking is completed that he will request certification of each batch thereof unless it is exempt under section 801(d) of the act or §§ 433.12, 433.13, 433.14, or 433.17, and that he will not remove any of such drug from such establishment unless it complies with section 502(1) of the act or the certification requirements of section 512(n) of the act or is so exempt or is returned to him for labeling or, if certification is refused, unless it is returned within a reasonable time to permit reprocessing and certification, destruction, or such exemption at the establishment where it was manufactured.

When the Commissioner finds that such application contains any untrue statement of a material fact or that any provision of any such agreement has been violated he may revoke such permit. Any person who contests the denial or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

## PART 511—NEW ANIMAL DRUGS FOR INVESTIGATIONAL USE

47. In Part 511, by amending § 511.1 by revising the undesignated paragraph at the end of paragraph (b) (5) and paragraphs (c) (1) and (4) and (d) (2) to read as follows:

## § 511.1 New animal drugs for investigational use exempt from section 512 (a) of the act.

(b) . . .  
(5) . . .

Authorizations granted under this subparagraph do not exempt investigational animals and their products from compliance with other applicable inspection requirements. Any person who contests a refusal to grant such authorization shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

## (c) Withdrawal of eligibility to receive investigational-use new animal drugs.

(1) Whenever the Food and Drug Administration has information indicating that an investigator has repeatedly or deliberately failed to comply with the conditions of these exempting regulations or has submitted false information either to the sponsor of the investigation or in any required report, the Director, Bureau of Veterinary Medicine, will furnish the investigator written notice of the matter complained of in general terms and offer him an opportunity to explain the matter in an informal conference and/or in writing. If an explanation is offered but not accepted by the Bureau of Veterinary Medicine, the investigator shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on the question of whether the investigator is entitled to receive investigational new animal drugs.

(c) (4) If the Commissioner determines, after the unreliable data submitted by the investigator are eliminated from consideration, that the data remaining are inadequate to support a conclusion that it is reasonably safe to continue the investigation, he shall first notify the sponsor, who shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on whether the exemption should be terminated. If a danger to the public health exists, however, he shall terminate the exemption forthwith and notify the sponsor of the termination. In such event the sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on the question of whether the exemption should be reinstated.

(d) . . .

(2) The continuance of the investigation is unsafe or otherwise contrary to the public interest or the drug is being or has been used for purposes other than bona fide scientific investigation, he shall first notify the sponsor and invite his immediate correction. If the conditions of the exemption are not immediately

met, the sponsor shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter on whether the exemption should be terminated. If the exemption is terminated the sponsor shall recall or have destroyed the unused supplies of the new animal drug.

## PART 514—NEW ANIMAL DRUG APPLICATIONS

48. In Part 514, § 514.201 is revised to read as follows:

## § 514.201 Procedure for hearings.

Hearings relating to new animal drugs under section 505 (d), (e), (m) (3), and (m) (4) of the act shall be governed by Part 2 of this chapter.

§§ 514.202, 514.203, 514.204, 514.205, 514.206 [Revoked].

49. Sections 514.202, 514.203, 514.204, 514.205, and 514.206 are revoked.

50. Section 514.210 is revised to read as follows:

## § 514.210 Hearing procedure.

Hearings pursuant to § 514.155 shall be governed by Subpart F of Part 2 of this chapter.

§§ 514.220, 514.221, 514.222, 514.230, 514.231, 514.232 [Revoked].

51. Sections 514.220, 514.221, 514.222, 514.230, 514.231, and 514.232 are revoked.

52. Section 514.235 is revised as follows:

## § 514.235 Judicial review.

(a) The transcript and record shall be certified by the Commissioner. In any case in which the Commissioner enters an order without a hearing pursuant to § 314.200(g) of this chapter, the request(s) for hearing together with the data and information submitted and the Commissioner's findings and conclusions shall be included in the record certified by the Commissioner.

(b) Judicial review of an order withdrawing approval of a new drug application, whether or not a hearing has been held, may be sought by a manufacturer or distributor of an identical, related, or similar drug product, as defined in § 310.6 of this chapter, in a United States court of appeals pursuant to section 505(h) of the act.

## PART 601—LICENSING

53. In Part 601, §§ 601.4, 601.5, and 601.6(c) are revoked and the remainder of § 601.6 is redesignated as § 601.12, new §§ 601.4 through 601.9 are added to read as follows:

## § 601.4 Issuance and denial of license.

(a) An establishment or product license shall be issued upon a determination by the Commissioner that the establishment or the product, as the case may be, meets the applicable standards established in this chapter. Licenses shall be valid until suspended or revoked.

(b) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

## § 601.5 Revocation of license.

(a) An establishment or product license shall be revoked upon application of the manufacturer giving notice of intention to discontinue the manufacture of all products or to discontinue the manufacture of a particular product for which a license is held, and waiving an opportunity for a hearing on the matter.

(b) If the Commissioner finds that (1) authorized Food and Drug Administration employees after reasonable efforts have been unable to gain access to an establishment or a location for the purpose of carrying out the inspection required under § 600.21 of this chapter, (2) manufacturing of products or of a product has been discontinued to an extent that a meaningful inspection or evaluation cannot be made, (3) the manufacturer has failed to report a change as required by § 601.12, (4) the establishment or any location thereof, or the product for which the license has been issued, fails to conform to the applicable standards established in the license and in this chapter designed to ensure the continued safety, purity, and potency of the manufactured product, (5) the establishment or the manufacturing methods have been so changed as to require a new showing that the establishment or product meets the standards established in this chapter in order to protect the public health, or (6) the licensed product is not safe and effective for all of its intended uses or is misbranded with respect to any such use, he shall notify the licensee of his intention to revoke the license, setting forth the grounds for, and offering an opportunity for a hearing on, the proposed revocation. Except as provided in § 601.6 and in cases involving willfulness, the notification required in this paragraph shall provide a reasonable period for the licensee to demonstrate or achieve compliance with the requirements of this chapter, before proceedings will be instituted for the revocation of the license. If compliance is not demonstrated or achieved and the licensee does not waive the opportunity for a hearing, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(c) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(d) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(e) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(f) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(g) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(h) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(i) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(j) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(k) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(l) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(m) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(n) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(o) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(p) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(q) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(r) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(s) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(t) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(u) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(v) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(w) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

(x) If the Commissioner determines that the establishment or product does not meet the standards established in this chapter, he shall deny the application and inform the applicant of the grounds for, and of an opportunity for a hearing on, his decision. If the applicant so requests, the Commissioner shall issue a notice of opportunity for hearing on the matter pursuant to § 2.111(b) of this chapter.

## RULES AND REGULATIONS

such product or products have been delivered of such suspension, and (2) furnish to the Director, Bureau of Biologics, complete records of such deliveries and notice of suspension.

(b) Upon suspension of a license, the Commissioner shall either (1) proceed pursuant to the provisions of § 601.5(b) to revoke the license, or (2) if the licensee agrees, hold revocation in abeyance pending resolution of the matters involved.

## § 601.7 Procedure for hearings.

(a) A notice of opportunity for hearing, notice of appearance and request for hearing, and grant or denial of hearing for a biological drug pursuant to this Part, for which the exemption from the Federal Food, Drug, and Cosmetic Act in § 310.4 of this chapter has been revoked, shall be subject to the provisions of § 314.200 of this chapter except to the extent that the notice of opportunity for hearing on the matter issued pursuant to § 2.111(b) of this chapter specifically provides otherwise.

(b) Hearings pursuant to §§ 601.4 through 601.6 shall be governed by Part 2 of this chapter.

(c) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(d) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(e) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(f) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(g) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(h) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(i) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(j) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(k) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(l) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(m) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(n) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(o) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(p) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(q) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(r) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(s) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(t) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(u) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(v) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(w) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(x) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

(y) When a license has been suspended pursuant to § 601.6 and a hearing request has been granted, the hearing shall proceed on an expedited basis.

on any appropriate information panel in letters not less than 1/8 of an inch in height and without obscuring design, vignettes, or crowding. In the absence of sufficient space for such declaration on the package, or where the manufacturer or distributor wishes to use a decorative container, the declaration may appear on a firmly affixed tag, tape, or card. In those cases where there is insufficient space for such declaration on the package, and it is not practical to firmly affix a tag, tape, or card, the Commissioner may establish by regulation an acceptable alternate, e.g., a smaller type size. A petition requesting such a regulation as an amendment to this paragraph shall be submitted pursuant to Part 2 of this chapter.

(e) Interested persons may submit a petition requesting the establishment of a specific name for a cosmetic ingredient pursuant to Part 2 of this chapter. The Commissioner may also propose such a name on his own initiative.

## PART 1003—NOTIFICATION OF DEFECTS OF FAILURE TO COMPLY

56. In Part 1003, § 1003.11 is amended by adding an undesignated paragraph at the end of paragraph (a) as follows:

§ 1003.11 Determination by Secretary that product fails to comply or has a defect.

(a) . . .

The manufacturer shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

57. Section 1003.31(d) is added to read as follows:

## § 1003.31 Granting the exemption.

(d) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(e) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(f) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(g) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(h) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(i) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(j) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(k) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(l) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(m) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(n) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(o) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(p) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(q) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

(r) Any person who contests denial of an exemption shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

V 40-102 MAY 27 75

XUM

**Subpart D—Hearings****§ 1210.30 Hearing procedure for permit denial, suspension, and revocation.**

Any person who contests denial, suspension, or revocation of a permit shall have an opportunity for a regulatory hearing before the Food and Drug Administration pursuant to Subpart F of Part 2 of this chapter.

60. Section 1210.31 is revoked and § 1210.63 is redesignated as new § 1210.31 to read as follows:

**§ 1210.31 Hearing before prosecution.**

Before violation of the act is referred to the Department of Justice for prosecution under section 5 of the Federal Import Milk Act, an opportunity to be heard will be given to the party against whom prosecution is under considera-

tion. The hearing will be private and confined to questions of fact. The party notified may present evidence, either oral or written, in person or by attorney, to show cause why he should not be prosecuted. After a hearing is held, if it appears that the law has been violated, the facts will be reported to the Department of Justice.

§§ 1210.32, 1210.33, 1210.40, 1210.41, 1210.42, 1210.43, 1210.44, 1210.50, 1210.51, 1210.52, 1210.53, 1210.54, 1210.55, 1210.56, 1210.57, 1210.58, 1210.59, 1210.60, 1210.61, 1210.62, [Revoked].

61. Sections 1210.32, 1210.33, and Subparts E, F and G of Part 1210, including 1210.40, 1210.41, 1210.42, 1210.43, 1210.44, 1210.50, 1210.51, 1210.52, 1210.53, 1210.54, 1210.55, 1210.56, 1210.57, 1210.58, 1210.59, 1210.60, 1210.61, 1210.62 are revoked.

*Effective date.* This order shall be effective on July 28, 1975, except that §§ 2.20(b) and 2.21 shall be effective on November 24, 1975. Interested persons may, on or before July 28, 1975, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, written comments in quintuplicate on any aspect of this order. Comments received will be available for public inspection at the above office during working hours, Monday through Friday. Any changes in this order justified by such comments will be the subject of a further order amending the specific regulations involved.

Dated: May 9, 1975.

A. M. SCHMIDT,  
Commissioner of Food and Drugs.

# DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[ 14 CFR Parts 23, 25, 27, 29, 91, 121 and 127 ]

[ Docket No. 14625; Notice No. 75-23 ]

## AIRWORTHINESS REVIEW PROGRAM

### Notice No. 5: Equipment and Systems Proposals

The Federal Aviation Administration is considering amending Parts 23, 25, 27, 29, 91, 121 and 127 of the Federal Aviation Regulations to update and improve the airworthiness standards applicable to aircraft equipment and systems and to make related changes in the operating rules.

This is one of a series of notices of proposed rule making issued, or to be issued, as a part of the First Biennial Airworthiness Review Program. Notice No. 74-33 (39 FR 36595; October 11, 1974) was the first. Amendments 21-43, 23-16, and 25-37, issued on December 31, 1974 (40 FR 2576; January 14, 1975) pursuant to that notice, incorporated certain form number and clarifying revisions into the Federal Aviation Regulations. In addition to Notice 74-33, the following Airworthiness Review notices of proposed rule making have been issued: Notice No. 75-10 (40 FR 10802; March 7, 1975); Notice No. 75-19 (40 FR 21866; May 19, 1975); and Notice 75-20 (40 FR 22110; May 20, 1975).

Interested persons, including the general public, manufacturers and users of aircraft and their components, both foreign and domestic, and foreign airworthiness authorities, are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to any significant environmental or economic impact that might result because of the adoption of the proposals contained herein may also be submitted. Comments should identify this regulatory docket or notice number (Docket No. 14625; Notice No. 75-23) and be submitted in duplicate to: Federal Aviation Administration, Office of Chief Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue, SW, Washington, D.C. 20591. All communications received on or before August 25, 1975, will be considered by the Administrator before taking action on the proposed rules. However, interested persons are urged to submit their comments as early as possible to facilitate rapid resolution of any issues raised. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket for examination by interested persons.

On February 12, 1974, the FAA issued an invitation to all interested persons to submit proposals for consideration during the First Biennial Airworthiness Review Conference (see Notice 74-5, 39 FR 5785, February 15, 1974). In that notice, the FAA announced that it would make available for comment by inter-

ested persons a compilation of proposals that were to be given further consideration as possible agenda items for the First Biennial Airworthiness Review Conference. On May 22, 1974, the FAA issued an announcement of the availability of the compilation of proposals containing over 1000 submissions by the FAA and interested persons, and invited all interested persons to submit comments on the proposals it contained (see Notice 74-5A, 39 FR 18662, May 29, 1974).

In response to that invitation for comments, the FAA received over 4900 individual comments contained in 74 submissions. Based on those comments and on the compilation of proposals, the FAA prepared a number of working documents for the Airworthiness Review Conference held in Washington, D.C., on December 2-11, 1974. The FAA distributed those documents to all persons who had participated in the Airworthiness Review Program and to all other interested persons who requested them (see Notice 74-5B, 39 FR 36594, October 11, 1974).

For reasons given in Notice 74-5B, not all of the proposals contained in the compilation were included in the agenda for the conference. However, the proposals not included in the agenda were listed in a conference workbook titled "Proposals Not in Agenda." In general, Notice 75-10 deals with the proposals identified as "Items for Notice" in that workbook.

On November 25, 1974, the FAA issued a notice of conference that set forth the schedule for the conference and invited all interested persons to attend the conference (see Notice 74-5C, 39 FR 41319, November 26, 1974).

The Airworthiness Review Conference was attended by over 586 individuals representing 22 foreign airworthiness authorities as well as aircraft manufacturers and users. Except for the opening and closing plenary sessions of the conference, one or more committees discussed agenda items during conference working hours. Summaries were given by the FAA Committee Chairmen at the close of discussions on each agenda item. Persons present were given an opportunity to correct those oral summaries. Transcripts of those summaries (with editorial revisions) were combined with an attendee list for the conference as well as with transcripts of certain plenary session speeches and were distributed in accordance with a notice of availability issued February 4, 1975 (see Notice 74-5D, 40 FR 5810; February 7, 1975).

In general this notice deals with the proposals that were contained in the Committee workbook titled "Committee V—Equipment." That workbook contained the proposals discussed by the Equipment and Systems Committee at the Airworthiness Review Conference. Another conference working document used was the Agenda for the Airworthiness Review Conference. That document, in addition to providing general information relating to the conference, included details on how the proposals were grouped into agenda items, and the

scheduling of those items for discussion. Both the workbooks and the agenda were updated and corrected by a supplemental working document distributed prior to and at the conference to participating individuals as well as to other interested persons. These workbooks along with the committee discussions and written information submitted by conference attendees have provided the basis upon which the FAA has developed this notice.

A number of proposals contained in this notice were not included in the Committee V workbook. Among these are proposals that are directly related to the proposals in the workbook and are included for the sake of clarity, consistency, and comprehensiveness. In addition, there are several proposals dealt with in this notice which appeared as "Items for Notice" in the "Proposal Not in Agenda" workbook but were withheld from consideration pending the completion of the Airworthiness Review Conference (see Appendix I to Notice 75-10 for a list of those proposals).

A number of proposals contained in the Committee V workbook are not included in this notice. These proposals (listed in Appendices I, II, and III) fall into three categories as follows:

**Appendix I**—those proposals which are being deferred to a later notice or to the next Airworthiness or Operations Review.

**Appendix II**—those proposals which were withdrawn by their proponent.

**Appendix III**—those proposals which were removed from consideration during this Airworthiness Review.

The FAA believes that, in general, the proposals in Appendix I have sufficient merit to warrant further consideration and will be dealt with in the next Airworthiness or Operations Review, unless withdrawn by their proponent. But, because of the complexity of the proposal, the need for additional data, or the operational character of the proposal, further consideration within this Airworthiness Review is not feasible. The proposals in Appendix III have been removed from consideration for the reasons stated in that appendix.

The FAA believes that the airworthiness standards should, to the extent practical, be consistent throughout the airplane and rotorcraft certification parts (Parts 23, 25, 27, and 29). Therefore, the FAA has attempted within the time frame of this Airworthiness Review Program, to make consistent and parallel proposals, where appropriate, for each of these certification parts.

To avoid unnecessary repetition, in a number of instances the proposals developed for purposes of consistency are not set forth in their entirety if those proposals are substantively identical to another proposal in this notice. A short-form proposal referring to a proposal that is expressly set forth in this notice is used. Where a short-form proposal is used, however, there may be a need, if the proposal is to be adopted as a final rule, to change paragraph designations, cross references, or aircraft terminology

(i.e. "airplane" to "rotorcraft", or vice versa) from that used in the referenced express proposal.

The FAA recognizes that there may exist additional instances in which a proposed rule change prescribed in this notice as expressly applying only to certain parts of the Federal Aviation Regulations should more appropriately apply to additional parts as well. Therefore, with respect to each proposal in this notice relating to Parts 23, 25, 27, or 29 of the Federal Aviation Regulations for which similar proposals do not exist for all of those parts, comments are solicited from all interested persons with respect to the applicability of that proposal (and its stated explanation) to those parts for which the proposal has not been expressly presented. Such comments received in response to this notice will either be dealt with as a part of the 1974-1975 Airworthiness Review Program or be considered as a part of the next Biennial Airworthiness Review.

For convenience, each proposal in this notice is numbered separately. The FAA requests that interested persons, when submitting comments, refer to proposals by these numbers, or by the section to which they relate. Each proposal contains, or references a proposal that contains, a reference to the Airworthiness Review Program proposal number, section, and agenda item to which that proposal relates. Comment on this notice should not refer to the Airworthiness Review Program proposal numbers or section numbers without also referring to the corresponding proposal numbers as set forth in this notice. Each proposal in this notice is provided with an explanation. In addition, to avoid confusion several of the proposals in this notice reference proposals in Notice 75-10 that deal with the same regulatory provisions. Several explanations deal with comments received in response to Notice 74-5A; however, all comments submitted in response to Notice 74-5A or submitted for the Airworthiness Review Conference, dealing with proposals contained in this notice, should be re-submitted if it is desired that they be considered as a part of this rulemaking action.

This amendment is proposed under the authority of sections 313(a), 601, 603, 604 and 605 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423, 1424, and 1425) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend Parts 23, 25, 27, 29, 91, 121 and 127 of the Federal Aviation Regulations as follows:

## PART 23—AIRWORTHINESS STANDARDS: NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

5-1. By revising § 23.1301 to read as follows:

### § 23.1301 Function and installation.

(a) Each item of installed equipment must—

(1) Be of a kind and design appropriate to its intended function;

## PROPOSED RULES

(2) Be permanently and legibly marked or, if the item is too small to mark, tagged as to its identification, function, and operating limitations;

(3) Be installed according to limitations specified for that equipment; and

(4) Function properly when installed.

(b) No item of installed equipment may under any circumstance prevent the proper operation of any required system or of any other system provided to the flight crew for controlling, navigating, or monitoring performance of the airplane.

**Explanation.** This proposal would expand the applicability of this section to cover some optional equipment not now covered by present paragraph (a). Service experience has shown that improperly designed or malfunctioning optional equipment may introduce hazards. Proposed paragraph (a) is identical to the present requirement in § 25.1301 except for the clarification in proposed paragraph (a) (2). Proposed paragraph (b) would prohibit detrimental interference with required systems or any other system used in controlling, navigating or monitoring performance of the airplane. The addition of proposed paragraph (b) would render present § 23.1309(a) superfluous. Therefore, it is also being proposed that § 23.1309(a) be deleted.

**Ref.** Proposal No. 672; § 23.1301; Agenda Item A-1.

### § 23.1309 [Amended]

5-2. By deleting § 23.1309(a) and marking it "[Reserved]".

**Explanation.** See the proposal for § 23.1301.

**Ref.** Proposal No. 672; § 23.1301; Agenda Item A-1.

5-3. By revising § 23.1321(a) and by adding a new § 23.1321(e) to read as follows:

### § 23.1321 Arrangement and visibility.

(a) Each instrument which has a visual indicator for use in flight by any pilot must be plainly visible to him from his station with the minimum practicable deviation from his normal position and line of vision when he is looking forward along the flight path.

(e) If a visual indicator is provided to indicate malfunction of an instrument, it must be effective under all cockpit lighting conditions.

**Explanation.** The present visibility requirement in § 23.1321(a) pertains only to flight, navigation, and powerplant instruments. Since other devices may be intended for use in flight and a pilot may develop vertigo by his head movements to see these devices, the location of all visual indicators for use in flight needs to be considered. Of course, flight safety will remain the primary consideration in position priority. The standard of "minimum practicable deviation" will remain, if the rule is adopted as proposed, thus allowing considerations of all factors related to utilization and flight safety. This same proposal is also made for §§ 25.1321(a), 27.1321(a), and 29.1321(a).

The proposed § 23.1321(e), if adopted, would extend the requirement of the present and proposed § 23.1321(a) to require consideration of all possible cockpit lighting conditions for visibility of required malfunction indicators.

The FAA considered the question whether the proposal should apply only to required malfunction indicators or to all indicators, and believes that if a malfunction indicator has been provided for the crew it should be effective under all cockpit lighting conditions.

**Ref.** Proposal Nos. 680, 681, 791, 864, 950; §§ 23.1321, 23.1321(a), 25.1321(b), 27.1321, 29.1321; Agenda Items B-7, B-8.

5-4. By revising § 23.1323 to read as follows:

### § 23.1323 Airspeed indicating system.

(a) Each airspeed indicating instrument must be calibrated to indicate true airspeed (at sea level with a standard atmosphere) with a minimum practicable instrument calibration error when the corresponding pitot and static pressures are applied.

(b) Each airspeed system must be calibrated in flight to determine the system error. The system error, including position error, but excluding the airspeed indicator instrument calibration error, may not exceed three percent of the indicated airspeed or five knots, whichever is greater, throughout the following speed ranges:

(1) 1.3  $V_{SI}$  to  $V_{SO}/M_{SO}$  or  $V_{SR}$ , whichever is appropriate with flaps retracted.

(2) 1.3  $V_{SI}$  to  $V_{SR}$  with flaps extended.

**Explanation.** See the proposal for § 23.1545(a).

**Ref.** Proposal Nos. 114, 129; §§ 23.1323(a), 23.1545(a); Agenda Item B-9.

5-5. By amending § 23.1325 by adding paragraph (d) to read as follows:

### § 23.1325 Static pressure system.

(d) Each system must be designed and installed so that the error in indicated pressure altitude, at sea level, with a standard atmosphere, excluding instrument calibration error, does not result in an error of more than  $\pm 30$  feet per 100 knots speed for the appropriate configuration in the speed range between 1.3  $V_{SI}$  with flaps extended and 1.8  $V_{SI}$  with flaps retracted. However, the error need not be less than  $\pm 30$  feet.

**Explanation.** This proposal is identical to the standard presently required by § 25.1325(e). Part 23 now contains no specified standard of allowable error for the static pressure system. This proposal, if adopted, will provide a standard which would be consistent for small airplanes and transport category airplanes.

Airworthiness Review Notice 75-10 proposed a new § 23.1325(c).

**Ref.** Proposal No. 685; § 23.1325; Agenda Item B-12.

5-6. By revising § 23.1327(b), and by adding a new § 23.1327(c), to read as follows:

### § 23.1327 Magnetic direction indicator.

(b) Except as provided in paragraph (c), the compensated installation may

V

5

XUM

not have a deviation, in level flight, greater than ten degrees on any heading.

(c) A magnetic nonstabilized direction indicator may deviate more than ten degrees due to the operation of electrically powered systems such as electrically heated windshields if either an additional magnetic direction indicator (stabilized or nonstabilized) which does not have a deviation, in level flight, greater than ten degrees on any heading, or a gyroscopic direction indicator, is installed. Deviations of a magnetic nonstabilized direction indicator of more than 10 degrees must be placarded in accordance with § 23.1547(e).

**Explanation.** This proposal would allow deviation (exceeding 10 degrees) in a magnetic nonstabilized direction indicator caused by operation of electrically powered systems if the airplane is equipped with another direction indicator that meets the standard specified in paragraph (b) and the airplane is placarded in accordance with proposed § 23.1547(e). Under these conditions, safety would not be adversely affected. A similar change is proposed for § 27.1327.

Ref. Proposal Nos. 686, 867; §§ 23.1327 (b), 27.1327(b); Agenda Item B-13.

5-7. By redesignating § 23.1329 as § 23.1311; and by revising the heading, by deleting the introductory phrase, by revising paragraph (a), and by adding new paragraphs (g) and (h) to read as follows:

**§ 23.1311 Automatic flight control systems.**

(a) Each automatic flight control system must be designed so that it can—

(1) Be quickly and positively disengaged by the pilots to prevent it from interfering with their control of the airplane; and

(2) Be sufficiently overpowered by one pilot to let him control the airplane. The overpower and control forces may not exceed the temporary application limits set forth in § 23.143.

(g) Quick release (emergency) controls must be on each control wheel (or stick control) on the side opposite the throttles.

(h) Means independent of the mode selector switch must be provided to indicate to the flight crew the current mode of operation and the availability status of each alternate system.

**Explanation.** It is proposed that § 23.1329 be redesignated as § 23.1311, and that the term "automatic pilot system" be replaced with "automatic flight control system", as proposed for Part 25 in Airworthiness Review Notice No. 2 (Notice 75-10).

Under present § 23.1329(a), either the airplane must have a means to quickly and positively disengage the automatic pilot system or one pilot must be able to overpower that system. The FAA believes that neither of these alternatives, by itself, provides an adequate level of safety. If a disengage device is provided, and a malfunction or failure in it pre-

vents disengagement in an emergency, the pilot may not be able to overpower the automatic system. And if overpowering capability is provided, any need to continuously overpower the automatic flight control system adds a large increment to the pilot's workload and, should another failure occur, may prevent continued safe flight and landing. It is therefore proposed to require both a means to quickly and positively disengage the automatic flight control system and the ability to overpower that system. In addition, proposed § 23.1311 (a) would also require that the overpower and control forces may not exceed the temporary application limits set forth in present § 23.143(c).

To ensure quick release of the automatic flight control system in an emergency, proposed § 23.1311(g) would require that quick release controls be installed on each control wheel (or stick control), on the side opposite the throttles. This would allow disengagement without moving the hand from its normal position.

A proposal identical to § 23.1311(a) is being proposed for Part 25. Also see the proposal for §§ 27.1311 and 29.1311.

For an explanation of proposed § 23.1311(h) see the proposal for § 25.1329(h).

Ref. Proposal No. 687; § 23.1329(a) (1); Agenda Item C-20.

5-8. By revising § 23.1335, including the heading, to read as follows:

**§ 23.1335 Flight director systems.**

If a flight director system is installed, means independent of the mode selector switch must be provided to indicate to the flight crew its current mode of operation.

**Explanation.** See the proposal for § 25.1335.

A proposal was made in Airworthiness Review Notice No. 2 (Notice 75-10) to delete present § 23.1335. This Notice No. 2 proposal was not included in the agenda for the Airworthiness Review Conference. At the conference, however, proposals concerning flight director systems were discussed, and have been included in this notice as a proposal for § 25.1335. Pursuant to FAA's belief that the airworthiness standards should be consistent, to the extent practicable, throughout the airplane and rotorcraft certification parts new proposals for §§ 23.1335, 27.1335 and 29.1335 are being made. The proposal contained in Notice No. 2 for § 23.1335 will be withdrawn at the time of final rulemaking action if the new proposal for § 23.1335 is adopted. All comments received in response to proposed § 23.1335 in Notice No. 2 will be considered for this new proposal for § 23.1335.

Ref. Proposal No. 141; § 25.1333; Agenda Item C-23.

5-9. By adding a new § 23.1351(f) to read as follows:

**§ 23.1351 General.**

(f) **External power.** If provisions are made for connecting external power to the airplane, and that external power is not used solely for starting the engine,

means must be provided to ensure that no external power supply having a reverse polarity, or a reverse phase sequence, can supply power to the airplane's electrical system.

**Explanation.** If an external power supply with reverse polarity or reverse phase sequence were to supply power to the airplane's electrical system extensive damage to the system could result. This proposal would require a means to prevent such an occurrence.

Ref. Proposal Nos. 118, 308; §§ 23.1351, 25.1355; Agenda Item D-29.

5-10. By revising § 23.1353(b) (1) and by adding a new § 23.1353(g) to read as follows:

**§ 23.1353 Storage battery design and installation.**

(1) At maximum regulated voltage or power;

(g) Each nickel cadmium battery installation capable of being used to start an engine or auxiliary power unit must have provisions to prevent any hazardous effect on structure or essential systems that may be caused by the maximum amount of heat the battery can generate during a short circuit of the battery or of its individual cells.

**Explanation.** Proposed § 23.1353(b) (1) would add "or power" to the battery recharging standard. The proposal by adding an alternative standard is intended to clarify the present rule to more appropriately include all battery charging means and parameters. In some battery charging techniques, voltage is not a controlled factor except by response of the battery. Also, power is a measure of heat input to the battery. A similar proposal is made for §§ 25.1353(c) (1) (i), 27.1353(b) (1), and 29.1353(c) (1) (i).

Short circuits of nickel cadmium batteries (either internally or to the airplane structure through the battery caps) have occurred in service. The heat generated by such short circuits may in some circumstances damage nearby structure or essential systems. It is therefore proposed to require provisions to prevent any hazardous effect from this cause. See also proposed new § 23.1353(f) in Airworthiness Review Notice No. 2 (Notice 75-10), which is aimed at reducing the occurrence of short circuits that are caused by excessive battery charging current.

Ref. Proposal Nos. 307, 694, 800, 871, 956; §§ 23.1353(f), 25.1353, 25.1353(d), 27.1353(f), 29.1353(d); Agenda Items D-30, D-31.

5-11. By revising § 23.1357(b) to read as follows:

**§ 23.1357 Circuit protective devices.**

(b) A protective device for a circuit essential to flight safety may not be used to protect any other circuit.

**Explanation.** Proposed paragraph (b) would clarify the present rule by specifically prohibiting the use of a single

protective device to protect an essential and a nonessential circuit, or more than one essential circuit. A protective device protecting two circuits would trip in response to a fault in either one; thus a fault in the nonessential circuit would render the essential circuit inoperative.

Ref. Proposal Nos. 695, 872, 119; §§ 23.1357(b), 27.1357(b); Agenda Item D-32.

**§ 23.1361 [Amended]**

5-12. By amending § 23.1361(b) by adding, at the end thereof, the sentence, "These circuits must be isolated, or physically shielded, to prevent their igniting flammable fluids or vapors that might be liberated by the leakage or rupture of flammable fluid systems".

**Explanation.** Circuits by-passing the master switch remain energized after the master switch is opened. If such circuits fall during a crash landing they might possibly ignite nearby flammable fluids or vapors. This proposal would reduce that possibility.

Ref. Proposal No. 696; § 23.1361(b); Agenda Item D-34.

**§ 23.1401 [Amended]**

5-13. By amending § 23.1401 by striking the number "30" in both places in paragraph (b) and inserting in place thereof (in both places) the number "75"; and by adding a line at the end of the table in paragraph (f) to read as follows: "30° to 75°-----20".

**Explanation.** The present anticollision light rule in § 23.1401(b) requires that the field of coverage extend in each direction within at least 30° above and 30° below the horizontal plane of the airplane. The FAA believes that this minimum coverage should be increased. Under the present rule, visibility of the light may be less than is needed when the airplane is approached by another aircraft ascending or descending, or when the airplane is banked at more than 30°. This proposal would expand the present field of coverage so that it extends in each direction within at least 75° above and 75° below the horizontal plane of the airplane. In addition, this proposal would specify at least a 20-candle effective intensity in the 30° to 75° field of coverage, thereby increasing the probability of seeing the airplane from other aircraft (including air rescue aircraft) and from control towers.

Ref. Proposal Nos. 124, 697, 313, 801; §§ 23.1401(b), 23.1401(f), 25.1401(b), 25.1401(f); Agenda Item E-36.

5-14. By adding a new § 23.1438 to read as follows:

**§ 23.1438 Pressurization and pneumatic systems.**

(a) Pressurization system components must be burst pressure tested to 2.0 times, and proof pressure tested to 1.5 times, the maximum normal operating pressure.

(b) Pneumatic system components must be burst pressure tested to 4.0 times, and proof pressure tested to 1.5

times, the maximum normal operating pressure.

**Explanation.** Components (such as ducts and couplings) of pressurization and pneumatic systems have failed at an unacceptable rate in service. The proposed standards for these components have been effective in preventing design deficiencies in the past.

Ref. Proposal Nos. 702, 811; §§ 23.1438 (a) (b) (c) (d), 25.1438; Agenda Item G-45.

5-15. By adding a new § 23.1447 (c) and (d) to read as follows:

**§ 23.1447 Equipment standards for oxygen dispensing units.**

(c) If certification for operation above 30,000 feet is requested, the dispensing units providing the required oxygen flow rate must be automatically presented to each occupant before the cabin pressure altitude exceeds 14,000 feet.

(d) If an automatic dispensing unit (hose and mask, or other unit) system is installed, each occupant served by that system must be provided with a manual means to make the dispensing unit immediately available in the event of failure of the automatic system.

**Explanation.** The proposal would require automatic presentation of oxygen dispensing units on airplanes certificated under Part 23 for operations above 30,000 feet. Should loss of pressurization occur at those altitudes, the time of useful consciousness varies between 90 seconds at 30,000 feet and 10-12 seconds at 40,000 feet, necessitating automatic presentation of oxygen dispensing units. It is also proposed to specify 14,000 feet as the cabin pressure altitude at which they must be automatically presented so that they would be ready for use not only when the cabin pressure altitude goes very rapidly to very high values but also in the event of a pressurization system failure or malfunction after which (under present § 23.841(a)) the cabin pressure altitude may go to 15,000 feet. The 14,000-foot cabin pressure altitude for automatic presentation is also being proposed for Part 25.

In addition, since service experience has shown that the automatic-presentation feature may fail, it is proposed that a manual means be provided to enable each occupant to gain access to his oxygen dispensing unit. This manual means is also being proposed for Part 25.

Ref. Proposal Nos. 704, 322; §§ 23.1447 (c) and (d), 25.1447(c) (1); Agenda Item H-47.

**§ 23.1450 [New]**

5-16. By adding a new § 23.1450 that would be substantially identical to the proposed new § 25.1450.

**§ 23.1461 [New]**

5-17. By adding a new § 23.1461, following § 23.1449, that would be substantially identical to the proposed new § 25.1461.

5-18. By revising § 23.1545(a) and § 23.1545(b) (5), and by adding § 23.1545 (b) (6), to read as follows:

**§ 23.1545 Airspeed indicator.**

(a) Each airspeed indicator must be marked as specified in paragraph (b) of this section, with the marks located at the corresponding indicated airspeeds.

(b) . . .

(5) For the one-engine-inoperative best rate of climb speed,  $V_r$ , a blue sector extending from the  $V_r$  speed at sea level to the  $V_r$  speed at—

(i) An altitude of 5000 feet, if the one-engine-inoperative best rate of climb at that altitude is less than 100 feet per minute; or

(ii) The highest 1000-foot altitude (at or above 5000 feet) at which the one-engine-inoperative best rate of climb is 100 feet per minute or more. Each side of the sector must be labeled to show the altitude for the corresponding  $V_r$ .

(6) For the minimum control speed (one-engine-inoperative),  $V_{mc}$ , a red radial line.

**Explanation.** Proposed § 23.1545(a) would require airspeed limitation marks be located at the corresponding indicated airspeeds instead of at the calibrated airspeeds, thereby providing a more useful indicator dial for operation of the airplane. However, to ensure uniformity, it is also proposed to revise § 23.1323 to require that the airspeed instrument be calibrated according to the standard relationship between pressure and airspeed. (See the proposal for § 23.1323.) The allowable airspeed system error would then include position error, but exclude the airspeed instrument calibration error, consistent with Part 25. The airspeed range for calibration, as set forth in proposed § 23.1323, would encompass the airspeed limitations in proposed § 23.1545(a).

Also, proposed § 23.1545(b) (5) would provide for the variation in the one-engine-inoperative best rate of climb speed with altitude, and proposed § 23.1545(b) (6) would cover  $V_{mc}$ .

Ref. Proposal Nos. 114, 129, §§ 23.1323 (a), 23.1545(a); Agenda Item B-9.

5-19. By adding a new § 23.1547(e) to read as follows:

**§ 23.1547 Magnetic direction indicator.**

(e) If a magnetic nonstabilized direction indicator can have a deviation of more than 10 degrees caused by electrical equipment, the placard must state which electrical loads, or combination of loads, would cause a deviation of more than 10 degrees when turned on.

**Explanation.** See the proposal for § 23.1327 (b) and (c). Proposed § 23.1547(e) would require that the magnetic direction indicator placard identify those electrical loads which cause a deviation of more than 10 degrees. The pilot would thus know when the indicated heading of the magnetic nonstabilized direction indicator is not reliable due to magnetic fields associated with airplane electrical systems.

Ref. Proposal Nos. 686, 867; §§ 23.1327 (b), 27.1327(b); Agenda Item B-13.

# **PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES**

5-20. By revising § 25.831(e) and by adding a new § 25.831(f) to read as follows:

## **§ 25.831 Ventilation.**

(e) Except as provided in paragraph (f) of this section, there must be a means in each compartment or area occupied by crewmembers to enable the occupants of each area or compartment to control the temperature and quantity of ventilating air supplied to that compartment or area independently of the temperature and quantity of air supplied to other compartments or areas.

(f) Means to control the temperature and ventilating air flow in the crew compartment independently of the temperature and air flow in the passenger compartment are not required if all of the following conditions are met:

(1) The total volume of the crew and passenger compartments is 800 cubic feet or less.

(2) The air inlets and passages for air to flow between crew and passenger compartments are arranged to provide compartment temperatures within 5° F of each other and adequate ventilation to occupants in both compartments.

(3) The temperature and ventilation controls are accessible to the pilot.

**Explanation.** A proposal was made in Airworthiness Review Notice No. 2 (Notice 75-10) to revise § 25.831(e) and to add a new § 25.831(f). These proposals were not included in the agenda for the first Airworthiness Review Conference. At the conference, however, other proposals concerning § 25.831(e) were discussed. The FAA now believes that a further revision of § 25.831(e) may be needed. Also, the proposed new § 25.831(f) is repropoed to avoid confusion with Notice No. 2. The proposals contained in Notice No. 2 for § 25.831 will thus be withdrawn at the time of final rulemaking action if the proposal for § 25.831 in this Notice is adopted. All comments received in response to the proposal for § 25.831 in Notice No. 2 will be considered for the new proposal for § 25.831.

The proposed new § 25.831(f) would allow an exception to the requirement of independent controls for ventilating air for certain airplanes. If the conditions in new paragraph (f) are met, the FAA believes independent controls do not contribute significantly to airworthiness. However, the FAA believes if those conditions are not met that greater control in individual areas may be needed.

Neither present § 25.831(e) nor proposed § 25.831(e) in Notice No. 2 requires independent control in flight attendant areas of ventilating air supplied to those areas. Since both flight attendants and flight crewmembers perform various duties affecting safety, it is necessary that the ventilation in their work areas be adequate to ensure that their efficiency is not adversely affected. The ventilation needed in flight attendant areas may be quite different due to the presence of heating elements and the activ-

ity required in performance of their duties. Control of ventilation in flight attendant areas may be needed when flight crewmembers are busy with other tasks. Therefore, the FAA believes that all crewmember compartments or areas should have not only their own supply of ventilating air, but should have a control of such air in the individual compartment or area.

Ref. Proposal Nos. 251, 729; §§ 25.831, 25.831(f); Agenda Item G-42.

5-21. By revising § 25.1301(b) to read as follows:

## **§ 25.1301 Function and installation.**

(b) Be permanently and legibly marked or, if the item is too small to mark, tagged as to its identification, function, and operating limitations;

**Explanation.** The proposal would provide a more realistic and specific requirement for labeling airplane equipment. The proposal is consistent with the corresponding requirement for equipment manufactured in accordance with a Technical Standard Order and with the proposal for § 23.1301.

Ref. Proposal No. 781; § 25.1301; Agenda Item A-1.

5-22. By amending the lead-in of § 25.1309 (d) and (e) and by revising § 25.1309 (a), (b), (c), (e)(3) and (f) to read as follows:

## **§ 25.1309 Equipment systems and installations.**

(a) The equipment, systems, and installations whose functioning is required by this chapter, must be designed to ensure that they perform their intended functions under any foreseeable operating condition.

(b) The airplane systems and associated components, considered separately and in relation to other systems, must be designed so that—

(1) The occurrence of any failure condition which would prevent the continued safe flight and landing of the airplane or which, in the event of loss of all propulsive power, would preclude controlled flight to an emergency landing, is extremely improbable; and

(2) The occurrence of any other failure condition which would significantly reduce the operational or performance capability of the airplane is improbable.

(c) Warning information must be provided to alert the crew to unsafe system operating conditions, and to enable them to take appropriate corrective action. Systems, controls, and associated monitoring and warning means must be designed to minimize crew errors which could create additional hazards.

(d) Compliance with the requirements of paragraph (b) of this section must be shown by analysis, and where necessary, by appropriate ground, flight, or flight simulator tests. The analysis must consider—

(e) Each installation whose functioning is required by this chapter, and that

requires a power supply, is an "essential load" on the power supply. . . .

(3) Essential loads after failure of—

(i) Any one engine on two-engine airplanes; and

(ii) Any two engines on three-or-more engine airplanes.

(f) In determining compliance with paragraphs (e) (2) and (3) of this section, the power loads may be assumed to be reduced under a monitoring procedure consistent with safety in the kinds of operation authorized. Loads not required in controlled flight need not be considered for the two-engine-inoperative condition on airplanes with three or more engines.

**Explanation.** The proposed revision of § 25.1309(a) and the lead-in of paragraph (e) would change the term "subchapter" to "chapter" in both. The term "chapter" is being proposed to broaden the applicability of § 25.1309. Equipment, systems, and installations not specifically required by Subchapter C are installed in airplanes in order to engage in operations covered by other subchapters. Dependence for safety of flight might be placed on installations not otherwise mentioned in the rules. The proposal for § 25.1309(a) is also made for § 27.1309(a) and § 29.1309(a).

The proposal for § 25.1309(b) would qualify the present requirement in § 25.1309(b) (1) to take into account the possibility of loss of all propulsive power, in which event "continued safe flight and landing" would not necessarily be attainable. In addition, the proposal would delete the reference to occupant injury in present § 25.1309(b) (2) since the matter of preventing injuries to occupants is treated elsewhere in the regulations (see §§ 25.785, 25.787, 25.789, 25.801), and would clarify the language in that paragraph.

Also the proposal would revise the language in present § 25.1309(c) and delete the reference to paragraph (c) from the language of paragraph (d). The method of compliance set forth in paragraph (d) which is applicable to paragraph (c) in the present rule has been found to be an unreasonably burdensome procedure in some instances. Further, the revision of paragraph (c) would more appropriately emphasize the required design considerations of minimizing crew errors.

Under present § 25.1309(e) (3), system power sources on three-engine airplanes need not be capable of supplying essential loads after failure of two engines. It is proposed to upgrade this requirement by specifying that essential loads must be supplied after failure of two engines on three-engine airplanes. In general, three-engine airplanes are capable of considerable performance on one engine. Essential loads required for controlled flight on one engine must be supplied. A corresponding change has been proposed for § 25.1309(f).

A proposal in Airworthiness Review Notice Number 2 (Notice 75-10) would add commas in the section heading be-

tween "Equipment" and "systems," and between "systems" and "and."

Ref. Proposal Nos. 295, 296, 299, 789; §§ 25.1309, 25.1309(a), 25.1309(e); Agenda Items A-2, A-3, A-6.

## **§ 25.1321 [Amended]**

5-23. By amending § 25.1321 in a manner substantively identical to that proposed for § 23.1321.

5-24. By revising the title of § 25.1329 and § 25.1329(a), and by adding a new § 25.1329(h) to read as follows:

## **§ 25.1329 Automatic flight control systems.**

(a) Each automatic flight control system must be designed so that it can—

(1) Be quickly and positively disengaged by the pilots to prevent it from interfering with their control of the airplane; and

(2) Be sufficiently overpowered by one pilot to let him control the airplane. The overpower and control forces may not exceed the temporary application limits set forth in § 25.143.

(h) Means independent of the mode selector switch must be provided to indicate to the flight crew the current mode of operation and the availability status of each alternative system.

**Explanation.** For an explanation of § 25.1329(a), see the proposal for § 23.1329 (proposed redesignation to § 23.1311).

Service experience has shown that where automatic flight control systems are installed, confusion may result if there is no indication of the current mode of operation, and of the status of alternate systems. Moreover, experience has also shown that the position of a mode selector switch is not a reliable means of providing such indications. This proposal would ensure that an indication entirely independent of the mode selector switch is provided.

In Airworthiness Review Notice Number 2 (Notice 75-10), a proposal was made to change all references from "Automatic Pilot systems" to "Automatic flight control systems", and this proposal has been worded to be consistent with that proposal. The proposal in Notice 75-10 would also redesignate § 25.1329 as § 25.1311. This proposal (for § 25.1329 (h)), if adopted, will be designated accordingly.

Ref. Proposal Nos. 687, 795; §§ 23.1329 (a) (1), 25.1329(h); Agenda Items C-20, C-22.

5-25. By amending § 25.1331 by striking the phrase "or adjacent to," in paragraph (a) (1); and by adding a new paragraph (a) (3) to read as follows:

## **§ 25.1331 Instruments using a power supply.**

(a) . . .

(3) If in instrument presenting navigation data receives information from sources external to that instrument and loss of that information would render the presented data unreliable, the instrument must incorporate a visual means to warn the crew, when such loss

of information occurs, that the presented data should not be relied upon.

**Explanation.** By deleting the alternative "adjacent to" location for instrument power failure indicators, this proposal would require that these indicators be integral with the instrument. An integral indicator provides a more reliable warning of instrument-power failure. The proposal for paragraph (a) (3) would ensure that the flight crew is warned when loss of information to an instrument presenting navigation data renders that data unreliable.

Ref. Proposal No. 796; § 25.1331(a) (c); Agenda Item B-15.

5-26. By striking the period at the end of § 25.1333 (a) and inserting a semicolon in place thereof, and by revising § 25.1333 (b) to read as follows:

## **§ 25.1333 Instrument systems.**

(b) The equipment, systems, and installations must be designed so that one display of the information essential to the safety of flight which is provided by the instruments, including attitude, direction, airspeed, and altitude will be immediately available to the pilots after any single failure or combination of failures that is not shown to be extremely improbable; and

**Explanation.** A major revision to § 25.1333 was made by Amendment 25-23, effective May 8, 1970 (35 FR 5665). The FAA still believes, as stated in Amendment 25-23, that instrument systems must be designed considering a combination of failures that are not shown to be extremely improbable and the necessity of providing information essential to the safety of flight to any pilot after these failures. However, the FAA believes that the requirement in present § 25.1333(b) of availability of this information without crewmember action is too restrictive. Some minimal crewmember action, such as allowing manual switching, would be a more reasonable alternative without degrading the level of safety. Therefore, it is proposed to delete the words "without additional crewmember action" and "remain", and to insert "will be immediately" available.

Ref. Proposal No. 303; § 25.1333 (a) and (b); Agenda Item B-14.

5-27. By adding a new § 25.1335 to read as follows:

## **§ 25.1335 Flight director systems.**

If a flight director system is installed, means independent of the mode selector switch must be provided to indicate to the flight crew its current mode of operation.

**Explanation.** Service experience has shown that safety is compromised when the flight crew is not informed as to the current mode of operation of the flight director system. Moreover, experience has also shown that the position of the mode selector switch is not a reliable means of providing that information. This proposal would ensure that an indi-

cation entirely independent of the mode selector switch is provided.

Ref. Proposal No. 141; § 25.1333; Agenda Item C-23.

5-28. By adding a new § 25.1351(c) that would be substantively identical to the proposed new § 23.1351(f) and by adding a new § 25.1351(d) to read as follows:

## **§ 25.1351 General.**

(d) Operation without normal electrical power. It must be shown by analysis, tests, or both, that the airplane can be operated safely in VFR conditions, for a period of not less than five minutes, with the normal electrical power inoperative, with critical type fuel (from the standpoint of flameout and restart capability), and with the airplane initially at the maximum certificated altitude. Parts of the electrical system may remain on if—

(1) A single malfunction, including a wire bundle or junction box fire, cannot result in loss of the part turned off and the part turned on;

(2) The parts turned on are electrically and mechanically isolated from the parts turned off; and

(3) The electrical wire and cable insulation, and other materials, of the parts turned on are self-extinguishing when tested in accordance with § 25.1359(d).

**Explanation.** The FAA has been applying for the past few years, as a special condition, a requirement that the airplane can be operated safely for a period of five minutes under VFR conditions without normal generator or battery power. Emergency power should be provided to those services which are necessary to complete the flight in safety. Such emergency power should be mechanically and electrically isolated from the normal system and be such that no single malfunction, including the cutting of a cable bundle or the loss of a junction box, will affect both the normal and emergency power.

Ref. Proposal No. 798; § 25.1351(c); Agenda Item D-24.

## **§ 25.1353 [Amended]**

5-29. By adding a new § 25.1353 (c) (1) (i) and (c) (6) that would be substantively identical to the proposed new § 23.1353 (b) (1) and (g).

## **§ 25.1401 [Amended]**

5-30. By amending § 25.1401 (b) and (f) in a manner substantively identical to that proposed for § 23.1401 (b) and (f), respectively.

5-31. By adding a new § 25.1421, following § 25.1419, to read as follows:

## **§ 25.1421 Megaphones.**

(a) If a megaphone is installed, the megaphone must be so protected that it will perform its function after being subjected to the ultimate inertia forces specified in § 25.561(b) (3).

(b) Each compartment used for megaphone stowage must be conspicuously marked—"MEGAPHONE".

**Explanation.** Although § 121.309(f) prescribes megaphones, there are no corresponding airworthiness standards covering their installation. This proposal would add airworthiness standards in part 25 dealing with the ability of the megaphone installation to withstand emergency landing loads, and with the marking of megaphone stowage compartments, thereby providing additional assurance that it is serviceable, and can be located, in an emergency.

Ref. Proposal No. 806; § 25.1421; Agenda Item J-58.

5-32. By amending § 25.1435 by striking the language in § 25.1435(a)(3) and in place thereof inserting the term "[Reserved]"; by revising § 25.1435(a)(2) and (a)(4)(ii), and by adding a new § 25.1435(a)(7) and (a)(8), to read as follows:

**§ 25.1435 Hydraulic systems.**

- (a) . . . . .
- (2) A system pressure gage and a fluid quantity gage, both located at a flight crewmember station, must be provided for each hydraulic system that—
  - (i) Performs a function that is essential for continued safe flight and landing; or
  - (ii) In the event of hydraulic system malfunction, requires corrective action by the crew to ensure continued safe flight and landing.

- (4) . . . . .
- (ii) Except as provided in paragraph (a)(7) of this section, will not exceed 125 percent of the design operating pressure, excluding pressure at the outlets specified in paragraph (a)(4)(i) of this section. Design operating pressure is the maximum steady operating pressure.

(7) Transient pressure in a part of the system may exceed the limit specified in paragraph (a)(4)(ii) of this section if—

- (i) A survey of those transient pressures is conducted to determine their magnitude and frequency; and

- (ii) Based on the survey, the fatigue strength of that part of the system is substantiated by analysis or tests, or both.

(8) Each hydraulic pump must be designed and installed so that loss of hydraulic fluid to the pump cannot create a hazard that might prevent continued safe flight and landing.

**Explanation.** The term "continuously operating system" in present § 25.1435(a)(2) and (a)(3) is not sufficiently definitive, nor is it clear whether the "means to indicate" system pressure and fluid quantity must necessarily be a gage. The proposal would identify those hydraulic systems for which a means to indicate system pressure and fluid quantity must be provided, and would require specifically that, for such systems, the means be a gage.

Present § 25.1435(a)(4)(ii) does not allow for transient pressures which, although taken into account in the design

of the hydraulic system, exceed the prescribed limit. The FAA believes, after further study of this issue in the light of recent service experience, that if the magnitude and frequency of such transient pressures in some part of the system were determined by survey, and the fatigue strength of this part of the system were substantiated on the basis of that survey, safety would not be adversely affected, nor would system performance be reduced significantly. The proposed revision to § 25.1435(a)(4)(ii) and proposed new § 25.1435(a)(7) would remove this restriction on design.

Service experience has shown that hydraulic fluid to hydraulic pumps may be lost, after which the pump continues to rotate, overheats, and disintegrates. Proposed § 25.1435(a)(8) would require that no hazard preventing continued safe flight and landing results after loss of such hydraulic fluid.

Ref. Proposal Nos. 319, 808, 809; §§ 25.1435(a), 25.1435(a)(4), 25.1435(d)(e)(f); Agenda Items F-39, F-41.

**§ 25.1438 [Amended]**

5-33. By adding a new § 25.1438 that would be substantially identical to proposed new § 23.1438.

5-34. By revising § 25.1447(c)(1) and (c)(2) to read as follows:

**§ 25.1447 Equipment standards for oxygen dispensing units.**

- (c) . . . . .
- (1) There must be an oxygen dispensing unit connected to oxygen supply terminals immediately available to each occupant, wherever seated. If certification for operation above 30,000 feet is requested, the dispensing units providing the required oxygen flow must be automatically presented to the occupants before the cabin pressure altitude exceeds 14,000 feet. Each occupant served by the automatic dispensing unit system must be provided with a manual means to make the dispensing unit immediately available in the event of failure of the automatic system. The total number of dispensing units and outlets must exceed the number of seats by at least 10 percent. The extra units must be as uniformly distributed throughout the cabin as practicable.

- (2) Each flight crewmember on flight deck duty must be provided with demand equipment. In addition, each flight crewmember must be provided with a quick-donning type of oxygen dispensing unit, connected to an oxygen supply terminal, that is immediately available to him when seated at his station, and that is designed and installed so that it—

- (i) Can be placed on the face from its ready position, properly secured, sealed, and supplying oxygen upon demand, with one hand within five seconds, and without disturbing eyeglasses or causing delay in proceeding with emergency duties; and

- (ii) Allows, while in place, the performance of normal communication functions.

**Explanation.** For an explanation of § 25.1447(c)(1) see the proposal for new § 23.1447(c) and (d).

Present § 25.1447(c)(2) requires that oxygen dispensing units be "immediately available" to each flight crewmember when seated at his station, but does not define that term. The proposal, which uses the language in present § 121.333(c)(2), would provide a basis for approving oxygen dispensing units that must be "immediately available" in the event of rapid depressurization.

Ref. Proposal Nos. 322, 704, 815; §§ 23.1447(c) and (d), 25.1447(c)(1), 25.1447(c)(2); Agenda Items H-47, H-49.

5-35. By adding a new § 25.1450 to read as follows:

**§ 25.1450 Chemical oxygen generators.**

- (a) For the purpose of this section, a chemical oxygen generator is defined as a device which produces oxygen by chemical reaction.

- (b) Each chemical oxygen generator must be designed and installed in accordance with the following requirements:

- (1) Surface temperature developed by the generator during operation may not create a hazard to the airplane or to its occupants.
- (2) Means must be provided to—
  - (i) Indicate positively that oxygen is flowing; and
  - (ii) Relieve any internal pressure that may be hazardous.

- (c) Each portable chemical oxygen generator that is capable of sustained operation by successive replacement of a generator element must be designed to meet the following requirements in addition to those in paragraph (b):

- (1) The generator must be placarded to show—
  - (i) The rate of oxygen flow, in liters per minute;

- (ii) The duration of oxygen flow, in minutes, for the replaceable generator element; and

- (iii) A warning that the replaceable generator element may be hot, unless the element construction is such that the surface temperature cannot exceed 100°F.

- (2) Means must be provided for safe replacement and stowage of used generator elements.

**Explanation.** Chemical oxygen generators have been in use for some time. This proposal would require that they be designed and installed in accordance with specified safety standards derived from service experience.

Ref. Proposal Nos. 705, 816; §§ 23.1450, 25.1450; Agenda Item H-50.

5-36. By revising § 25.1457(b), (d)(1), (e) and (g) to read as follows:

**§ 25.1457 Cockpit voice recorders.**

- (b) The recording requirements of paragraph (a)(2) of this section must be met by installing two directional microphones and, if necessary, an area microphone. The microphones must be located in the cockpit so that—

- (1) One directional microphone is directed toward the captain and the other toward the first officer;

- (2) The intelligibility of the recorded communications is as high as practicable under flight cockpit noise conditions.

- (d) Each cockpit voice recorder must be installed so that—

- (1) It receives its electric power from a bus that supplies emergency loads;

- (e) The record container must be located and mounted to minimize the probability of rupture of the container as a result of crash impact and consequent heat damage to the record from fire. If the record is on tape, the tape must be stored on a reel, or stored by any other method that is equivalent to storage on a reel with respect to providing protection against damage by crash impact or heat exposure. In meeting this requirement, the record container must be as far aft as practicable, but may not be where aft mounted engines may crush the container during impact. However, it need not be outside the pressurized compartment.

- (g) Each record container must—

- (1) Be either bright orange or bright yellow;
- (2) Have reflective tape affixed to its external surface to facilitate its location under water; and
- (3) Have an underwater locating device, when required by the operating rules of this chapter, on or adjacent to the container which is secured in such a manner that they are not likely to be separated during crash impact.

**Explanation.** The proposal for § 25.1457(a)(4) is intended to promote the availability of information from the flight recorder. The present requirement includes checking the recorder from proper tape movement which is not a sufficient indication that the recorder is capable of actually recording. Information available to the FAA indicates that there are presently devices available which can check this capability.

The proposal for § 25.1459(d) would make the applicable flight recorder requirements consistent with those proposed for cockpit voice recorders. However, the only additional requirement proposed for this section is the provision for reflective tape.

Ref. Proposal Nos. 325, 534, 818; §§ 25.1457, 25.1459(a)(4), 121.343; Agenda Items I-52, I-53, I-55.

5-38. By adding a new § 25.1461, following § 25.1459, to read as follows:

**§ 25.1461 Equipment containing high energy rotors.**

- (a) Equipment containing high energy rotors must meet paragraph (b), (c), or (d) of this section.

- (b) High energy rotors contained in equipment must be able to withstand damage caused by malfunctions, vibration, abnormal speeds, and abnormal temperatures. In addition—

- (1) Auxiliary rotor cases must be able to contain damage caused by the failure of high energy rotor blades; and

- (2) Equipment control devices, systems, and instrumentation must reasonably ensure that no operating limitations affecting the integrity of high energy rotors will be exceeded in service.

The proposed revision to § 25.1457(e) would require, if the voice record is on tape, that the tape be stored on a reel, or by an equivalent method with respect

to protection against damage by crash impact or heat exposure. Information has been lost from tapes stored in random fashion due to crushing and folding of the tape when exposed to high deceleration forces.

For explanation of paragraph (g), see the proposal for § 121.359.

Ref. Proposal Nos. 324, 325, 817; § 25.1457; Agenda Items I-54, I-55, I-56, 5-37. By amending § 25.1459 by deleting paragraph (a)(7); and by revising § 25.1459(a)(4) and (d) to read as follows:

**§ 25.1459 Flight recorders.**

- (a) Each flight recorder required by the operating rules of this chapter must be installed so that—

- (4) There is a means for preflight checking of the recorder for proper operation.

- (d) Each record container must—

- (1) Be either bright orange or bright yellow;
- (2) Have reflective tape affixed to its external surface to facilitate its location under water; and
- (3) Have an underwater locating device, when required by the operating rules of this chapter, on or adjacent to the container which is secured in such a manner that they are not likely to be separated during crash impact.

**Explanation.** The proposal for § 25.1459(a)(4) is intended to promote the availability of information from the flight recorder. The present requirement includes checking the recorder from proper tape movement which is not a sufficient indication that the recorder is capable of actually recording. Information available to the FAA indicates that there are presently devices available which can check this capability.

The proposal for § 25.1459(d) would make the applicable flight recorder requirements consistent with those proposed for cockpit voice recorders. However, the only additional requirement proposed for this section is the provision for reflective tape.

Ref. Proposal Nos. 325, 534, 818; §§ 25.1457, 25.1459(a)(4), 121.343; Agenda Items I-52, I-53, I-55.

5-38. By adding a new § 25.1461, following § 25.1459, to read as follows:

**§ 25.1461 Equipment containing high energy rotors.**

- (a) Equipment containing high energy rotors must meet paragraph (b), (c), or (d) of this section.

- (b) High energy rotors contained in equipment must be able to withstand damage caused by malfunctions, vibration, abnormal speeds, and abnormal temperatures. In addition—

- (1) Auxiliary rotor cases must be able to contain damage caused by the failure of high energy rotor blades; and

- (2) Equipment control devices, systems, and instrumentation must reasonably ensure that no operating limitations affecting the integrity of high energy rotors will be exceeded in service.

(c) It must be shown by test that equipment containing high energy rotors can contain any failure of a high energy rotor that occurs at the highest speed obtainable with the normal speed control devices inoperative.

(d) Equipment containing high energy rotors must be located where rotor failure will neither endanger the occupants nor adversely affect continued safe flight.

**Explanation.** This proposal would add requirements for protection against the failure of equipment containing high energy rotors, such as turbine engine starters, air cycle machines, and certain cooling fans. Experience has shown that failures which release the energy stored in these rotors may result in engine or structural damage, fires, or injury to occupants. The language in this proposal is identical to §§ 27.1461 and 29.1461.

Ref. Proposal Nos. 771, 810, 701; §§ 25.1167, 25.1436, 23.1436; Agenda Item J-67.

**PART 27—AIRWORTHINESS STANDARDS: NORMAL CATEGORY ROTORCRAFT**

5-39. By revising § 27.1301 to read as follows:

**§ 27.1301 Function and installation.**

- (a) Each item of installed equipment must—

- (1) Be of a kind and design appropriate to its intended function;

- (2) Be permanently and legibly marked or, if the item is too small to mark, tagged as to its identification, function, and operating limitations;

- (3) Be installed according to limitations specified for that equipment; and

- (4) Function properly when installed.
- (b) No item of installed equipment may under any circumstance prevent the proper operation of any required system provided to the flight crew for controlling, navigating, or monitoring performance of the rotorcraft.

**Explanation.** See the proposal for § 23.1301.

Ref. Proposal No. 862; § 27.1301; Agenda Item A-1.

**§ 27.1309 [Amended]**

5-40. By changing the term in § 27.1309(a) from "subchapter" to "chapter".

**Explanation.** See the proposal for § 25.1309(a).

Ref. Proposal No. 789; § 25.1309(a); Agenda Item A-2.

5-41. By adding a new § 27.1311 to read as follows:

**§ 27.1311 Automatic flight control system.**

- (a) Each automatic flight control system must be designed so that it can—

- (1) Be quickly and positively disengaged by the pilots without moving their hands from the normal position on the cyclic control; and

- (2) Be sufficiently overpowered by one pilot within the limits specified in § 27.397 to let him control the rotorcraft.

- (b) Unless there is automatic synchronization, each system must have a means to readily indicate to the pilot the align-

ment of the actuating device in relation to the control system it operates:

(c) Each manually operated control for the system's operation must be readily accessible to the pilots.

(d) The system must be designed and adjusted so that, within the range of adjustment available to the pilot, it cannot produce hazardous loads on the rotorcraft, or create hazardous deviations in the flight path, under any flight condition appropriate to its use, either during normal operation or in the event of a malfunction, assuming that corrective action begins within a reasonable period of time.

(e) Means independent of the mode selector switch must be provided to indicate to the flight crew the current mode of operation and the availability status of each alternate system.

*Explanation.* This proposal would provide standards applicable to automatic flight control systems in Part 27.

A proposal was made in Airworthiness Review Notice Number 2 (Notice 75-10) to add a new § 27.1329 dealing with automatic pilot systems, and to amend § 27.1329(a)(1) in a manner identical to that proposed for § 27.1329(a)(1). These proposals were not included in the agenda for the first Airworthiness Review Conference. At the Conference, however, proposals concerning § 23.1329 were discussed, and have been included in this notice as proposals for § 23.1311 (presently § 23.1329). Pursuant to FAA's belief that the airworthiness standards should be consistent, to the extent practicable, throughout the aircraft certification parts (Part 23, 25, 27 and 29), new proposals for §§ 27.1311 and 29.1311 are being made. The proposals contained in Notice Number 2 for §§ 27.1329 and 29.1329 will be withdrawn at the time of final rulemaking action if the proposals for §§ 27.1311 and 29.1311 are adopted, but all comments received in response to proposed §§ 27.1329 and 29.1329 will be considered for §§ 27.1311 and 29.1311.

The new proposals for §§ 27.1311 and 29.1311 are similar to the previous proposals (in Notice Number 2) for §§ 27.1329 and 29.1329(a)(1) except for the following: (1) Change in terminology from "automatic pilot system" to "automatic flight control system". (2) The change of the word "or" at the end of paragraph (a)(1) to "and". (3) The redesignation already noted. (4) The addition of paragraph (e). The change in terminology and the redesignation were proposed in Notice Number 2 for § 25.1329. The change from the requirement that either paragraph (a)(1) or (a)(2) be complied with to a requirement that both be complied with is discussed in the proposal for § 23.1329. For an explanation of paragraph (e) see the proposal for § 25.1329(h).

A proposal is also being made for Parts 23, 25 and 29.

*Ref.* Proposal Nos. 687, 795, 868, 1315; §§ 23.1329(a)(1), 25.1329(h), 25.1329, 27.1329; Agenda Items C-20, C-22.

#### § 27.1321 [Amended]

5-42. By amending § 27.1321 in a manner substantively identical to that proposed for § 23.1321.

5-43. By amending § 27.1323 by redesignating paragraph (b) as paragraph (c); by revising paragraph (a) and redesignating it as paragraph (b), and by adding a new paragraph (a) to read as follows:

#### § 27.1323 Airspeed indicating system.

(a) Each airspeed indicating instrument must be calibrated to indicate true airspeed (at sea level with a standard atmosphere) with minimum practicable instrument calibration error when the corresponding pitot and static pressures are applied.

(b) The airspeed indicating system must be calibrated in flight at forward speeds of 20 knots and over.

*Explanation.* The proposed addition of paragraph (a) would require that the airspeed instrument be calibrated according to the standard relationship between pressure and airspeed. A similar proposal is also made for Part 23, and is the same as the present Part 29 requirement.

Information available to the FAA indicates that the present 10-knot low speed calibration requirement (present paragraph (a) which is redesignated as paragraph (b)) is not achievable without extreme difficulty. The FAA believes that 20 knots would be a more realistic lowest-speed criterion.

*Ref.* Proposal Nos. 114, 129, 365; §§ 23.1323(a), 27.1323(a); Agenda Items B-9, B-10.

5-44. By amending § 27.1325 by revising the section heading; by designating the present paragraph as paragraph (a); and by adding a new paragraph (b), to read as follows:

#### § 27.1325 Static pressure system.

(b) Each static pressure port must be designed and located in such manner that the correlation between air pressure in the static pressure system and true ambient atmospheric static pressure is not altered when the rotorcraft encounters icing conditions. An anti-icing means or an alternate source of static pressure may be used in showing compliance with this requirement.

*Explanation.* This proposal would provide the same level of safety, insofar as inadvertent icing of the static pressure port is concerned, as is currently provided for Part 23 airplanes. Part 27 rotorcraft now have increased performance, and operate over a wide range of environments, thereby increasing the exposure to icing.

*Ref.* Proposal No. 866; § 27.1325(b); Agenda Item B-11.

#### § 27.1327 [Amended]

5-45. By amending § 27.1327(b) and (c) in a manner substantively identical to that proposed for § 23.1327 (b) and (c).

#### § 27.1335 [New]

5-46. By adding a new § 27.1335 that would be substantively identical to the proposed new § 25.1335.

#### § 27.1351 [Amended]

5-47. By adding a new § 27.1351(e) that would be substantively identical to the proposed new § 23.1351(f).

#### § 27.1353 [Amended]

5-48. By amending § 27.1353 in a manner substantively identical to that proposed for § 23.1353.

#### § 27.1357 [Amended]

5-49. By amending § 27.1357(b) in a manner substantively identical to that proposed for § 23.1357(b).

5-50. By amending § 27.1401 by striking "30" in both places in paragraph (b) and inserting in place thereof (in both places) the number "75"; and by revising § 27.1401 (d) and (f) to read as follows:

#### § 27.1401 Anticollision light system.

(d) *Color.* Each anticollision light must be aviation red and must meet the applicable requirements of § 27.1397.

(f) *Minimum effective intensities for anticollision light.* Each anticollision light effective intensity must equal or exceed the applicable values in the following table:

Angle above or below the horizontal plane:	Effective intensity (candles)
0° to 5°	150
5° to 10°	90
10° to 20°	30
20° to 30°	15
30° to 75°	10

*Explanation.* See the proposal for § 23.1401 (b) and (f) for an explanation of § 27.1401(b). A 10-candle minimum effective intensity in the 30° to 75° region is proposed for rotorcraft consistent with the general reduction of intensities proposed for §§ 27.1401(f) and 29.1401 (f). Service experience and experimentation by the military services has indicated that the intensities specified in present § 27.1401 for rotorcraft anticollision lights are excessive because of objectionable multiple reflections in the cockpit, and that while anticollision lights are particularly objectionable (even at reduced intensity) in rotorcraft because of reflections and stroboscopic effects associated with having rotor blades in the flight crew's field of view. It is therefore proposed to reduce the present intensities to an acceptable level, and to limit the color to aviation red.

*Ref.* Proposal Nos. 368, 874, 408, 957, 873, 958, 407, 367; §§ 27.1401(b), 29.1401 (b), 27.1401(f), 29.1401(f); Agenda Items E-36, E-37.

5-51. By revising § 27.1545(a) to read as follows:

#### § 27.1545 Airspeed indicator.

(a) Each airspeed indicator must be marked as specified in paragraph (b) of

this section, with the marks located at the corresponding indicated airspeeds.

*Explanation.* This proposal is made to clarify the marking requirement for airspeed indicators in § 27.1545. See the proposal for § 23.1545(a).

*Ref.* Proposal No. 129; § 23.1545(a); Agenda Item B-9.

#### § 27.1547 [Amended]

5-52. By adding a new § 27.1547(e) that would be substantively identical to the proposed new § 23.1547(e).

### PART 29—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY ROTORCRAFT

5-53. By revising § 29.1301 to read as follows:

#### § 29.1301 Function and installation.

(a) Each item of installed equipment must—

(1) Be of a kind and design appropriate to its intended function;

(2) Be permanently and legibly marked or, if the item is too small to mark, tagged as to its identification, function, and operating limitations.

(3) Be installed according to limitations specified for that equipment; and

(4) Function properly when installed.

(b) No item of installed equipment may in any circumstance prevent the proper operation of any required system or of any other system provided to the flight crew for controlling, navigating, or monitoring performance of the rotorcraft.

*Explanation.* See the proposal for § 23.1301.

*Ref.* Proposal No. 944; § 29.1301; Agenda Item A-1.

5-54. By revising § 29.1303(g) to read as follows:

#### § 29.1303 Flight and navigation instruments.

The following are required flight and navigational instruments:

(g) A gyroscopic rate-of-turn indicator combined with an integral slip-skid indicator (turn-and-slip indicator) except that only a slip-skid indicator is required on rotorcraft with a third attitude instrument system that—

(1) Is useable through flight attitudes of  $\pm 80^\circ$  of pitch and  $\pm 120^\circ$  of roll;

(2) Is powered from a source independent of the electrical generating system;

(3) Continues reliable operation for a minimum of 30 minutes after total failure of the electrical generating system;

(4) Operates independently of any other attitude indicating system;

(5) Is operative without selection after total failure of the electrical generating system;

(6) Is located on the instrument panel in a position acceptable to the Administrator that will make it plainly visible to and useable by any pilot at his station; and

(7) Is appropriately lighted during all phases of operation.

*Explanation.* Present Part 25 does not require a gyroscopic rate-of-turn indicator when the airplane is fitted with a third attitude instrument system meeting certain conditions. The same exception is equally applicable to transport category rotorcraft.

*Ref.* Proposal No. 946; § 29.1303(g); Agenda Item B-16.

5-55. By amending § 29.1309 by changing the term in § 29.1309(a) and (d) from "subchapter" to "chapter"; by deleting the word "four" in § 29.1309(e) and inserting the word "three" in place thereof; and by revising § 29.1309(d)(3)(i) and (ii) to read as follows:

#### § 29.1309 Equipment, systems, and installations.

(d) . . .

(3) . . .

(i) Any one engine, on rotorcraft with two engines; and

(ii) Any two engines, on rotorcraft with three or more engines.

*Explanation.* See the proposal for § 25.1309.

*Ref.* Proposal No. 299, 789; § 25.1309(e), 25.1309(a); Agenda Items A-2, A-6.

#### § 29.1321 [Amended]

5-56. By amending § 29.1321 in a manner substantively identical to that proposed for § 23.1321.

5-57. By amending § 29.1325 by revising the section heading; by redesignating paragraphs (e), (d), and (e) as paragraphs (d), (e), and (f), respectively; and by adding a new paragraph (c), to read as follows:

#### § 29.1325 Static pressure and pressure altimeter systems.

(c) Each static pressure port must be designed and located in such manner that the correlation between air pressure in the static pressure system and true ambient atmospheric static pressure is not changed when the rotorcraft is exposed to the continuous and intermittent maximum icing conditions defined in Appendix C of Part 25.

*Explanation.* This proposal would provide the same level of safety, insofar as inadvertent icing of the static pressure port is concerned, as is provided for Part 25 airplanes. Part 29 rotorcraft now have increased performance, and operate over a wider range of environments, thereby increasing the exposure to icing.

*Ref.* Proposal No. 952; § 29.1325; Agenda Item B-11.

5-58. By redesignating § 29.1329 as § 29.1311; and by revising the heading and paragraph (a), and by adding a new paragraph (e), to read as follows:

#### § 29.1311 Automatic flight control systems.

(a) Each automatic flight control system must be designed so that it can—

(1) Be quickly and positively disengaged by the pilots without moving their hands from the normal position on the cyclic control; and

(2) Be sufficiently overpowered by one pilot within the limits specified in § 29.397 to let him control the rotorcraft.

(e) Means independent of the mode selector switch must be provided to indicate to the flight crew the current mode of operation and the availability status of each alternate system.

*Explanation.* See the proposal for § 27.1311.

*Ref.* Proposal Nos. 687, 795, 868, 1315; §§ 23.1329(a)(1), 25.1329(h), 25.1329, 27.1329; Agenda Items C-20, C-22.

#### § 29.1335 [New]

5-59. By adding a new § 29.1335 that would be substantively identical to the proposed new § 25.1335.

5-60. By adding a new § 29.1351(d) that would be substantively identical to the proposed new § 23.1351(f); and by adding a new § 29.1351(c) to read as follows:

#### § 29.1351 General.

(c) *Operation without normal electrical power.* It must be shown by analysis, tests, or both, that the rotorcraft can be operated safely in VFR conditions, for a period of not less than five minutes, with the normal electrical power inoperative, with critical type fuel (from the standpoint of flameout and restart capability), and with the rotorcraft initially at the maximum certificated altitude. Parts of the electrical system may remain on if—

(1) A single malfunction, including a wire bundle or junction box fire, cannot result in loss of the part turned on and the part turned off;

(2) The parts turned on are electrically and mechanically isolated from the parts turned off; and

(3) The electrical wire and cable insulation, and other materials, of the parts turned on are self-extinguishing when tested in accordance with § 25.1359 (d) in effect on (date on which this proposal would become effective).

*Explanation.* The substance of the proposed paragraph (c) has been applied as a special condition to Part 25 airplanes for the past few years. It is equally applicable to Part 29 rotorcraft. See the proposal for § 25.1351.

*Ref.* Proposal No. 954; § 29.1352; Agenda Item D-24.

#### § 29.1353 [Amended]

5-61. By amending § 29.1353 in a manner substantively identical to that proposed for § 23.1353.

5-62. By revising § 29.1355(b)(1) to read as follows:

**§ 29.1355 Distribution system.**

(b) Each system must be designed so that—

(1) For category A rotorcraft, essential load circuits can be supplied in the event of reasonably probable faults or open circuits; and

*Explanation.* The reference to "individual distribution systems" in the present rule is superfluous. The lead-in specifies "each system", and § 29.1355(a) defines the components of each distribution system. It is proposed to clarify the present requirement by deleting the words "Individual distribution systems ensure that".

*Ref.* Proposal No. 405; § 29.1355; Agenda Item D-28.

**§ 29.1401 [Amended]**

5-63. By amending § 29.1401 in a manner substantively identical to that proposed for § 27.1401.

**§ 29.1457 [Amended]**

5-64. By amending § 29.1457 (b), (d) (1), and (e) in a manner substantively identical to that proposed for § 25.1457 (b), (d) (1), and (e).

**§ 29.1545 [Amended]**

5-65. By amending § 29.1545(a) in a manner substantively identical to that proposed for § 23.1545(a).

**PART 91—GENERAL OPERATING AND FLIGHT RULES**

5-66. By revising § 91.33(d) (3) to read as follows:

**§ 91.33 Powered civil aircraft with standard category U.S. airworthiness certificates; instrument and equipment requirements.**

(d) *Instrument flight rules.* For IFR flight the following instruments and equipment are required:

(3) Gyroscopic rate-of-turn indicator, except on the following aircraft:

(i) Large airplanes with a third attitude instrument system useable through flight attitudes of 360° of pitch and roll and installed in accordance with § 121.305(j) of this chapter; and

(ii) Rotorcraft, type certificated under Part 29 of this chapter, with a third attitude instrument useable through flight attitudes of ±80° of pitch and ±120° of roll and installed in accordance with § 29.1303(g) of this chapter.

*Explanation.* In view of the proposed revision of § 29.1303(g), which would allow, under certain conditions, the substitution of a third attitude gyro for the required gyroscopic rate-of-turn indicator, it is proposed to adjust § 91.33(d) (3).

*Ref.* Proposal No. 946; § 29.1303(g); Agenda Item B-16.

5-67. By amending § 91.36 by striking the word "or" at the end of paragraph (a); by striking the period at the end of

paragraph (b) and inserting in place thereof a semicolon followed by the word "or"; and by adding a new paragraph (c) to read as follows:

**§ 91.36 Data correspondence between automatically reported pressure altitude data and the pilot's altitude reference.**

(c) After (a date one year after the effective date of this amendment), unless the altimeters and digitizers in that equipment meet the performance standards in TSO-C10b and TSO-C88, respectively.

*Explanation.* This proposal, by specifying that altimeters and digitizers (those associated with automatic pressure altitude reporting equipment) meet existing Technical Standard Order performance standards, would prevent the introduction of equipment with unacceptable performance on operational aircraft. Substandard equipment could seriously degrade the Air Traffic Control System's altitude reporting capability.

*Ref.* Proposal No. 1012; § 91.36; Agenda Item B-19.

**PART 121—CERTIFICATION AND OPERATION: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT**

5-68. By amending § 121.337 by striking the last sentence of paragraph (a) including the parenthetical and inserting in place thereof two sentences to read as follows:

**§ 121.337 Protective breathing equipment for the flight crew.**

(a) . . . There must be at least a 300-liter, normal temperature and pressure (70° F and 760 mm. Hg respectively) dry, supply of oxygen for each required flight crewmember on flight deck duty. After (date one year after the effective date of this amendment) the equipment provided must be fitted to each flight crewmember to provide the protection specified in this paragraph.

*Explanation.* The proposal would require, after one year after the effective date of this amendment, that protective breathing equipment be fitted to each crewmember for whom it must be provided under § 121.337(a), to ensure that the equipment affords the specified protection. Without such fitting, entry of harmful gases can occur, as experience has shown.

It is also proposed to specify the presently required supply of oxygen at normal rather than standard temperature and pressure, to be consistent with the requirement in present § 25.1439(b) (5).

*Ref.* Proposal No. 1093, 532; § 121.337 (a); Agenda Item H-51.

5-69. By revising § 121.343(a) to read as follows:

**§ 121.343 Flight recorders.**

(a) No person may operate a large airplane that is certificated for operations above 25,000 feet altitude or is turbine engine powered, unless it is equipped with one or more approved flight recorders

that record data from which the following information may be determined and, if set forth in Appendix B of this part, within the ranges, accuracies, and recording intervals specified in Appendix B of this part:

(1) Time, altitude, airspeed, vertical acceleration, heading, and the information specified in paragraphs (a) (2) and (a) (3) of this section, as applicable.

(2) Except as provided in paragraph (a) (3) of this section, for airplanes having an original type certificate issued after September 30, 1969, pitch attitude, roll attitude, side slip angle or lateral acceleration, pitch trim position, control column or pitch control surface position, control wheel or lateral control surface position, rudder pedal or yaw control surface position, thrust of each engine, position of each thrust reverser, trailing edge flap or cockpit flap control position, and leading edge flap or cockpit flap control position.

(3) After (date one year after the effective date of this proposed amendment), for airplanes having an original airworthiness certificate issued on or after (date one year after the effective date of this proposed amendment) and for airplanes having an original type certificate issued after September 30, 1969, (regardless of the date of the original airworthiness certificate), pitch attitude, roll attitude, side slip angle or lateral acceleration, pitch trim position, control column and pitch control surface position, control wheel and lateral control surface position, rudder pedal and yaw control surface position, thrust of each engine, position of each thrust reverser, trailing edge flap or cockpit flap control position, leading edge flap or cockpit flap control position, Greenwich mean time, automatic flight control system selected mode and engagement status, spoiler and speedbrake position, selected flight director mode, localizer and glide-slope deviation, hydraulic system status, electrical bus status, activation of each fire warning system, activation of the pressurization system cockpit warning, vertical acceleration recorded at 0.25 second intervals, longitudinal acceleration, outside ambient or total air temperature, position of the strut extension-retraction switch, indication of outer, middle, and inner marker passage, and radio altitude.

*Explanation.* The present flight recorder requirements are restated in paragraph (a) (1) and (a) (2) except for minor revisions to account for the new requirement in paragraph (a) (3). Proposed paragraph (a) (3) would add several new parameters. Also, some changes would be made to items now set forth in paragraph (a) (2). The new parameters begin with "Greenwich mean time" and go to the end of the sentence in the proposed paragraph (a) (3). The changes to items now set forth include replacing the "or's" after "control column", "control wheel", and "rudder pedal" with "and's".

Flight recorders capable of recording the additional parameters would be required (after a date one year after the effective date of the proposed amendment) on airplanes having an original airworthiness certificate issued after that date and on airplanes having an original type certificate issued after September 30, 1969, regardless of the date of the original airworthiness certificate. Proposed paragraph (a) (1) and (a) (2) would allow airplanes to operate under present flight recorder rules until the new parameters are required.

The National Transportation Safety Board has found that, because of factors such as the increased sophistication of airplane design, ground-based navigation equipment and approach guidance information is sometimes inadequate for the determination of the cause of airplane accidents. Although there may be a need to specify ranges, accuracies, and recording intervals, for certain of the additional parameters, none are proposed at this time. However, the FAA plans to undertake separate rulemaking to incorporate such standards under the Technical Standard Order systems.

*Ref.* Proposal No. 535; § 121.343; Agenda Item I-52.

5-70. By revising § 121.359(c) to read as follows:

**§ 121.359 Cockpit voice recorder.**

(c) The cockpit voice recorder required by this section must meet the following application standards:

(1) Except as provided in paragraphs (c) (3) and (c) (4) of this section, the requirements of Part 25 of this chapter in effect on (date one day before the effective date of this amendment).

(2) After (date one year after the effective date of this amendment), each recorder container must—

(i) Be either bright orange or bright yellow;

(ii) Have reflective tape affixed to the external surface to facilitate its location under water; and

(iii) Have an approved underwater locating device on or adjacent to the container which is secured in such a manner that they are not likely to be separated during crash impact.

(3) After (date two years after the effective date of this amendment), each cockpit voice recorder installation must comply with § 25.1457 (b) and (d) in effect on (the effective date of this amendment).

(4) After (date five years after the effective date of this amendment) each cockpit voice recorder installation must comply with § 25.1457(e) in effect on (the effective date of this amendment).

*Explanation.* Present § 121.359(c) requires that voice recorders be installed in accordance with the requirements of Part 25 of this chapter. It is also proposed to require that each cockpit voice recorder container have reflective tape

affixed, and an underwater locating device, one year after the effective date of the amendment. The requirement that the record container be either bright orange or bright yellow is in the present rule and is restated in the proposed rule to have all the container requirements together.

Experience has shown that underwater locating devices greatly facilitate underwater recovery of the record containers, which contain important accident investigation data. Reflective tape enables pinpoint location of the record container after its general location by the underwater locating device. The amendment would not become applicable for Part 121 operators until one year after the effective date of this proposed amendment to allow time for procurement and installation.

For an explanation of § 121.359 (c) (3) and (c) (4), see the proposals for § 25.1457. This proposal would require cockpit voice recorder installations on airplanes operated under Part 121 to meet proposed § 25.1457 (b) and (d) (1) within two years, and proposed § 25.1457(e) within five years.

*Ref.* Proposal Nos. 325, 324, 537, 817; §§ 25.1457, 121.359; Agenda Items I-55, I-54, I-56.

**PART 127—CERTIFICATION AND OPERATIONS OF SCHEDULED AIR CARRIERS WITH HELICOPTERS**

5-71. By revising § 127.127(b) to read as follows:

**§ 127.127 Cockpit voice recorders.**

(b) Except as provided in paragraphs (b) (1) and (b) (2) of this section, each cockpit voice recorder must be installed in accordance with the requirements of Part 29 of this chapter in effect on (date one day before the effective date of this amendment).

**APPENDIX I COMMITTEE V (SYSTEMS) PROPOSALS DEFERRED**

Based upon the discussions at the Airworthiness Review Conference, the FAA has determined that the proposals listed below appear to have sufficient merit to warrant further consideration but for various reasons should be deferred for consideration at the next Airworthiness Review or Operations Review as appropriate. Included in the reasons for deferral are the following:

1. The proposal is so complex or extensive that more time is required than is available within the 1974-75 Airworthiness Review to give it full consideration.

2. There is insufficient data presently available on which to base a decision on the outcome of the proposal.

3. The proposal would be more appropriately considered during an operations review.

The deferral of these proposals does not foreclose the FAA from taking separate rule-making action on the deferred proposals if a need for such action should arise.

end of the Airworthiness Review Conference. The proponents or other interested persons may submit similar proposals in the future. The withdrawal of FAA proposals does not commit the FAA to any future course of action.

## PROPOSED RULES

## APPENDIX III COMMITTEE V (SYSTEMS) PROPOSALS REMOVED FROM CONSIDERATION

Based on the FAA's review of the discussion at the Airworthiness Review Conference and of the information submitted by interested persons, the following proposals considered by Committee V at the Airworthiness Review Conference are removed from consideration during the First Biennial Airworthiness Review for the reasons listed below:

14 CFR (FAR section)	Proposal No.	Agenda Item	Proponent
14.23	57	A-4	National Transportation Safety Board.
23.1357	120	D-33	Department of Transportation—Australia.

25.1435	318	E-40	Aerospace Industries Association.
25.1435	323	H-48	Do.
27.1401	304	E-35	Air Line Pilots Association.
27.1401	406	E-35	Do.
29.133	488	H-18	Department of Transportation—Australia.
29.133	492	E-35	Air Line Pilots Association.
91.32	499	J-62	General Motors Corp.
121.315	527	J-63	Aerospace Industries Association.
121.315	528	J-64	Do.

**Proposal No. 57**—The proponent requested that Parts 23 and 25 be amended to require that safety analyses be completed in a manner similar to that required by "Military Standard 882, System Safety Program for Systems and Associated Subsystems and Equipment: Requirements for." The FAA believes that adoption of the proposed rule is inappropriate because—

1. Other adequate methods of safety assessment and fault analysis exist;
2. The proposed requirement would severely limit and would tend to dictate design procedures; and
3. The experience to date with § 25.1309 does not justify the regulation change.

**Proposal No. 120**—The proponent, citing instances of non-compliance with § 23.1357 (c), requested that the rule be clarified. The FAA believes that the current rule is sufficiently definitive. The FAA has initiated an investigation to determine if alleged non-compliance exists, and if it does, appropriate action will be taken.

**Proposal No. 122**—The proposal would "establish a means by which parts or components produced to a higher standard can be installed without the need to recertify the whole aircraft." The FAA believes that the regulations now provide appropriate methods for the approval of aircraft parts or components produced to an equivalent or higher standard. The procedures for such approval must include an adequate balance of all interests, and the FAA does not believe that this procedure should be amended without further justification. A procedure for each type of system set forth in the regulations, as proposed, would yield an unmanageable regulatory system.

**Proposal No. 123**—This proposal would require that xenon strobe lights be installed

at specific locations on each aircraft. Xenon lights are already permitted by regulation. To require that only this type be used would be too restrictive since other types of satisfactory lights exist.

**Proposal No. 252**—The proponent suggested that § 25.831 be amended to provide for relaxed ventilation control requirement for small airplanes. The purpose of the proposal is covered by the proposed amendment to § 25.831, 46 FR 10810 (Notice 75-10).

**Proposal No. 253**—The proposal would allow the use of a 10,000-foot cabin pressure altitude for all-cargo airplanes. The FAA believes that exposure of the crew to a cabin pressure altitude of 10,000 feet (as opposed to the currently prescribed 8,000 feet) would lead to a significant degradation of crew performance and efficiency.

**Proposal No. 140**—See the comments for Proposal No. 57.

**Proposal No. 301**—This proposal would increase the airplane velocity limit for autopilot malfunction to that specified in § 25.253(a)(2). Those speeds, however, assume manual flying within control force limits without a failed autopilot. The FAA believes that the human pilot, working against adverse control forces being applied by a malfunctioning autopilot, needs an increment of safety achievable by specifying, during type certification, a finite limit on the authority of the autopilot. That limit should be the lowest practicable and the FAA believes that the value set forth (as an acceptable means of compliance) in AC 25.1329-1A is satisfactory for this purpose.

**Proposal No. 167**—The proposal would have amended § 25.1351(b) to allow a momentary loss of power to essential circuits due to switching, fault clearing, or other causes. The FAA has determined that insufficient

justification was presented to justify the possible degradation in safety which could result from adoption of the proposal.

**Proposal No. 305**—The proposal would amend § 25.1351(b) to provide for power sources which cannot be disconnected. The FAA has determined that utilization of power source without a disconnect capability is an inappropriate change at the present time and that insufficient justification has been provided to warrant the possible degradation in flight safety.

**Proposal No. 306**—This proposal would eliminate the reference to voltage and current in § 25.1351(b)(6). Those references are examples and not requirements. The present rule provides adequate flexibility.

**Proposal No. 312**—See the comments for Proposal No. 123.

**Proposal No. 318**—This proposal would allow an alternative design criterion for hydraulic fluid quantity indicators by allowing a low quantity warning light to satisfy the present requirement. With respect to § 25.1435(a)(3), the FAA believes that warning lights alone do not provide an adequate indication of the quantity of fluid in each continually operating system.

**Proposal No. 323**—The proponent requested the elimination of the present requirement that portable oxygen equipment be immediately available to flight attendants. The FAA has determined that adoption of the proposal would result in an unjustified degradation in the level of safety currently provided by regulation.

**Proposal No. 366**—See the comments for Proposal No. 123.

**Proposal No. 406**—See the comments for Proposal No. 123.

**Proposal No. 488**—The proponent assumed that requiring "approved" altimeters as proposed would assure that all altimeters meet the altimeter TSO. This is not the case since under § 21.305 there are other methods by which an altimeter may be approved. Those methods have proven adequate in the past and a change that would eliminate them has not been justified.

**Proposal No. 492**—See comments for Proposal No. 123.

**Proposal No. 499**—This proposal would permit certain aircraft operation with an inoperative ELT. Such a change is inconsistent with the Public Law and beyond the scope of the Airworthiness Review Program.

**Proposal No. 527**—This proposal covers provisions included in Notice 75-14 [40 FR 11736], March 13, 1975.

**Proposal No. 528**—This proposal covers provisions included in Notice 75-14 [40 FR 11736], March 13, 1975.

Issued in Washington, D.C., on May 19, 1975.

J. A. FERRARESE,  
Acting Director,  
Flight Standards Service.

## PART IV

## SPECIAL ACTION OFFICE FOR DRUG ABUSE PREVENTION

## DRUG TREATMENT SERVICES AND CENTRAL INTAKE UNITS

Federal Funding Criteria

Title 21—Food and Drugs  
CHAPTER III—SPECIAL ACTION OFFICE  
FOR DRUG ABUSE PREVENTION

PART 1402—FEDERAL FUNDING CRITERIA FOR DRUG TREATMENT SERVICES  
PART 1403—FEDERAL FUNDING CRITERIA FOR DRUG TREATMENT CENTRAL INTAKE UNITS

General Statement

In the FEDERAL REGISTER of December 23, 1974 (Volume 39, No. 247, pp. 44,384-44,387), two new parts were proposed to be added to Title 21 of the Code of Federal Regulations, Part 1402 entitled "Federal Funding Criteria for Drug Treatment Services" and Part 1403 entitled "Federal Funding Criteria for Drug Treatment Central Intake Units." These parts were published as a proposed rulemaking under sections 210, 221, and 222 of the Drug Abuse Office and Treatment Act of 1972, Pub. L. 92-255 (21 U.S.C. 1120, 1131, and 1132).

To provide information necessary to aid the Director of the Special Action Office for Drug Abuse Prevention in determining whether Parts 1402 and 1403 should be issued, interested persons were invited to submit written data, views, and arguments. Numerous comments, suggestions, and recommendations were received from professional and other organizations and individuals as well as known authorities in the field of drug abuse treatment and rehabilitation. With few exceptions, the comments supported the underlying policy of establishing minimum levels of program performance for the administration of federally funded drug treatment and central intake unit programs with the least possible controls imposed by the Federal Government.

The Special Action Office, along with the National Institute on Drug Abuse, Department of Health, Education, and Welfare, have given serious consideration to all comments, suggestions, and recommendations that have been submitted. Several were based on a misconstruction of the proposed regulations and required no change. Others raised valid questions regarding certain sections of the proposed regulations which required clarification or amendment. The Director has determined that all of the changes, as hereinafter set forth, are necessary or desirable in furtherance of the Government's policy of upgrading the quality of services provided by federally funded drug abuse treatment programs and central intake units.

A review of the principal comments and recommendations and the action taken with respect thereto are set forth below, followed by the full text of the regulations as revised.

COMMENTS AND RECOMMENDATIONS ON PART 1402, FEDERAL FUNDING CRITERIA FOR TREATMENT SERVICES

1. *Applicability.* (a) *Programs funded by several sources.* Two basic questions have been raised in regard to the applicability of the treatment standards. The first question concerned whether or not

the regulations were intended to apply to a program which is funded by several sources, only one of which is by the Federal Government. Section 1402.01 has been revised to make it clear that in the case of a program funded by several sources, only one of which is by the Federal Government, the standards of treatment shall apply to all segments of such program which provide services to which this part applies. For example, a program may be funded by four different sources only one of which is the Federal Government. If any segment of a program is federally funded, all other segments which perform the types of services to which this part applies would also be covered by the standards of treatment set forth in this part. Of course, programs conducted directly by departments and agencies of the Federal Government are exempted.

(b) *Demonstration and research programs.* The second question concerns the applicability of the federal funding criteria to demonstration and research projects. It was not intended that this part should apply to either of these projects. Section 1402.01 has been amended to specifically exclude them.

2. *Definitions.* (a) *Patient.* Paragraph (a) of section 1402.02 as proposed defined "patient" as "any person who has been accepted for treatment or rehabilitation services." It has been suggested that this definition is too broad and should be limited in such manner as to relate only to patients receiving the drug abuse services to which this part applies. To be consistent with the language of Pub. L. 92-255 and the regulations on the confidentiality of patient records, the definition is amended accordingly.

(b) *Program.* The definition of "program" in paragraph (b) of section 1402.02 has been simplified. It refers to any drug abuse project or activity which administers services to which this part applies.

(c) *Medical director.* To avoid any confusion that might arise regarding the respective responsibilities of the medical director of a drug abuse program and the program director as defined in paragraph (c) of § 1402.02, a new paragraph (d) has been added to this section defining the responsibilities of the medical director. While the responsibilities of the program director and the medical director are separately defined in this part, this should not be construed as precluding a duly licensed physician from filling both positions.

(d) *Treatment and treatment plan.* To avoid repetition of the various services usually associated with treatment, the term "treatment" has been defined to include interviewing, counseling, and any other services or activities carried on for the purpose of, or as an incident to, diagnosis, treatment, or rehabilitation with respect to drug abuse, whether or not conducted by a member of the medical profession. The term "treatment plan" means the mode of treatment that is determined appropriate to meet the objective needs of the patient.

(e) *Qualified mental health professional.* Another comment recommended the inclusion of a definition of "qualified mental health professional." Paragraph (f) of § 1402.02 has been added defining "qualified mental health professional" as a person who, by virtue of education, training, or experience, is capable of assessing the psychological and sociological background of drug abusers to determine the treatment plan most appropriate for the patient.

3. *Technical assistance.* The proposed § 1402.03 relating to technical assistance has been deleted because of the difficulty in establishing an adequate standard for purposes of this regulation.

4. *General requirements—(a) Admission of patients and termination of services.* Several comments recommended clarification and elaboration of the requirements for admission of patients and termination of services in paragraph (c) of proposed § 1402.04 (redesignated as § 1402.03). This section has been amended to make it clear that, at a minimum, the admission criteria are applicable only to those patients who are known to have primary drug abuse problems other than alcohol. Services to a patient must be terminated whenever the level of services does not meet the requirements of this part or legitimate person to person, services are not provided at least once each month on a regularly scheduled basis.

(b) *Personal, medical and drug history.* Paragraph (e) of proposed § 1402.04 (redesignated as § 1402.03) has been amended to describe the information to be obtained in a personal, medical and drug history. Unless otherwise indicated, a treatment program need not, in developing a patient's personal medical and drug history, secure information which already has been obtained by the referring Central Intake Unit and which is contained in the patient's intake record when transferred to the treatment program. Also, the three day discretionary period for the completion of the intake process has been changed to provide that it must be completed within the earliest practicable time.

(c) *Notice and review of termination of services.* Paragraph (f) has been added to § 1402.03 requiring that the patient be given written notice of the termination or substantial change in treatment and an opportunity to have such decision reviewed in accordance with appropriate procedures established for that purpose.

5. *Minimum standards for physical and laboratory examinations—(a) Performance requirements.* Several comments recommended clarification of paragraph (a) of § 1402.05 (redesignated as § 1402.04) relating to performance requirements to indicate which examinations are mandatory. Also, paragraph (a) has been amended to require that physical and laboratory examinations be administered as soon as practicable by qualified personnel but not later than 21 days after admission. Further, a treatment program need not repeat any part of a physical and laboratory examination

which was completed by a Central Intake Unit from which a patient was referred unless the results of the examination forwarded by the Intake Unit to the treatment program are found to be incomplete or in question. The documentation and results of these examinations should be contained in the person's intake record upon transfer to the treatment program.

(b) *Exceptions to physical and laboratory examinations.* It is recognized that there may be substantial cause for requesting exception to the physical or laboratory examinations set forth in § 1402.05 as proposed (redesignated as § 1402.04), particularly in the case of out-patient drug free programs administered in rural areas, programs which serve mainly polydrug abusers and those which treat significant numbers of adolescent patients. Therefore, paragraph (a) has been amended to underscore the fact that programs may request exception to the physical and laboratory examinations criteria established in this section. All requests for exception in the case of programs administering such services must be submitted in writing by the medical director. This request must contain the rationale and criteria in support of granting the exception to the requirements.

(c) *Physical and laboratory examinations.* Several comments have been made that the requirements for physical and laboratory tests are too restrictive and the terminology uncertain. As a result, item 6 in paragraph (b) of § 1402.05 (redesignated as § 1402.04) identified as "SMA 12/60 or equivalent" has been changed to "multiphasic chemistry profile." Also item 8 in paragraph (b) of proposed § 1402.05 identified as "sickle cell, as appropriate" has been deleted. Finally, item 9 in paragraph (b) of § 1402.05 identified as "Australian antigen, as appropriate" has been changed to "Australian antigen [HBsAg testing (HAA testing)], as appropriate" and redesignated as item 8.

(d) *Over-professionalization.* Concern was expressed by some that the overall effect of the guidelines might over-professionalize drug abuse therapy. The Director does not share this view and has determined that such guidelines are necessary in order to insure adequate standards of quality for programs to which this part applies.

(e) *Other changes.* Other language changes were made in § 1402.5 of the proposed rulemaking for purposes of clarification and the number of the section has been changed to 1402.04.

6. *Pre-admission interview.* Another comment suggests the need for clarifying paragraph (a) of proposed § 1402.06 (redesignated as § 1402.05), which recommended that specific items be covered in a personal history on each patient. This paragraph has been amended to provide that, under the supervision and guidance of the mental health professional, the staff shall obtain sufficient, relevant information (areas to be covered are identified) from the patient for a complete personal history.

7. *Mental health consultation.* Several comments suggested some clarification of the scope of professional mental health consultation in § 1402.09. This section (redesignated as § 1402.07) has been amended to provide that each program shall provide a minimum of five hours of mental health consultation per 100 patients per week by a qualified mental health professional.

8. *Counseling.* Several comments suggested that it would be extremely difficult to determine the appropriate size of a counseling group as proposed in § 1402.10. As a result, this section (redesignated as § 1402.08) has been amended to provide that the size of the counseling group should be left to the discretion of a duly qualified professional under whose supervision the group counseling sessions are conducted. It is also provided that such counseling services may be provided either by the program or by private consultants under contract.

9. *Vocational rehabilitation and employment programs.* An important point was made that because of the current economic situation and the divergent make-up of individual communities, it would not be appropriate to require that patients enrolled in residential programs be employed or be in attendance in a training program within 60 days after the date of admission. This is not the intent of § 1402.13 (now redesignated as § 1402.11). Programs are merely required to encourage patients to enroll in such programs. If a patient refuses to enroll or is unsuccessful in obtaining employment, this will be merely reflected in his treatment plan and progress notes but will not otherwise affect his relations with the program.

10. *Patient follow-up.* Many comments supported the follow-up program as provided in § 1402.14. However, because of the many problems involved, it has been determined that the provisions for such a program should be dropped and the proposal abandoned.

11. *Patient record system.* For purposes of clarification, § 1402.15 has been amended to provide that such patient records must be kept in accordance with the confidentiality regulations set forth in Part 1401 of the Code of Federal Regulations (21 CFR Part 1401) as proposed to be amended by Subchapter A of Chapter I, Title 42, of such Code (42 CFR Ch. I). Also, § 1402.15 has been redesignated as § 1402.12.

12. *Program hours for services.* Several comments misconstrued the intent underlying the rules governing program hours as set forth in § 1402.16. The purpose of providing for minimum hours is to insure that the program hours are scheduled in such a manner as to assure sufficient hours of operation on weekdays and weekends to meet the requisite need of patients. Comments also recommended a change in the requirements for day care drug free services. Accordingly, paragraph (b) (4) has been amended to provide that day care programs must be open at least five days per week rather than six at ten hours per day with a reduced schedule for the remaining two days. Also the language in this section has been revised for purposes of clarification, and the section has been redesignated as § 1402.13.

COMMENTS AND RECOMMENDATIONS ON PART 1403, FEDERAL FUNDING CRITERIA FOR CENTRAL INTAKE UNITS

1. *Definitions.* For purposes of clarification and consistency, the definition of "patient" has been changed as indicated in paragraph 2 of the comments relating to Part 1402.

Several comments indicated that a person should not be considered a "patient" until he has completed the intake process. To be consistent with the language of Public Law 92-255 and the regulations on the confidentiality of patient records, the definition has been amended accordingly.

2. *Technical assistance.* For the reasons stated in paragraph 3 of the comments relating to Part 1402, section 1403.03 has been deleted, and the sections that follow have been re-numbered accordingly.

3. *Operation of facilities and examination of patients.* Several comments recommended that the language in proposed § 1403.05 establishing a mandatory two day period for completing the intake process be changed to make the two day period preferable but not mandatory. Paragraph (a) has been amended accordingly. It was also suggested that the examination criteria as set forth in paragraph (b) of proposed § 1403.05 be made mandatory. This paragraph has been amended accordingly. Although the examination criteria are established as mandatory requirements, requests for exceptions may be made when deemed necessary or appropriate. Tests with respect to tetanus toxoid and sickle cell were not retained as mandatory requirements. Therefore, the requirements for these tests have been deleted and paragraph (b) amended accordingly. Section 1403.05 has been redesignated as § 1403.04.

4. *Patient recordkeeping—confidentiality.* Section 1403.15 (redesignated as § 1403.12) has been added to require that each program establish an adequate system of patient records and maintain such records in accordance with the Confidentiality Regulations (currently set forth as 21 CFR, Part 1401; proposed to be incorporated in 42 CFR, Part 2; see 40 FR 20522, May 9, 1975).

Based on the foregoing considerations, the Director has concluded that Parts 1402 and 1403 should be issued and be made effective immediately on May 27, 1975. Therefore, pursuant to sections 210, 221 and 222 of the Drug Abuse Office and Treatment Act of 1972 (Pub. L. 92-255), it is accordingly determined that Title 21 of the Code of Federal Regulations should be amended by adding Part 1402 and Part 1403 as set forth hereinafter.

Dated: May 19, 1975.

ROBERT L. DUPONT,  
Director, Special Action Office  
for Drug Abuse Prevention.

Part 1402 is added as set forth below:

Sec.	Applicability.
1402.01	Definitions.
1402.02	General requirements.
1402.03	Minimum standards for physical and laboratory examinations.
1402.04	Pre-admission interview.
1402.05	Medical services.
1402.06	Mental health consultation.
1402.07	Counseling.
1402.08	Provision for supportive services.
1402.09	Procedures for urine surveillance.
1402.10	Vocational rehabilitation and employment programs.
1402.11	Patient record system.
1402.12	Program hours for services.
1402.13	Provision for meals.
1402.14	Compliance with all Federal and State regulations.
1402.15	Exceptions to requirements.

AUTHORITY: Secs. 210, 221, 222, the Drug Abuse Office and Treatment Act of 1972, Pub. L. 92-255, (21 U.S.C. 1120, 1131, and 1132).

#### § 1402.01 Applicability.

This part sets forth the criteria which all Federal departments and agencies shall apply with respect to standards of treatment to be maintained in programs or projects (other than research or demonstration) funded by them, by means of grants or contracts awarded or renewed after the effective date of this part, for drug abuse treatment services, including but not limited to outpatient methadone, residential methadone, residential drug fee, out-patient drug fee and day care drug free, whether such services are performed directly by the recipient of any such grant or contract or indirectly through subcontracts, grants, or other means in implementation of the recipient's contract or grant with the Federal agency or department supplying the funds. In the case of a program funded by several sources, only one of which source is Federal, the standards of treatment set forth in this part shall apply to all segments of such program which provide the type of services to which this part applies. This part, however, does not apply to programs conducted within or by departments and agencies of the Federal Government.

#### § 1402.02 Definitions.

(a) *Patient.* The term "patient" means any person who has applied for or been given diagnosis or treatment for drug abuse at a treatment program or Central Intake Unit which administers services to which this part applies.

(b) *Program.* The term "program" means any drug abuse project or activity which administers services to which this part applies.

(c) *Program director.* The term "program director" means the person having the ultimate responsibility for managing and supervising a drug abuse program which administers services to which this part applies.

(d) *Medical director.* The term "medical director" means a duly licensed physician who has been appointed to assume responsibility for all medical affairs conducted by a program which administers services to which this part applies.

(e) *Treatment and treatment plan.* For the purposes of this part, the term "treatment" includes interviewing, counseling, and any other services or activities carried on for the purpose of, or as incident to, diagnosis, treatment, or rehabilitation with respect to drug abuse, whether or not conducted by a member of the medical profession; and the term "treatment plan" means the mode of treatment that is determined appropriate to meet the objective needs of the patient.

(f) *Qualified mental health professional.* The term "qualified mental health professional" means a person who, by virtue of education, training, or experience, is capable of assessing the psychological and sociological background of drug abusers to determine the treatment plan most appropriate for patients in programs administering services to which this part applies.

#### § 1402.03 General requirements.

The grantee or contractor shall provide the necessary facilities, materials, services, and personnel for the operation of a drug abuse program to which this part applies. The contractor or grantee shall establish and operate, or shall engage a subcontractor to establish and operate, such facilities, and shall provide such material, services, and personnel as are deemed necessary to provide patients with services in accordance with the provisions of this part. The grantee or contractor shall:

(a) *Appropriate facilities.* Provide services through such drug abuse treatment facilities as may be appropriate at such site or sites as shall be approved by the contracting or awarding authority.

(b) *Maintain in sanitary condition.* Maintain all facilities in a clean, safe, and sanitary condition in accordance with applicable standards established under Federal, State and local laws.

(c) *Admission criteria.* Develop criteria which meet the requirements of this part for the admission of patients and the termination of services to them. The admission criteria are applicable only to those individuals with a primary drug abuse problem other than alcohol. Services to a patient must be terminated whenever there is evidence that the level of services does not meet the requirements of this part or where legitimate, person to person, services are not provided at least once per month on a regularly scheduled basis.

(d) *Equipment and furnishings.* Install and maintain appropriate equipment and furnishings which are suitable for the type of treatment services being conducted.

(e) *Personal, medical and drug history.* Establish procedures under which a complete personal, medical, and drug history for each patient will be secured upon the patient's entry into the program and shall be maintained and kept up to date throughout the patient's treatment. This is essential for the purpose of identifying symptoms of

flashbacks, psychotic manifestations, and severe physical illness requiring immediate psychiatric or medical care and also for the development of the patient's treatment plan. The intake process must proceed expeditiously to avoid discouragement and shall be completed within the earliest practicable time. A treatment program need not secure personal, medical, or drug information which already had been obtained by a Central Intake Unit on a patient who was referred to the program by such unit unless the information is deemed incomplete or appears questionable. The documentation and results of these CIU examinations must be transferred to the treatment program as such results become available.

(f) *Notice and review of termination of treatment.* In any case in which a decision is made that a patient's treatment to which this part applies be terminated or substantially changed by the program director, the patient shall be given written notice of this fact and the right to have such decision reviewed in accordance with procedures established for that purpose.

#### § 1402.04 Minimum standards for physical and laboratory examinations.

(a) *Performance requirements.* A physical and laboratory examination shall be administered by qualified personnel as soon as practicable but not later than 21 days after admission of the patient. The results of the physical and laboratory examination and their implications for the patient's treatment shall be detailed in his treatment plan. Residential drug-free programs are required to perform physical examinations at the earliest practicable time because of the possibility of the existence of infectious diseases which might affect other patients. In the event that the residential program requires a period of induction, the physical examination should be administered during that period. A treatment program need not repeat any part of a physical or laboratory examination which had been completed by a Central Intake Unit from which a patient was referred unless the results of the examination are incomplete or questionable. The documentation and results of these examinations should be contained in the patient's intake record upon transfer to the treatment program. When special circumstances warrant an exception to the required physical and laboratory examination, a request for such exception may be made in accordance with § 1402.16 of this part. Such request must be submitted by the Medical Director and must contain a full explanation of the need for the exception to the requirements. However, the granting of an exception under this part shall not be considered as an exception to any applicable regulation of the Food and Drug Administration.

(b) *Physical and laboratory examination.* The physical and laboratory examination of each patient shall include:

(1) Investigation of the possibility of infectious disease, pulmonary, liver, cardiac abnormalities, dermatologic sequelae of addiction and possible concurrent surgical problems;

(2) Complete blood count and differential;

(3) Serological test for syphilis;

(4) Routine and microscopic urinalysis;

(5) Urine screening for drugs (toxicology);

(6) Multiphasic chemistry profile;

(7) Chest x-ray;

(8) Australian antigen (HbAg testing (HAA testing)) as appropriate, and

(9) EKG and biological tests for pregnancy, as appropriate.

#### § 1402.05 Pre-admission interview.

(a) *Information to be obtained.* Each patient seeking admission or re-admission for the purpose of obtaining treatment services shall be interviewed by a qualified mental health professional having qualifications as described in paragraph (f) of § 1402.02, or by a qualified intake counselor under the supervision of such a professional. Under the supervision and guidance of such professional, the staff shall obtain a complete personal history including information relating to the patient's social, economic, and family background, his education and vocational achievements, any history of past drug abuse and treatment, any record of past criminal conduct, and any other information which is relevant to his application and which may be helpful in determining an appropriate treatment program.

(b) *Development of appropriate treatment plan.* A primary objective of the admission interview is to determine the most appropriate mode of treatment for the patient and to assure that he understands the nature of the program and what may be expected of him. Any program of treatment recommended must be designed to meet the needs of the patient consistent with the projected program expectations. If a Central Intake Unit provides intake screening, it is the responsibility of the program to which the patient has been referred by such Unit to develop an individually tailored treatment plan based on the interview and his case history.

(c) *Reexamination and reports.* For persons receiving outpatient treatment, individual treatment plans shall be reexamined by the treatment team at least once in each ninety day period and altered where necessary to satisfy any needed changes. For all other modalities, the individual treatment plan shall be reexamined at least once in each 30 day period. A complete report of each review shall be recorded in the patient's record.

(d) *Information to be documented.* Each treatment plan must include documented information relating to (1) short and long term goals for treatment generated by both staff and patient, (2) the assignment of a primary counselor, (3) a description of the type of counseling services to be provided, and the frequency thereof, and (4) a description of

the supportive services determined to be needed by the individual patient.

#### § 1402.06 Medical services.

(a) *Designation of medical director.* Each grantee or contractor shall designate a medical director who must assume responsibility for the administration of all medical services performed by the program. He must be licensed to practice medicine in the jurisdiction in which he administers medical services. It will also be his responsibility to assure that the initial evaluation is properly performed, the medical needs of each patient are periodically evaluated, and that any emergency medical services, when needed, are adequately provided. The medical director shall also be responsible for determining what emergency medical equipment and supplies are needed to deal with possible overdoses and other medical emergencies that might arise and to make certain that such equipment and supplies are provided.

(b) *Services to patients (other than methadone) receiving prescription medication.* Each grantee or contractor shall, for those patients receiving prescription medication through the program, establish procedures under which consultation with the medical director or other program physician will be provided, at a minimum, once in every four week period or more frequently depending upon the needs of the patient.

(c) *Provision for emergency medical services.* (1) Each program is required to formalize a written agreement with a licensed hospital or hospitals in the community for the purpose of providing emergency, inpatient and ambulatory medical services, when needed.

(2) Medical services which are not directly related to the provision of drug abuse treatment services are not reimbursable under Federal contracts or grants. To the extent practicable, however, each program should arrange for the provision of such services.

#### § 1402.07 Mental health consultation.

Each program shall provide, through a qualified mental health professional, a minimum of five hours per week of mental health consultation for each 100 patients. The objective of this consultation should be to review selected cases and to provide assistance to the staff in the management of patient services or for the purpose of referral for psychiatric services.

#### § 1402.08 Counseling.

All counseling services are required to be performed by trained personnel under the supervision of a qualified professional, utilizing the individual, family, or group counseling technique which best meets the needs of the patients. In the case of group counseling, the size of the group should be left to the discretion of the professional under whose supervision the group counseling services are administered. For outpatient methadone and outpatient drug-free programs, a minimum of three hours of formalized counseling per week shall be made available

for each patient either by the program or by an outside qualified consultant under a contract. For residential drug-free, residential methadone, and day care drug-free programs, a minimum of 10 hours of formalized counseling per week shall be made available for each patient either by the program or by an outside qualified consultant. The hours of counseling actually provided should vary according to the needs of the patient.

#### § 1402.09 Provision for supportive services.

The following supportive services shall be provided:

(a) Educational;

(b) Vocational counseling and training;

(c) Job development and placement; and

(d) Legal services through local licensed lawyers to the extent such services are related to the patient's treatment.

To the maximum extent possible, programs shall utilize community resources to provide these services. Copies of any agreements for the provision of such services shall be furnished to the contracting or awarding authority. If any program is unable to obtain any of the requisite supportive services, a formal request to provide such services directly must be made to the project officer for the contract or grant award.

#### § 1402.10 Procedures for urine surveillance.

The following standards shall be applied for urine surveillance:

(a) *Procedures.* Urine specimens from each patient must be collected in a manner that minimizes falsification and on a randomly scheduled basis. In programs dispensing methadone, urine specimens for all patients must be analyzed weekly for opiates and monthly for methadone, amphetamines, barbiturates, as well as other drugs as indicated. For all other programs it is recommended that urine specimens from all patients be analyzed at least monthly for opiates, methadone, amphetamines, barbiturates, as well as other drugs as indicated. More frequent testing should occur when clinically indicated.

(b) *Compliance with other standards.* Laboratories used for urine testing shall comply with all applicable Federal proficiency testing and licensing standards and all state standards in conformity therewith. Laboratories covered by this requirement include any independent, clinical, government or program facility that offers to perform presumptive analysis for screening purposes as well as definitive qualitative analysis for confirmed identifications.

(c) *Use of urine testing results.* Urine testing results shall be used as one clinical tool for the purposes of diagnosis, and in the determination of patient treatment plans. Patient records must reflect the manner in which test results are utilized, and shall distinguish presumptive qualitative laboratory results from those which are definitive.

(d) *Use of laboratory analysis.* Program and medical directors electing to rely on the results of presumptive urinalysis for patient management must demonstrate reasonable access to definitive qualitative laboratory analysis for use when necessary, e.g., criminal justice system records, intake urine testing on all prospective methadone clients, any loss of patient privileges based on urinalysis results, and any frequency of use of other drugs not detectable by a screening method.

§ 1402.11 Vocational rehabilitation and employment programs.

All patients enrolled in outpatient treatment should be encouraged to participate in an educational or job training program or to obtain gainful employment as soon as appropriate but not later than 120 days from the date of enrollment. In the case of patients enrolled in residential programs, such patients should be encouraged to participate in one of such programs or to obtain gainful employment within sixty days from the date of admission. All efforts toward either of these objectives and the results derived therefrom must be noted in the patient's treatment plan and the notes of his progress. If, for any reason, a patient is not encouraged to pursue one of these alternatives, the reasons therefore also shall be recorded in the patient's records.

§ 1402.12 Patient record system.

Each program shall establish a patient record system to document and monitor patient care. This system shall comply with all Federal and State reporting requirements. All records shall be kept confidential in accordance with the applicable regulations (currently 21 CFR, Part 1401; proposed to be incorporated in 42 CFR, Part 2; see 40 FR 20522, May 9, 1975).

§ 1402.13 Program hours for services.

(a) *General requirements.* A reasonable effort must be made to adjust the hours of program operation to meet patient needs. For outpatient treatment programs, consideration should be given to the employment hours of patients, and, to the extent practicable, clinic operating hours should be scheduled at such times as will accommodate the working hours of such patients. Patients who are not employed or who are not attending school or training programs are expected to arrange their schedules in such manner as to receive services at suitable times. Where necessary to accommodate the needs of patients, the program must recognize that the usual 9 a.m. to 5 p.m. workday shall not be rigidly adopted for outpatient treatment. In many clinics with large patient admissions, a 12 hour day of operations is frequently necessary.

(b) *Minimum hours of operation.* The following minimum hours of operation shall be maintained:

(1) *Outpatient methadone.* Each outpatient methadone program shall provide services seven days each week. Services provided on at least five of these

seven days shall be on the basis of an eight hour day provided that, services for a minimum of two hours of such eight hour day must be scheduled at a time other than the regular 9 a.m. to 5 p.m. day. Services administered during the remaining two days must be scheduled for a period of at least four hours each day at a time most convenient to the patients.

(2) *Residential methadone and residential drug-free.* Each residential methadone and residential drug-free program shall provide services seven days per week, twenty-four hours per day.

(3) *Outpatient drug-free.* Each outpatient drug-free program shall provide services at least six days per week. Services provided on at least five of these six days shall be on the basis of an eight hour day provided that a minimum of two hours of such eight hour day must be scheduled at a time other than the regular 9 a.m. to 5 p.m. day. Services administered during the remaining (sixth) day must be scheduled for a period of at least five hours.

(4) *Day care drug-free.* Each day care drug-free program must provide services at least five days per week, ten hours per day. Services provided for the remaining two days may be so scheduled as to accommodate the needs of the patients.

(5) *Central intake unit.* Each central intake unit must provide services at least five days per week, eight hours per day.

§ 1402.14 Provision for meals.

Residential methadone and residential drug-free programs shall provide each patient a minimum of three meals per day. While meals are not required for day care drug-free programs, such programs are encouraged to provide each patient one meal daily, if practicable.

§ 1402.15 Compliance with all Federal and State regulations.

All programs which use methadone for detoxification and maintenance treatment must comply with all applicable regulations of the Food and Drug Administration, as well as other applicable Federal and State regulations and directives.

§ 1402.16 Exceptions to requirements.

Exceptions to the requirements set forth in this Part 1402 may be requested by submitting a request to the Director, Division of Community Assistance, National Institute on Drug Abuse, 11400 Rockville Pike, Rockville, Maryland 20852. The request must fully explain and justify the necessity for the exception.

Part 1403 is added as set forth below:

Sec.	
1403.01	Applicability.
1403.02	Definitions.
1403.03	General requirements.
1403.04	Operation of facilities and examination of patients.
1403.05	Medical services.
1403.06	Agreement for emergency medical services.
1403.07	Pre-admission interview.

Sec.	
1403.08	Patient file.
1403.09	Referral for treatment.
1403.10	Adoption of procedures to avoid duplication.
1403.11	Procedure for urine surveillance.
1403.12	Patient recordkeeping.
1403.13	Agreements between CIU and community programs.
1403.14	Requirements to be adopted in CIU procedures.
1403.15	Compliance with all Federal and State regulations.
1403.16	Exceptions to requirements.

AUTHORITY: Secs. 210, 221, 222, Drug Abuse Office and Treatment Act of 1972 Pub. L. 92-255, (21 U.S.C. 1120, 1131, and 1132.)

§ 1403.01 Applicability.

This part sets forth the criteria to be applied by all Federal departments and agencies with respect to standards to be maintained for drug abuse programs or projects (other than research or demonstration) funded by them by means of grants or contracts awarded or renewed after the effective date of this part, for the conduct of central intake services, whether such services are performed directly by the recipient of any such grant or contract or indirectly through subcontracts, grants, or other means in implementation of the recipient's contract or grant with the Federal agency or department supplying the funds. In case of a program funded by several sources, only one of which source is Federal, the standards of treatment set forth in this part shall apply to all segments of such program which provide the type of services to which this part applies. This part, however, does not apply to programs conducted within or by departments and agencies of the Federal Government.

§ 1403.02 Definitions.

(a) *Patient.* The term "patient" means any person who has applied for or been given diagnosis or treatment for drug abuse at a treatment program or central intake unit which administers services to which this part applies.

(b) *Program.* The term "program" means any drug abuse project or activity which administers services to which this part applies.

(c) *Central intake unit.* The term "Central Intake Unit" (CIU) means a centralized facility which is responsible for the initial screening, evaluation, diagnosis and orientation of a patient for purposes of referral to an appropriate modality for drug abuse treatment.

(d) *Qualified mental health professional.* The term "qualified mental health professional" means a person who, by virtue of education, training, or experience is capable of assessing the psychological and sociological background of drug abusers to determine the treatment plan most appropriate for patients in programs to which this part applies.

(e) *Treatment and treatment plan.* For the purposes of this part, the term "treatment" includes interviewing, counseling, and any other services or activities carried on for the purpose of, or as incident to, diagnosis, treatment, or re-

habilitation with respect to drug abuse whether or not conducted by a member of the medical profession; and the term "treatment plan" means the mode of treatment that is determined appropriate to meet the objective needs of the patient.

(f) *Program and medical director.* The term "program director" and "medical director" shall have the meaning set forth in §§ 1402.02(c) and 1402.02(d), respectively, of Part 1402 of this chapter.

§ 1403.03 General requirements.

The grantee or contractor shall provide adequate facilities, material, services, and personnel for the operation of a central intake facility. The contractor or grantee shall establish and operate, or shall engage a subcontractor to establish and operate, such facilities and provide such material, services, and personnel as are necessary to render such services to drug dependent persons in accordance with the provisions of this part. The Central Intake Unit shall be established at such site or sites as shall be approved by the awarding authority. The unit shall operate under procedures which provide (a) criteria for the admission of patients and for the termination of services rendered to them and (b) informal, standardized, initial patient orientation, multiphasic health screening, and referral to an appropriate treatment modality for new or readmitted patients.

§ 1403.04 Operation of facilities and examination of patients.

(a) *Hours of operation.* Each CIU facility shall remain open at least eight hours each day, five days per week. The intake process must proceed expeditiously to avoid discouragement and should not exceed a period of two days. The facility shall be appropriately furnished to provide the required services and shall be maintained in a condition consistent with applicable regulations of Federal, State and local authorities.

(b) *Examination.* At the time of intake, an initial personal, medical, and drug history shall be obtained and a physical and laboratory examination administered by qualified personnel. Such examination shall check the possibility of infectious diseases, pulmonary, liver, cardiac abnormalities, dermatologic sequelae of addiction and possible concurrent surgical problems. The laboratory examination shall include:

- (1) Complete blood count and differential;
- (2) Serological test for syphilis;
- (3) Routine and microscopic urinalysis;
- (4) Urine screening for drugs (toxicology);
- (5) Multiphasic chemistry profile;
- (6) Chest x-ray;
- (7) Australian antigen (HbAg testing (HAA testing)) as appropriate;
- (8) EKG and biological tests for pregnancy, as appropriate; and
- (9) Pap smear and gonorrhea culture, as appropriate.

§ 1403.05 Medical services.

(a) *Designation of medical director.* Each grantee or contractor shall designate a medical director who shall assume responsibility for the administration of all medical services performed by the CIU. Such director must be licensed to practice medicine in the jurisdiction in which the program is located.

(b) *Initial evaluation.* It will be the responsibility of the medical director to assure that the initial evaluation is properly performed and that the appropriate needs of each patient are evaluated and the type of treatment, if any, prescribed. The evaluation shall include an initial diagnostic work up, an identification of medical and surgical problems for referral to other treatment facilities, and a periodic review of the patient's records. If the patient has a previous medical record and it is available, the medical director should obtain it if possible and include it with the records sent to the treatment center to which the patient has been or is being transferred.

§ 1403.06 Agreement for emergency medical services.

(a) Each program is required to formalize a written agreement with a licensed hospital or hospitals in the community for the purpose of providing emergency, inpatient and ambulatory medical services, when needed.

(b) Medical services which are not directly related to the provision of drug abuse treatment services are not reimbursable under Federal contracts or grants. To the extent practicable, however, each program should arrange for the provision of such services.

§ 1403.07 Pre-admission interview.

Programs shall conduct an interview by a mental health professional, or by a qualified intake counselor under the supervision of such a professional, of each patient or former patient re-admitted. In the course of the interview, the staff shall obtain a complete personal history, including information relating to the patient's social, economic, and family background, his education and vocational achievements, any history of past drug abuse and treatment, any record of past criminal conduct and any other information which is relevant to his application and which may be helpful in determining an appropriate treatment program. The staff should then discuss with the patient the various treatment modalities available to him. After discussing the availability of these modalities in the light of the patient's particular needs (including the results of physician's evaluation), a treatment plan should be selected by mutual agreement and an appropriate referral made.

§ 1403.08 Patient file.

The program should maintain a file for each drug dependent patient. This file should be kept up to date by the particular agencies and all transfers to other programs and terminations noted.

All records shall be held confidential in accordance with the Confidentiality Regulations set forth in Part 1401 of this chapter.

§ 1403.09 Referral for treatment.

Upon reaching an agreement as to the modality to be applied, the patient should be referred to treatment within 48 hours and his intake records transferred to the center administering such treatment.

§ 1403.10 Adoption of procedures to avoid duplication.

Each program shall adopt such intake procedures as will avoid the duplication of services by programs receiving patients through the central intake process.

§ 1403.11 Procedure for urine surveillance.

Urine specimen shall be obtained by CIU from each patient under appropriate supervision. The specimens must be analyzed for morphine, methadone, cocaine, codeine, amphetamines, barbiturates, as well as other drugs if indicated. Laboratories which are used for urine testing must comply with applicable Federal proficiency testing and licensing standards and all State standards in conformity therewith.

§ 1403.12 Patient recordkeeping.

Each CIU program shall establish a record system for patients processed which must be adequate to meet all Federal and State reporting requirements and all patient records shall be maintained in accordance with the Confidentiality Regulations (currently set forth as Part 1401 of this chapter; proposed to be incorporated in 42 CFR Part 2; see 40 FR 20522, May 9, 1975).

§ 1403.13 Agreements between CIU and community programs.

Each CIU program shall establish and provide the contracting or awarding agency with documentary evidence of formal agreements with community based drug abuse treatment programs. Such documentary evidence shall include the treatment program's agreement to utilize the CIU for patient intake functions. The agreement should also provide for the acceptance of only those patients who have been processed through the CIU.

§ 1403.14 Requirements to be adopted in CIU procedures.

Each CIU program shall adopt procedures relating to the following:

(a) Orientation of patients with particular instructions on the available treatment options and the specific treatment program recommended to meet the needs of the patient;

(b) Consideration and determination of the most appropriate method to be followed for referral to treatment;

(c) The negotiation of an agreement with the patient covering the terms and conditions of referral to treatment; and

## RULES AND REGULATIONS

(d) Subject to approval by Federal and State project representatives, establishment of standards for meeting the needs of patients referred to CIU for rescreening and for referral to a modality or program determined to be more suitable for their needs.

§ 1403.15 Compliance with all Federal and State regulations.

All programs using methadone for detoxification and maintenance treatment must comply with all regulations of the Food and Drug Administration as well as all other relevant Federal and State regulations and directives.

§ 1403.16 Exceptions to requirements.

Requests for exceptions to the criteria and requirements set forth in this Part 1403 shall be submitted to the Director, Division of Community Assistance, National Institute on Drug Abuse, 11400 Rockville Pike, Rockville, Maryland 20852, for his consideration and action. Each request shall fully explain and justify the necessity for the requested exception.

WEDNESDAY, MAY 28, 1975

WASHINGTON, D.C.

Volume 40 ■ Number 103

Pages 23069-23270

## PART I

### NOTICE TO AGENCIES

In order to minimize costs of publishing the large volume of information expected under the Privacy Act of 1974, the Office of the Federal Register will accept magnetic tape or word processing equipment input by prior arrangement only. Call the Federal Register Privacy Act coordinator on 523-5240.

### HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

**PASSENGER CAR TIRES**—DOT/NHTSA requires manufacturers to provide grading information in certain performance areas ..... 23073

**FOOD ADVERTISING**—FTC proposes to eliminate deception and unfairness of certain misleading nutritional claims; comments by 7-28-75 ..... 23086

**MAJOR NOISE SOURCES**—EPA identifies certain products ..... 23105

**CANCER RESEARCH EMPHASIS GRANTS**—HEW/NIH announcement to support certain independently designed research projects ..... 23101

**NEW ANIMAL DRUGS**—  
HEW/FDA approves use of tylosin premix in swine feed; effective 5-28-75 ..... 23070  
HEW/FDA approves use of thiabendazole with trichlorfon for treating worms in horses; effective 5-28-75 .. 23071

**TACHOGRAPHS**—DOT/FHA advanced notice of proposed rulemaking regarding mandatory installation on buses; comments by 9-2-75 ..... 23084

(Continued inside)

### PART II:

**FOOD FOR SPECIAL DIETARY USES**—HEW/FDA proposes identity standards; comments by 7-14-75 ..... 23243

### PART III:

**FEDERAL DISASTER ASSISTANCE**—HUD/FDAA issues final regulations to implement Disaster Relief Act of 1974; effective 5-28-75 ..... 23251

HEW/NIH: National Advisory Allergy and Infectious Diseases Council, 6-18-75	23102	NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES: Music Advisory Panel, 5-29 and 5-30-75	23121
INTERIOR/NPS: National Capital Memorial Advisory Committee, 6-18-75	23099	CANCELLED MEETINGS—	
SBA: Concord District Advisory Council, 6-11-75	23125	STATE: Private International Law Advisory Committee, 6-4-75	23092

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202-523-5282. For information on obtaining extra copies, please call 202-523-5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202-523-5022.

federal register

Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$45 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

## list of cfr parts affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1974, and specifies how they are affected.

<b>7 CFR</b>	<b>21 CFR</b>	<b>40 CFR</b>

# rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 12—Banks and Banking CHAPTER V—FEDERAL HOME LOAN BANK BOARD

### SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 75-375]

## PART 523—MEMBERS OF BANKS Liquidity

APRIL 29, 1975.

The following summary of the amendment adopted by this Resolution is provided for the reader's convenience and is subject to the full provisions of this Resolution, including the provisions in the preamble thereof, and in the amended regulation set forth below.

I. *Existing regulation.* Loans of Federal funds to an insured bank which is a member of the Federal Reserve System count toward satisfaction of the liquidity requirements of members of the Federal Home Loan Bank System.

II. *Amended regulation.* Authorizes loans of unsecured day(s) funds to an insured bank to count toward the computation of the liquidity requirements of members of the Federal Home Loan Bank System, but adds the restriction that lenders of such funds must not be subordinated in their priority of claims to an insured bank's depositors.

III. *Reason for changing the regulation.* To permit unsecured day(s) fund investments by members of the Federal Home Loan Bank System in any insured bank, regardless of whether it is a member of the Federal Reserve System, and to substitute the more descriptive term "unsecured day(s) funds" for the term "Federal funds" used in the existing regulation.

The Federal Home Loan Bank Board considers it advisable to amend § 523.10 of the regulations for the Federal Home Loan Bank System (12 CFR 523.10) by revising subparagraph (g) (4) thereof for the purpose of authorizing members of the Federal Home Loan Bank System to include as liquidity loans of unsecured day(s) funds to insured banks. An additional purpose of this amendment is to require that claims of Federal Home Loan Bank System member lenders of such funds not be subordinated in priority to claims of depositors of a bank to which such funds are loaned.

Under the present § 523.10(g) (4), thrift institutions which are members of the Federal Home Loan Bank System may make loans of Federal funds to an insured bank which is a member of the Federal Reserve System. The regulation, when adopted on November 2, 1973, restricted such investments to Federal Reserve System members because the Board

believed that only such members could deal in the Federal funds market. This is not the case, however, and the Board now believes that the present regulation is a needless discrimination against non-Federal Reserve member insured banks.

Therefore, the Board considers it appropriate to revise § 523.10(g) (4) to allow loans of unsecured day(s) funds to any insured bank to count toward satisfaction of the liquidity requirements of members of the Federal Home Loan Bank System. In order to minimize any risk attendant to such investments, a new § 523.10(g) (4) (v) is being added which requires that claims of Bank System member lenders of such funds not be subordinated in priority to claims of depositors in a bank to which such funds are loaned. The Board also considers it appropriate to substitute the phrase "unsecured day(s) funds" for "Federal funds" wherever it appears in § 523.10(g) (4). The phrase "unsecured day(s) funds" is defined as Federal funds or similar unsecured loans to insured banks and is believed to be more descriptive than "Federal funds".

Accordingly, the Board hereby amends said § 523.10(g) (4) to read as set forth below, effective June 27, 1975.

Since this amendment relieves restriction, the Board hereby finds that notice and public procedure with respect to said amendment is unnecessary under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b).

## § 523.10 Definitions.

(g) Prior to January 1, 1972, the term "liquid assets" means the total of cash, accrued interest on unpledged assets which qualify as liquid assets under this paragraph, or would so qualify except for their maturities, and the book value of unpledged assets specified in subparagraphs (1) through (6) of this paragraph, without regard to the proviso contained in subparagraph (2) of this paragraph. Beginning on January 1, 1972, the term "liquid assets" means the total of cash, accrued interest on unpledged assets which qualify as liquid assets under this paragraph, or would so qualify except for their maturities, and the book value of the following unpledged assets:

(4) time deposits in an insured bank including such time deposits held subject to a repurchase agreement and loans of unsecured day(s) funds (Federal funds or similar unsecured loans to insured banks) to an insured bank, if:

(i) the total of all time deposits, including loans of unsecured day(s) funds

of the same member, in the same bank does not exceed the greater of (a) one-fourth of 1 percent of the total deposits of such bank (calculated on the basis of total deposits of such bank as shown by its last published statement of condition preceding the date each time deposit is made or acquired by a member), or (b) \$20,000;

(ii) no consideration, other than discounting to a current market rate of interest, is received by the member from a third party in connection with the making or acquiring of such deposits (excluding loans of unsecured day(s) funds) by the member and no consideration is received by the member from a third party in connection with loans of unsecured day(s) funds by the member; (iii) except for loans of unsecured day(s) funds, the remaining periods to maturity of such deposits are not more than 1 year and such deposits are negotiable, or, in the case of time deposits which may not be withdrawn without notice, the notice periods do not exceed 90 days;

(iv) the periods to maturity of loans of unsecured day(s) funds are not more than 6 months; and

(v) the claims of a lender of such unsecured day(s) funds are not subordinated in priority to claims of depositors in the insured bank to which such funds are loaned;

(Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended, sec. 17, 47 Stat. 736, as amended; (12 U.S.C. 1425a, 1437), Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48, Comp., p. 1071).

Dated: April 29, 1975.

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,  
Assistant Secretary.

## Title 14—Aeronautics and Space

### CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 75-NE-22; Amdt. 39-2221]

## PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky S-61L, S-61N, S-61NM and S-61R Helicopters Certificated in All Categories

Amendment 39-1992 (39 FR 37356), AD 74-22-02 and Amendment 39-2031 (39 FR 41739), AD 74-25-07 required a radiographic inspection of the main rotor blades of S-61 helicopters, as well as auditory inspections conducted by shaking the blades, to detect loose counter-

weights that were free to move within, and damage, the blade spar and tip. After the issuance of Amendments 39-1992 and 39-2031, the manufacturer modified the design of the counterweights and improved the process for the bonding that retains the counterweights in their proper positions within the blade spar. Sikorsky Service Bulletin No. 61B15-18 has been revised to indicate that the inspections are required only for the blades that were produced prior to these design improvements.

The agency has determined that certain main rotor blades need not be inspected in accordance with the AD, and that the requirements of AD 74-22-02 and AD 74-25-07 can be consolidated into a single AD.

Therefore, AD 74-22-02 and AD 74-25-07 are being superseded with a new AD which combines the auditory inspection requirements of the two directives and incorporates the latest Sikorsky service bulletin revision.

Since this amendment combines the requirements of two AD's, eliminates the requirements for inspecting new main rotor blades, and imposes no additional burden on any person, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, is amended by adding the following new airworthiness directive:

**SIKORSKY AIRCRAFT.** Applies to S-61L, S-61N, S-61R, and S-61NM helicopters certificated in all categories including Military type CH-3C, HH-3C, CH-3E, and HH-3E helicopters equipped with the following main rotor blades:

(1) S6115-20501 series, prior to and including S6115-20501-9 main rotor blade assemblies.

(2) S6115-20601 series, prior to and including S6115-20601-044 main rotor blade assemblies.

(3) S6117-20101 series, prior to and including S6117-20101-053 main rotor blade assemblies.

(4) S6188-15001 series, prior to and including S6188-15001-044 main rotor blade assemblies.

Compliance required as indicated.

(a) Prior to the first flight of each day, inspect each main rotor blade in accordance with section 2, paragraph C of Sikorsky Service Bulletin No. S61B15-18B or later FAA-approved revisions for possible free counterweights or loose material in the blade spar cavity. If any sound is evident, remove the blade from service immediately and notify Sikorsky Aircraft Product Support Department.

(b) If any unusual one-per-rev vibration is noted, inspect each main rotor blade prior to further flight for a possible free counterweight or loose material in the spar cavity in accordance with Section 2, paragraph C of Sikorsky Service Bulletin No. 61B15-18B or later FAA-approved revisions. If any sound is evident, remove the blade from service immediately and notify Sikorsky Aircraft Product Support Department.

(c) Upon request of the operator, equivalent methods of compliance with the inspection requirements of this AD may be approved by the Chief, Engineering and Manu-

facturing Branch, New England Region, if the request contains substantiating data to justify that equivalent method for that operator.

This supersedes Amendment 39-1992 (39 FR 37356), AD 74-22-02 and Amendment 39-2031 (39 FR 41739), AD 74-25-07.

This amendment becomes effective June 12, 1975.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Burlington, Mass., on May 20, 1975.

QUENTIN S. TAYLOR,  
Director, New England Region.

[FR Doc.75-13766 Filed 5-27-75; 8:45 am]

## CHAPTER II—CIVIL AERONAUTICS BOARD

### SUBCHAPTER D—SPECIAL REGULATIONS [Reg. SPR-83; Amdt. 8]

#### PART 375—NAVIGATION OF FOREIGN CIVIL AIRCRAFT WITHIN THE UNITED STATES

Director, Bureau of Operating Rights

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., May 22, 1975.

The amendment herein substitutes "Director, Bureau of Operating Rights" for "Director, Bureau of Air Operations" in § 375.40.

The editorial amendment is issued by the undersigned pursuant to a delegation of authority from the Board to the General Counsel in 14 CFR 385.19 and shall become effective on June 17, 1975. Procedures for review of this amendment by the Board are set forth in Subpart C of Part 385 (14 CFR 385.50 through 385.54).

Accordingly, the Civil Aeronautics Board hereby amends § 375.40(a) of Part 375 (14 CFR Part 375) as follows:

§ 375.40 Permits for commercial air operations.

(a) *Applications.* Commercial air operations in the United States may not be undertaken by foreign civil aircraft unless the Board has issued a permit therefor upon application pursuant to this subpart and such permit is carried on board the aircraft. Permits are not transferable. Applications for permits may be filed directly with the Board and need not be filed through diplomatic channels. They shall be made on CAB Form 272, addressed to the attention of the Director, Bureau of Operating Rights, and shall contain a proper identification of the applicant, the operator of the aircraft concerned and of the owner thereof, a description of the aircraft by make, model, and registration marks; and a full description of the operations for which authority is desired, indicating type and dates of operations and number of flights, and routing. In case of cargo flights, the names of all contractors and the beneficial owner of the cargo, a de-

scription of the cargo and of the proposed operations, including services to be performed by any exporter, importer or transportation agent, shall be provided. In case of passenger flights, a full identification and description of the group chartering the aircraft, and identification of the travel agent, if any, shall be provided. A copy of any newspaper or other advertising of the flights shall be enclosed. The application shall also be accompanied by such documents as may be necessary to establish that reciprocity for similar operations by United States registered aircraft exists in the country of registration of the aircraft. Applications shall be submitted at least 15 days in advance of the date of the commencement of the proposed operation. Such additional information as may be specifically requested by the Board shall also be furnished.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; (49 U.S.C. 1374), Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5969; (49 U.S.C. 1324 (note)))

By the Civil Aeronautics Board.

[SEAL] THOMAS J. HEYE,  
General Counsel.

#### Title 21—Food and Drugs

### CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

#### SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

##### PART 510—NEW ANIMAL DRUGS

###### Subpart G—Sponsors of Approved Applications

##### PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

###### Tylosin

The Commissioner of Food and Drugs has evaluated a new animal drug application (98-687V) filed by Kerber Milling Co., Emmetsburg, IA 50536, proposing safe and effective use of a tylosin premix in making swine feed. The application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act, (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 510 and 558 (formerly Parts 135 and 135e prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)) are amended as follows:

1. In Part 510 by amending § 510.600 (formerly § 135.501) by adding a new sponsor, alphabetically to paragraph (c) (1) and numerically to paragraph (c) (2), to read as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

• • • • •  
(c) • • • • •  
(1) • • • • •

Firm name and address:	Drug Listing No.
Kerber Milling Co., Box 152, 1817 E. Main St., Emmetsburg, IA 50536	029341
(2) • • • • •	• • • • •
Drug listing No.	Firm name and address
029341	Kerber Milling Co., Box 152, 1817 E. Main St., Emmetsburg, IA 50536.
• • • • •	• • • • •

2. In Part 558 by adding a new paragraph (b) (31) to § 558.625 (formerly § 135e.10) to read as follows:

§ 558.625 Tylosin.

(b) • • • • •  
(31) To 029341: 5 grams per pound; paragraph (f) (1) (vi) (a) of this section.

Effective date. This order shall be effective on May 28, 1975.

(Sec. 512(i), 82 Stat. 347; (21 U.S.C. 360b(i)))

Dated: May 20, 1975.

C. D. VAN HOUWELING,  
Director, Bureau of Veterinary  
Medicine.

[FR Doc.75-13811 Filed 5-27-75; 8:45 am]

#### PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

##### Thiabendazole-Trichlorfon

The Commissioner of Food and Drugs has evaluated a new animal drug application (91-067V) filed by Merck Sharp and Dohme Research Laboratories, Division of Merck and Co., Inc., Rahway, NJ 07065, proposing safe and effective use of thiabendazole with trichlorfon for treating bot and certain worm infections in horses. The application is approved.

The Commissioner is amending Part 520 (formerly Part 135c prior to recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)), to reflect approval as set forth below. The amendment shall become effective on May 28, 1975.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 520 is amended by adding a new section to read as follows:

§ 520.2380e Thiabendazole with trichlorfon.

(a) *Specifications.* The drug contains 5 grams of thiabendazole with 4.5 grams of trichlorfon, or 20 grams of thiabendazole with 18 grams of trichlorfon.

(b) *Sponsor.* See No. 000006 in § 510.600(c) of this chapter.

(c) *Conditions of use.* (1) Used for the treatment and control of bots (*Gasterophilus* spp.), large strongyles (*Strongylus* spp.), small strongyles (genera *Cyathostomum*, *Cylicobrachytus*, *Craterostomum*, *Oesophagodontus*, *Poteriostomum*), pinworms (*Oxyuris* spp., *Strongyloides* spp.), and ascarids (*Parascaris* spp.) in horses.

(2) Administer 2 grams of thiabendazole with 1.8 grams of trichlorfon per 100 pounds of body weight sprinkled on the animals' usual daily ration of feed, or may be mixed in 5 to 10 fluid ounces of water and administered by stomach tube or drench.

(3) Do not re-treat more than once every 30 days, preferably every 6 to 8 weeks.

(4) Do not treat animals if sick or debilitated; less than 4 months of age; or mares in last month of pregnancy.

(5) Do not administer intravenous anesthetics, especially muscle relaxants, within 2 weeks of use.

(6) Not for animals intended for food use.

(7) Do not use within a few days before or after treatment with or exposure to cholinesterase-inhibiting drugs, pesticides, or chemicals.

(8) If the label bears directions for administration of the drug by stomach tube or drench it shall also bear the statement: Caution; Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall be effective on May 28, 1975.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: May 20, 1975.

C. D. VAN HOUWELING,  
Director,  
Bureau of Veterinary Medicine.

[FRL 360-1; FAPSE5070/RE]

#### PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

##### Methoprene

On January 7, 1975, notice was given (40 FR 1299) that Zoecon Corp., 975 California Ave., Palo Alto CA 94304, had filed a food additive petition (FAP 5H5070) with the Environmental Protection Agency (EPA). This petition proposed establishment of a feed additive regulation to provide for the safe use of the insect growth regulator methoprene (isopropyl (E,E)-11-methoxy-3, 7,11-trimethyl-2,4-dodecadienoate) in processed feed supplements for cattle in an amount not to exceed 0.025 percent by weight of the processed feed supplement. (A related document concerning the establishment of a pesticide tolerance for methoprene also appears in today's FEDERAL REGISTER, 40 FR 23073).

The data submitted in the petition and other relevant material have been eval-

uated. It is concluded that the regulation should be established expressed as the amount of pesticide fed to the animals per body weight of the animal per duration of time.

Any person adversely affected by this regulation may, on or before June 27, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M Street SW., East Tower, Room 1019, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions for the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on May 28, 1975, Part 561 is amended by adding § 561.282.

(Sec. 409(c) (1) & (4), Federal Food, Drug and Cosmetic Act, (21 U.S.C. 348(c) (1) & (4)), transferred to the Administrator EPA in Reorganization Plan No. 3 (35 FR 15623))

Dated: May 22, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

Part 561 is amended by adding § 561.282 to read as follows.

§ 561.282 Methoprene.

The feed additive methoprene (isopropyl (E,E)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate) may be safely used in accordance with the following prescribed conditions:

(a) It is used as a feed additive in the feed for cattle at the rate of 0.375 to 0.750 milligram per 100 pounds of body weight per month.

(b) It is used to prevent the breeding of hornflies in the manure of treated cattle.

(c) To ensure safe use of the additive, the label and labeling of the pesticide formulation containing this additive shall conform to the label and labeling registered by the U.S. Environmental Protection Agency.

[FR Doc.75-13936 Filed 5-27-75; 8:45 am]

#### CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

##### PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

###### Exemption of Chloral

The Drug Enforcement Administration has become aware that a large number of industrial users of chloral are not registered with the Drug Enforcement Administration, as required by section 302 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 822), for persons whose activities include the processing of controlled substances. Chloral is merely the anhydrous form of chloral hydrate, which is a controlled substance listed in Schedule IV of the Act (21 U.S.C. 812(c)), and, as such, has a low potential for abuse

relative to the drugs or other substances in Schedules III. Therefore, all persons who engage in industrial activities with respect to chloral are engaged in activities with respect to a Schedule IV controlled substance, and must become registered for such activities with DEA.

However, information submitted to DEA by several industrial users of chloral has revealed that there is no significant potential for abuse with respect to chloral when it is in "package" form, i.e., when shipped and stored in tank cars and pipelines which are fully sealed under nitrogen pressure in an oxygen-free atmosphere.

Therefore, industrial users of chloral who maintain it under the above circumstances shall be exempt from the application of sections 305, 306, 307, 308, 309, 1002, 1003 and 1004 of the Act (21 U.S.C. 825-829, 952-954, respectively), and Title 21 of the Code of Federal Regulations (CFR) §§ 1301.71-1301.73 and 1301.74 (a), (b), (d), (e) and (f), by virtue of the Administrator hereby finding that chloral, when existing under the above circumstances, is a substance which is not intended for general administration to a human being or other animal, and contains no narcotic controlled substances and is packaged in such a form that the package quantity does not present any significant potential for abuse.

Therefore, under the authority vested in the Attorney General by sections 301 and 501(b) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 821 and 871(b), respectively), and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations (CFR), the Administrator hereby orders that § 1308.24 of Title 21 of the Code of Federal Regulations (CFR) be amended to read as follows:

§ 1308.24 Exempt chemical preparations.

(a) The chemical preparations and mixtures set forth in paragraph (1) of this section have been exempted by the Administrator from application of sections 302, 303, 305, 306, 307, 308, 309, 1002, 1003 and 1004 of the Act (21 U.S.C. 822-3, 825-9, 952-4) and § 1301.74 of this chapter, to the extent described in paragraphs (b) to (h) of this section. Substances set forth in paragraph (j) shall be exempt from the application of sections 305, 306, 307, 308, 309, 1002, 1003 and 1004 of the Act (21 U.S.C. 825-9, 952-4) and §§ 1301.71-1301.73 and 1301.74(a), (b), (d), (e) and (f) of this chapter to the extent as hereinafter may be provided.

(j) The following substances are designated as exempt chemical preparations for the purposes set forth in this section.

(1) Chloral. When packaged in a sealed, oxygen-free environment, under nitrogen pressure, safeguarded against exposure to the air.

#### EFFECTIVE DATES

1. *Registration.* The requirement of registration which is imposed by this order is effective as follows:

(a) Any person who manufactures, distributes, dispenses, engages in research, imports or exports chloral, in such form as hereinabove described in proposed § 1308.24(j) of Title 21 of the Code of Federal Regulations, or who proposes to engage in the manufacture, distribution, importation or exportation of, or research with, chloral in such form, shall obtain a registration to conduct such activities on or before July 1, 1975.

2. *Criminal liability.* Any person who manufactures, distributes, engages in research, imports or exports chloral, in such form as hereinabove described in proposed § 1308.24(j) of Title 21 of the Code of Federal Regulations, and who is not now registered to handle chloral in such form but is entitled to registration under the Controlled Substances Act or the Controlled Substances Import and Export Act, may continue to conduct normal business, industrial or research activities with respect to such substance, during the time period which falls between the date upon which this order becomes effective and the date upon which he obtains or is denied registration, but not beyond July 1, 1975.

3. *Other.* In all other respects, this order is effective. Any person interested may file written comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which the order is based, the Administrator shall immediately suspend the effectiveness of the order until he may reconsider the order in light of the comments and objections filed. Thereafter, the Administrator shall reinstate, revoke or amend his original order as he determines appropriate.

Dated: May 9, 1975.

JOHN R. BARTELS, JR.,  
Administrator.

Drug Enforcement Administration.

#### Title 29—Labor

#### CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

#### PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

#### PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION

#### Recodification of Air Contaminant Standards

On September 20, 1974, at 39 FR 33843, the Occupational Safety and Health Administration announced its intention to initiate rulemaking proceedings to issue more complete standards for each of the substances listed in Tables G-1, G-2 and G-3 of 29 CFR 1910.93. As a result, it is expected that approximately 400 additional standards dealing with toxic substances will be promulgated.

Regulations dealing with toxic substances are contained in Subpart G of

Part 1910. This subpart contains only a few sections and additional serially numbered sections cannot be added without completely renumbering the subparts which follow. Therefore new standards dealing with individual toxic substances have in the past been inserted following § 1910.93 by the addition of letter suffixes (e.g., § 1910.93a—Asbestos; § 1910.93b—Coal tar pitch volatiles; interpretation of term; § 1910.93c—4-Nitrophenyl; . . . § 1910.93q—Vinyl chloride).

While such numbering is satisfactory for limited use, it is not suitable for a large group of new sections, because of the complex multiple-letter suffixes that result. Therefore, in view of the fact that OSHA contemplates promulgating a large number of standards dealing with toxic substances, the current numbering system cannot be continued. Consequently the toxic substance standards presently contained in Subpart G of Part 1910 are hereby recodified and placed in a new Subpart Z of Part 1910, beginning at § 1910.1000. New standards dealing with the new subpart. This recodification will simplify the manner in which standards for toxic substances may be referenced and will eliminate unnecessary confusion. Since this recodification makes no change in the standards, it is not necessary to provide notice of proposed rulemaking, opportunity for public participation therein, nor any delay in effective date under either section 6(b) of the Occupational Safety and Health Act of 1970 (the Act) (84 Stat. 1593, 29 U.S.C. 655) or 5 U.S.C. 553.

Accordingly, pursuant to authority in sections 6 and 8 of the Act, Secretary's Order No. 12-71 (36 FR 8754) and 29 CFR Part 1911, Title 29 of the Code of Federal Regulations is hereby amended by recodifying §§ 1910.93 through 1910.93q as §§ 1910.1000 through 1910.1017 respectively, in a new Subpart Z of Part 1910 entitled "Toxic and Hazardous Substances." In addition, other sections of Parts 1910 and 1926 are amended so that internal references are consistent with this recodification, and a reference to the new Subpart Z is inserted in Subpart G, as follows:

1. The following table sets forth the recodification of §§ 1910.93 through 1910.93q as §§ 1910.1000 through 1910.1017 respectively:

Old Section No. (Subpart G)	New Section No. (Subpart Z)
1910.93	1910.1000
1910.93a	1910.1001
1910.93b	1910.1002
1910.93c	1910.1003
1910.93d	1910.1004
1910.93e	1910.1005
1910.93f	1910.1006
1910.93g	1910.1007
1910.93h	1910.1008
1910.93i	1910.1009
1910.93j	1910.1010
1910.93k	1910.1011
1910.93l	1910.1012
1910.93m	1910.1013
1910.93n	1910.1014
1910.93o	1910.1015
1910.93p	1910.1016
1910.93q	1910.1017

2. The following sections in Part 1910 which reference § 1910.93 are revised to refer to § 1910.1000.

a. In § 1910.94, paragraphs (a) (2) (II), (a) (5) (II) (c) and (d) (2) (III).

b. In § 1910.141, paragraph (a) (2) (VIII).

c. In § 1910.178, paragraph (i) (1).

d. In § 1910.252, paragraphs (f) (1) (iv), (f) (8), (f) (9) (i) and (f) (10).

e. In § 1910.261, paragraphs (g) (15) (iv) and (g) (20).

f. In § 1910.262, paragraph (tr).

g. In § 1910.285 paragraph (c) (17) (i).

h. New § 1910.1002.

3. The reference in § 1910.99 to § 1910.93 is deleted.

4. The following sections in Parts 1910 and 1926 which reference § 1910.93a are revised to refer to § 1910.1001.

a. § 1910.19.

b. In § 1910.141, paragraph (a) (2) (VIII).

c. In § 1926.55, paragraph (c).

5. As a result of this recodification, the table of contents for new Subpart Z reads as follows:

Subpart Z—Toxic and Hazardous Substances

Sec.:  
1910.1000 Air Contaminants.

1910.1001 Asbestos.

1910.1002 Coal tar pitch volatiles; interpretation of term.

1910.1003 4-Nitrophenyl.

1910.1004 alpha-Naphthylamine.

1910.1005 4,4'-Methylene bis (2-chloroaniline).

1910.1006 Methylchloromethyl ether.

1910.1007 3,3'-Dichlorobenzidine (and its salts).

1910.1008 bis-Chloromethyl ether.

1910.1009 beta-Naphthylamine.

1910.1010 Benzidine.

1910.1011 4-Aminodiphenyl.

1910.1012 Ethyleneimine.

1910.1013 beta-Propiolactone.

1910.1014 2-Acetylaminofluorene.

1910.1015 4-Dimethylaminoazobenzene.

1910.1016 N-Nitrosodimethylamine.

1910.1017 Vinyl chloride.

6. Tables G-1, G-2 and G-3 of § 1910.93 (now redesignated § 1910.1000) are redesignated as Tables Z-1, Z-2 and Z-3 respectively. All references in new § 1910.1000 to Tables G-1, G-2 and G-3 are revised to correspond with this redesignation.

7. New § 1910.1499 and 1910.1500 are added to Subpart Z to read as follows:

§ 1910.1499 Source of standards.

Section 1910.1000.. 41 CFR 50-204.50, except for Table Z-2, the source of which is American National Standards Institute, Z37 series.

§ 1910.1500 Standards organizations.

Specific standards of the following organizations have been referred to in this subpart. Copies of the standards may be obtained from the issuing organization.

American Conference of Governmental Industrial Hygienists  
1014 Broadway  
Cincinnati, Ohio 45202

American National Standards Institute  
1430 Broadway  
New York, New York 10018

National Fire Protection Association  
470 Atlantic Avenue  
Boston, Massachusetts 02210

8. In Subpart G of Part 1910, the following reference is added: §§ 1910.93-1910.93q (These sections have been recodified in Subpart Z of this part, beginning at § 1910.1000).

Effective date. This amendment shall become effective on May 27, 1975.

(Secs. 6, 8(g), Pub. L. 91-506, 84 Stat. 1593, 1600 (29 U.S.C. 655, 657), Secretary of Labor's Order No. 12-71, 36 FR 8754, 29 CFR Part 1911)

Signed at Washington, D.C., this 20th day of May 1975.

JOHN STENDER,  
Assistant Secretary of Labor.

[FR Doc.75-13809 Filed 5-27-75; 8:45 am]

#### Title 40—Protection of Environment CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

#### SUBCHAPTER E—PESTICIDE PROGRAMS [FRL 379-8; PP541592/R28]

#### PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

#### Methoprene

On March 28, 1975, notice was given (40 FR 14117) that Zoon Corp., 975 California Ave., Palo Alto CA 94304, had filed a pesticide petition (PP 5F1592) with the Environmental Protection Agency (EPA). This petition proposed establishment of a tolerance for residues of the insect growth regulator methoprene (isopropyl (E,E)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate) in the raw agricultural commodities meat, fat, and meat byproducts of cattle at 0.1 part per million and in milk at 0.01 part per million. (A related document concerning the establishment of a feed additive regulation for methoprene also appears in today's FEDERAL REGISTER, 40 FR 23071.)

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The proposed tolerances for residues in milk, meat, fat, and meat byproducts of cattle are adequate to cover residues resulting from the proposed and established uses. Consequently, these raw agricultural commodities are being deleted from § 180.1033 "Methoprene; exemption from the requirement of a tolerance". The tolerances established by this regulation will protect the public health.

Any person adversely affected by this regulation may on or before June 27, 1975, file written objections with the Hearing Clerk, Environmental Protection Agency, 401 M Street SW., East Tower Room 1019, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions for the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the

objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on May 28, 1975, Part 180, Subpart C, is amended by adding § 180.359, and Subpart D is amended by revising § 180.1033.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)))

Dated: May 22, 1975.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

1. Section 180.359 is added to Part 180, Subpart C, to read as follows:

§ 180.359 Methoprene; tolerances for residues.

Tolerances are established for residues of the insect growth regulator methoprene (isopropyl (E,E)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate) in or on raw agricultural commodities as follows:

0.1 part per million in meat, fat, and meat byproducts of cattle

0.01 part per million in milk.

2. Section 180.1033 in Subpart D, Part 180, is revised by deleting the words cattle and milk from the list of raw agricultural commodities to read as follows:

§ 180.1033 Methoprene; exemption from the requirement of a tolerance.

The insect growth regulator methoprene (isopropyl (E,E)-11-methoxy-3,7,11-trimethyl-2,4-dodecadienoate) is exempt from the requirement of a tolerance in or on the raw agricultural commodities eggs; the fat, meat, and meat byproducts of goats, hogs, horses, poultry, and sheep; fish; forage grasses; forage legumes; rice; rice straw; and shellfish; when used on pastures, rice fields and marshlands and other noncrop areas to control floodwater mosquitoes.

[FR Doc.75-13934 Filed 5-27-75; 8:45 am]

#### Title 49—Transportation CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 25; Notice 17]

#### PART 575—CONSUMER INFORMATION REGULATIONS

#### Uniform Tire Quality Grading Standards

This notice establishes Uniform Tire Quality Grading Standards. The notice is based on proposals published June 14, 1974 (39 FR 20808, Notice 12), August 9, 1974 (39 FR 28644, Notice 14), January 7, 1975 (40 FR 1273, Notice 15). Comments submitted in response to these proposals have been considered in the preparation of this notice.

A rule on this subject was issued on January 4, 1974 (39 FR 1037). It was revoked on May 9, 1974 (39 FR 16469), due to the inability of the NHTSA to obtain from the tire industry "control tires" which were to have been used as the basis for determining the compara-

tive performance grades for treadwear and traction.

The rule issued today requires manufacturers to provide grading information for new passenger car tires in each of the following performance areas: Treadwear, traction, and temperature resistance. The respective grades are to be molded into or onto the tire sidewall, contained in a label affixed to each tire (except for OEM tires), and provided for examination by prospective purchasers in a form retainable by them at each location where tires are sold.

#### TREADWEAR

Treadwear grades are based on a tire's projected mileage (the distance which it is expected to travel before wearing down to its treadwear indicators) as tested on a single, predetermined test run of approximately 6400 miles. A tire's treadwear grade is expressed as the percentage which its projected mileage represents of a nominal 30,000 miles, rounded off to the nearest lower 10 percent increment. For example, a tire with a projected mileage of 24,000 would be graded "80", while one with a projected mileage of 40,000 would be graded "130".

The test course has been established by the NHTSA in the vicinity of San Angelo, Texas, as described in Appendix A. It is the same as that discussed at the public briefings on this subject which took place July 23 and July 29, 1974, except that the direction of travel has been reversed on the northwest loop to increase safety by reducing the number of left turns. The course is approximately 400 miles long, and each treadwear test will require 16 circuits. It is anticipated that both the industry, at each manufacturer's option, and the agency will perform treadwear tests on this course; the former for establishing grades, and the latter for purposes of compliance testing, i.e., testing the validity of the grades assigned. To arrange for allocations of test time at the site, industry members should contact the NHTSA facility manager, P.O. Box 6501, Goodfellow Air Force Base, San Angelo, Texas 76901; telephone (915) 655-0546. While manufacturers are not required to test on the site, it would be to their advantage to do so, since the legal standard against which compliance with the rule will be measured is a tire's performance in government tests on that course.

The method of determining projected mileages is essentially that proposed in Notice 12 as modified by Notices 14 and 15 in this docket. The treadwear performance of a candidate tire is measured along with that of course monitoring tires (CMTs) of the same general construction type (bias, bias-belted, or radial) used to monitor changes in course severity. The CMTs are tires procured by the NHTSA—one group each of the three general types—which are made available by the agency for purchase and use by regulated persons at the test site. To obtain course monitoring tires, regulated persons should contact the NHTSA facility manager at the above address.

Each test convoy consists of one car equipped with four CMTs and three or

fewer other cars equipped with candidate tires of the same construction type. (Candidate tires on the same axle are identical, but front tires on a test vehicle may differ from rear tires as long as all four are of the same size designation.) After a two-circuit break-in period, the initial tread depth of each tire is determined by averaging the depth measured at six equally spaced locations in each groove. At the end of every two circuits (800 miles), each tire's tread depth is measured again in the same way, the tires are rotated, and wheel alignments are readjusted if necessary. At the end of the 16-circuit test, each tire's overall wear rate is calculated from the nine measured tread depths and their corresponding mileages-after-break-in as follows: The regression line which "best fits" these data points is determined by applying the method of least squares as described in Appendix C; the wear rate is defined as the absolute value of the slope of the regression line, in mils of tread depth per 1000 miles. This wear rate is adjusted for changes in course severity by a multiplier consisting of the base wear rate for that type of course monitoring tire divided by the measured average of the wear rates for the four CMTs in that convoy. A candidate tire's tread depth after break-in (minus 62 mils to account for wearout when the treadwear indicators are reached) divided by its adjusted wear rate and multiplied by 1000, plus 800 miles, yields its projected mileage. The projected mileage is divided by 30,000 and multiplied by 100 to determine the percentage which, when rounded off, represents the candidate tire's treadwear grade.

A discussion of the NHTSA response to the comments on treadwear grading follows.

**Duration of break-in period and test.** The 400 mile break-in period originally proposed in Notice 12 was extended in Notice 15 to 800 miles, to permit the rotation of each tire between axles after 400 miles. The Rubber Manufacturers Association (RMA) suggested that a 1600-mile break-in, by permitting each tire to be rotated once through each position on the test car, would provide more reliable results. An analysis of variance in a study conducted by the NHTSA showed no significant variations in wear from one side of a car to the other. Further, a review of data from extensive testing on the San Angelo course showed no anomalies or consistent variations in wear rate occurring after the first 800 miles. The NHTSA is convinced that the 800-mile break-in period is sufficient to allow a tire to establish its equilibrium inflated shape and stabilize its wear rate. Therefore, the RMA suggestion has not been adopted.

Many of the comments to Notice 12 suggested that testing distances greater than 6400 miles are necessary for accurate tread life projections. Testing to 40 percent, 50 percent, and even 90 percent of wearout was urged. Unfortunately, only the submission of North American Dunlop was accompanied by substantive data. These data, showing non-linear wear rates, were of questionable validity

because the tires were not broken in prior to testing and because the data were collected by different test fleets in different parts of the country. Nonetheless, as a result of the large number of adverse comments, the NHTSA requested further information from all knowledgeable and concerned parties to document and substantiate the position that a longer treadwear test is necessary. The additional data were requested in a written inquiry to the RMA and in Notice 15. Because of the need to limit test time, test cost, and fuel consumption, the objective was to determine the minimum test distance which can reliably predict ultimate tire treadwear life.

The responses to these requests have been reviewed and analyzed. Again, the NHTSA finds the industry data and conclusions that greater testing distances are necessary lacking in rigor and completeness. In most cases, the conditions of the industry tests were not disclosed or did not coincide with the prescribed control procedures. Serious doubt is cast upon the conclusions because of inadequate information on one or more of the following test conditions: Changes in weather and season, course severity, conformity with prescribed break-in period, mileage between readings, method of projecting mileage, size of convoy, number of tires tested, and uniformity and frequency of tread depth measurement.

A controlled test program recently completed by the NHTSA was designed to test the hypothesis that the rate of wear of tires is constant after an 800-mile break-in. The design and conclusions of the test are discussed in detail in a paper by Brenner, Scheiner, and Kondo ("Uniform Tire Quality Grading: Effect of Status of Wear on Tire Wear," NHTSA Technical Note T-1014, March, 1975—General Reference entry No. 42 in this docket.) The general conclusions of the test are: (1) That the inherent rate of wear of tires, after an 800-mile break-in period, is constant and (2) that the projected tread life for a tire estimated from a 6,400-mile test after 800-mile break-in is accurate for all three tire types. Accordingly, the 6,400 mile test period has been retained.

**Grading based on minimum performance.** The RMA expressed strong disagreement with any system in which treadwear grades are based on a tire line's "minimum" projected mileage on the San Angelo test course, urging instead that the average performance of a line is a more appropriate grade. The RMA suggested further that the proposed grading system "ignores the bell-shaped distribution curve which describes any performance characteristic and would require the downgrading of an entire line of tires until no portion of the distribution curve fell below any selected treadwear grade, notwithstanding that the large bulk of a given group of tires was well above the grade."

The NHTSA rejects the arguments and the position taken by the industry on this issue. It is precisely the fact that, in industrial processes involving production of large numbers of items, the products group themselves into the so-called bell-

shaped or normal distribution which allows for measurement of central tendency and variation and forms the basis of scientific quality control.

Tests performed by the NHTSA and described in the paper cited above have shown conclusively that different production tires exhibit considerable differences in their variability about their respective average values. Thus, two different tire brands might have identical average values for treadwear, but differ markedly in their variance or standard deviation. These differences would probably be attributable to differences in process and quality control.

Recognition of differences in inherent variability among tire manufacturers and tire lines is of the utmost importance to the consumer. The average or mean measure of a group of tires does not provide sufficient information to enable the consumer to make an informed choice. If one tire on a user's car wears out in 10,000 miles, the fact that the "average" tire of that type wears to 25,000 miles in the same driving environment does not alter his need to purchase a new tire. Ideally, the consumer might be provided with more information if he were given a measure of the mean (central tendency) and standard deviation (variability) for each tire type, but the complexity and possible confusion generated by such a system would negate its advantages. In the NHTSA's judgment, the most valuable single grade for the consumer is one corresponding to a level of performance which he can be reasonably certain is exceeded by the universe population for that tire brand and line.

As with the other consumer information regulations issued by this agency, a grade represents a minimum performance figure to which every tire is expected to conform if tested by the government under the procedures set forth in the rule. Thus, any manufacturer in doubt about the performance capabilities of a line of his tires is free to assign a lower grade than what might actually be achieved, and he is expected to ensure that substantially all the tires marked with a particular grade are capable of achieving it.

**Homogeneity of course monitoring tires.** Another aspect of the Notice 12 proposal which generated much controversy is the adoption by the NHTSA of production tires for use as course monitoring tires. The commenters suggested that changes in course severity be monitored instead by tires manufactured under rigidly specified conditions to ensure homogeneity. Because variations in the performance of course monitoring tires are reflected in treadwear projections for all candidate tires, it follows that the more homogeneous the universe of the monitoring tires, the more precisely the performance of the candidate tires can be graded. The NHTSA is in complete accord with the industry's desire to minimize the variability of tires chosen for course monitoring. The development of specifications for special "control tires", in which materials, processing, and other conditions

are rigidly controlled to a degree beyond that possible for mass production, will continue. The NHTSA hopes to work with the tire industry to reduce the variability of course monitoring tires to the maximum extent possible. However, it should be noted that an earlier version of this regulation had to be revoked due to the difficulty in obtaining such "control tires." Recent tests (summarized in the paper cited above) demonstrate that implementation of a viable treadwear grading system need not be delayed further, pending development of special tires. In these tests, the current radial CMTs—Goodyear Custom Steelgards chosen from a single, short production run—show a coefficient of variation (standard deviation of wear rate divided by mean) of 4.9 percent. This degree of uniformity is commensurate with universally accepted criteria for test control purposes. Hence, grading of radial tires may be started immediately. The tentatively adopted bias and bias-belted CMTs showed coefficients of variation of 7.3 percent and 12.4 percent, respectively. Existing test data indicate that the NHTSA will be able to identify and procure other tires of these two construction types, exhibiting homogeneity comparable to the current radial CMTs, in time for testing in accordance with the implementation schedule set out below. In any event, the variability of course monitoring tires will be taken into account by the NHTSA in connection with its compliance testing. At worst, the degree of grading imprecision associated with CMT variability will be no greater than one-half the levels measured for the current bias and bias-belted tire lots, because the standard deviation for the average of a set of four tires is equal to one-half that of the universe standard deviation. It is the NHTSA's judgment that treadwear grades of this level of precision will provide substantially more meaningful information to the prospective tire buyer than is currently available.

To make efficient use of the available CMTs, the NHTSA expects to conduct treadwear tests with used CMTs, as well as with new ones. This will not affect any mileage projections, because the inherent wear rate of tires is constant after break-in. Test results will be discarded if the treadwear indicators are showing on any of the CMTs at the end of a test.

**The need for three separate course monitoring tires.** Many commenters suggested that a single CMT of the bias-ply type be used, arguing that the use of a different CMT for each general construction type would create three separate treadwear rating systems. These suggestions appear to result from a misunderstanding of the role of the course monitoring tires. They are not used as yardsticks against which candidate tires are graded. Instead, they are used to monitor changes in the severity of the test course. Experiments performed by the NHTSA (Brenner, F. C. and Kondo, A., "Elements in the Road Evaluation of Tire Wear", "Tire Science and Technology," Vol. 1, No. 1, February 1973, p. 17—General Reference entry No. 17 in

this docket) show that changes in test course severity will affect tires of differing construction types to differing degrees. For example, the improvement in projected tread life from the severest to the mildest test courses in the experiments was 12 percent for bias tires, yet it was 91 percent for bias-belted tires and 140 percent for radial tires. In fact, a variety of factors influence course severity, each having different relative effects on the various tire types. Therefore, the use of a single course monitoring tire on courses of varying severity, or even on a given course whose severity is subject to variation due to weather and road wear, would not permit the correct adjustment of measured wear rates for environmental influences. Only with a CMT for each construction type can a single, uniform treadwear grading system be established.

**Expression of treadwear grades.** The system of treadwear grading proposed in Notice 12 specified six grades, as follows:

Grade X (projected mileage less than 15,000)  
Grade 15 (projected mileage at least 15,000)  
Grade 25 (projected mileage at least 25,000)  
Grade 35 (projected mileage at least 35,000)  
Grade 45 (projected mileage at least 45,000)  
Grade 60 (projected mileage at least 60,000)

Among the objections to this proposal was that small differences in actual treadwear in the vicinity of grade boundaries would be misrepresented as large differences because of the breadth of the predetermined categories. The NHTSA was also concerned that the broad categories could in some cases reduce the desirable competitive impact of the treadwear grading system if tires of substantially differing treadwear performance were grouped in the same grade. For these reasons, a relatively continuous grading system was proposed in Notice 15, in which tires would be graded with two digit numbers representing their minimum projected mileages in thousands of miles as determined on the San Angelo test course. The major objection to both of these proposals was that grades expressing projected mileages would lead consumers to expect every tire to yield its indicated mileage. The manufacturers were especially concerned that this would subject them to implied warranty obligations, despite the disclaimer on the label. The NHTSA remains convinced that treadwear grades which are directly related to projected mileages are the most appropriate way of expressing treadwear performance. To overcome any possible misinterpretation by consumers, the grading system established today is changed from that of Notice 15 to indicate relative performance on a percentage basis, as described above. This decision is based in part upon the fact that testing performed to date on the San Angelo course has given projected mileages that are generally higher than those the average user will obtain; i.e., it appears to be a relatively mild course.

**Wheel alignment procedure.** Test vehicle wheel alignment procedures received considerable comment. Notice 12

proposed alignment to vehicle manufacturer's specifications after vehicle loading. Notice 15 proposed that this be done before loading, and that the measurements taken after loading be used as a basis for setting alignment for the duration of the test. The majority of the commenters strongly favored a return to the original procedure. The NHTSA takes particular cognizance of the fact that those commenters who have actually tried both procedures in testing at San Angelo find the procedure of Notice 12 to be satisfactory and practicable, and that of Notice 15 to be unusable. NHTSA representatives at San Angelo have reported satisfactory operation on a variety of vehicles using the originally proposed procedure, and have not observed any uneven tire wear that would indicate alignment problems. For these reasons, the final rule prescribes alignment procedures which are identical with those proposed in Notice 12.

**Tire rotation procedure.** Several commenters objected to using the proposed "X" rotation procedure for testing radial tires. The NHTSA is aware that this procedure differs from that recommended by many groups for consumers' use. While some vehicle and tire manufacturers recommend that radial tires be rotated only fore-aft, others recommend no rotation at all and yet others are silent on the subject. The primary reason for these other methods appears to be to improve passenger comfort by reducing vibration. No data have been submitted, however, to suggest that the proposed method has any adverse or uneven effect on radial tire wear. Further, this method has the advantage, for treadwear testing, of balancing out any side-to-side or axle wear differences attributable to the vehicle or to the course. Accordingly, the proposed tire rotation method has been adopted without change.

**Choice of grooves to be measured.** Some commenters suggested that treadwear projections be calculated from measurements of the most worn grooves on candidate tires, rather than from the averages of measurements made in all grooves. It was argued that, because many States require replacement of passenger car tires when treadwear indicators appear in any two adjacent grooves, the proposed method of calculation would yield misleadingly high projections. Analysis of projections based on both methods (Brenner, F. C. and Kondo, A., "Patterns of Tread Wear and Estimated Tread Life," "Tire Science and Technology," Vol. 2, No. 1, 1973—General Reference entry no. 27 in this docket) shows a high correlation between the resulting tire rankings. Because the treadwear grading system established today is based on relative performance, there is no disadvantage in adopting the proposed method. On a related issue, the E.T.R.T.O. pointed out that some grooves near the tire shoulder which are designed only for esthetic reasons exhibit practically no wear, and suggested that measurements be made only in those grooves

which contain treadwear indicators. This suggestion has been adopted.

**Calculation of projected mileage.** Several methods for calculating the tire wear rates to be used in determining projected mileages were considered. Notice 12 proposed calculating the geometric mean of the wear rates measured for each 800-mile increment. This approach was rejected because the geometric mean is extremely sensitive to inaccurate readings in any single measurement. Use of the arithmetic mean of the incremental wear rates appears to be the general industry practice. Unfortunately, however, the intermediate readings have no effect on such a calculation, because the result is a function only of the initial tread depth (after break-in) and that measured 6,400 miles later. Therefore, a wear rate calculated by the industry method is extremely sensitive to errors in these two measurements. In Notice 15, the NHTSA proposed that wear rate be calculated by the least-squares regression method, as described above. This approach has the advantage of weighting all measurements and minimizing the effect of inaccurate readings, so it has been adopted.

**Differing tires on a single test vehicle.** Uniroyal and the E.T.R.T.O. argued that each test convoy vehicle should be equipped with four identical tires; the reason given was that otherwise, the performance of a candidate tire would be a function of the tires chosen by the NHTSA for use on the other axle of the test vehicle during compliance testing. The NHTSA is unaware of any data that support this position. The rule adopted today requires that all vehicles in a single convoy be equipped with tires of the same general construction type, and that all tires on a single vehicle be of the same size designation. In extensive testing at San Angelo with this procedure, none of the suggested undesirable variations has been observed.

**Differing test vehicles in a single convoy.** Several commenters suggested that the rule specify that all vehicles in a given convoy be identical, to reduce variations in projected treadlife. The NHTSA is in complete agreement with the premise that those variables which can be identified and which can affect treadwear results should be controlled as closely as is feasible. Variations in vehicle type, however, do not appear to produce significant variations in treadwear projections. Nevertheless, to minimize such variations, tires will be tested for compliance only on vehicles for which they are available as original equipment or recommended replacement options. Where practical, all vehicles in a given convoy will be of the same make. However, to test tires designed for the range of wheel sizes available, the suggested method would require a proliferation of course monitoring tires, one for each combination of wheel size and construction type. Therefore, the suggestion has not been adopted.

**Accuracy of tread depth measurements.** The RMA suggested that the

interval between measurements be increased to 1,600 miles to reduce the effects of measurement error. However, if this interval were used instead of 800 miles, only five readings would be obtained in the 6,400 mile treadwear test, so errors in any one reading would result in a greater overall error. A recently completed study (Kondo, A. and Brenner, F. C., "Report on Round-Robin Groove Depth Measuring Experiment," "NHTSA Technical Note T-1012," March 1975—General Reference entry No. 44 in this docket) shows that variations among measurements of the same tread depth by different operators do not present a serious problem. The study found that the only significant variations in measurement results occur as a result of differences in measuring techniques between different laboratories. Since these techniques are consistent within a given laboratory, the different laboratories arrive at the same results in terms of the slope of the tread depth regression line that is the basis of the treadwear grade.

#### TRACTION

Traction grades are based on a tire's traction coefficient as measured on two wet skid pads, one of asphalt and one of concrete. Because a method for producing identical skid test surfaces at different sites has not yet been developed, the NHTSA has established two skid pads, described in Appendix B, near the treadwear test course in San Angelo. These pads represent typical highway surfaces. The asphalt surface has a traction coefficient, when tested wet using the American Society for Testing and Materials (ASTM) E 501 tire, of  $0.50 \pm 0.10$ . The concrete surface was described in Notice 12 as having a traction coefficient, when similarly tested, of  $0.47 \pm 0.05$ . Due to surface polishing, this coefficient has declined and stabilized at  $0.35 \pm 0.10$ . As with the treadwear course, these pads are available for use by manufacturers as well as the agency. For allocations of test time, industry members should contact the NHTSA facility manager at the above address.

Before each candidate tire test, the traction coefficient of each surface is measured with two ASTM tires to monitor variations in the surface, using a two-wheeled test trailer built in accordance with ASTM Method E-274-70. The candidate tire's traction coefficient is similarly measured on each surface, and then adjusted by adding a fixed coefficient (0.50 for asphalt, 0.35 for concrete) and subtracting the average coefficient obtained from measurements with the two ASTM tires.

The tire industry's major objection to the proposed rule was that, with four possible grades for traction, two tires might be graded differently without a meaningful difference in their performance. The RMA suggested a scheme with two grade categories above a minimum requirement. The rule issued today, by setting two threshold levels of performance, establishes three grades: "0", for performance below the first threshold;

threshold; and "...", for performance above the second threshold. The NHTSA is convinced that the grades thus defined reflect significant differences in traction performance.

Firestone suggested that further testing may demonstrate that only one pad is necessary to give the best and most consistently repeatable results. However, the ranking of a group of tires based on their performance on one surface can differ from their ranking on another surface. In fact, one tire manufacturer suggested that an additional surface of low coefficient be included in the testing scheme for this reason. The NHTSA agrees that an additional surface may increase the utility of the traction grading system, and anticipates a proposal to implement this suggestion in the future.

The suggestion of Pirelli, that measurements be made during the period between 0.5 and 1.5 seconds after wheel lockup instead of the period between 0.2 and 1.2 seconds, has been adopted. To permit more efficient use of the skid pads, the rule specifies a test sequence which differs slightly from that originally proposed: "Instead of being tested repeatedly on the asphalt pad and then repeatedly on the concrete pad, each tire is run alternately over the two pads. A change in paragraph (f)(2)(i)(A) permits tires to be conditioned on the test trailer as an alternative to conditioning on a passenger car. Another change facilitates the use of trailers with instrumentation on only one side, which had been inadvertently precluded by the wording of the proposed rule.

#### TEMPERATURE RESISTANCE

The major objection to the proposed high speed performance grading scheme was that it was neither necessary nor beneficial to the consumer. Several commenters pointed out that Standard No. 109 specifies testing a tire against a laboratory wheel at a speed corresponding to 85 mph, and argued that certification of a tire to this minimum requirement provides the consumer with adequate information about its performance at all expected driving speeds. They suggested that only one higher grade be established, for tires designed to be used on emergency vehicles. Some commenters indicated that, as proposed, the rule seemed to condone or even encourage the unsafe operation of motor vehicles above legal speed limits. To preclude this misinterpretation, the third tire characteristic to be graded has been renamed "temperature resistance". The grade is indicative of the running temperature of the tire. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. Therefore, the distinctions provided by three grades of temperature resistance are meaningful to the consumer. Except for the name change, this aspect of quality grading has been adopted as proposed. A grade of "C" corresponds to the minimum requirements of Standard

No. 109. "B" indicates completion of the 500 rpm test stage specified in paragraph (g)(9), while "A" indicates completion of the 575 rpm test stage.

#### PROVISION OF GRADING INFORMATION

Several commenters objected to the proposed tread label requirement, suggesting that point-of-sale material such as posters and leaflets could provide the consumer with adequate information about tire grades. For the reasons discussed in Notice 12, the NHTSA is convinced that labels affixed to the tread of the tire are the only satisfactory method of providing complete information to replacement tire purchasers. Therefore, the scheme of transmitting quality grading information to consumers, combining sidewall molding, tread labels, and point-of-sale materials, has been adopted substantially as proposed. A change in paragraph (d)(1)(ii) clarifies the respective duties of vehicle manufacturers and tire manufacturers to provide information for prospective purchasers.

Several vehicle manufacturers requested that new vehicles not be required to be equipped with graded tires until six months after the date that tires must be graded. These commenters appear to have misunderstood the scope of the quality grading standard. The NHTSA expects that tires which comply with the standard will appear on new vehicles as inventories of ungraded tires are depleted. Part 575.6 requires of the vehicle manufacturer only that he provide the specified information to purchasers and prospective purchasers when he equips a vehicle with one or more tires manufactured after the applicable effective date of this rule.

The NHTSA has determined that an Inflationary Impact Statement is not required pursuant to Executive Order 11621. Industry cost estimates and an inflation impact review are filed in public Docket No. 25. This review includes an evaluation of the expected cost of the rule.

In consideration of the foregoing, a new § 575.104, "Uniform Tire Quality Grading Standards" is added to 49 CFR Part 575, to read as set forth below.

**Effective dates.** For all requirements other than the molding requirement of paragraph (d)(1)(i)(A): January 1, 1976, for radial ply tires; July 1, 1976, for bias-belted tires; January 1, 1977, for bias ply tires. For paragraph (d)(1)(i)(A): July 1, 1976, for radial ply tires; January 1, 1977, for bias-belted tires; July 1, 1977, for bias-ply tires.

(Secs. 103, 112, 119, 201, 203; Pub. L. 89-563, 80 Stat. 718 (16 U.S.C. 1392, 1401, 1407, 1421, 1423); delegation of authority at 49 CFR 1.51.)

Issued on May 20, 1975.

JAMES B. GREGORY,  
Administrator.

#### § 575.104 Uniform tire quality grading standards.

(a) **Scope.** This section requires motor vehicle and tire manufacturers and tire brand name owners to provide information

indicating the relative performance of passenger car tires in the areas of treadwear, traction, and temperature resistance.

(b) **Purpose.** The purpose of this section is to aid the consumer in making an informed choice in the purchase of passenger car tires.

(c) **Application.** This section applies to new pneumatic tires for use on passenger cars manufactured after 1948. However, this section does not apply to deep tread, winter-type snow tires.

(d) **Requirements—(1) Information.** (i) Each manufacturer of tires, or in the case of tires marketed under a brand name, each brand name owner, shall provide grading information for each tire of which he is the manufacturer or brand name owner in the manner set forth in paragraphs (d)(1)(i)(A) and (d)(1)(i)(B) of this section. The grades for each tire shall be only those specified in paragraph (d)(2) of this section. Each tire shall be able to achieve the level of performance represented by each grade with which it is labeled. An individual tire need not, however, meet further requirements after having been subjected to the test for any one grade.

(A) Each tire shall be graded with the words, letters, symbols, and figures specified in paragraph (d)(2) of this section, permanently molded into or onto the tire sidewall between the tire's maximum section width and shoulder in accordance with one of the methods described in Figure 1.

(B) Each tire, except a tire sold as original equipment on a new vehicle, shall have affixed to its tread surface in a manner such that it is not easily removable a label containing its grades and other information in the form illustrated in Figure 2. The treadwear grade attributed to the tire shall be either imprinted or indelibly stamped on the label adjacent to the description of the treadwear grade. The label shall also depict all possible grades for traction and temperature resistance. The traction and temperature resistance performance grades attributed to the tire shall be indelibly circled.

(ii) In the case of information required in accordance with § 575.6(c) to be furnished to prospective purchasers of motor vehicles and tires, each vehicle manufacturer and each tire manufacturer or brand name owner shall as part of that information list all possible grades for traction and temperature resistance, and restate verbatim the explanations for each performance area specified in Figure 2. The information need not be in the same format as in Figure 2, but must indicate clearly and unambiguously the grade in each performance area for:

(A) In the case of a vehicle manufacturer, each tire offered for sale on a new motor vehicle; and

(B) In the case of a tire manufacturer or brand name owner, each tire of that manufacturer or brand name owner offered for sale at the particular location.

(iii) In the case of information required in accordance with § 575.6(a) to be furnished to the first purchaser of a new motor vehicle, each manufacturer of motor vehicles shall as part of that information list all possible grades for traction and temperature resistance and restate verbatim the explanation for each performance area specified in Figure 2. The information need not be in the format of Figure 2, but must clearly and unambiguously indicate the quality grades for the tires with which the vehicle is equipped.

(2) **Performance—(i) Treadwear.** Each tire shall be graded for treadwear performance with the word "TREADWEAR" followed by a number of two or three digits representing the tire's grade for treadwear, expressed as a percentage of the NHTSA nominal treadwear value, when tested in accordance with the conditions and procedures specified in paragraph (e) of this section. Treadwear grades shall be multiples of 10 (e.g., 80, 150).

(ii) **Traction.** Each tire shall be graded for traction performance with the word "TRACTION," followed by the symbols 0, \*, or \*\* (either asterisks or 5-pointed stars) when the tire is tested in accordance with the conditions and procedures specified in paragraph (f) of this section.

(A) The tire shall be graded 0 when the adjusted traction coefficient is either:

(1) 0.38 or less when tested in accordance with paragraph (f) (2) of this section on the asphalt surface specified in paragraph (f) (1) (i) of this section, or

(2) 0.26 or less when tested in accordance with paragraph (f) (2) of this section on the concrete surface specified in paragraph (f) (1) (i) of this section.

(B) The tire may be graded \* only when its adjusted traction coefficient is both:

(1) More than 0.38 when tested in accordance with paragraph (f) (2) of this section on the asphalt surface specified in paragraph (f) (1) (i) of this section, and

(2) More than 0.26 when tested in accordance with paragraph (f) (2) of this section on the concrete surface specified in paragraph (f) (1) (i) of this section.

(C) The tire may be graded \*\* only when its adjusted traction coefficient is both:

(1) More than 0.47 when tested in accordance with paragraph (f) (2) of this section on the asphalt surface specified in paragraph (f) (1) (i) of this section, and

(2) More than 0.35 when tested in accordance with paragraph (f) (2) of this section on the concrete surface specified in paragraph (f) (1) (i) of this section.

(iii) **Temperature resistance.** Each tire shall be graded for temperature resistance performance with the word "TEMPERATURE" followed by the letter A, B, or C, based on its performance when the tire is tested in accordance with the procedures specified in paragraph (g)

of this section. A tire shall be considered to have successfully completed a test stage in accordance with this paragraph if, at the end of the test stage, it exhibits no visual evidence of tread, sidewall, ply, cord, innerliner or bead separation, chunking, broken cords, cracking or open splices as defined in § 571.109 of this chapter, and the tire pressure is not less than the pressure specified in paragraph (g) (1) of this section.

(A) The tire shall be graded C if it fails to complete the 500 rpm test stage specified in paragraph (g) (9) of this section.

(B) The tire may be graded B only if it successfully completes the 500 rpm test stage specified in paragraph (g) (9) of this section.

(C) The tire may be graded A only if it successfully completes the 575 rpm test stage specified in paragraph (g) (9) of this section.

(e) **Treadwear grading conditions and procedures—(1) Conditions.** (i) Tire treadwear performance is evaluated on a specific roadway course approximately 400 miles in length, which is established by the NHTSA both for its own compliance testing and for that of regulated persons. The course is designed to produce treadwear rates that are generally representative of those encountered in public use for tires of differing construction types. The course and driving procedures are described in Appendix A to this section.

(ii) Treadwear grades are evaluated by first measuring the performance of a candidate tire on the government test course, and then correcting the projected mileage obtained to account for environmental variations on the basis of the performance of course monitoring tires of the same general construction type (bias, bias-belted, or radial) run in the same convoy. The three types of course monitoring tires are made available by the NHTSA at Goodfellow Air Force Base, San Angelo, Texas, for purchase by any persons conducting tests at the test course.

(iii) In convoy tests each vehicle in the same convoy, except for the lead vehicle, is throughout the test within human eye range of the vehicle immediately ahead of it.

(iv) A test convoy consists of no more than four passenger cars, each having only rear-wheel drive.

(v) On each convoy vehicle, all tires are mounted on identical rims: either a "test rim" as defined with respect to that tire in paragraph S3 of § 571.109 of this chapter (Standard No. 109) or any other rim listed for use with that tire in Appendix A of § 571.110 of this chapter (Standard No. 110) having a width within  $-0+0.50$  inches of the "test rim" width.

(2) **Treadwear grading procedure.** (i) Equip a convoy with course monitoring and candidate tires of the same construction type. Place four course monitoring tires on one vehicle. On each other vehicle, place four candidate tires with identical size designations. On each

axle, place tires that are identical with respect to manufacturer and line.

(ii) Inflate each candidate and each course monitoring tire to an inflation pressure 8 pounds per square inch less than its maximum permissible inflation pressure.

(iii) Load each vehicle so that the load on each course monitoring and candidate tire is 85 percent of the load specified in Appendix A of § 571.109 of this chapter (Standard No. 109) at the inflation pressure specified in paragraph (e) (2) (ii) of this section.

(iv) Adjust wheel alignment to that specified by the vehicle manufacturer.

(v) Subject candidate and course monitoring tires to "break-in" by running the tires in convoy for two circuits of the test roadway (800 miles). At the end of the first circuit, rotate each vehicle's tires by moving each front tire to the same side of the rear axle and each rear tire to the opposite side of the front axle.

(vi) After break-in, allow the tires to cool to the inflation pressure specified in paragraph (e) (2) (ii) of this section or for two hours, whichever occurs first. Measure, to the nearest 0.001 inch, the tread depth of each candidate and course monitoring tire, avoiding treadwear indicators, at six equally spaced points in each groove. For each tire compute the average of the measurements. Do not include those shoulder grooves which are not provided with treadwear indicators.

(vii) Adjust wheel alignment to the manufacturer's specifications.

(viii) Drive the convoy on the test roadway for 6,400 miles. After each 800 miles:

(A) Following the procedure set out in paragraph (e) (2) (vi) of this section, allow the tires to cool and measure the average tread depth of each tire;

(B) Rotate each vehicle's tires by moving each front tire to the same side of the rear axle and each rear tire to the opposite side of the front axle.

(C) Rotate the vehicles in the convoy by moving the last vehicle to the lead position. Do not rotate driver position within the convoy.

(D) Adjust the wheel alignment to the vehicle manufacturer's specifications, if necessary.

(ix) Determine the projected mileage for each candidate tire as follows:

(A) For each course monitoring and candidate tire in the convoy, using the average tread depth measurements obtained in accordance with paragraph (e) (2) (vi) of this section and the corresponding mileages as data points, apply the method of least squares as described in Appendix C to this section to determine the estimated regression line of  $y$  on  $x$  given by the following formula:

$$y = a + \frac{bx}{1000}$$

Where:

$y$  = average tread depth in mills,  $x$  = miles after break-in.

$a$  =  $y$  intercept of regression line (reference tread depth) in mills, calculated using the method of least squares; and

$b$  = the slope of the regression line in mills of tread depth per 1,000 miles, calculated using the method of least squares. This slope will be negative in value. The tire's wear rate is defined as the absolute value of the slope of the regression line.

(B) Average the wear rates of the four course monitoring tires as determined in accordance with paragraph (e) (2) (ix) (A) of this section.

(C) Determine the course severity adjustment factor by dividing the base wear rate for the course monitoring tire (see note below) by the average wear rate for the four course monitoring tires determined in accordance with paragraph (e) (2) (ix) (B) of this section.

NOTE: The base wear rates for the course monitoring tires will be furnished to the purchaser at the time of purchase.

(D) Determine the adjusted wear rate for each candidate tire by multiplying its wear rate determined in accordance with paragraph (e) (2) (ix) (A) of this section by the course severity adjustment factor determined in accordance with paragraph (e) (2) (ix) (C) of this section.

(E) Determine the projected mileage for each candidate tire using the following formula:

$$\text{Projected mileage} = \frac{1000(a-b)}{b} + 800$$

Where:

$a$  =  $y$  intercept of regression line (reference tread depth) for the candidate tire as determined in accordance with paragraph (e) (2) (ix) (A) of this section.

$b$  = the adjusted wear rate for the candidate tire as determined in accordance with paragraph (e) (2) (ix) (D) of this section.

(F) Compute the percentage of the NHTSA nominal treadwear value for each candidate tire using the following formula:

$$P = \frac{\text{Projected Mileage}}{30,000} \times 100$$

Round off the percentage to the nearest lower 10 percent increment.

(f) **Traction grading conditions and procedures—(1) Conditions.** (i) Tire traction performance is evaluated on skid pads that are established, and whose severity is monitored, by the NHTSA both for its compliance testing and for that of regulated persons. The test pavements are asphalt and concrete surfaces constructed in accordance with the specifications for pads "C" and "A" in the "Manual for the Construction and Maintenance of Skid Surfaces," National Technical Information Service No. DOT-HS-800-814. The surfaces have locked wheel traction coefficients when evaluated in accordance with paragraphs (f) (2) (i) through (f) (2) (vii) of this section of  $0.50 \pm 0.10$  for the asphalt and  $0.35 \pm 0.10$  for the concrete. The location of the skid pads is described in Appendix B to this section.

(ii) The standard tire is the American Society for Testing and Materials

(ASTM) E 501 "Standard Tire for Pavement Skid Resistance Tests."

(iii) The pavement surface is wetted in accordance with paragraph 3.5, "Pavement Wetting System," of ASTM Method E 274-70, "Skid Resistance of Paved Surfaces Using a Full-Scale Tire."

(iv) The test apparatus is a test trailer built in conformity with the specifications in paragraph 3, "Apparatus," of ASTM Method E 274-70, and instrumented in accordance with paragraph 3.3.2 of that method, except that "wheel load" in paragraph 3.2.2 and tire and rim specifications in paragraph 3.2.3 of that method are as specified in the procedures in paragraph (f) (2) of this section for standard and candidate tires.

(v) The test apparatus is calibrated in accordance with ASTM Method F 377-74, "Standard Method for Calibration of Braking Force for Testing of Pneumatic Tires" with the trailer's tires inflated to 24 psi and loaded to 1085 pounds.

(vi) Consecutive tests on the same surface are conducted not less than 30 seconds apart.

(vii) A standard tire is discarded in accordance with ASTM Method E 501.

(2) **Procedure.** (i) Prepare two standard tires as follows:

(A) Condition the tires by running them for 200 miles on a pavement surface.

(B) Mount each tire on a "test rim" as defined in S3 of Standard No. 109 (§ 571.109 of this chapter), or on any rim listed for use with that tire in the Appendix of Standard No. 110 (§ 571.110 of this chapter) that is of a width within  $-0+0.50$  inches of the "test rim" width. Then inflate the tire to 24 psi.

(C) Static balance each tire-rim combination.

(D) Allow each tire to cool to ambient temperature and readjust its inflation pressure to 24 psi.

(ii) Mount the tires on the test apparatus described in paragraph (f) (1) (iv) of

$u_a$  = Measured candidate tire coefficient for asphalt + 0.50  
— Measured standard tire coefficient for asphalt

(x) Compute a candidate tire's adjusted traction coefficient for concrete ( $u_c$ ) by the following formula:

$u_c$  = Measured candidate tire coefficient for concrete + 0.35  
— Measured standard tire coefficient for concrete

(g) **Temperature resistance grading.** (1) Mount the tire on any test rim as defined in S3 of Standard No. 109 (§ 571.109 of this chapter) and inflate it to 2 pounds per square inch less than its maximum permissible inflation pressure.

(2) Condition the tire-rim assembly at an ambient temperature of 105° F. for 3 hours.

(3) Adjust the pressure again to 2 pounds per square inch less than the maximum permissible inflation pressure.

(4) Mount the tire-rim assembly on an axle, and press the tire tread against the surface of a flat-faced steel test wheel that is 67.23 inches in diameter and at least as wide as the section width of the tire.

this section and load each tire to 1085 pounds.

(iii) Tow the trailer on the asphalt test surface specified in paragraph (f) (1) (i) of this section at a speed of 40 mph, lock one trailer wheel, and record the locked-wheel traction coefficient on the tire associated with that wheel between 0.5 and 1.5 seconds after lockup.

(iv) Repeat the test on the concrete surface, locking the same wheel.

(v) Repeat the tests specified in paragraphs (f) (2) (iii) and (f) (2) (iv) of this section for a total of 10 measurements on each test surface.

(vi) Repeat the procedures specified in paragraphs (f) (2) (iii) through (f) (2) (v) of this section, locking the wheel associated with the other tire.

(vii) Average the 20 measurements taken on the asphalt surface to find the standard tire traction coefficient for the asphalt surface. Average the 20 measurements taken on the concrete surface to find the standard tire traction coefficient for the concrete surface.

(viii) Prepare two candidate tires of the same construction type, manufacturer, line, and size designation in accordance with paragraph (f) (2) (i) of this section, mount them on the test apparatus, and test one of them according to the procedures of paragraphs (f) (2) (ii) through (v) of this section, except load each tire to 85 percent of the load specified at 24 psi for the tires' size designation in Appendix A of Standard No. 109 (§ 571.109 of this chapter). Average the 10 measurements taken on the asphalt surface to find the candidate tire traction coefficient for the asphalt surface. Average the 10 measurements taken on the concrete surface to find the candidate tire traction coefficient for the concrete surface.

(ix) Compute a candidate tire's adjusted traction coefficient for asphalt ( $u_a$ ) by the following formula:

$u_a$  = Measured candidate tire's adjusted traction coefficient for asphalt + 0.50  
— Measured standard tire coefficient for asphalt

(x) Compute a candidate tire's adjusted traction coefficient for concrete ( $u_c$ ) by the following formula:

$u_c$  = Measured candidate tire coefficient for concrete + 0.35  
— Measured standard tire coefficient for concrete

(5) During the test, including the pressure measurements specified in paragraphs (g) (1) and (g) (3) of this section, maintain the temperature of the ambient air, as measured 12 inches from the edge of the rim flange at any point on the circumference on either side of the tire, at 105° F. Locate the temperature sensor so that its readings are not affected by heat radiation, drafts, variations in the temperature of the surrounding air, or guards or other devices.

(6) Press the tire against the test wheel at the load specified in Appendix A of § 571.109 of this chapter (Motor Vehicle Safety Standard No. 109) for the tire's size designation and the inflation pressure that is 8 pounds per square inch less than the tire's maximum permissible inflation pressure.

(7) Rotate the test wheel at 250 rpm for 2 hours.

(8) Remove the load, allow the tire to cool to 105° F. or for 2 hours, whichever occurs last, and readjust the inflation pressure to 2 pounds per square inch less than the tire's maximum permissible inflation pressure.

(9) Reapply the load and without interruption or readjustment of inflation pressure, rotate the test wheel at 375 rpm for 30 minutes, and then at successively higher rates in 25 rpm increments, each for 30 minutes, until the tire has run at 575 rpm for 30 minutes, or to failure, whichever occurs first.

**Temperature** The temperature grades are A (the highest), B, and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal motor vehicle safety standards. Grades B and A represent higher levels of performance than the minimum required by law.

#### APPENDIX A—TREADWEAR TEST COURSE AND DRIVING PROCEDURES

**Introduction.** The test course consists of three loops of a total of 400 miles in the geographical vicinity of Goodfellow AFB, San Angelo, Texas.

The first loop runs south 143 miles through the cities of Eldorado, Sonora, and Juno, Texas, to the Camp Hudson Historical Marker, and returns by the same route.

The second loop runs northwest toward Robert Lee, through Water Valley, and returns to the vicinity of Goodfellow AFB.

The third loop runs east over Farm and Ranch Roads (FM) and returns to the starting point.

**Route.** The route is shown in Figure 3. The table identifies key points by number. These numbers are encircled in Figure 3 and in parentheses in the descriptive material that follows.

**Southern Loop.** The course begins at the intersection (1) of Ft. McKavitt Road and Paint Rock Road (FM388) at the northwest corner of Goodfellow AFB. Drive east via FM388 to junction with Loop Road 306 (2). Turn right onto Loop Road 306 and proceed south to junction with US277 (3). Turn left onto US277 and proceed south through Eldorado and Sonora (4), continuing on US277 to junction with FM189 (5). Turn right onto FM189 and proceed to junction with Texas 163 (6). Turn left onto Texas 163, proceed south to Camp Hudson Historical Marker (7) and U-turn in highway. Reverse route to junction of Loop Road 306 and FM388 (2).

**Northwestern Loop.** Thru junction of Loop Road 306 and FM388 (2), proceed north on Loop Road 306, onto US277, to junction with FM2106 (8). Turn left onto FM2106 and proceed west to junction with US87 (9). Turn right on US87 and proceed northwest to the junction with FM2034 near the town of Water Valley (10). Turn right onto FM2034 and proceed north to Texas 208 (11). Turn right onto Texas 208 and proceed south to junction with FM2105 (12). Turn left onto FM2105 and proceed east to junction with US277 (8). Turn right onto US277 and proceed south onto 306 to junction with 388 (2).

**Eastern Loop.** From junction of Loop Road 306 and FM388 (2) make left turn onto FM388 and drive east to junction with FM2334 (13). Turn right onto FM2334 and proceed south across FM765 (14) to junction of FM2384 and US87 (15). Make U-turn and return to junction of FM388 and Loop Road 306 (2) by the same route. Proceed to start-

upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices, and differences in road characteristics and climate.

The traction grades are \*\* (the highest), \*, and 0, and represent the tire's ability to stop on wet pavements as measured on asphalt and concrete test surfaces. A tire marked 0 for traction may have poor traction performance.

OPTION 2

Locate quality grades between the shoulder and the maximum section width.

Maximum Section Width

Note: The quality grades shall be in "Futura Bold, Modified, Condensed or Gothic" characters permanently molded (.020 to .040 deep) into or onto the tire as indicated.

FIGURE 1

FIGURE 2—DOT QUALITY GRADES

ALL PASSENGER CAR TIRES MUST CONFORM TO FEDERAL SAFETY REQUIREMENTS IN ADDITION TO THESE GRADES

**Treadwear** The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. For example, a tire graded 200 would wear twice as well on the government course as a tire graded 100. The relative performance of tires depends

**Traction**

ing point at junction of Ft. McKavitt Road and FM388 (1).

**Driving Instructions.** The drivers shall run at posted speed limits throughout the course unless an unsafe condition arises. If such condition arises, the speed should be reduced to the maximum safe operating speed.

**Braking procedures at STOP signs.** There are a number of intersections at which stops are required. At each of these intersections a series of signs is placed in a fixed order as follows:

#### SIGN LEGEND

Highway Intersection 1000 (or 2000) Feet  
STOP AHEAD  
Junction X X X  
Direction Sign (Mereta →)  
STOP or YIELD

**Procedures.** 1. Approach each intersection at the posted speed limit.

2. When abreast of the STOP AHEAD sign, apply the brakes so that the vehicle decelerates smoothly to 10 mph when abreast of the direction sign.

3. Come to a complete stop at the STOP sign or behind any vehicle already stopped.

FIGURE 3

#### APPENDIX B—TRACTION SKID PADS

Two skid pads have been laid on an unused runway and taxi strip on Goodfellow AFB. Their location is shown in Figure 4.

The asphalt skid pad is 600 ft. x 60 ft. and is shown in black on the runway in Figure 2. The pad is approached from either

end by a 75 ft. ramp followed by 100 ft. of level pavement. This arrangement permits the skid trailers to stabilize before reaching the test area. The approaches are shown on the figure by the hash-marked area.

The concrete pad is 600 ft. x 48 ft. and is on the taxi strip. The approaches to the

## RULES AND REGULATIONS

concrete pad are of the same design as those for the asphalt pads.

A two lane asphalt road has been built to connect the runway and taxi strip. The road is parallel to the northeast-southwest runway at a distance of 100 ft. The curves have super-elevation to permit safe exit from the runway at operating speeds.

FIGURE 4

FEDERAL REGISTER, VOL. 40, NO. 103—WEDNESDAY, MAY 28, 1975

## RULES AND REGULATIONS

23083

In this graph,  $(x_j, y_j)$  [ $j=0, 1, \dots, 8$ ] are the individual data points representing the tread depth measurements (the overall average for the tire with 6 measurements in each tire groove) at the beginning of the test (after break-in) and at the end of each 800-mile segment of the test.

The absolute value of the slope of the regression line is an expression of the miles of tread worn per 1,000 miles, and is calculated by the following formula:

$$b = 1000 \frac{\left( \sum_{j=0}^8 x_j y_j - \frac{1}{9} \sum_{j=0}^8 x_j \sum_{j=0}^8 y_j \right)}{\sum_{j=0}^8 x_j^2 - \frac{1}{9} \left( \sum_{j=0}^8 x_j \right)^2}$$

The "y" intercept of the regression line (a) in miles is calculated by the following formula:

$$a = \frac{1}{9} \sum_{j=0}^8 y_j - \frac{b}{9000} \sum_{j=0}^8 x_j$$

#### POTATO RESEARCH AND PROMOTION PLAN

Proposed Expenses and Rate of Assessment

Consideration is being given to the approval of the expenses and rate of assessment, hereinafter set forth, which were recommended by the National Potato Promotion Board, established pursuant to the Potato Research and Promotion Plan (7 CFR 1207; 37 FR 5008).

This research and promotion program is effective pursuant to the Potato Research and Promotion Act (title III of Public Law 91-670; 91st Congress, approved January 11, 1971, 84 Stat. 3041).

All persons who desire to submit written data, views, or arguments in connection with these proposals may file the same, in duplicate, with the Hearing Clerk, Room 112-A, U.S. Department of Agriculture, Washington, D.C. 20250, not later than June 12, 1975. All written submissions made pursuant to this notice will be made available for public inspection at the office of the hearing clerk during regular business hours (7 CFR 1.27(b)).

The proposals are as follows:

#### § 1207.401 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period beginning July 1, 1975, and ending June 30, 1976, by the National Potato Promotion Board for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate will amount to \$1,780,000.

(b) The rate of assessment to be paid by each designated handler in accordance with the provisions of the plan shall be 1 cent (\$0.01) per hundredweight of assessable potatoes handled by him as the designated handler thereof during said fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as an operating monetary reserve.

(d) Terms used in this section have the same meaning as when used in the Potato Research and Promotion Plan.

Dated: May 22, 1975.

### DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[ 14 CFR Part 71 ]

[ Airspace Docket No. 75-NW-12 ]

#### TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration (FAA) is considering an amendment of Part 71 of the Federal Aviation Regulations that would alter the description of the Burley, Idaho, transition area.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures, and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108. All communications received on or before June 27, 1975, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Washington 98108.

The Burley VOR/DME-B Instrument Approach Procedure has recently been revised. A review of this revision disclosed that additional Transition Area

would be required in order to provide controlled airspace to the procedure.

In consideration of the foregoing, and to clarify the description, the FAA proposes to amend Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (40 FR 441) the description of the Burley, Idaho, transition area is amended to read as follows:

All after that portion of the description beginning "... and that airspace extending upward from 1200 feet above the surface ..." is deleted and the following is substituted, therefor,

"... that airspace extending upward from 1200 feet above the surface north of Burley bounded by a line 8 miles northwest of, and parallel to, V-365 extending from the Burley VORTAC to the south edge of V-500; that airspace northeast of Burley bounded on the northeast by V-500, on the southeast by V-260, on the northwest by V-366; that airspace east of Burley bounded on the north by V-260 on the east by an arc of a 28-mile radius circle, centered on the Burley VORTAC, on the southwest by V-4; that airspace southeast of Burley bounded on the north by V-4, on the southeast by an arc of a 38.5 mile circle centered on the Burley Municipal Airport (Latitude 42°32'29" N; Longitude 113°46'27" W) on the southwest by the northeast edge of V-10; that airspace southwest of Burley bounded by a line 10 miles southeast of, and parallel to, the Burley VORTAC 223° radial extending from the VORTAC 19 miles southwest.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Seattle, Wash., on May 16, 1975.

C. B. WALK, JR.,  
Director, Northwest Region.

### Federal Highway Administration

[ 49 CFR Part 393 ]

[ Docket No. MC-63; Notice No. 75-6 ]

#### INSTALLATION OF TACHOGRAPHS IN BUSES

##### Advance Notice of Proposed Rule Making

The purpose of this notice is to invite interested persons to submit comments on a petition for rule making filed with the Bureau of Motor Carrier Safety, requesting the Director of the Bureau to amend the Federal Motor Carrier Safety Regulations to require the installation and use of tachographs in buses operated by common and contract motor carriers engaged in interstate or foreign commerce. The petition was filed by Sangamo Electric Company (Sangamo) of

Springfield, Illinois, a manufacturer of tachographs.

A tachograph is a device which, when installed in a motor vehicle, produces an automatic written record of certain vehicle operation functions, such as engine speed, vehicle speed, and engine operation and shut-off. The record is produced on a chart, and the recording equipment is controlled by a clockwork mechanism, so that the time at which changes in the operating characteristics being recorded took place can be ascertained by reading the chart. The tachograph may also provide the driver with a visible indication of vehicle speed, engine revolutions per minute, or both.

In support of the petition, Sangamo has submitted data purporting to show that mandatory installation of tachographs in commercial motor vehicles would be justified on the basis of improved safety and would result in an overall reduction of operating costs for the motor carrier industry. With respect to the first issue—safety justification—the petitioner has presented a study of comparative statistics relating to the performance of selected motor carriers of property chosen from a list of the 100 largest Class I common and contract carriers, published by "Commercial Car Journal" magazine.

The petitioner has divided the carriers selected into two classes, those who equip their fleets with tachographs and those who do not. It has then compared the Bureau's statistics on safety performance of the two classes for the years 1971 and 1972. The results of its study indicate that carriers who use tachographs have an accident rate of 1.93 per million miles of intercity operations, a fatality rate of 7.23 per hundred million miles of operation, a rate of bodily injury of 1.03 per million miles, and have accidents resulting in an average of \$4,716 in property damage per million miles. The petitioner contrasts these figures with the record compiled by selected Class I motor carriers who do not use tachographs: 2.42 accidents per million miles of operation, 8.34 fatalities per hundred million miles of operation, 1.15 bodily injuries per million miles, and average property damage of \$5,699 per million miles.

On the subject of buses, Sangamo notes that New York is the only State which by law requires its school buses to be equipped with speed-recording devices. New York, it says, has a school bus accident record that is second best of all the States and that is considerably better than the national average.

Sangamo places considerable emphasis on cost savings attributed to the installation of tachographs. The installed cost of "the tachograph model most often used" is said to be about \$185, with maintenance expenses running between \$20 and \$25 per year. These added expendi-

Sangamo has also filed a petition for rulemaking seeking issuance of a rule requiring installation and use of tachographs on certain motor vehicles used to transport hazardous materials. This petition will be the subject of a separate notice to be issued by the Bureau at a later date.

tures for the installation and maintenance of tachographs, Sangamo contends, are more than offset by savings in two areas: First, there are "operational savings resulting from the control of speed" and the availability of a vehicle operational record that can be used to schedule vehicle operations and maintenance and to ensure efficient use of equipment. Second, Sangamo asserts that certain insurance companies are willing to give motor carriers who have tachographs installed in their fleets reductions in their premiums for liability and collision coverage.

Sangamo concedes that a tachograph is not fully tamperproof, but argues that it is possible to construct the device so that unauthorized removal of the tachograph chart can readily be detected. Specifications for its current models indicate that a mark or notch is made in the chart whenever it is removed from the housing.

The petition proposed that the Director specify that an acceptable tachograph must have the following features:

A. *Visual indicators.* 1. Dial with pointer to indicate vehicle speed in miles per hour, readily visible to the driver of the vehicle at all times.

2. Resettable odometer to record total miles traveled by the vehicle, up to at least 1 million miles.

3. A signal, visible or audible, to indicate to the driver of the vehicle when it is exceeding a pre-set rate of speed.

B. *Chart records.* Charts, when placed in the recording instrument and operated under environmental conditions surrounding the instrument as installed in the vehicle, shall provide a permanent record, visually readable when removed from the instrument, of the following:

a. Speed of the vehicle in miles per hour.

b. Distance traveled by the vehicle in miles.

c. Vehicle's engine ignition on and off.

d. Indication of movement or non-movement of the vehicle over the road.

e. Time scales to indicate when the chart is advanced by an accurate clock drive mechanism, the hour and approximate minute when events a, b, c and d above occurred.

f. Spaces to enter date, time and odometer mileage reading when chart installed and when removed.

g. Spaces to enter name of driver at start of trip, and name of relief driver if such a change is made during the trip.

c. *Installation and controls.* 1. Mechanical provisions for installation of the recording instrument in a position readily visible to the driver.

2. Provision by: (a) Lock and key, or (b) seal, to secure the recording instrument enclosure containing the chart to prevent or detect unauthorized access, and to assure that the specified recorded data is automatically recorded by the instrument without manual alteration.

3. Mechanical marker or notching blade, to record on the chart the hour and approximate minute each time the recording instrument is opened or closed.

D. *Retention of chart records.* 1. Charts automatically recorded by the recording instrument shall be kept on file by the persons responsible for operation of the vehicles for a period of at least 2 years.

2. Charts shall be made available by the persons responsible for operation of the vehicles for inspection and review by any authorized representative of the Bureau of Motor Carrier Safety.

E. *Specifications.* 1. Recording instruments as a minimum shall meet motor vehicle industry standards comparable to specifications applicable to standard speedometers used on motor vehicles covered by these regulations. As a minimum the required recording instrument when properly installed and operated in a range of environments normal to those found in the interior of motor vehicles covered by this regulation, shall meet specifications for:

(a) Maintenance of specified accuracy under forces caused by shock, vibration, temperature and humidity.

(b) Visibility of all instrument indicators.

(c) Resistance to impact and corrosion of instrument's internal operating mechanisms, external cover, and mounting device.

Interested persons are invited to submit written data, views, or arguments pertaining to the subject-matter of the petition for rulemaking under consideration in this docket. All comments submitted should refer to the docket number and notice number that appear at the top of this document. Comments should be submitted in triplicate to the Director, Bureau of Motor Carrier Safety, Department of Transportation, Washington, D.C. 20590. All comments received before the close of business on September 2, 1975 will be considered before further action is taken on the petition for rulemaking. If further rulemaking action is deemed advisable, the Director will issue a notice of proposed rulemaking, setting forth the terms of the rule under consideration.

All comments received, as well as the original petition for rulemaking, will be available for examination in the public docket room of the Bureau of Motor Carrier Safety, Room 3401, 400 Seventh Street, SW., Washington, D.C., both before and after the closing date for comments.

This advance notice of proposed rulemaking is issued under the authority of section 204 of the Interstate Commerce Act, 49 U.S.C. 304, section 6 of the Department of Transportation Act, 49 U.S.C. 1655, and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 49 CFR 389.4, respectively.

Issued on May 16, 1975.

ROBERT A. KAYE,  
Director, Bureau of  
Motor Carrier Safety.

### Federal Railroad Administration

[ 49 CFR Ch. II ]

[ Docket No. RSSI-1, Notice 1 ]

#### SIGNAL SYSTEMS ON COMMUTER RAILROADS AND RAPID TRANSIT LINES

Standards; Correction

On May 2, 1975, the Federal Railroad Administration published in the FEDERAL REGISTER (40 FR 19209) an advanced notice of proposed rulemaking with respect to the development of safety regulations which would require the use of signal equipment which provides specified train

protection systems on railroads where commuter or rapid transit service is provided.

The fourth paragraph of the preamble text, entitled Background, is amended to read as follows:

"Also, in the past two years there have been four rear-end collisions on the Chicago Transit Authority as follows: Evans-ton, Illinois, November 1, 1973—33 injured; Chicago, Illinois, January 16, 1974—13 injured; Chicago, Illinois, May 10, 1974—214 injured; Chicago, Illinois, September 13, 1974—85 injured."

Issued in Washington, D.C., on May 19, 1975.

DONALD W. BENNETT,  
Chief Counsel.

[FR Doc. 75-13755 Filed 5-27-75; 8:45 am]

#### National Highway Traffic Safety Administration [49 CFR Part 571]

[Docket No. 75-2, Notice 01; Docket No. 75-3, Notice 01; Docket No. 73-34, Notice 02; Docket No. 73-20, Notice 04]

#### SCHOOL BUS SAFETY STANDARDS Comment Period Reopened

The purpose of this notice is to reopen the period for submission of comments to the recent notices proposing establishment of school bus safety standards relating to body joint strength, rollover protection, emergency exits, and fuel system integrity.

On February 28, 1975, new school bus requirements were proposed for rollover protection (40 FR 8570) and emergency exits (40 FR 8569), on March 13, 1975, for school bus body joint strength (40 FR 11738), and on April 16, 1975, for school bus fuel system integrity (40 FR 17036). The comment periods for these proposals have expired.

In a letter dated April 25, 1975, Representatives John E. Moss and Les Aspin requested that the period for submission of comments to the school bus standards relating to joint strength, rollover, and emergency exits be extended 30 days to provide time for further evaluation of the proposals. The letter explained that many members of Congress have only recently become aware of the notices and therefore have not had sufficient opportunity to prepare comments.

Since school bus safety has been a subject of great concern to the Congress, its members' analyses of the contents of the three school bus proposals is especially important.

Petitions were received from the Motor Vehicle Manufacturers Association and the Truck Body and Equipment Association requesting that the period for submission of comments to the proposed school bus provisions of Standard No. 301, "Fuel System Integrity," be extended to allow time for more detailed analysis of the requirements. These requests are considered meritorious since the test procedure proposed for school buses over 10,000 pounds GVWR is one which has not been previously used.

In light of the above, interested persons are again invited to submit data, views, and arguments concerning the proposals, cited above, to establish new requirements for school bus body joint strength, rollover protection, emergency exits, and fuel system integrity. All comments received before the close of business on June 26, 1975, will be considered before a rule on any of the above subjects is issued. Comments should be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590. Reference should be made to the following docket and notice numbers:

School Bus Body Joint Strength: Docket No. 73-34; Notice 02 Rollover Protection: Docket No. 75-2; Notice 01 Emergency Exits: Docket No. 75-3; Notice 01 Fuel System Integrity: Docket No. 73-20; Notice 04.

All comment received may be examined at the above address during business hours both before and after the closing date.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); Sec. 202, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1392); delegations of authority at 49 CFR 1.51 and 49 CFR 501.8)

Issued on May 21, 1975.

ROBERT L. CARTER,  
Associate Administrator,  
Motor Vehicle Programs.

#### ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 65]

#### ENFORCEMENT AUTHORITY

State and Federal Enforcement of Implementation Plan Requirement After Statutory Deadlines; Extension of Period for Comment

#### Correction

In FR Doc. 75-12736, appearing on page 21046, of the issue of Thursday, May 15, 1975, the word "able" in the third column, second paragraph, eleventh line, should be changed to read "unable".

[40 CFR Part 409]

[FRL 379-2]

#### SUGAR PROCESSING POINT SOURCE CATEGORY

Effluent Limitations and Guidelines; Availability and Extension of Public Comment Period

On February 27, 1975, the Agency published a notice of interim final rulemaking establishing effluent limitations and guidelines based on best practicable control technology currently available for the sugar processing point source category (40 FR 8493). Simultaneously a notice of proposed rules establishing effluent limitations and guidelines based on best available technology economically achievable, standards of performance for new sources, and pretreatment standards

for both existing and for new sources was published for the sugar processing point source category (40 FR 8506). Reference was made in the preambles to these notices of a technical report and an economic report prepared by the Agency in connection with the development of these regulations.

The report entitled "Development Document for Interim Final Effluent Limitations Guidelines and Proposed New Source Performance Standards for the Raw Cane Sugar Processing Segment of the Sugar Processing Point Source Category" details the analysis undertaken in support of the regulations and is available for inspection in the EPA Freedom of Information Center, Room 204, West Tower, Waterside Mall, Washington, D.C. 20460, at all EPA regional offices, and at State water pollution control offices. A supplementary analysis entitled "Economic Analysis of Proposed Effluent Guidelines, Sugar Cane Milling Industry" which discusses the possible economic effects of the regulation is also available for inspection at these locations. Copies of both of these documents have been sent to persons or institutions affected by the proposed regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). An additional limited number of copies of both reports are available. Persons wishing to obtain a copy may write the EPA Freedom of Information Center, Environmental Protection Agency, Washington, D.C. 20460, Attention: Ms. Ruth Brown.

All comments received on or before June 27, 1975, will be considered. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in the advance notice concerning public review procedures published on August 6, 1973 (38 FR 21202).

Dated: May 19, 1975.

JAMES L. AGEE,  
Assistant Administrator,  
Water and Hazardous Materials.

#### FEDERAL TRADE COMMISSION

[16 CFR Part 437]

#### FOOD ADVERTISING

#### Proposed Trade Regulation Rule

Notice of proceeding, statement of reasons for proposed rule, invitation to propose issues of specific fact for consideration in public hearings, invitation to comment on proposed rule, and proposed trade regulation rule.

Notice is hereby given that the Federal Trade Commission, pursuant to the Federal Trade Commission Act, as amended, 15 U.S.C. 41, et seq., the provisions of Part I, Subpart B of the Commission's procedures and rules of practice, 16 CFR 1.7, et seq., and section 553 of Subchapter II, Chapter 5, Title 5, U.S. Code (Administrative Procedure) has initiated a proceeding for the promulgation of a Trade Regulation Rule on Food Adver-

tising. Previous notice of proposed rule-making was published in the *FEDERAL REGISTER* on November 11, 1974, 39 FR 39842, and included a proposed rule. The Commission republishes the proposed rule below following the invitation to comment.

In addition to the proposed rule, the Commission republishes for comment through incorporation by reference: (a) The "Explanation And Basis Of Proceeding"; (b) the "Analysis And Statement of Issues By Section" (as amended 40 FR 6375), including certain issues relating to affirmative disclosure in food advertising; (c) the "Staff Statement of Fact, Law and Policy" (not adopted by the Commission) and the issues raised thereby, including, in particular, the form which the disclosures called for therein should take; (d) the text of a staff proposal for achieving the affirmative disclosure of nutrition information in food advertising (which neither the Commission nor the Bureau Director nor the Assistant Director for National Advertising is presently prepared to propose as part of the rule); and (e) specific provisions recommended by staff, but not proposed by the Commission, for inclusion in those sections of the proposed Rule which have been reserved. All of the above-mentioned materials were originally published on November 11, 1974 (39 FR 39842 et seq.), and copies are available upon request to the Federal Trade Commission.

In addition to the questions raised in the aforementioned materials on which the Commission invites comment, the Commission also seeks comments evaluating the economic impact of the rule on small business.

#### STATEMENT OF REASONS FOR THE PROPOSED RULE

It is the Commission's purpose, in issuing this statement, to set forth its reasons for proposing this Trade Regulation Rule with sufficient particularity to allow informed comment. The precise format of such statements may vary from rule to rule depending on the complexity of the issues involved. For the purpose of assisting the Commission's deliberations on this proposed rule, the Commission has determined that meaningful comment by the public will be facilitated by presenting, in addition to the republished materials, a statement describing the basic factual premises underlying the Commission's determination to propose the rule.

The Commission's objective in these proceedings is to develop rules which will assure the accuracy of nutrition claims without restricting the amount of useful information an advertiser may present and to evaluate the staff statement calling for industry-wide disclosure requirements that will inform consumers of the nutritional worth of advertised foods.

The Commission emphasizes that neither the statement of factual premises nor the issues set out in the materials accompanying the proposed rule should be interpreted as a designation of disputed issues of specific fact. Such design-

nations shall be made by the Commission or its duly authorized presiding official pursuant to the Commission's rules of practice.

#### STATEMENT

In recent years, the Commission has been particularly concerned with problems surrounding the advertising of food products. This concern was initially sparked, in part, by findings of the 1969 White House Conference on Food, Nutrition and Health. The 1969 White House Conference Report emphasized that significant sectors of the American population were either malnourished or not well-fed due, in part, to the fact that they lacked the requisite knowledge to make rational determinations of their nutritional needs.

Since food is of central importance to a consumer's health and finances, it is important that food advertisers' claims respecting their products' nutritional value be scrupulously accurate. The Commission has reason to believe that some current food advertising contains curately represent the nutritional worth of the advertised food or accurately describe particular nutrition characteristics being advertised.

The Commission has further reason to believe that the American consumer is being confronted with general advertising claims relating to the nutritional value of foods which have no commonly accepted or well-understood meanings and that definitions should be established so as to enable consumers to utilize these terms in making their food purchase decisions.

The Commission has determined that it has reason to believe the above statements on the basis of a staff review of food advertising which was aimed at identifying common food messages, analyzing the nutrition information they provide and identifying patterns of misleading nutrition claims. The staff's examination of food advertising has included consultations with experts from a variety of disciplines whose expertise bears upon the issues raised in this proposal. The Commission has not adopted any findings or conclusions of the staff. All findings in this proceeding shall be based solely on matter in the rulemaking record.

The Proposed Trade Regulation Rule on Food Advertising is designed to eliminate deception and unfairness which may result from the making of certain affirmative claims with respect to the nutritional value of foods. This proposed rule establishes uniform definitions for certain terms the use of which is subject to ambiguity and deception, and prohibits outright certain other claims the making of which is deceptive.

In addition, the staff of the Commission is of the view, for reasons described at length in its statement, that it is an unfair and deceptive act or practice under Section 5 for advertisers of food products to fail to disclose affirmatively certain information concerning the nutritive quality of advertised food products. The Commission is extremely con-

cerned about the considerations discussed in the staff statement, including the implications for food advertising raised by the Food and Drug Administration's nutrient labeling program. The Commission has therefore concluded that it is in the public interest to solicit comment on the staff statement, including, in particular, the form which the affirmative disclosures called for in that statement might take.

Furthermore, the Commission has for some years undertaken extensive adjudicative efforts in an attempt to remedy deceptive or unfair advertising by some food manufacturers. In past years the Commission has litigated many cases involving allegedly false or unfair advertising for foods and within the past four years has issued approximately twenty consent orders requiring food advertisers to cease and desist from the dissemination of certain misleading nutrition claims. The Commission, having reason to believe that adjudication alone is inadequate to establish well-defined legal standards for the guidance of consumers and food advertisers, undertakes herewith to define with specificity some acts or practices which may be unfair or deceptive and to prescribe requirements for the purpose of preventing such acts or practices.

#### INVITATION TO PROPOSE ISSUES OF SPECIFIC FACT FOR CONSIDERATION IN PUBLIC HEARINGS

All interested persons are hereby given notice of opportunity to propose any disputed issues of specific fact, in contrast to legislative fact, which are material and necessary to resolve. The Commission, or its duly authorized presiding official, shall, after reviewing submissions hereunder, identify any such issues in a Final Notice which will be published in the *FEDERAL REGISTER*. Such issues shall be considered in accordance with section 18(c) of the Federal Trade Commission Act as amended by Pub. L. 93-637, and rules promulgated thereunder. Proposals shall be accepted until not later than July 28, 1975, by the Special Assistant Director for Rulemaking, Federal Trade Commission, Washington, D.C. 20580. A proposal should be identified as a "Proposed Identifying Issues of Specific Fact—Food Advertising," and furnished, when feasible and not burdensome, in five copies.

#### INVITATION TO COMMENT ON THE PROPOSED RULE

All interested persons are hereby notified that they may also submit to the Special Assistant Director for Rulemaking, Federal Trade Commission, Washington, D.C. 20580, data, views or arguments on any issue of fact, law or policy which may have some bearing upon the proposed rule. Written comments, other than proposals identifying issues of specific fact, will be accepted until ten (10) days before commencement of public hearings, but at least until July 28, 1975. The times and places of public hearings will be set forth in a later notice which will be published in the *FEDERAL REGISTER*.

To assure prompt consideration of a comment, it should be identified as a "Food Advertising Comment," and furnished, when feasible and not burdensome, in five copies.

Interested persons should also be advised that the Commission will consider all data, views, arguments or any other relevant information previously submitted on the public record in this matter since notice of publication in the *Federal Register* on November 11, 1974 (39 FR 39842 et seq.). Resubmission of previously filed data, views, arguments or other relevant information is not required.

In accordance with above, the Commission has proposed to amend Subchapter D, Trade Regulation Rules, Chapter I of 16 CFR by adding a new Part 437 to read as below.

Issued: May 23, 1975.

By direction of the Commission.

[SEAL] CHARLES A. TOBIN,  
Secretary.

- Sec. 437.0 Preamble.
- Subpart A—General
- 437.1 Definitions.
- 437.2 Form, content and method of making disclosures.
- Subpart B—Voluntary Claims
- 437.3 Emphatic nutrition claims.
- 437.4 Nutrient comparison claims.
- 437.5 Nourishment claims.
- 437.6 Natural and organic food claims [Reserved].
- 437.7 Claims for foods intended to be combined with other foods.
- 437.8 Energy and calorie claims.
- 437.9 Fat, fatty acid and cholesterol content claims [Reserved].
- 437.10 Health and related claims [Reserved].
- AUTHORITY: 38 Stat. 717, as amended; (15 U.S.C. 41-58).

#### § 437.0 Preamble.

In connection with the advertising of foods in commerce, as "commerce" is defined in the Federal Trade Commission Act, for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase of food, it is an unfair method of competition and an unfair or deceptive act or practice within the meaning of sections 5 and 12 of that Act to fail to comply with the following provisions of this Trade Regulation Rule:

#### Subpart A—General

##### § 437.1 Definitions.

For the purpose of this rule the following definitions shall apply:

(a) "Advertisement" or "Advertising." Any written or verbal statement, illustration, or depiction, other than a label or in the labeling, which is designed to effect the sale of any food product, or to create interest in the purchase of such product, whether the same appears in a newspaper, magazine, leaflet, circular, mailer, book insert, catalog, sales promotional material, other periodical literature (except professional or scientific journals), billboard, public transit card, or in a radio or television broadcast or in any other media. It does not

include point-of-purchase advertising or any promotional material developed and/or disseminated by retail supermarket and food store establishments and wholesale food distributors the content of which refers solely to the price of an advertised food and which does not contain representations regarding nutrition, nourishment, or other nutrition claims relative to the product.

(b) "Food." Any article used for food or drink by humans, including chewing gum. However, it does not include:

(1) Special formula foods which are developed, intended or marketed exclusively for infants (persons not more than 12 months of age) and which provide the complete nutritional requirements of infants.

(2) Foods represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions and advertised only in professional journals or publications.

(3) Alcoholic beverages subject to the provisions of the Federal Alcohol Administration Act of 1935 (27 U.S.C. section 201 et seq.).

(c) "Nutrients." Protein and those vitamins and minerals listed in 21 CFR 1.17(c) (7) (iv) and 21 CFR 125.1(b).

(d) "United States Recommended Daily Allowances" (U.S. RDA). The nutrients and levels established, subject to amendment, in 21 CFR 125.1.

(e) "Serving." That reasonable quantity of food suited for or practicable of consumption as part of a meal by an adult male engaged in light physical activity or by a child who is more than 12 months of age (when the food purports or is represented to be for consumption by any such child); or, if a nutrient label is affixed to the container of the advertised food, "serving" shall be the same measure as that which is stated on the label.

(f) "Portion." The amount of a food customarily used only as an ingredient in the preparation of a meal component or, if a nutrient label is affixed to the container of the advertised food, "portion" shall be the same measure as that which is stated on the label (e.g., ½ cup of flour, ½ tablespoon of cooking oil).

(g) "Clearly and Conspicuously Disclose." (1) Disclosing in a manner which can be easily understood (in the case of television and print advertising, also easily seen and read) by the casual observer, listener, or reader among members of the public and which conforms (except where otherwise provided in this rule), for advertising in any media, in all relevant respects to the Commission's Statement of Enforcement Policy of October 21, 1970. (See Vol. 2, CCH Trade Regulation Reporter section 7569.09.) Each disclosure shall be presented in the same language principally employed in the advertisement. (See Commission's Statement of Policy of July 24, 1973, as amended, 38 FR 21494-95.)

(2) In any television advertisement any disclosure of information shall be made in the manner and form prescribed by § 437.2(g).

(3) In any print advertisement any disclosure of information shall be made

in the manner and form prescribed by § 437.2(h).

(h) "Representation" or "Represent." Any direct or indirect statement, suggestion or implication in advertising, including but not limited to one which is made orally, in writing, pictorially, or by any other audio or visual means, or by any combination thereof.

(i) "Protein Efficiency Ratio" (PER). The protein efficiency ratio (PER) shall be determined in accordance with the method described in 21 CFR 1.17(c) (4).

#### § 437.2 Form, content and method of making disclosures.

Any disclosure required or described by any provision of this rule shall be made in accordance with the following general provisions of this rule and as may be specifically prescribed in a section dealing with that particular disclosure.

(a) *Nutrients.* (1) Any advertisement which contains a representation concerning a nutrient or a disclosure of a nutrient shall make such representation or disclosure only from among the nutrients listed in 21 CFR 1.17(c) (7) (iv) and 21 CFR 125.1(b).

(2) A food shall not be represented in advertising as containing a nutrient, unless (i) the nutrient's (a) identity (stated as the common or usual name) and (b) amount (expressed as a percentage of the U.S. RDA contained in a stated serving of the advertised food) are clearly and conspicuously disclosed in accordance with all the provisions of this subpart of this rule, and unless (ii) a serving of such food contains the identified nutrient in an amount of 10 percent or more of the U.S. RDA; *Provided, however,* That, in instances where a food or a serving thereof is not required to contain a nutrient at a certain percentage of the U.S. RDA before a voluntary claim is made, an advertisement may represent the presence of nutrients contained in amounts of less than 10 percent of the U.S. RDA per serving if the identities of all nutrients required to be disclosed by 21 CFR 1.17 when a nutrition claim is made, as well as their respective percentages of the U.S. RDA per serving (including zero percent), are clearly and conspicuously disclosed in accordance with all of the provisions of this subpart of this rule. If a food or a serving thereof is required to contain any nutrient at a certain percentage of the U.S. RDA before a voluntary claim may be made (see Subpart B), the actual percentage (prior to any rounding off) of the U.S. RDA at which any such nutrient is contained in the advertised food or a serving thereof shall determine whether the condition(s) for making the claim has (have) been satisfied.

(3) An advertised food or a serving thereof may not be represented as containing a nutrient in an amount of 50 percent or more of the U.S. RDA, unless such food or serving contains the identified nutrient only in a naturally occurring (indigenous) form or such nutrient has been added in compliance with 21 CFR 1.17(a) (2).

(4) Disclosures of nutrients shall be expressed to the nearest two percent increment up to and including the 10 percent level; to the nearest five percent increment above the 10 percent level and up to and including the 50 percent level; and to the nearest 10 percent increment above the 50 percent level. If the percentage falls equidistant between the upper and lower increment in any percentage level, the disclosure shall be expressed as the lower increment.

(b) *Protein.* (1) The percentage of the U.S. RDA of protein present per serving of the advertised food shall be based on a U.S. RDA of 45 grams of protein, if the total protein has a PER equal to or greater than the PER or casein; or based on a U.S. RDA of 65 grams of protein, if the total protein has a PER less than that of casein.

(2) Except with respect to the amount of protein as permitted by the proviso in paragraph (a) (2) of this section, representations in advertising of the presence of protein may be made only if a serving of the advertised food contains protein at a level of 10 percent or more of the U.S. RDA and the total protein in the advertised food alone has a PER of 20 percent or more of the PER of casein.

(c) *Analytical methods.* The procedures and methods used for determining the amount of any nutrient contained in an advertised food shall be in accord with the provisions of 21 CFR 1.17 or, where applicable, 9 CFR.

(d) *Calories.* The energy content of a food shall be stated in calories per serving, expressed to the nearest two calorie increment up to and including 20 calories; to the nearest five calorie increment above 20 calories and up to and including 50 calories; and to the nearest 10 calorie increment above 50 calories. Calorie content shall be determined in the manner described in 21 CFR 1.17(c) (3).

(e) *Serving or portion.* Statements regarding servings or portions shall be consistently stated in terms of a convenient unit of such food or a convenient unit of measure that can be easily identified as an average or usual serving or portion and can be readily understood as such by purchasers of such food. Servings or portions may be expressed in terms of ounces, fluid ounces, tablespoonfuls, cupfuls, or other customary or usual units, and shall be consistent with the applicable provisions of 21 CFR 1.17. Provisions of this rule which refer to "servings" shall be construed to mean "portions" if the use of the latter term would be more appropriate with respect to a particular food or ingredient.

(f) *Identification and designation of foods.* A food shall be identified or designated in accordance with any applicable Federal regulations prescribed in the Code of Federal Regulations. Non-standardized foods shall be identified or designated by their respective common or usual names, if such exist, pursuant to 21 CFR Part 102.

(g) *Television advertisements—method and form of disclosures.* Under § 437.2 (a) and (b) and Subpart B of this rule, any disclosure in any television advertisement shall be made in the same portion (audio or video) of the advertisement in which the voluntary claim is made. The video portion of the disclosure in each advertisement shall be prominently displayed in the form of a super or title, or prominently displayed on the screen by itself so as to enable it to be completely and easily seen and read on all television sets, regardless of picture tube size, that are commonly available for purchase by the consuming public. Any disclosure required by Subpart B of this rule in any advertisement shall be made in immediate conjunction with the voluntary claim which creates the requirement for such disclosure.

(h) *Print advertisements—method and form of disclosures.* (1) Any disclosure in a print or display advertisement shall be prominently displayed in any sans serif type style consistent with the requirements set forth in § 437.1(g) (1) and hereinbelow, but in no event in condensed type. The type shall be set on a slug at least one point larger than the point size of the type (not solid), using only normal word and letter spacing. A determination of whether a particular disclosure is "clear and conspicuous" within the definition set forth under § 437.1(g) (1) of this rule shall be made by examining the context of the total advertisement, but in no event shall a disclosure be deemed clear and conspicuous unless it appears in type of at least the following sizes, size being measured by the height of the smallest letter employed in making the disclosure:

(i) At least ¼ inch type, in advertisements of a trim size not larger than 65 square inches.

(ii) At least ⅜ inch type, in advertisements of a trim size larger than 65 square inches, but not larger than 110 square inches.

(iii) At least ½ inch type, in advertisements of a trim size larger than 110 square inches, but not larger than 180 square inches.

(iv) At least type of a size bearing the same proportion to the size of the advertisement as the proportion of ½ inch to 180 square inches, in print advertisements of a trim size larger than 180 square inches.

(v) For any billboard or other display advertisement (except one which is located in the interior of a public transit vehicle) normally viewed and read from a distance substantially greater than the normal range of reading distances for a book, newspaper, magazine, or other similar printed reading matter:

(a) At least ¼ inch type in advertisements of a trim size larger than 180 square inches, but not larger than 270 square inches.

(b) At least ⅜ inch type in advertisements of trim size larger than 270 square inches, but not larger than 1500 square inches.

(c) A size of one inch per 3000 square inches times the area of the advertisement expressed in square inches, i.e., size = (1 inch/3000 square inches) × (area of the advertisement in square inches), but in no event of a size less than ½

inch, in advertisements of trim size larger than 1500 square inches.

(2) If a print advertisement appears on more than one page, and if the total area of the advertisement is greater than the area of the largest page upon which it appears, the required type size shall be determined as though the advertisement were of an area equal to the area of the largest page upon which it appears.

(3) In the case of advertisements that are in whole or part lighted or reflectively surfaced or advertisements otherwise prepared for enhanced visibility, any disclosure shall be lighted or otherwise treated in the same manner as the most prominently lighted or otherwise specially treated portion of the advertisement.

(4) For multi-sided displays and like advertising material, the required type size shall be determined as though the advertisement were of an area equal to the area of the major display area of the display, and any disclosure shall be prominently positioned upon such display area.

(5) For unusual advertising materials or materials too small to reasonably comply with the requirements of paragraphs (h) (1) through (4) of this section, the Commission may establish acceptable alternative forms of making the required disclosures. A petition formally requesting permission to utilize an alternative form of disclosure may be submitted to the Secretary for due consideration by the Commission.

#### Subpart B—Voluntary Claims

##### § 437.3 Emphatic nutrition claims.

Emphatic, extraordinary, positive or similar claims concerning the nutritional value of a food with general or specific reference to any nutrient(s) contained in such food, including but not limited to the use of terms such as "lots (or 'full') of . . .", "high (or 'rich') in . . .", "packed (or 'loaded') with . . .", and "excellent (or 'significant' or 'good') source of . . ." shall not be used in advertising unless:

(a) The identity of any nutrient upon which the claim is based, as well as the percentage of the U.S. RDA per stated serving provided by each such identified nutrient, is clearly and conspicuously disclosed; and

(b) A serving of the advertised food contains each nutrient identified pursuant to paragraph (a) of this section in an amount of at least 35 percent of the U.S. RDA.

##### § 437.4 Nutrient comparison claims.

(a) Representations in advertising which make a comparative claim for the amount of any nutrient contained in an advertised food shall not be made, unless:

(1) The comparison is with an equal-sized serving of a commercially available food; and

(2) If a serving of the advertised food contains the same number of calories as or fewer calories than an equal-sized serving of the compared food, the compared food contains no more than two nutrients in amounts greater by 10 per-

## PROPOSED RULES

cent or more of the U.S. RDA than the amounts (including zero percent) at which the same two nutrients are contained in a serving of the advertised food; and

(3) If a serving of the advertised food contains more calories than an equal-sized serving of the compared food, the compared food contains no more than two nutrients in amounts greater on a per 100 calorie basis than the amounts (including zero percent) at which the same two nutrients are contained in a serving of the advertised food; and

(4) If the comparison concerns protein, a serving of the advertised food contains protein of at least the same quality as that contained in an equal-sized serving of the compared food; and

(5) The identities of the advertised and compared foods are clearly and conspicuously disclosed; and

(6) The advertised food and the food with which it is compared normally serve the same purpose in the diet; and

(7) The same nutrients are compared and the name of each such compared nutrient is clearly and conspicuously disclosed; and

(8) The percentage of the U.S. RDA of each compared nutrient provided by a stated serving of the advertised food is clearly and conspicuously disclosed; and

(9) If an advertised food is represented as one which contains any nutrient in any amount greater than the amount of such nutrient in another food, the amount contained in a serving of the advertised food exceeds that contained in an equal-sized serving of the compared food by at least 10 percent of the U.S. RDA.

(b) A food shall not be represented in advertising to be a substitute or replacement for another food (unless it is a food labeled "imitation" in compliance with 21 CFR 1.8), or as nutritious as another food, unless:

(1) A serving of the advertised food contains at least the same nutrients as those nutrients contained in an amount of 2 percent or more of the U.S. RDA in an equal-sized serving of the compared food, and each such nutrient is present in the advertised food in an amount which is at least equivalent to the amount at which each is contained in an equal-sized serving of the compared food; and

(2) If the compared food contains protein, a serving of the advertised food contains protein of at least the same quality as that contained in an equal-sized serving of the compared food; and

(3) The identity of the compared food and number of calories provided by equal-sized, stated servings of the advertised and compared foods, respectively, is clearly and conspicuously disclosed; and

(4) If the advertised food contains a higher fat content than the compared food, such fact, as well as the total fat content (in accordance with 21 CFR § 1.17(c)(6) and 1.18(c)(2)(i)), is clearly and conspicuously disclosed; and

(5) If an advertisement is for a food labeled "imitation" in compliance with 21 CFR 1.8, it is clearly and conspicuously

disclosed that such food is not as nutritious as the food for which it is intended to be a substitute or replacement.

(c) A food shall not be represented in advertising to be nutritionally superior to another food, unless:

(1) The nutrients in a serving of the advertised food provide at least 10 percent more of the U.S. RDA than are provided by those nutrients contained in an amount of 2 percent or more of the U.S. RDA in an equal-sized serving of the compared food; and

(2) If the compared food contains protein, a serving of the advertised food contains protein of at least the same quality as that contained in an equal-sized serving of the compared food; and

(3) The identity of the compared food and number of calories provided by equal-sized, stated servings of the advertised and compared foods, respectively, is clearly and conspicuously disclosed; and

(4) If the advertised food contains a higher fat content than the compared food, such fact, as well as the total fat content (in accordance with 21 CFR 1.17(c)(6) and 1.18(c)(2)(i)), is clearly and conspicuously disclosed.

## § 437.5 Nourishment claims.

(a) An advertisement shall not represent a food to be "nourishing", "wholesome", "nutritious", or use any other term of similar import which in any way states, suggests or implies that such food is a valuable or significant source of nutrition, unless a serving of the food contains at least four nutrients, including protein, each of which is present in an amount of at least 10 percent of the U.S. RDA per 100 calories, and unless at least one of such nutrients is present in a serving of such food in an amount of at least 10 percent of the U.S. RDA; *Provided, however*, That such terms may be used to describe any identified nutrient(s) which is (are) contained in such food (e.g., "nutritious Vitamin C"), subject to the provisions of § 437.2(a)(2) of this rule.

(b) A food or a serving thereof shall not be represented in advertising as providing all of the nutrients necessary for a sound, complete or balanced diet, unless it satisfies the U.S. RDA requirements for protein, vitamins and minerals prescribed in 21 CFR Part 125, and unless competent and reliable scientific tests demonstrate that such food is a total diet replacement.

(c) Subject to the provisions of paragraph (b) of this section, an advertisement shall not represent that an advertised food or a serving thereof alone is "perfect" or "nutritionally perfect", provides "complete nutrition", contains "all the good things you need", or use any other term of similar import which in any way states, suggests or implies that consumption of only the advertised food will provide enough nutrition to constitute a sufficient and full source of nutrition; or that consumption of the advertised food or a serving thereof maintains health, makes an individual well-fed or in any way is a unique, special or exclusive source of nutrition or health benefits.

(d) An advertisement shall not represent that a food or a serving thereof constitutes a nutritionally adequate meal, unless such advertised food or serving thereof complies with an applicable Federal regulation prescribed in the Code of Federal Regulations.

## § 437.6 Natural and organic food claims. [Reserved]

[See Explanation of Proceeding and Analysis and Statement of Issues by Section.]

## § 437.7 Claims for foods intended to be combined with other foods.

(a) If, in order to prepare a food for consumption, it is necessary for a consumer to add to an advertised food any other food(s), characterizing ingredient(s) or component(s), as such ingredient(s) or component(s) is (are) defined in 21 CFR 102.1, that fact shall be clearly and conspicuously disclosed in any advertisement for such food.

(b) An advertisement for a food described in paragraph (a) of this section may represent that consumption of a serving of the combination provides a designated percentage of the U.S. RDA of each of the nutrients contained in a serving of such combination, subject to the provisions of § 437.2(a)(2) of this rule. However, a representation that the advertised food alone provides a designated percentage of the U.S. RDA of the nutrients which are contained in a serving of such combination shall not be made.

(c) If a serving of the food(s), ingredient(s) or component(s) with which an advertised food is (are) necessarily combined contributes more than 50 percent of the U.S. RDA of any nutrient named in the advertisement, it shall be clearly and conspicuously disclosed that most of such nutrient is provided by such food(s), ingredient(s) or component(s).

(d) If an advertised food is frequently, but not necessarily, combined with any other food(s), ingredient(s) or component(s) for consumption, any representation regarding nutrition shall be based on the nutritional value of the advertised food alone.

## § 437.8 Energy and calorie claims.

(a) An advertisement shall not represent that a food or nutrient contains, produces, provides, enhances, or is a source of "energy" or "food energy", or use any other word, demonstration or depiction of similar import, unless it clearly and conspicuously discloses, in immediate conjunction with the making of each such representation, that "energy" or "food energy" is supplied by calories, as well as the number of calories contained in a stated serving of the advertised food.

(b) An advertisement shall not represent that consumption of a food or nutrient, by itself, will produce or provide health, general vigor, sustained energy or alertness, or that the energy from calories, by itself, will produce or provide strength, endurance, intellectual

performance, or the prevention or relief of fatigue.

(c) An advertisement shall not represent that consumption of a food in any way enhances or contributes to a person's vigor, energy, alertness, strength or endurance, unless it clearly and conspicuously discloses, in immediate conjunction with the making of each such representation:

(1) That such vigor, energy, alertness, strength or endurance is enhanced by and depends, in part, upon the calories in the food; and

(2) The number of calories contained in a stated serving of the advertised food.

(d) An advertisement shall not represent that consumption of any food or meal is useful for, or contributes in any way to, or is useful in, regulating or maintaining caloric intake or body weight by the use of any demonstration or depiction, or any word or phrase such as "diet", "dietetic", "low calorie", "low in calories", "fewer calories", "calorie reduced", "contains artificial sweeteners", "artificially sweetened", or any other demonstration, depiction or term of similar import, unless:

(1) The advertised food complies with the provisions of 21 CFR 125.6; and

## PROPOSED RULES

23091

(2) The number of calories contained in a stated serving of the advertised food is clearly and conspicuously disclosed.

(e) An advertisement for a food which makes any representation described in paragraph (d) of this section, and which contains any artificial sweetener, except one which serves an authorized technological purpose (as defined in 21 CFR 125.1(i)) shall comply with the provisions of paragraphs (d)(1) and (2) of this section, and

(1) Shall clearly and conspicuously disclose the number of calories contained in a stated, equal-sized serving of the same food made with nutritive sweeteners; and

(2) If the artificially sweetened product contains a nutritive sweetener, the advertisement shall clearly and conspicuously make the following specific disclosure:

This food contains sugars and should not be used by diabetics without the advice of a physician.

(f) An advertisement shall not represent that a food is "sugarless", "sugar free", "contains no sugar" or use any other term of similar import, unless such food contains no sugars, including, but

not limited to, sorbitol, mannitol, or other hexitol(s).

## § 437.9 Fat, fatty acid and cholesterol content claims. [Reserved]

[See Explanation of Proceeding and Analysis and Statement of Issues by Section.]

## § 437.10 Health and related claims. [Reserved]

[See Explanation of Proceeding and Analysis and Statement of Issues by Section.]

#### SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

##### Meeting

The working group on container operations of the Subcommittee on Safety of Life at Sea (SOLAS) will hold an open meeting at 9:30 a.m. on Wednesday, June 18, 1975 in Room 8334 of the Department of Transportation, 400 7th Street, SW., Washington, D.C.

The purpose of this meeting will be to discuss United States positions for the 16th session of the Intergovernmental Maritime Consultative Organization's (IMCO) Subcommittee on Containers and Cargoes scheduled to meet June 30, 1975 in London.

The principal items on the agenda for the 16th session are:

Decisions of the IMCO Maritime Safety Committee related to the work of the Subcommittee  
Carriage of Grain  
Code of Safe Practice for Bulk Cargoes  
International Convention for Safe Containers (CSC), 1973  
Code of Safe Practice for Ships Carrying Timber Deck Cargoes  
Safe Stowage and Securing of Cargo in non-container ships

The working group will also discuss a common American position on container standards for use in all foreign affairs forums; and problems concerning stowage of military explosives in commercial containers for overseas shipments.

Further information on this working group meeting may be obtained from Mr. M. H. Allen, Chairman of the working group on container operations. He may be reached by telephone on (area code 202) 426-1577.

Members of the public may submit written comments to the Chairman prior to June 12. The Chairman will, as time permits, entertain oral comments from members of the public attending the meeting.

RICHARD K. BANK,  
Chairman,

Shipping Coordinating Committee.

MAY 19, 1975.

[Public Notice CM-5/55]

#### SHIPPING COORDINATING COMMITTEE, SUBCOMMITTEE ON SAFETY OF LIFE AT SEA

##### Meeting

The working group on radio communications of the Subcommittee on Safety of Life at Sea (SOLAS) will hold an open meeting at 9:30 a.m. on Thursday, June 19, 1975 in Room 847 of the Federal Communications Commission, 1919 M Street, NW., Washington, D.C.

The purpose of the working groups' meeting will be to discuss the agenda and preparations for the 15th session of the Intergovernmental Maritime Consultative Organization's Subcommittee on Radio Communications, scheduled to be held in London, September 15-19, 1975. Among the items on the agenda for the 15th session are:

Actions taken by the Maritime Safety Committee at its thirty-second session;  
Operational standards for shipborne radio equipment;  
Report on the outcome of the Conference on the Establishment of an International Maritime Satellite System.

Requests for further information on the meeting should be directed to Captain W. T. Adams, Chairman of the working group on radio communications, United States Coast Guard, 400 7th Street, SW., Washington, D.C. 20590. He may be reached by telephone on (area code 202) 426-1345.

Members of the public may submit written comments to the Chairman prior to June 12. The Chairman will, as time permits, entertain oral comments from members of the public attending the meeting.

RICHARD K. BANK,  
Chairman,  
Shipping Coordinating Committee.

MAY 19, 1975.

Department of the Air Force

#### SCIENTIFIC ADVISORY BOARD

##### Meeting

MAY 22, 1975.

The USAF Scientific Advisory Board Electronics Panel on Prioritization of Electron Device Technology will hold a meeting on June 17 and 18, 1975 from 9:00 a.m. to 5:00 p.m. at the Air Force Avionics Laboratory, Wright Patterson Air Force Base, Ohio.

The meeting will be closed to the public in accordance with Title 5, U.S.C.

552(b) (1), (4) and (5). The Panel will receive classified and proprietary briefing on the present electron device technology base and anticipated Air Force development opportunities and requirements through FY 1981.

For further information, contact the Scientific Advisory Board Secretariat at 202-697-4648.

JAMES L. ELMER,  
Major, USAF Executive,  
Directorate of Administration.

### DEPARTMENT OF JUSTICE

#### Drug Enforcement Administration MANUFACTURE OF CONTROLLED SUBSTANCES

##### Application

Section 303(a) (1) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 823(a) (1)) states:

The Attorney General shall register an applicant to manufacture controlled substances in schedules I or II if he determines that such registration is consistent with the public interest and with United States obligations under international treaties, conventions, or protocols in effect on the effective date of this part. In determining the public interest, the following factors shall be considered:

(1) Maintenance of effective controls against diversion of particular controlled substances and any controlled substance in schedule I or II compounded therefrom into

other than legitimate medical, scientific, research, or industrial channels, by limiting the importation and bulk manufacture of such controlled substances to a number of establishments which can produce an adequate and uninterrupted supply of these substances under adequately competitive conditions for legitimate medical, scientific, research, and industrial purposes;

Section 1008 of the Controlled Substance Import and Export Act (21 U.S.C. 958(h)) provides that the Attorney General shall, prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in schedules I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Pursuant to § 1301.43 of Title 21 of the Code of Federal Regulations, notice is hereby given that on April 9, 1975, Regis Chemical Company, 8210 N. Austin Avenue, Morton Grove, Illinois 60053, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of mescaline, a basic class controlled substance listed in schedule I.

Any person registered to manufacture mescaline in bulk may, on or before July 1, 1975, file written comments on or objections to the issuance of the proposed registration and may, at the same time, file a written request for a hearing on the application (stating with particularity the objections or issues, if any, concerning which the person desires to be heard and a brief summary of his position on those objections or issues).

Comments and objections may be addressed to the Hearing Clerk, Office of the Administrative Law Judge, Drug Enforcement Administration, Room 1130, 1405 Eye Street, NW., Washington, D.C. 20537.

Dated: May 20, 1975.

JOHN R. BARTELS, Jr.,  
Administrator,  
Drug Enforcement Administration.

### DEPARTMENT OF THE INTERIOR

#### Fish and Wildlife Service

#### ENDANGERED SPECIES PERMIT

##### Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant, Idaho Cooperative Wildlife Research Unit, College of Forestry, Wildlife and Range Science, University of Idaho, Moscow, Idaho 83843. Dr. Maurice Hornocker, Leader, Dr. Roderick C. Drewien, Research Wildlife Biologist.

DEPARTMENT OF THE INTERIOR  
U.S. FISH AND WILDLIFE SERVICE  
FEDERAL FISH AND WILDLIFE  
LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one)  
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED:  
To transplant whooping crane eggs from Ft. Smith, Alberta, Canada to Grays Lake National Wildlife Refuge, Idaho and place eggs into nests of Greater Sandhill cranes. The eggs will be hatched and the young reared by the sandhill crane foster-parents. Subsequent activity will consist of close observation of foster-parent family groups and possible capture and leg banding of whooping crane chicks.

3. APPLICANT (Name, complete address and phone number of individual, business, agency, or institution for which permit is requested):  
Idaho Cooperative Wildlife Research Unit. The staff field investigator who will be handling the whooping cranes is Dr. Roderick C. Drewien, Research Wildlife Biologist, College FWR, Univ. of ID., Moscow, ID. 83843. Phone: 208-885-6433.

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:  
Field Investigator Description  
NAME: MR. DREWEN, R. C. HEIGHT: 5' 8" WEIGHT: 170 lbs.  
DATE OF BIRTH: 30 July 1939 COLOR HAIR: Brown COLOR EYES: Brown  
SOCIAL SECURITY NUMBER: 555-50-5042

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:  
Business, Agency, or Institution: Idaho Cooperative Wildlife Research Unit (Univ. of Idaho and U.S. Fish and Wildlife Service Cooperating) headquartered at College of Forestry, Wildlife & Range Sciences, Univ. of Idaho, Moscow, ID.

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED:  
Foster-parent experiment will be at Grays Lake National Wildlife Refuge and vicinity, Wayan, Idaho 83285.

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT?  
YES ☐ NO ☒ (If yes, list license or permit number): Fed. Banding Permit 5991

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSED?  
YES ☐ NO ☒ (If yes, list jurisdiction and type of document): Canadian government. Permits being secured by the Canadian Wildlife Service for handling of whooper eggs by their personnel.

9. CERTIFIED CHECK OR MONEY ORDER (If applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF:  
N/A

10. DESIRED EFFECTIVE DATE: 25 May 1975

11. DURATION NEEDED: 25 May 1975-30 June 1975

12. ATTACHMENTS: THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 17.23) MUST BE ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED:  
17.23 Zoological, educational, scientific, or propagation permits

CERTIFICATION  
I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.  
Signature: Maurice Hornocker DATE: 7 April, 1975

## ATTACHMENT—50 CFR 17.23(b)

Section 17.23. Zoological, educational, scientific, or propagation permits.

17.23(a)(1). This permit request is for the importation of up to 15 eggs of the whooping crane (*Grus americana*) from Canada in 1975 and a similar number of whooping crane eggs in 1976.

17.23(a)(2). Written agreement between the United States and the Canadian governments covering this research experiment is being prepared by the Directorate of the U.S. Fish and Wildlife Service.

17.23(a)(3). The eggs are to be taken from wild whooping crane nests (one egg from each 2-egg nest) at Wood Buffalo National Park, Northwest Territories, Canada. Personnel of the Canadian Wildlife Service will pick up the eggs, handle by incubator and insulated

carrying case in Canada, and transport them by jet aircraft to Idaho Falls or Pocatello, Idaho, where they will become the responsibility of the Idaho Cooperative Wildlife Research Unit.

The eggs, in their insulated carrying cases, will then be airlifted to Grays Lake National Wildlife Refuge where they will be placed in the nests of selected sandhill crane foster-parents for completion of incubation and hatching.

Continuous observational follow-up of the nests and the whooping crane chicks will be conducted. It is possible that whooping crane chicks will be color-banded by capturing chicks before they reach the flight stage.

Subsequent follow-up of the foster-parent crane families will be conducted as they migrate from Grays Lake in the fall, proceed

to their migration stopping point in the San Luis Valley in Colorado and go on to their wintering area on and in the vicinity of Bosque del Apache National Wildlife Refuge parent families will be observed throughout the winter and during their northbound migration the following spring. Dispersal and summer activities of the yearling whooping cranes will be monitored. A second transplant of whooping crane eggs from Wood Buffalo National Park, Canada, to Grays Lake, Idaho will occur in 1976, utilizing the same procedures.

Date: April 7, 1975.

Director, U.S. Fish and Wildlife Service, Chief, Division of Law Enforcement, Chief, Division of Wildlife Research—From Leader, Idaho Cooperative Wildlife Research Unit. Request for permit to conduct research on an endangered species.

As required by the Endangered Species Act of 1973, attached find application from the Idaho Cooperative Wildlife Research Unit for a permit to conduct research on endangered wildlife.

We are requesting permission to receive whooping crane eggs from the Canadian Wildlife Service at Idaho Falls or Pocatello, Idaho, transport the eggs to Grays Lake NWR by helicopter, place eggs in the nests of foster-parent greater sandhill cranes and conduct follow-up observations on the foster-parent families, with possible capture and leg-banding of whooping crane chicks.

It is our understanding that we will not require permit from the Canadian government since their personnel will be handling the eggs in Canada.

Sincerely,

MAURICE HORNOCKER,  
Unit Leader.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before June 27, 1975 will be considered.

Dated: May 20, 1975.

C. R. BAVIN,  
Chief, Division of Law Enforcement, U.S. Fish and Wildlife Service.

SUMMARY OF ATTACHMENTS TO PERMIT  
APPLICATION FROM TARZAN ZERBINI

Application for interstate transportation of circus act:

One male Siberian tiger, born March 14, 1971, in the Birmingham (Ala.) Zoo.

One male and two female Bengal tigers, born December 7, 1966, in the Cleveland (Ohio) Zoo.

15 lions, males and females.

The cages of the tigers are 7 ft. long, 7½ ft. wide, and 4 ft. high. The cages travel in a semi-truck/trailer. The semi has a door on the side for feeding during travel between engagements, and a 6000-pound freezer for the meat. The trailer is heated in the winter; in the summer all windows are open for air.

Five photographs, and a check for \$50.00.

## ATTACHMENT 2A—BROWN PELICAN

I request permission to continue my work with the Brown pelican, *P. occidentalis*, which has been in progress for over 25 years. It was in part through my efforts that the species was placed on the endangered list. Indirectly it brought about visits to the West Coast nesting colonies where the species was said to be in excellent condition numerically. Initial visits disclosed soft shelled eggs and practically no reproduction. To date I have banded about 11,000 pelicans, monitored the breeding success and carried out numerous studies regarding the species' life history. I have published my work on the Deveaux Bank site and worked for many years for its protection. On May 1 the site will be dedicated to the late Dr. Alexander Sprunt as a memorial to his many years of service to the Audubon Society.

It is my firm belief that it is only through banding that a true picture can be secured of the Brown pelican's breeding success and later mortality on the wintering grounds.

To date there has never been any form of harm occur from my efforts and I can

secure statements from personnel in your enforcement division.

## ATTACHMENT 2B—RED-COCKADED WOODPECKER

I request permission to continue my work with the Red-cockaded woodpecker, *D. borealis*, which has been in progress since 1969 and includes the color banding of about 200 individuals currently under study. It was in a large part my work and letters to the Secretary of the Interior that succeeded in acquiring the endangered species status.

My studies have been included in the Symposium Report—1971. I have published in Eastern Bird Banding—1974 acreage requirements of colonies in natural habitat areas.

I have been asked by the Forest Service and the Department of the Interior to assist in developing means of moving and introducing the species into habitat suitable but not in current use by the species.

I currently have enough information on the species to write a book on its life history, but in acquiring this information many more questions have been raised. I can easily see that another 10 years' work will

still leave many voids regarding its habits and needs.

Above all I do not want to feel as have previous authors Lignon and Lay—that they have published prematurely.

## EBRA NEWS

Winter 1974 Volume 37, No. 1  
 Published by the Eastern Bird Banding Association

## HABITAT ACREAGE REQUIREMENTS OF THE RED-COCKADED WOODPECKER BY T. A. BECKETT, III

The Red-cockaded woodpecker (*Dendrocopos borealis*) is one of numerous species of wildlife in habitat trouble. It is still considered common by some knowledgeable persons but it should remain on the endangered list. There is no species that we can more safely state is headed for extinction than this highly specialized and localized woodpecker. The main factor working against continuing this bird on the endangered list is the ease with which it may be found due to its habitat.

The Red-cockaded is a non-migratory species. It is sedentary in that individuals may be found for several years within a rather small area. My current studies indicate that the species has a relatively long life in favorable habitat. One of the most perplexing questions currently needing answering is—what is the minimum habitat in which the species can exist? This paper will not attempt to furnish any of these answers but will simply show that a certain number of clans of birds are found in an area that meets the need to isolate them from possible intrusions by adjacent birds.

This study represents a small segment of over 3 years' work in locating over 200 clans, study information from about 300 trees, and color banding about 200 birds. I know of no other North American species of bird that can be handled under wild conditions on a year-round basis as the need arises. I know of no other species about which so little information is in print and even that small amount is often in error.

The nomenclature used in this manuscript follows the proposed terms set forth in the published Symposium on the Red-cockaded Woodpecker, Bureau of Sport Fisheries and Wildlife, 1971, edited by R. L. Thompson.

To date there has been no factual information regarding the support timber and habitat needed by the Red-cockaded woodpecker in relatively "natural habitat." I know of no primitive areas, not altered by man, on which a study of this type might be based. It is true that possibly 1 or 2 colonies might be selected in isolated areas but these would be far from the type conditions under which the species came into existence.

This study is based on banding and observation periodically on a year-round basis covering a little over 3 years. Some first hand information regarding surrounding habitat and former clans dates back over 20 years. The tract limits itself to ready incursions by other members of the species by the surrounding vegetation. All highway and road names and numbers have been purposely deleted from the small scale map so that abnormal visits by birders might be kept to a minimum. They are available for any ornithologist seriously interested in the species for study purposes.

The study area is in a National Forest and follows most of the guide lines formulated by Melvin Hopkins and T. E. Lynn, Jr. in the previously mentioned symposium publication. Some suggestions are followed closely whereas others, such as raking around the base of hole trees, appear to be ignored. No attempt will be made to bring out changes that need to be made if the species is to

remain with us as a living bird. In fact we only know that changes must be made but have little knowledge of minimal needs.

The area receives prescribed burning, a necessity to maintain habitat, and periodic thinning. Logging is restricted in hole tree areas to the non-breeding seasons. In general the district foresters show a great deal of interest in preserving the Red-cockaded woodpecker. The loggers, "stumpers", and those holding "dead tree" permits are another matter. Their activities in and around hole trees need much greater control. Holders of "dead tree" permits have destroyed several clans.

Some critics may say that this study area is not normal habitat and should not be the basis for a population study, but I can assure them that the species, with very few exceptions, exists today over most of its present range under these rather artificial conditions. Due to ecological claims of air pollution even the needed periodic controlled burning is in danger of being banned. There can be little question that the current selective cutting has a tendency toward even aged management.

The area selected for this attempt to determine roughly the acreage needs was relatively isolated by the surrounding habitat. It contained 13 clans, composed of 70 Red-cockaded woodpeckers, 52 of which were color banded. To date there has been no evidence of any influx of birds from adjacent clans. From observations it was concluded that clans 12 and 13 spent roughly half of their feeding efforts across adjacent roads. They were both small clans, averaging over the 3 years period from 3 to 5 birds each. If we assume their habitat acreage requirements were equal we can eliminate one clan.

From current literature we can readily understand that any conclusions drawn from habitat acreage needed in this particular study site would not necessarily apply to other sites, such as some marginal areas of Florida or Texas. We do not, in fact, have a picture of what an optimum habitat consists. We can safely state that thinning of trees beyond a certain minimum will cause abandonment and abnormal predation in a clan.

One of the greatest problems in the study of the Red-cockaded woodpecker continues to be the fact that there is no species which approximates its life history. New questions continue to arise that have no parallel in the literature. Many of its current habits are possible relic in origin and no single answer will suffice in its current habitat utilization.

The greatest single need today is for our federal government to set aside, on public lands, areas to be manipulated for optimum use by the Red-cockaded woodpecker. These areas should be available for scientific study and possible manipulation to gain knowledge of minimal requirements of the species. If the Red-cockaded woodpecker is to survive in the current projected 25 to 30 year clear cut rotations that are in use on so much of our pine land in the south today, it needs help. I, for one, believe that this is highly possible and have some field observations that will support this line of thought.—Rt. 4, Charleston, S.C. 29407.

## DONALD B. SINIFF

## Issuance of Permit for Marine Mammals

On March 20, 1975, a notice was published in the FEDERAL REGISTER (40 FR 12690), that an application had been filed with the Fish and Wildlife Service by Dr. Donald B. Siniff and Dr. John R. Tester, Bio Science Center, University of Minnesota, St. Paul, Minnesota, for a permit to engage in sea otter research.

Notice is hereby given that on May 19, 1975, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Fish and Wildlife Service issued a permit to Donald B. Siniff, subject to certain conditions set forth therein. The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Dated: May 22, 1975.

C. R. BAVIN,  
 Chief, Division of Law Enforcement,  
 U.S. Fish and Wildlife Service.

## ENDANGERED SPECIES PERMIT

## Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (Pub. L. 93-205).

Applicant, Dr. F. Prescott Ward, Chief, Ecological Research Office, Biomedical Laboratory, Edgewood Arsenal, Aberdeen Proving Ground, Maryland 21010.

## DEPARTMENT OF THE ARMY

## HEADQUARTERS, EDGEWOOD ARSENAL

ABERDEEN PROVING GROUND, MARYLAND 21010

Mr. CLARK R. BAVIN,  
 Chief, Division of Law Enforcement,  
 U.S. Fish and Wildlife Service  
 Washington, DC 20240

APRIL 16, 1975.

DEAR MR. BAVIN: The following information is submitted to be considered for publication in the FEDERAL REGISTER in applying for an Endangered Species Permit as required by Pub. L. 93-205 (Endangered Species Act of 1973).

The application is for a permit to band peregrine falcons (*Falco peregrinus tundrius* and *F. p. anatum*), and to salvage, for the purpose of donating to a public, scientific, or educational institution, peregrine falcons killed or found dead as a result of normal banding operations or peregrine falcon casualties from other causes.

Populations of peregrine falcons have experienced unprecedented declines during the

last 25 years in many parts of the world. Biomagnifications of cumulative toxins such as DDT and polychlorinated biphenyls have been incriminated as the major cause of these declines. Indeed, no other species has been more decimated than the peregrine by chemical pollution of the biosphere; it is probably the best global indicator of this pervasive contamination. In this climate, it is imperative that population trends of peregrine falcons be monitored closely in order that informed management procedures can be accomplished. Traditional methods of studying peregrine falcon populations are varied:

a. Reproductive surveys at nest sites have been widely and successfully employed.

b. Population trends have been monitored by observing falcons on autumn migration at sites of concentration on flyways such as: Padre Island, Texas; Assateague Island, Maryland; Cedar Grove, Wisconsin; and Cape May, New Jersey.

c. Banding of falcons at nesting sites and migration foci with standard Fish and Wildlife Service tarsal bands has been practiced for about 40 years, and recoveries have provided some valuable information on peregrine movements, longevity, and demography.

d. Recently, biotelemetry has been employed successfully in detailed studies of the autumn migration of peregrine falcons.

It is the purpose of this study to establish a coordinated plan for ecological studies of peregrine falcons at selected sites on a global scale. Nesting, migration, biotelemetry, and banding investigations are planned. However, conventional banding of peregrine falcons suffers from several statistical and logistical shortcomings. Only a few individuals of this rare species are banded each year, and recovery rates usually average less than 10 percent; this results in extremely small samples to analyze statistically. Furthermore, nearly all conventional returns are from falcons that have been "shot" or "found dead" meaning that they have been removed from the population. Therefore, it is desirable to augment, not to replace, the standard banding regime with a system colored plastic tarsal bands. The basic color of the lightweight plastic band will indicate the geographic area where the band was applied, and a contrasting three-digit number inscribed into the plastic will individually identify the bird. This system has many advantages: It will permit casual observers to note the background color of the band and therefore supply general migration data; it will allow researchers to identify a bird individually in demographic studies without having to capture it and read the conventional band; and it will facilitate repeated observations and identifications on a falcon without removing it from the population.

The objectives of this program are:

a. To conduct basic ecological surveys of nesting peregrine falcons in selected areas of North America and Greenland including measures of reproductive success, prey selection, nesting behavior, and dynamics of pesticides, heavy metals, and polychlorinated biphenyls.

b. To establish standard observation, marking, and analytical techniques so that the results of these investigations can be used as baselines for interpreting future trends, and so that results of geographically separate studies will be compatible.

c. To gather migration statistics (abundance, age and sex ratios, correlation of movement with weather patterns) of peregrine falcons in spring and fall at sites of geographical concentration from records of sightings and captures, and to compare these data with observations from previous years.

## NOTICES

d. To band with standard U.S. Fish and Wildlife Service metal bands and color-coded, lightweight, plastic tarsal bands peregrine falcons on a global scale to augment scanty information on population dynamics.

e. To implement international working agreements involving scientists from the United States, Canada, Greenland, Great Britain, Central America, and the Soviet Union.

This study has been incorporated as Sub-project E, Problem Area VI, of the Agreement between the United States of America and the Union of Soviet Socialist Republics on Cooperation in the Field of Environmental Protection. The Sub-project is entitled, "A Cooperative Marking Program for Raptors with Emphasis on the Peregrine Falcon (*Falco peregrinus*)"; Dr. P. Prescott Ward is the scientific coordinator for the U.S. and Dr. Vladimir Glausin is the scientific coordinator for the U.S.S.R.

Facets of this study have been in progress for several years. Dr. P. P. Ward and Mr. Robert B. Berry have conducted an autumn migration survey of peregrine falcons at Assateague Island, MD/VA since 1970, last year under the authority of Endangered Species Permit Number PRT-8-2-C. Dr. William G. Mattox has supervised an annual reproductive study of peregrine falcons in a small area of West Greenland since 1972. Dr. Ward and other investigators have studied peregrine movements in spring and fall in recent years in Panama, at Dry Tortugas, Florida, and on barrier islands in Virginia.

Plastic bands will be attached to one tarsus and a Fish and Wildlife Service metal band to the other. Each plastic band will have a different three-digit letter/number inscribed into a contrasting background color to facilitate easy individual identification in the field. Background colors of the bands will be keyed generally to the following areas: Alaska, white; western Canada, black; eastern Canada, yellow; most of continental U.S., sky blue; Greenland, red; Great Lakes area, dark blue; east coast of U.S., green; Caribbean and Central America south of Mexico, gray; and Gulf Coast and Mexico, orange. Many years of experience with a similar style plastic tarsal band on whistling swans indicate that the bands are durable and safe; recaptures, resightings, and recoveries of color-banded peregrine falcons during the past two years indicate the same. No more than 500 falcons of various ages and sexes will be banded annually (107 peregrine falcons were so marked in 1973 and 140 in 1974 in North America/Greenland under authority of other permits, so the maximum number of 500 is very unlikely to be attained in any season). All peregrine falcons will be released immediately after banding, unless previous injury or substantial injury or death incident to the banding operation dictates that they be treated or salvaged (of 135 peregrine falcons banded at Assateague Island by Dr. P. P. Ward and Mr. R. B. Berry during the last five autumn surveys, none has ever been injured or killed, thus injury or death is highly unlikely).

The purpose of this permit application is to expand somewhat the limited scope of my original endangered species permit. This request for an amended permit is due to new information on peregrine biology which has become available since the original application. Authority is requested:

a. To observe, capture, and band migrating peregrine falcons at Assateague Island, MD/VA during spring and fall migrations. No more than two principal investigators will engage in this activity at one time.

b. To observe, trap, and band migrating peregrine falcons at no more than five additional sites or areas in the United States which include, but will not necessarily be limited to, sites or areas in Florida (Dry Tortugas and/or a barrier island along the Atlantic Coast), Georgia (coastal barrier island), Virginia (coastal barrier island and/or Cape Charles), and/or Alaska.

c. To radio-track telemetered peregrines (radios applied to a small sample of falcons in Greenland and/or Canada).

The primary applicant for an endangered species permit is: Dr. P. Prescott Ward, Chief, Ecological Research Office, Biomedical Laboratory, Edgewood Arsenal, Aberdeen Proving Ground, MD 21010; born 22 August 1940; male; 5'10" tall; 170 pounds; brown hair; brown eyes; business telephone (301) 671-2588; social security number 165-32-2200; occupation, research scientist for the United States Army.

Planned cooperators are listed below, but because of exigencies at survey times involving such things as illness, other personal business, or equipment malfunction, the principal investigator requests permission to name alternates by formally notifying the Chief of Law Enforcement, U.S. Fish and Wildlife Service. Because it is also impossible to obtain commitments from all potential cooperators at this time, additional persons who can demonstrate competence and ability will be named as assistants in this project at a later date. Names and a statement concerning the qualifications and extent of participation of these individuals will be provided in writing to the Chief of Law Enforcement, U.S. Fish and Wildlife Service.

Mr. Robert B. Berry, RD #1, Yellow Springs Road, Chester Springs, PA 19425 is identified as Dr. Ward's co-investigator in the Assateague Island study, and as potential principal investigator in other migration investigations in the U.S. listed above.

To band peregrine falcons at a barrier island in Virginia, Captain Kyle H. Woodbury (United States Navy), 1068 Rector Lane, McLean, Virginia 22101 is identified as principal investigator. He will band as a sub-permittee on Dr. Ward's federal bird banding permit (number 9448), but will need explicit endangered species authority, for he will not band under Dr. Ward's direct supervision.

To band peregrine falcons at a barrier island in southern Georgia and/or the east coast of Florida, Mr. Patrick R. Leary, 2453 South Fletcher Avenue, Fernandina Beach, Florida 32034 is named as principal investigator. He will band as Dr. Ward's subpermittee, but will not be under Dr. Ward's direct supervision.

The following individuals are identified as cooperators in banding of peregrine falcons at Dry Tortugas, Florida: Mr. C. William Harry, 9207 Drian Drive, Vienna, Virginia 22180; Mr. James L. Ruos, 7145 Deer Valley Road, Highland, Maryland 20777; and/or Mr. William S. Seagar, Hillside Road, Stevenson, Maryland 21153. Mr. Ruos and Mr. Harry have federal bird banding permits, and Mr. Seagar is Dr. Ward's subpermittee. Most banding on Dry Tortugas, Florida will not be under Dr. Ward's direct supervision.

To band peregrine falcons at nesting sites along the Colville River, Alaska, Dr. Thomas J. Cade, Cornell Laboratory of Ornithology, 159 Sapsucker Woods Road, Ithaca, New York 14850 is named as principal investigator. Dr. Cade holds federal bird banding permit number 7253, expires 28 February 1977, which authorizes him to color-band peregrine falcons in coordination with this program.

As research needs dictate shifting a banding site within a given geographical area, or

naming alternate investigators, the Chief of Law Enforcement, U.S. Fish and Wildlife Service will be notified by letter. If the general thrust, scope, or intent of this project changes substantially, or if the likely impact of this research upon the endangered species changes sufficiently so that activities would have a greater adverse impact on the survival potential or reproductive ability of peregrine falcons, then application will be made for a new endangered species permit.

I currently hold the following valid U.S. Fish and Wildlife Service permits:

a. Endangered Species Permit Number PRT-8-2-C, effective 25 November 1974 and which expires 31 December 1976.

b. Federal bird banding permit number 9448 with salvage, mist-net, and color-marking riders, which expires 30 November 1976.

c. Federal migratory bird permit number 5-SC-580 with amendment, which expires 31 December 1975.

d. Special-use permit for studies on the Chincoteague National Wildlife Refuge.

These permits are in addition to: a Maryland state endangered species permit; state bird banding permits for Maryland, Virginia, New Jersey, and Florida; special-use permits for Assateague Island National Seashore and Everglades National Park (Dry Tortugas); an Assateague Island National Seashore collecting permit and a Maryland State collecting permit (for peregrine prey species); and authorization from the U.S. Coast Guard to band birds of prey on Loggerhead Key, Dry Tortugas, Florida. In addition, permits germane to international banding activities have been applied for or have been provided by the Republic of Panama, the Republic of Mexico, Canada, and Denmark (Greenland).

The desired effective date of this permit is July 1, 1975; the duration needed is five years, at which time results will be evaluated and a new application will be submitted if necessary.

I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and the other applicable parts in Subchapter B of Chapter I of Title 50, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement hereon may subject me to the criminal penalties of 18 U.S.C. 1001.

Sincerely yours,

DR. P. PRESCOTT WARD,  
Chief, Ecological Research  
Office, Biomedical Laboratory.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before June 27, 1975 will be considered.

Dated: May 22, 1975.

C. R. BAVIN,  
Chief, Division of Law Enforcement  
U.S. Fish and Wildlife Service.

National Park Service  
NATIONAL CAPITAL MEMORIAL  
ADVISORY COMMITTEE  
Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the National Capital Memorial Advisory Committee will be held at 1:30 p.m. on Monday, June 16, 1975, in Room 234 at the National Capital Parks Headquarters, 1100 Ohio Drive, SW., Washington, D.C. 20242.

The Committee was established for the purpose of preparing and recommending to the Secretary broad criteria, guidelines, and policies for memorializing persons and events on Federal lands in the National Capital Region (as defined in the National Capital Planning Act of 1952, as amended) through the media of monuments, memorials, and statues. It is to examine each memorial proposal for adequacy and appropriateness, make recommendations to the Secretary with respect to site location on Federal land in the National Capital Region and to serve as an information focal point for those seeking to erect memorials on Federal land in the National Capital Region.

The members of the Committee are as follows:

Mr. Gary Everhardt, Chairman  
Director, National Park Service  
Washington, D.C.

Mr. George M. White  
Architect of the Capitol  
Washington, D.C.

General Mark W. Clark  
Chairman, American Battle Monuments  
Commission  
Washington, D.C.

Mr. J. Carter Brown  
Chairman, Fine Arts Commission  
Washington, D.C.

Chairman, National Capital Planning Commission  
Washington, D.C.

Honorable Walter E. Washington  
Mayor of the District of Columbia  
Washington, D.C.

Commissioner, Public Buildings Service  
Washington, D.C.

The purpose of this meeting is to review the subarea plans for the FDR Memorial.

The meeting will be open to the public. Any person may file with the Committee a written statement concerning the matters to be discussed. Persons who wish to file a written statement or who want further information concerning the meeting may contact Mr. Richard L. Stanton, Associate Director, Cooperative Activities, National Capital Parks, at area code 202-426-6715. Minutes of the meeting will be available for public inspection and copying 2 weeks after the meeting at the Office of National Capital Parks, Room 208, 1100 Ohio Drive SW., Washington, D.C.

Dated: May 20, 1975.

JOHN A. TOWNSLEY,  
Acting Director, National  
Capital Parks.

## NOTICES

DEPARTMENT OF AGRICULTURE  
Forest Service  
ALPINE LAKES AREA  
Availability of Final Environmental  
Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for a recommended Land Use Plan for the Alpine Lakes Area in the State of Washington.

The environmental statement concerns a proposed plan for the management of lands including wilderness in the Alpine Lakes Area on portions of the Mt. Baker-Snoqualmie and Wenatchee National Forests in the State of Washington. USDA-FS-FES-(Leg.) 74-16.

This final environmental statement was transmitted to CEQ on May 21, 1975. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service  
South Agriculture Bldg., Room 3231  
12th St. & Independence Ave., SW.  
Washington, D.C. 20250

USDA, Forest Service  
Pacific Northwest Region  
319 SW. Pine Street  
Portland, Oregon 97204

Mt. Baker-Snoqualmie National Forest  
1601 Second Avenue Building  
Seattle, Washington 98101

Wenatchee National Forest  
301 Yakima Street  
Wenatchee, Washington 98801

A limited number of single copies are available upon request to the same offices listed above.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

R. MAX PETERSON,  
Deputy Chief, Forest Service.

MAY 16, 1975.

[FR Doc.75-13814 Filed 5-27-75; 8:45 am]

CASCADE HEAD SCENIC-RESEARCH AREA  
ADVISORY COUNCIL  
Meeting

The Cascade Head Scenic-Research Area Advisory Council will meet at 1:00 pm on June 27 and 28 at the Dunes Motel in Lincoln City, Oregon.

The purpose of this meeting is to familiarize the Advisory Council with Pub. L. 93-535 and the Cascade Head Scenic-Research Area. A second purpose is to review the draft guidelines on substantial change required by section 5b of Pub. L. 93-535.

The meeting will be open to the public. Persons who wish additional information or plan to attend should contact Pamela D. Wilson, Sluslaw National Forest, at 545 SW Second Street, Corvallis, Oregon, 97330, phone 752-4211, Extension 502.

[FR Doc.75-13821 Filed 5-22-75; 8:45 am]

The public may participate in the meeting by either submitting written comments to the Chairman or speak to the Counsel when recognized by the Chairman.

F. DALE ROBERTSON,  
Forest Supervisor.

MAY 20, 1975.

[FR Doc.75-13823 Filed 5-27-75; 8:45 am]

EIGHTMILE-BLUE CREEK UNITS-SIX  
RIVERS NATIONAL FOREST LAND USE  
PLANS

Availability of Final Environmental  
Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Land Use Plans, Eightmile and Blue Creek Units, Six Rivers National Forest, California, USDA-FS-R5-FES(Adm)-75-9.

The environmental statement concerns proposed land use management plans for the 94,000 acres of National Forest lands known as the Eightmile-Blue Creek Units of the Six Rivers National Forest, in Del Norte and Humboldt Counties, California. Fifty-nine thousand, eight hundred acres within these Units have been inventoried as "roadless."

This final environmental statement was transmitted to the Council on Environmental Quality (CEQ) on May 20, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service  
South Agriculture Bldg., Room 3230  
12th St. & Independence Ave., SW.  
Washington, D.C.

Regional Forester  
U.S. Forest Service, Rm. 529  
630 Sansome Street  
San Francisco, California

Forest Supervisor's Office  
Six Rivers National Forest  
710 E Street  
Eureka, California

Forest Service  
District Ranger  
Gasquet, California

Forest Service  
District Ranger  
Orleans, California

A limited number of single copies are available, upon request, from Forest Supervisor George Roether, Six Rivers National Forest, 710 E Street, Eureka, California 95501.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

A modification is made of the review period for the statement. A decision will be made regarding proposed land uses in the Units and announced after June 9, 1975.

JOHN A. VANCE,  
Deputy Regional Forester.

MAY 20, 1975.

[FR Doc.75-13825 Filed 5-27-75; 8:45 am]

# **LANDOWNERSHIP ADJUSTMENT PLAN BETWEEN WEYERHAEUSER CO. AND GIFFORD PINCHOT NATIONAL FOREST, WASH.**

## **Availability of Addendum to Final Environmental Statement**

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Landownership Adjustment Plan Between Weyerhaeuser Company and Gifford Pinchot National Forest, Washington. USDA-FS-FES-(Adm) 73-70.

The environmental statement concerns a proposed landownership adjustment plan between Weyerhaeuser and the Forest Service. Weyerhaeuser is offering 13,674 acres of their land to the Forest Service in exchange for 16,155.0 acres of National Forest lands, all in the State of Washington. The exchange will consolidate public and private lands and will increase the number of land management alternatives, reduce management costs, and make several thousand acres of public land available primarily for recreation use.

This addendum to the final environmental statement was transmitted to CEQ on May 21, 1975.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service  
South Agriculture Bldg., Room 3230  
12th St. & Independence Ave., S.W.  
Washington, D.C. 20260  
USDA, Forest Service  
Pacific Northwest Region  
319 S.W. Pine Street  
Portland, OR 97204  
Gifford Pinchot National Forest  
500 West 12th Street  
Vancouver, WA 98660

A limited number of single copies are available upon request to Regional Forester, T.A. Schlapfer, Pacific Northwest Region, PO Box 3823, Portland, Oregon 97208, or Forest Supervisor Spencer T. Moore, 500 West 12th Street, Vancouver, Washington 98660.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ Guidelines.

**R. MAX PETERSON,**  
Deputy Chief, Forest Service.

MAY 12, 1975.

[FR Doc.75-13815 Filed 5-27-75; 8:45 am]

## **NEBRASKA NATIONAL FOREST LIVESTOCK ADVISORY BOARD**

### **Meeting Correction**

In FR Doc. 75-13304, appearing on page 23160, of the issue of Wednesday, May 21, 1975, the word "members" in the second paragraph, second line, should be changed to read "officers".

# **PALOMAR MOUNTAIN UNIT, CLEVELAND NATIONAL FOREST, CALIFORNIA**

## **Extension of Comment Period**

On February 7, 1975, the Forest Service, Department of Agriculture, transmitted to the Council on Environmental Quality a draft environmental statement for the proposed Land Use Plan for the Palomar Mountain Unit, Cleveland National Forest, California. USDA-FS-R5-DES(Adm)-75-8, pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969. Notice of availability of this draft environmental statement was published in the FEDERAL REGISTER on February 13, 1975 (40 FR 6995). Comments were requested within 90 days after transmittal to CEQ.

Because of numerous requests for an extended opportunity for public review, the comment period for this draft environmental statement is being extended an additional 90 days.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service  
South Agriculture Building, Room 3230  
14th Street & Independence Ave. SW.  
Washington, D.C. 20260  
USDA, Forest Service  
California Region  
630 Sansome Street, Room 581  
San Francisco, California 94111  
Forest Supervisor's Office  
Cleveland National Forest  
3211 Fifth Avenue  
San Diego, California 92103  
Forest Service  
District Ranger  
732 North Broadway  
Escondido, California 92025

A limited number of single copies are available, upon request, from Forest Supervisor, Cleveland National Forest, 3211 Fifth Avenue, San Diego, California 92103.

Comments concerning the proposed action should be addressed to Forest Supervisor, Cleveland National Forest, 3211 Fifth Avenue, San Diego, California 92103. Comments must be received by August 11, 1975, in order to be considered in the preparation of the final environmental statement.

**T. W. KOSKELLO,**  
Acting Regional Forester,  
California Region.

MAY 20, 1975.

[FR Doc.75-13824 Filed 5-27-75; 8:45 am]

## **Rural Electrification Administration DAIRYLAND POWER COOPERATIVE, LA CROSSE, WISCONSIN**

### **Final Environmental Impact Statement**

Notice is hereby given that the Rural Electrification Administration has prepared a Final Environmental Impact Statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969, in connection with a loan guarantee issued to Dairyland Power Cooperative of LaCrosse, Wisconsin.

sin, from the Rural Electrification Administration. The financing will provide funds for the purchase and installation of a 70 percent share of a 350 MW steam generating plant near Alma, Wisconsin, and related 161 kV transmission facilities. Northern States Power Company of Minnesota will provide the remaining 30 percent share of funds.

Additional information may be secured on request, submitted to Mr. David H. Askegaard, Assistant Administrator-Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. The Final Environmental Impact Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue, SW., Washington, D.C., Room 4310, or at the borrower address indicated above.

Final REA action with respect to this matter (including any release of funds) may be taken after thirty (30) days, but only after REA has reached satisfactory conclusions with respect to its environmental effects and after procedural requirements set forth in the National Environmental Policy Act of 1969 have been met.

Dated at Washington, D.C., this 21st day of May 1975.

**DAVID H. ASKEGAARD,**  
Acting Administrator, Rural  
Electrification Administration  
[FR Doc.75-13816 Filed 5-27-75; 8:45 am]

## **Soil Conservation Service LONG CREEK WATERSHED, MISSISSIPPI**

### **Availability of Negative Declaration**

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, and Part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and Part 650.8 (b)(3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Long Creek Watershed, Attala County, Mississippi.

The environmental assessment of this federal action indicates that the project will not create significant adverse local, regional, or national impacts on the environment and that no significant controversy is associated with the project. As a result of these findings, Mr. W. L. Heard, State Conservationist, Soil Conservation Service, Room 590, Milner Building, P.O. Box 610, Jackson, Mississippi 39205, has determined that the preparation and review of an environmental impact statement is not needed at this time for this project.

The project concerns a plan for watershed protection, flood prevention, and recreation. The remaining planned works of improvement as described in the negative declaration include conservation

land treatment supplemented by two floodwater retarding structures and one multiple purpose structure with basic recreation facilities.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA  
Room 590, Milner Building  
P.O. Box 610  
Jackson, Mississippi 39205

The Negative Declaration is available for single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until June 12, 1975.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services)

Dated: May 19, 1975.

**WILLIAM B. DAVEY,**  
Deputy Administrator for Water  
Resources, Soil Conservation  
Service.

## **DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE National Institutes of Health CANCER RESEARCH EMPHASIS GRANTS Program Announcement**

The National Cancer Institute under authority of Section 301 and Title IV Part A of the Public Health Service Act, as amended (42 U.S.C. 241, 281 et seq.), will establish grant-supported Cancer Research Emphasis Grants programs (CREG) to promote research in areas of concern to the National Cancer Program. The purpose of CREG programs is to promote cancer research in areas where (a) knowledge gaps are not being sufficiently addressed by on-going research, (b) there is a need for independent efforts to verify and corroborate on-going research, or (c) there is a need to stimulate or intensify effort in promising research areas. Research areas and research projects suitable for CREG's will be identified by NCI with the help of outside consultants and advisory groups.

The general characteristics of the CREG program include the following. NCI Program Directors will develop a detailed statement announcing the purpose, objectives, rationale and significance to program goals for each research project area which is appropriate for CREG. Each announcement will contain a date for receipt of applications for the specific program area. The approaches and methodology will be left to the creativity and initiative of the scientists who apply. Direction of the research or technical supervision by NCI will be neither necessary nor desirable. Cancer Research Emphasis program announcements will be published in the NIH Guide for Grants and Contracts and in other appropriate publications. The NIH Guide for Grants and Contracts may be obtained from the Division of Research

Grants, National Institutes of Health, Westwood Building, 5333 Westbard Avenue, Bethesda, Maryland 20016.

Cancer Research Emphasis Grants will be awarded only to nonprofit organizations and institutions, state and local governments and their agencies, authorized Federal institutions and, occasionally to individuals, in accordance with NIH and PHS policy. Receipt, review and referral of applications will be accomplished according to the policies and procedures contained in 42 CFR Part 52 and the Public Health Service Grants Policy Statement which may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Investigators will send applications to the Division of Research Grants (DRG), National Institutes of Health, on NIH Form 398 and must identify in a covering letter the single Cancer Research Emphasis announcement to which the application responds. The DRG Referral Officer with the NCI Program Director will determine if the application is responsive or unresponsive to the announcement. An applicant whose application is judged unresponsive to the announcement will be notified by DRG and will be given the opportunity to withdraw the application or submit it for consideration in the other grant programs of NIH.

Competitive applications may elaborate on the statement of purpose, objectives, rationale, and significance contained in the soliciting announcement, and the applicant must complete portions of the application pertaining to procedural details, the investigator's research experience, facilities available, specific budgets for all years of support requested, and biographical sketches for professional personnel.

Applications will be reviewed in accordance with the normal peer review system of the NIH utilizing the Study Sections of the Division of Research Grants. Applications with direct costs in excess of \$35,000 will receive a secondary review by the National Cancer Advisory Board.

NCI Program Directors will have authority and responsibility for monitoring scientific progress and administration of Cancer Research Emphasis Grants. Each year, preceding the anniversary date of the award, the investigator will submit a comprehensive scientific report as an integral part of his noncompetitive continuation application. More frequent reports may be requested in the announcement.

If the research is to be continued, applications for the renewal of Cancer Research Emphasis Grants beyond the project period as defined in appropriate CREG announcement must be competitively reviewed by study sections. Cancer Research Emphasis Program Directors must notify grantees twelve months before a project period ends whether or not the specific CREG program is to be continued. If the program is to be continued, the Program Director will prepare an announcement for publication in the

NIH Guide to Grants and Contracts. If the program is to be discontinued, grantees may, of course, respond to other published announcements or apply for a regular research grant.

For further information contact the Director, Division of Cancer Research Resources and Centers, National Cancer Institute, 9000 Rockville Pike, Bethesda, Maryland 20014.

(Catalogue of Federal Domestic Assistance Program No. 13.399, No. 13.394, No. 13.395, No. 13.396, and No. 13.399)

Dated: May 13, 1975.

**R. W. LAMONT-HAVERS,**  
Acting Director,  
National Institutes of Health.

[FR Doc.75-13800 Filed 5-27-75; 8:45 am]

## **EXPERIMENTAL VIROLOGY STUDY SECTION ET AL Establishment**

The Director, National Institutes of Health, announces the establishment on April 25, 1975, of the advisory committees indicated below by the Secretary of Health, Education, and Welfare under the authority of 42 U.S. Code 217a (section 222 of the Public Health Law, as amended). These advisory committees shall be governed by the provisions of the Public Advisory Committee Act (Pub. L. 92-463) setting forth standards governing the establishment and use of advisory committees.

**Name.** Experimental Virology Study Section

**Purpose.** This Committee reviews applications for grants-in-aid for research projects, and for grants and awards for research and training activities dealing with experimental virology, rickettsiology, and cell structure studies relating to basic and applied studies in pathogen-host cell interaction, genetics, morphology, diagnosis, therapeutic agents, immunology, mechanisms of replication and pathogenesis.

**Name.** Immunological Sciences Study Section

**Purpose.** This Committee reviews applications for grants-in-aid for research projects, and for grants and awards for research and training activities dealing with immunopathology, immunotherapy, hypersensitivity and problems of the immune response.

**Name.** Molecular Cytology Study Section

**Purpose.** This Committee reviews applications for grants-in-aid for research projects, and for grants and awards for research and training activities dealing with studies of the molecular basis of disease, cell structure and function (nucleus, cytoplasm, membranes and organelles).

**Name.** Pathobiological Chemistry Study Section

**Purpose.** This Committee reviews applications for grants-in-aid for research projects, and for grants and awards for research and training activities dealing with the biochemistry of disease (chemical pathology) enzymology, protein

chemistry, immunochemistry (chemical immunology), and membrane chemistry.

These Committees will terminate on April 25, 1977.

Dated: May 19, 1975.

# **NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES COUNCIL**

## **Amended Notice of Meeting**

Notice is hereby given of an addition to the meeting of the National Advisory Allergy and Infectious Diseases Council, National Institute of Allergy and Infectious Diseases, which was published in the *FEDERAL REGISTER* on April 30, 1975 (40 FR 18829-30).

The Allergy and Immunology Subcommittee of the National Advisory Allergy and Infectious Diseases Council will meet on June 18, 1975, at 8:00 p.m., Conference Room 7A24, Building 31, National Institutes of Health, Bethesda, Maryland, for the review, discussion, and evaluation of individual initial pending, supplemental and renewal grant applications, and applications for National Research Service and Institutional Research Service Awards. This meeting is necessary because more time is required to review the volume of applications assigned to this subcommittee than has already been provided for during the closed portion of the Council meeting on June 19, 1976.

The meeting will be closed to the public.

Dated: May 19, 1975.

# **ENVIRONMENTAL PROTECTION AGENCY**

[FRL 375-8]

# **CALIFORNIA STATE MOTOR VEHICLE POLLUTION CONTROL STANDARDS**

## **Waiver of Federal Preemption**

I. *Introduction.* On April 10, 1975, the Environmental Protection Agency, by notice published in the *FEDERAL REGISTER* (40 FR 16234), announced a public hearing pursuant to section 209(b) of the Clean Air Act (the "Act") as amended (42 U.S.C. 1857f-6a(a), 81 Stat. 501, Pub. L. 91-604), to consider a request by the State of California that the Administrator waive application of the prohibitions of section 209(a) of the Act to the State of California with respect to State emission standards applicable to 1977 model year light duty motor vehicles. Section 209(b) of the Act requires the Administrator to grant such waiver, after public hearing, unless he finds that the State of California does not require standards more stringent than applicable Federal standards to meet compelling and extraordinary conditions, or that such State standards and accompanying enforcement procedures are not consistent with section 202(a) of the Act. State standards and enforcement procedures are deemed to be consistent with section 202(a) if adequate technology exists with which to meet them, and if adequate lead time is available in which to implement that technology.

The public hearing was held in Los Angeles, California, on April 29, 1975. The record was kept open until May 2, 1975, for the submission of written material, data or arguments by interested persons. I have determined that the statutory criteria of section 209(b) of the Act have been met, and therefore that I am compelled to grant the requested waiver of Federal preemption. The record of the hearing and the other evidence available to me clearly reveal that compelling and extraordinary conditions exist in the State of California, and that adequate technology and lead time are available to meet the 1977 model year California standards.

In addition to the action taken with respect to light duty vehicles, I am announcing today the disposition of several other questions regarding waiver of Federal preemption for the State of California concerning the 1976 assembly-line

test procedures and the 1977 model year light duty truck and heavy duty engine standards. These questions were not at issue in the April 29 hearing. The action taken in each case is described fully in Part IV of this decision.

II *Background.* I believe that it is appropriate at this time to trace the more recent past events connected with the California waiver question, in order to give a better understanding of the circumstances surrounding the waiver request being granted today.

Under the Clean Air Amendments of 1970, the Administrator was required to set standards for the 1975 model year for hydrocarbons (HC) and carbon monoxide (CO) to achieve a 90 percent reduction of those pollutants from the emission levels allowed under regulations then applicable to the 1970 model year, and also to set a standard for the 1976 model year for oxides of nitrogen (NOx) to achieve a similar reduction, as measured against 1971 model year vehicles. As a result, standards of .41 gram/mile HC, 3.4 grams/mile CO and .4 gram/mile NOx were promulgated as the ultimate statutory standards for those pollutants.

The 1970 amendments also provided that motor vehicle manufacturers could apply for a one-year suspension of these standards. Application was made in March of 1972 to suspend the HC and CO standards. After an initial denial and a court appeal resulting in a remand (see "International Harvester Co. v. Ruckelshaus," 478 F.2d 615 (D.C. Cir. 1973)), a suspension was granted for the 1975 model year on April 11, 1973, (see 38 FR 10317), and interim standards of 1.5 gm/ml HC and 15 gm/ml CO were established. On July 30, 1973, the 1976 model year statutory NOx standard of .4 gm/ml was suspended for one year and an interim standard of 2.0 gm/ml was established.

In the April 11 suspension decision, the Administrator also took action which resulted in emission standards applicable in California of .9 gm/ml HC, 9.0 gm/ml CO and 2.0 gm/ml NOx for the 1975 model year.

In June of 1974, the Act was amended to provide that (1) the 1975 Federal and California interim standards shall also be applicable to the 1976 model year, (2) the original statutory standards for HC and CO of .41 and 3.4 gm/ml respectively shall be applicable to the 1977 and subsequent model years, (3) an interim NOx standard of 2.0 gm/ml shall be applicable to the 1977 model year, (4) the original statutory NOx standard of .4 gm/ml shall be applicable to the 1978 and subsequent model years, and (5) any motor vehicle manufacturer may, at any time after January 1, 1975, apply for a one-year suspension of the imposition of the statutory HC and CO standards to the 1977 model year.

On January 2, 1975, application was made to EPA by three motor vehicle manufacturers for a one-year suspension of the 1977 HC and CO standards. On March 5, 1975, I granted the suspension and simultaneously established interim standards of 1.5 gm/ml HC and 15 gm/ml

CO. On March 17, 1975, California adopted 1977 standards of .41 gm/ml HC, 9.0 gm/ml CO and 1.5 gm/ml NOx, and on March 26, 1975, they requested a waiver of Federal preemption for these standards and for the accompanying test and enforcement procedures, including the assembly-line test procedures. It is that waiver request which is the subject of this decision.

III *Discussion—Legal Criteria.* Section 209 of the Clean Air Act was added to that statute by the Air Quality Act of 1967, Pub. L. 90-148, 81 Stat. 501, and has been preserved in the statute essentially unamended since then. It prohibits any state from establishing or enforcing emission standards for new motor vehicles unless it had adopted such standards prior to March 30, 1966. Only California meets this test. California, however, may establish and enforce such standards unless the Administrator of EPA, after notice and opportunity for hearing, finds either that California has not adopted more stringent standards "to meet compelling and extraordinary conditions" or that the "standards and accompanying enforcement procedures are not consistent with section 202(a)" of the Act.

These provisions must be read in the light of their unusually detailed and explicit legislative history. Three major points emerge from such a reading.

1. At the time the California waiver provision was adopted, Congress believed that "compelling and extraordinary conditions" existed in California. S. Rep. No. 403, 90th Cong., 1st Sess. 33 (1967) ("Senator Murphy convinced the committee that California's unique problems . . . justified a waiver"). 113 Cong. Rec. H 14404 (daily ed. Nov. 2, 1967) (Cong. Herlong) ("These are conditions specially tailored for California which California clearly meets").

2. Congress meant to ensure by the language it adopted that the Federal government would not second-guess the wisdom of state policy here. This appears most dramatically from the debates on the floor of the House over two alternative versions of the statutory language. One, sponsored by the relevant legislative committee, would have required the Federal government, upon application, to set special California standards if the two conditions set forth above were met; the second, which was sponsored by the entire California delegation, see 113 Cong. Rec. H 14428 (Cong. Moss) (daily ed. Nov. 2, 1967), and eventually adopted on the floor, would have required a waiver to be granted if the same two conditions were met.

Despite the understandable efforts of some sponsors of the committee language to portray the differences between the two versions as purely verbal, 113 Cong. Rec. H 14404 (Cong. Herlong); H 14432 (Cong. Rogers) (daily ed. Nov. 2, 1967), the majority of the House clearly disagreed. Sponsors of the language eventually adopted referred repeatedly to their intent to make sure that no "Federal bureaucrat" would be able to tell the people of California what auto

emission standards were good for them, as long as they were stricter than Federal standards. 113 Cong. Rec. H 14393 (Cong. Sisk); H 14395 (Cong. Smith); H 14396 (Cong. Hollifield); H 14399 (Cong. Hosmer); H 14408 (Cong. Roybal); H 14409 (Cong. Reinicke); H 14429 (Cong. Wilson) (daily ed. Nov. 2, 1967). They also viewed the change as necessary to their intent to preserve the California state auto emission control program in its original form, see H.R. Rep. No. 728, 90th Cong. 1st Sess. 96-97 (1967) (separate views of Congressmen Moss and Van Deerlin), 113 Cong. Rec. H 14415 (daily ed. Nov. 2, 1967) (Cong. Van Deerlin) and to continuing the national benefits that might flow from allowing California to continue to act as a pioneer in this field. 113 Cong. Rec. H 14407 (Cong. Moss) (daily ed. Nov. 2, 1967); S 16395 (daily ed. Nov. 14, 1967) (Senator Murphy).

These points had also previously been made by the Senate Public Works Committee in reporting out waiver language identical to that eventually adopted by the House. S. Rep. No. 403, 90th Cong. 1st Sess. 32-33 (1967).

3. Even in the two areas concededly reserved for Federal judgment by this legislation—the existence of "compelling and extraordinary" conditions and whether the standards are technologically feasible—Congress intended that the standard of EPA review of the state decision be a narrow one. This is implicit, of course, in the many statements in favor of state autonomy referred to above. More directly, Congressman Moss, the main sponsor of the language which the House adopted, asserted that under his language the burden of proof in denying a waiver would be on the Federal government, see H.R. Rep. No. 728, 90th Cong. 1st Sess. 96 (1967) (Separate views of Congressman Moss and Van Deerlin). See also 113 Cong. Rec. H 14398 (Cong. Hanna) (daily ed. Nov. 2, 1967) (Senate language says "You may go beyond the Federal statutes unless we find that there is no justification for your progress").

One Congressman indicated that a decision to deny waiver should be subject to considerably less deference on judicial review than the Administrative Procedure Act normally provides, a view which would necessarily imply that the agency discretion to deny waiver is considerably narrower than is its discretion to act or not act in other contexts. 113 Cong. Rec. H 14405 (Cong. Hollifield) (daily ed. Nov. 2, 1967).

EPA's approach to California waiver decisions in the past has been shaped by this Congressional intent. Thus, in grant-

<sup>1</sup> The legislative history does contain one statement that under the language adopted, the burden of proof would be on California. 113 Cong. Rec. H 14432 (daily ed. Nov. 2, 1967) (Cong. Harvey). However, since the statement was made by an opponent of that language and was designed to win votes by portraying the change it would make from the committee version as negligible, it is entitled to little weight under the normal rules of statutory construction.

ing a waiver to California in August of 1971 to establish an assembly-line test program, Mr. Ruckelshaus said:

The law makes it clear that the waiver request cannot be denied unless the specific findings designated in the statute can properly be made. The issue of whether a proposed California requirement is likely to result in only marginal improvement in air quality not commensurate with its cost or is otherwise an arguable unwise exercise of regulatory power is not legally pertinent to my decision under section 209, so long as the California requirement is consistent with section 202(a) and is more stringent than applicable Federal requirements in the sense that it may result in some further reduction in air pollution on California. 36 FR 17458 (August 31, 1971)

Accordingly, I do not view the arguments of increased cost or fuel economy penalties, or only marginal improvements in air quality, advanced by some as arguments against the waiver, as controlling in my decision here. For similar reasons, I do not view the question whether the proposed California standards may result in an increase in emissions of sulfuric acid mist as controlling given the current state of our knowledge. The structure and history of the California waiver provision clearly indicate both a Congressional intent and an EPA practice of leaving the decision on ambiguous and controversial matters of public policy to California's judgment. As I indicated in my suspension decision, any assessment of the magnitude of the automobile sulfate risk and measures to deal with it clearly falls under that heading.

The core issue, then, is whether automobile companies—by whatever technology—will be able to satisfy the formal requirements of the regulations which California seeks to place upon them in the 1977 model year. Our discussion of that point is contained in the next section.

It is worth noting here, however, that even on this issue I would feel constrained to approve a California approach to the problem which I might also feel unable to adopt at the Federal level in my own capacity as a regulator. The whole approach of the Clean Air Act is to force the development of new types of emission control technology where that is needed by compelling the industry to "catch up" to some degree with newly promulgated standards. Such an approach to automotive emission control may be attended with costs, in the shape

<sup>3</sup> The issue was raised whether EPA is required to file an Inflation Impact Statement, pursuant to Executive Order 11821 and OMB Circular No. A-107, in conjunction with this decision. We have determined that none is required, for the waiver granted herein falls under the category of "Approval of State Actions," one of four categories of action which do not require IIS's under the Interim Procedures for Inflation Impact Statements issued internally within EPA on February 24, 1975, implementing section 6(b) (Interim Provision) of OMB Circular No. A-107. Approval of these exempt categories has been given by OMB and they are included in the final draft Guidelines now pending before OMB.

of a reduced product offering, or price or fuel economy penalties, and by risks that a wider number of vehicle classes may not be able to complete their development work in time. Since a balancing of these risks and costs against the potential benefits from reduced emissions is a central policy decision for any regulatory agency, under the statutory scheme outlined above I believe I am required to give very substantial deference to California's judgment on this score.

**Findings.** Having given due consideration to the record of the public hearing, all material submitted for that record, and other relevant information, I hereby make the following findings of fact.

1. The State of California had, prior to March 30, 1966, adopted standards (other than crankcase emission standards) for the control of emissions from new motor vehicles and new motor vehicle engines.

2. The California State emission standards applicable to 1977 model year light duty vehicles, when considered as a total regulatory program, including related assembly-line testing and enforcement procedures, are more stringent than the applicable Federal standards.

3. Compelling and extraordinary conditions continue to exist in the State of California. The testimony of the representatives of the Air Resources Board revealed that the State oxidant pollution problem, and particularly that of the South Coast Air Basin, continues to be the worst in the nation. The data presented demonstrates that the National Ambient Air Quality Standard for photochemical oxidant has been violated in the South Coast region at a substantially greater frequency and at significantly higher levels of concentration than in other major metropolitan areas of the country. Furthermore, the latest data reveal that, following an improvement between the years of 1967 and 1972, the trend reversed and the oxidant concentrations in the South Coast area have actually worsened during 1973 and 1974. The evidence thus graphically demonstrates that California is struggling with an air pollution problem of unique proportions, and that it is one which is not necessarily improving.

4. The California standards are consistent with section 202(a) of the Act, in that technology exists with which to meet them and adequate lead time is available in which to implement that technology. The testimony at the hearing on this issue varied somewhat from witness to witness.

General Motors stated that the standards as proposed could be met and that they were prepared to introduce and market a representative product line conforming with those standards in the California market in 1977. Ford, though somewhat less optimistic, said in its testimony that they opposed granting the waiver

not because the standards cannot be met on some cars. Particularly with a catalyst change, Ford believes that low standards at these levels are achievable

but at a penalty in first cost and fuel economy which they asserted was not justified. Some other manufacturers, such as Chrysler and American Motors, were in varying degrees more pessimistic about their ability to achieve these standards. All manufacturers asserted that compliance with the California standards could be accomplished only by paying penalties in the form of increased costs, restricted model lines, poorer fuel economy, and reduced driveability. However, no manufacturer stated that it would be forced out of the California market by the new standards.

On the other side, the California Air Resources Board presented a list of 29 engine families from the 1975 model year which, though not aimed at meeting standards as low as the ones for which waiver was sought, nevertheless did meet or almost meet them. Though most of these cars were imports (which account for some 30 percent of the market in California), Chrysler, Ford and GM were also represented. The Air Resources Board also presented a statement by one of its members, Dr. Robert Sawyer, Professor of Mechanical Engineering at Berkeley and a leading contributor to the latest report of the National Academy of Sciences on motor vehicle emissions, stating his conclusion that the standards could be met.

I have already determined in the March 5 suspension decision that emission standards of .41 gm/ml HC and 2.0 gm/ml NOx could be met nationwide in 1977. Since the legal test for California waiver is easier to satisfy, I believe I am at a minimum compelled to grant a waiver at these levels as a matter of law.

The question then centers around the California 1.5 gm/ml NOx requirement. The record reveals that no manufacturer disputed the fact that 1.5 gm/ml NOx could be met. The problem was meeting it together with the other standards. General Motors testified that both the .41 gm/ml HC and the 1.5 gm/ml NOx standards could be met through system optimization (i.e., achieving the proper balance between exhaust gas recirculation (EGR), spark advance and fuel/air ratio). Some manufacturers indicated, with lesser degrees of certainty, that they would employ similar system changes involving reoptimized EGR, spark control and air/fuel ratio to certify their vehicles to these standards. Other manufacturers indicated that systems utilizing start catalysts or three-way catalysts are under consideration. Ford did express concern that there may not be sufficient time remaining to perform the required recalibrations and still certify in time for the normal introduction date. However, they did not say that such recalibrations were not technically feasible.

On this record, and against the background of our suspension hearings, I cannot conclude that the California standards cannot be met. I am strengthened in this conclusion by two subsidiary factors.

(i) "Basic demand" can be met more easily in California, because California

sales comprise but 10 percent of the national total and thus there exists greater potential for "model switching." That is, there is a high probability that at least one model of one manufacturer's product line for each class of vehicle will be certified at the California standards. Since California's share of the national market is limited, manufacturers of certified vehicles will in all probability have enough production capacity available to satisfy California consumer demand for that class. Manufacturers of corresponding models which could not meet the California standards would then sell a higher percentage of their vehicles in the other 49 states because of the increased demand caused by the cars switched to California. (I am not deciding here that the "basic demand" test, as set out in the "International Harvester" decision, is applicable in the case of California waiver. However, I do believe that if the test were to be applied, it would not be applicable to its fullest stringency due to the degree of discretion given to California in policy areas, as discussed in the "Legal Criteria" section above.)

(ii) The lead time restrictions are not necessarily as severe as the manufacturers stated, for under California law, manufacturers may delay the introduction of 1977 model year vehicles until January 1, 1977. This could provide up to an additional four months of lead time, depending on presently planned introduction dates, in which to complete the certification procedures.

5. The hearing record allows several other findings which, while not controlling in this decision, do show some of its probable effects and therefore are included for informational purposes.

(i) According to the manufacturers' testimony, 1977 California cars can be expected to have increased initial and catalyst replacement costs over the 1975 California cars of from \$65 to \$275, depending on manufacturer and model.

(ii) The manufacturers also claimed that 1977 California cars can also be expected to achieve from 8 percent to 24 percent poorer fuel economy than the comparable 1975 versions.

(iii) Most, if not all manufacturers indicated that they will market a more restricted model line in California in 1977 than they presently can provide for the 1975 model year.

(iv) Most manufacturers believe that the system changes necessary to meet the 1977 California standards will result in poorer driveability.

(v) Representatives of the California automobile dealers believed that their business would suffer substantially as a result of a waiver. They felt that, because of increased cost, restricted product offering, and reduced performance and fuel economy, potential customers will be inclined to either purchase their 1977 vehicles in other states, or forego a purchase entirely and retain their older models.

**IV Decision.** Based upon the above stated findings, I hereby waive the application of section 209(a) to the State of California with respect to the follow-

ing identified State standards and test procedures, insofar as they apply to the 1977 and subsequent model years.

1. Section 1955.1, Title 13, California Administrative Code, as amended March 17, 1975, entitled "Exhaust Emission Standards and Test Procedures—1975 and Subsequent Model-Year Passenger Cars"; and

2. Section 2054, Title 13, California Administrative Code, as amended December 11, 1974, entitled "Assembly-Line or Pre-Delivery Test Procedures—1976 and Subsequent Model-Year Gasoline-Powered Passenger Cars and Light Duty Trucks".

In addition, I have made the following determinations with respect to other issues involving a California waiver question:

1. The waiver previously granted for 1976 model year light duty trucks (38 FR 30136, November 1, 1973) is deemed to extend to 1977 and subsequent model years inasmuch as the California 1976 and 1977 standards are identical;

2. The waiver previously granted for the California assembly-line test procedures, as they apply to the 1975 model year (38 FR 10317, April 26, 1973) is deemed to extend to the 1976 model year, inasmuch as the 1975 and 1976 California standards are identical;

3. The waiver previously granted for the original 1975 California heavy duty engine standards (36 FR 8172, April 30, 1971) is deemed to extend to the 1977 model year, inasmuch as the 1975 and 1977 standards are identical; and

4. The waiver referred to in 3. is deemed to extend to the alternative set of heavy duty engine standards of 1.0 HC, 25 CO and 7.5 NO<sub>x</sub>, all in grams per brake horsepower-hour, for which waiver was requested on April 25, 1975, inasmuch as we find those standards to be more stringent than the comparable Federal standards.

Copies of the above standards and procedures are available for inspection at the Freedom of Information Center, Room 207, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Copies of the standards and procedures may also be obtained from the California Air Resources Board, 1025 P Street, Sacramento, California 95814.

Dated: May 20, 1975.

RUSSELL E. TRAIN,  
Administrator.

[FRL 379-4]

EDWARDS AQUIFER, SAN ANTONIO, TEXAS

Public Hearing

On Thursday, March 6, 1975 there was published in the FEDERAL REGISTER (40 FR 10514) a notice that a petition had been received pursuant to section 1424 (e) of the Public Health Service Act, as amended by the Safe Drinking Water Act, Pub. L. 93-523. The petition requested the Administrator of the Envi-

ronmental Protection Agency to determine that the Edwards Aquifer is the sole or principal source of drinking water for the San Antonio, Texas area which, if contaminated, would create a significant hazard to public health. Public comments, data, and references to relevant sources of information were requested to be submitted not later than May 5, 1975. The Agency indicated that it would consider holding a public hearing if there were significant public interest in such a hearing.

Since the publication of that notice, requests for a public hearing have been received, including a request from the Attorney General of the State of Texas. The Agency believes that there is significant public interest, and accordingly will hold a public hearing to consider whether or not the Administrator should make the requested determination. The hearing will be held at the following time, date and location:

June 4, 1975, 9:30 a.m., C.d.t.	Mission Room San Antonio Convention Center HemisFair Grounds San Antonio, Texas
------------------------------------	--

Persons who wish to make statements at this hearing are urged to submit three written copies of their remarks at the time they are presented for inclusion in the record.

In order to ensure that all interested persons, including those who wish to appear at the hearing, have a full opportunity to present views and information, and to ensure as complete a record as possible, the Agency hereby extends the final date for the submission of written comments until June 18, 1975.

Dated: May 23, 1975.

CHARLES L. ELKINS,  
Acting Assistant Administrator  
for Water and Hazardous Materials.

[FR Doc.75-13933 Filed 5-27-75; 8:45 am]

[FRL 374-7]

#### IDENTIFICATION OF PRODUCTS AS MAJOR SOURCES OF NOISE Report

The Noise Control Act of 1972 (Pub. L. 92-574, 86 Stat. 1234) established, by statutory mandate, a national policy "to promote an environment for all Americans free from noise that jeopardizes their health and welfare." The Act provides for a division of powers between the Federal and state and local governments in which the primary Federal responsibility is for noise source emission control. The states and other political subdivisions retain rights and authorities to establish and enforce controls on environmental noise through licensing, regulation, or restriction of the use, operation, or movement of noise sources and on the levels of noise permitted in their environments. As specified in the Noise Control Act of 1972, the first step toward promulgation of noise standards for new products is identification of those

products that are major sources of noise. Section 5(b) of the Act provides as follows:

"The Administrator shall, after consultation with appropriate Federal agencies, compile and publish a report or series of reports (1) identifying products (or classes of products) which in his judgment are major sources of noise, and (2) giving information on techniques for control of noise from such products, including available data on the technology, costs, and alternate methods of noise control. The first such report shall be published not later than eighteen months after the date of enactment of this Act."

Section 6(a) (1) (C) sets out four categories of products that must be considered by the Administrator for noise regulation.

1. Construction equipment.
2. Transportation equipment (including recreational vehicles and related equipment).
3. Any motor or engine (including any equipment of which an engine or a motor is an integral part).
4. Electrical or electronic equipment.

On June 21, 1974 (39 FR 22297), the Administrator published the first report under section 5(b) identifying two products as major sources of noise: Medium and heavy duty trucks and portable air compressors. Proposed regulations have been published that would provide for the control of noise produced by these products. That report also listed a number of other candidates for possible future identification.

**Approach used to assess environmental impact.** To accomplish the broad intent of the Noise Control Act of 1972, the EPA has developed an overall framework for assessing the environmental impact of all the sources of environmental noise. The first step of this development was the Title IV report ("Report to the President and Congress on Noise," Doc. No. 92-63, 92nd Congress 2nd Session, February 1972), which provided an initial data base on noise reduction technology appropriate to various product types, environmental noise levels, and criteria related to public health and welfare. The second step was the publication of the "Criteria Document" ("Public Health and Welfare Criteria for Noise," EPA, July 27, 1973) as required by section 5(a) (1) of the Noise Control Act of 1972. The third step was the publication of the "Levels Document" ("Information on Levels of Environmental Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety," EPA, March 1974) as required by section 5(a) (2).

The levels identified in the "Levels Document" are baseline target goals based on the risks to public health and welfare from noise pollution without regard for cost or technical feasibility. To identify the levels, EPA selected two cumulative energy measures for quantifying noise exposures that can be related to human response.

1. **Leq**, the A-weighted equivalent sound level (the source level in dBA conveying the same sound energy as the actual time-varying sound during a given period) was selected as

a descriptor of noise relative to long-term hazard to hearing.

2. **Ldn**, the day-night sound level (the 24 hour Leq with a 10 dBA penalty applied to the period from 10 p.m. to 7 a.m.) was selected as a descriptor of noise relative to interference with human activities, e.g., speech communication, sleep, and other factors that may lead to annoyance.

An abbreviated summary of the identified levels is given in Table 1.

TABLE 1.—Noise levels protective of health and welfare

Human response	Leq	Ldn
Hearing loss (8 hr).....	75	75
Hearing loss (24 hr).....	70	70
Outdoor interference and annoyance.....	65	65
Indoor interference and annoyance.....	45	45

**Analytic procedures.** The impact of an environmental noise has two basic dimensions: extensity and intensity. Extensity of impact is measured in terms of the numbers of people impacted regardless of the severity of the impact. Intensity, or severity, of an individual's impact is measured in terms of the level of the environmental noise.

For analytic purposes, it is desirable to have a single number representing the magnitude of the total noise impact in terms of both extensity and intensity in a specific environmental situation. With a single noise impact scale, changes in impact can be evaluated in terms of simple percentage changes from the initial value. This need led to the use by EPA of the Equivalent Noise Impact Analysis Method. An example showing the nature and use of the method is EPA's "Project Report, Noise Standards for Civil Subsonic Turbojet Engine-Powered Airplanes (Retrofit and Fleet Noise Level)", 16 December 1974, obtainable from the Environmental Protection Agency, Office of Noise Abatement and Control, 1921 Jefferson Davis Highway, Arlington, Va. 20460. In this method, the intensity of an environmental noise impact at a specific location is characterized by the Fractional Impact (FI).

The fractional impact of a noise environment on an individual as used by EPA is proportional to the amount (in decibels) that the noise level exceeds the appropriate level identified in the "Levels Document" as shown in Table 1. The fractional impact is zero when the noise level is at or below the identified level. The fractional impact rises to 1.0 at 20 decibels above the identified level and can exceed unity in situations in which the noise level exceeds 20 decibels above the identified level. The range from zero to 20 decibels above the criterion level represents the range between those noise levels that are totally acceptable and those noise levels that are totally unacceptable to the individual in terms of annoyance response and speech interference. The total Equivalent Noise Impact (ENI) is then determined by summing the individual fractional impacts for all people affected by the environment. In this counting, then, two people exposed to 10 decibels above the identified level (fractional impact = 0.5) would

be equivalent to one person exposed to 20 decibels above the identified level (fractional impact = 1.0). The ENI can thus be considered as the equivalent number of people 100 percent impacted by the noise environment.

To determine which sources ought to be identified for regulation, EPA considers their fractionally weighted noise impact. This measure includes both the intensity (loudness) and extensity (population affected) of noise source impact. Nevertheless, it cannot completely supplant the Administrator's judgment as to an appropriate sequence of noise source regulation. In addition, other factors such as necessary lead time for development of a regulation, voluntary industry noise standards, interrelationship of regulations, and relative availability of data can affect the sequence of identification.

**Candidates for major noise sources.** The noise impact method has been applied in analyses using available noise data on products and classes of products distributed in commerce, population exposure data in various locations, and "Levels Document" criteria to develop a list of product types for possible consideration for regulatory action. This list is reflected in Table 2. In applying judgment, as prescribed in section 5(b) of the Act, as to which of these product types warrant identification as major sources of noise, those candidates having cumulative noise levels in normal use contributing to environmental noise levels in excess of "Levels Document" criteria are considered major noise source candidates. Using the fractional noise impact technique and available data, further consideration is given to those candidates contributing the greatest impact. Both the contribution to outdoor environmental noise and the impact on passengers and operators are included in the analysis.

TABLE 2.—Possible candidates for noise sources

SURFACE TRANSPORTATION	
Automobiles (including sports cars, compact cars, and standard passenger cars)	
Buses	
Medium and Heavy Duty Trucks (already identified)	
Light Trucks	
Motorcycles	
Railroad locomotives	
Rapid Transit-rail	
Special auxiliary equipment on trucks	
Tires	
AIR TRANSPORTATION (NOT CANDIDATES FOR SECTION 5 REGULATION)	
Business jet aircraft	
Commercial subsonic jet aircraft	
Commercial supersonic jet aircraft	
Helicopters	
Propeller driven small airplanes	
Short haul aircraft	
CONSTRUCTION/INDUSTRIAL EQUIPMENT	
Air compressors (already identified)	
Backhoes	
Chain saws	
Concrete vibrators	
Cranes, derrick	
Cranes, mobile	
Dozers (track and wheel)	

Engine driven industrial equipment  
Generators  
Graders  
Loaders (track and wheel)  
Mixers  
Pavement breakers  
Pavers  
Pile drivers  
Pneumatic and hydraulic tools  
Power saws  
Pumps  
Rock drills  
Rollers  
Scrapers  
Shovels

#### RECREATIONAL VEHICLES

Snowmobiles  
Motorboats  
Offroad motorcycles (including minicycles)  
Other off highway vehicles

#### LAWN CARE

Edgers  
Garden tractors  
Hedge clippers  
Home tractors  
Lawn mowers  
Snow and leaf blowers  
Tillers  
Trimmers

#### HOUSEHOLD APPLIANCES

Air conditioners  
Clothes dryers  
Clothes washers  
Dehumidifiers  
Dishwashers  
Electric can openers  
Electric heaters  
Electric knives  
Electric knife sharpeners  
Electric shavers  
Electric toothbrushes  
Exhaust fans  
Floor fans  
Food blenders  
Food disposals (grinders)  
Food mixers  
Freezers  
Hair clippers  
Hair dryers  
Home shop tools  
Humidifiers  
Refrigerators  
Sewing machines  
Slide/movie projectors  
Vacuum cleaners  
Window fans

**Identification of major noise sources.** EPA hereby identifies the following products as major sources of noise in accordance with section 5(b) of the Noise Control Act of 1972: motorcycles, buses, wheel and track loaders and wheel and track dozers (earth moving equipment), truck transport refrigeration units, and truck-mounted solid waste compactors (special auxiliary equipment on trucks). Additional information, as prescribed in section 5(b) (2) of the Act, will be published in advance of rulemaking. For the products identified, this will include information on techniques for control of noise, available data on technology, costs, and alternate methods of noise control.

Motorcycles, buses, wheel and track loaders and wheel and track dozers contribute significant impacts to outdoor environmental noise and on passengers/operators. Identification of special purpose truck equipment, such as transport refrigeration units and solid waste compactor units, provides for noise control

standards consistent with standards already proposed for new medium and heavy duty trucks. It is recognized that the noise impact from such special purpose equipment alone is of a lower order of magnitude. However, in view of the actions already taken to control noise emissions from medium and heavy duty trucks, control of these sources is required to avoid reducing the effectiveness of those regulations.

In the development of regulations for those products identified as major sources of noise, possible labeling requirements will be examined as well as noise control standards.

EPA will be selecting other products for future identification from among the large number of possible candidates listed in Table 2. The order in which they are identified will depend upon the various considerations discussed above, of which fractional noise impact is the major, but not exclusive, consideration. Automobiles and snowmobiles are currently under study. The size and complexity of the automotive industry and the extensive effort necessary to adequately evaluate cost and available technology make immediate regulation of automobile noise impossible. The EPA judgment to temporarily defer identification of snowmobiles takes into account consideration of voluntary standards being developed by the snowmobile industry. Major progress has been made in that regard, and continuing action is underway. EPA is in the process of evaluating this voluntary industry effort. In so doing, EPA is taking into account the fact that much of the noise impact associated with snowmobiles affects operators and passengers in recreational and other voluntary activities. EPA also is developing information on the need for labeling of snowmobiles under section 8 of the Act, working in conjunction with the Consumer Product Safety Commission.

EPA also intends to study during Fiscal Year 1976 light trucks, motorboats, chain saws, tires, pneumatic and hydraulic tools, pile drivers, lawn care equipment, and other special auxiliary equipment on trucks for possible future identification. This report is issued under the authority of the Noise Control Act of 1972, section 5(b) (1), 86 Stat. 1236 (42 U.S.C. 4904(b) (1)).

Dated: May 20, 1975.

RUSSELL E. TRAIN,  
Administrator.

#### MUNICIPAL WASTE TREATMENT GRANTS Public Hearings on Potential Legislative Amendments to the Federal Water Pollution Control Act

Notice was published in the FEDERAL REGISTER on May 2, 1975, (40 FR 19236), of a series of four public hearings to discuss possible Administration proposals to amend the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1251 et seq.

The notice indicated that five papers would be prepared for public review prior to the public meetings. These papers are presented here with the intent that they assist in focussing discussion at the meetings. The papers do not encompass all the points that might be made on these candidate proposals and are not meant to confine the discussion.

Several background points should be considered when reviewing each of the five papers.

**Papers 1, 2, 3.** These papers discuss possible modifications to the present provisions of Title II of the Act which authorizes the construction grants program. They were developed after the 1974 Survey of State Needs indicated that approximately \$350 billion in municipal facility construction is needed to meet the requirements of the Act. The magnitude of this indicated need appears to be beyond the funding capability of the Federal budget, and proposals have been made to selectively reduce the need for Federal funds, without negating the major water quality objectives of the Act. These papers, in a summary fashion, present these proposals. These proposals have been previously discussed, in a preliminary way, with selected groups with whom the Agency frequently meets to discuss the implementation of the Act.

A groundrule observed in preparing these discussion papers has been that none of the proposals would retroactively apply to the \$18 billion presently authorized and allotted.

**Paper 4.** This paper discusses a proposed extension of the July 1977 date for compliance by municipal dischargers with the secondary treatment requirement established by section 301(b) (1) (B) of the Act. This proposal has been suggested previously and discussed with representatives of State agencies and several public groups.

**Paper 5.** This paper discusses a proposed amendment to the Act to authorize an increased delegation of responsibility to the States for managing the construction grants program. Amendments to achieve this objective have been introduced in the House of Representatives as H.R. 2175 and H.R. 6991 which are identical bills. EPA has generally endorsed these Amendments.

Dated: May 22, 1975.

EDWIN L. JOHNSON,  
Acting Assistant Administrator  
for Water and Hazardous Materials.

PAPER NO. 1—REDUCTION OF THE FEDERAL SHARE

**Statement of Issue.** This paper deals with the issue of whether Pub. L. 92-500 should be amended to reduce the Federal share for construction grants from the current level of 75 percent to a level as low as 55 percent.

The objectives of such an amendment would be twofold. The first is to permit the limited funding available to go further in assisting needed projects. The second objective is to encourage greater accountability for cost effective design and project management on the part of

the grantee by virtue of his greater investment in the project.

#### BACKGROUND

**Statutory Reference.** Section 202(a) of Pub. L. 92-500 sets the current Federal grant share at 75 percent. Under legislation in effect from 1966 to 1972, the Federal grant share ranged from 30 to 55 percent. From 1956 to 1966, the Federal share was 30 percent, with restrictions that effectively reduced the grant share for large projects to less than 30 percent.

**1974 Needs Survey.** The recently completed 1974 Needs Survey reports total needs of \$342 billion for facilities eligible for construction grants under Pub. L. 92-500. At a 75 percent Federal share, these needs, if satisfied, would require almost \$260 billion in Federal funding. The most critical categories reported in the Survey—secondary treatment, advanced treatment, and interceptor sewers—need over \$46 billion, which would require Federal funding of nearly \$35 billion. The question is raised as to whether these needs—the total amount or even the amount for the critical categories—can be accommodated in the Federal budget in time to meet the 1977 and 1983 municipal pollution control requirements of Pub. L. 92-500.

**Incentives.** It has been traditionally held that a community's incentives for building treatment plants are relatively low because the primary beneficiary is not the community itself but, instead, downstream communities. More recently, the environmental ethic and the enforceable effluent standards issued under Pub. L. 92-500 appear to have significantly strengthened these incentives. A community has traditionally had more incentive to build collection and interceptor sewers, since the beneficiaries reside within the community. In considering these factors, a reduction of the Federal grant share would reduce incentives to construct needed facilities. However, there is no way of quantifying this effect, especially because of the short history of municipal effluent standards.

**Increased Local Share.** Reduction of the Federal share will require an increase in local or State funding. With recent changes in the economy, including both inflation and recession, it is not possible to predict the effect of a reduced Federal share on local financing capabilities.

#### ISSUES TO BE DISCUSSED

The following questions will be discussed in the public hearings:

1. Would a reduced Federal share inhibit or delay the construction if needed facilities?
2. Would the States have the interest and capacity to assume, through State grant or loan programs a larger portion of the financial burden of the program?
3. Would communities have difficulty in raising additional funds in capital markets for a larger portion of the program?
4. Would the reduced Federal share lead to greater accountability on the part of the grantee for cost effective design, project management, and postconstruction operation and maintenance?

5. What impact would a reduced Federal share have on water quality and on meeting the goals of Pub. L. 92-500?

#### PAPER NO. 2—LIMITING FEDERAL FUNDING OF RESERVE CAPACITY TO SERVE PROJECTED GROWTH

**Statement of issue.** This paper deals with the issue of whether Pub. L. 92-500 should be amended to limit the amount of reserve capacity of facilities that would be eligible for construction grant assistance. Reserve capacity is defined as that portion of the capacity of sewers, treatment plants, and other facilities designed to serve future population, industrial, and commercial growth. Under a proposed amendment, eligible reserve capacity could range from zero to some specified finite value such as that needed to serve 10 or 20 years of estimated growth. A zero limit would prohibit Federal funding of reserve capacity to serve growth occurring after construction of the facilities is completed. A 10- and 20-year limit would permit Federal funding of reserve capacity to serve 10 years of growth for treatment plants and 20 years for sewers.

The limiting of eligibility for reserve capacity is not intended to preclude the cost-effective sizing and design of the facilities. The grantee would be permitted and, in fact, encouraged to provide cost effective reserve capacity, but he would be required to fund 100 percent of this capacity.

The objectives to be achieved by limiting eligibility for reserve capacity are twofold. The first objective is to permit limited Federal authorizations for the construction grant program to go further in funding the backlog of projects. The estimates in the recently completed 1974 Needs Survey appear to exceed any reasonable capacity for funding within the Federal budgets for the next several years. The second objective is to induce more careful sizing and design of capacity to serve future growth; this will alleviate tendencies to provide excessive growth-related reserve capacity and reduce the secondary environmental impacts of growth that could result from such capacity.

#### BACKGROUND

**Statutory Reference.** Section 204(a) (5) of Pub. L. 92-500 specifically authorizes Federal funding of reserve capacity in facilities eligible for construction grant assistance. This Section provides that the EPA Administrator must determine "that the size and capacity of such works relate directly to the needs to be served by such works, including sufficient reserves as a part of the works to be capacity provided shall be approved by the Administrator on the basis of a comparison of the cost of constructing such reserves as a part of the works to be funded and the anticipated cost of providing expanded capacity at a date when such capacity will be required."

**Definition.** In the broadest sense, reserve capacity includes several components: (1) Capacity required to serve estimated population growth within the service area, (2) capacity to serve anticipated new industrial and commercial

sources, (3) capacity required to handle, fully or partially, wet-weather flows, (4) capacity required to handle flows from existing sources in a service area which are not connected to the system but will be connected during the life of the system, (5) capacity included in the system as a hydraulic safety factor to accommodate daily and seasonal fluctuations, and (6) capacity included to provide for projected increases in per capita flow rates. In this paper, reserve capacity includes only components (1) and (2).

**Present Practice.** Under current regulations, eligible reserve capacity is determined on the basis of cost-effective analysis performed by the grantee in the Step I, facilities planning stage of the grant. This analysis is reviewed by the States and/or EPA and, if it conforms to good analytical practices as defined by EPA guidelines, the reserve capacity determined by the analysis is found to be eligible. Basically, the analysis encompasses a projection of population, industrial, and commercial growth and a comparison of total present monetary worth of various sizings of the facilities designed to serve alternative periods of growth. In addition, the nonmonetary impacts (the secondary impacts of growth) of the alternatives are compared.

The adequacy of the cost-effective analysis varies from "rule of thumb" designs to fairly sophisticated evaluations. Generally, these analyses have resulted in approved eligible reserve capacities of up to 20 years for treatment plants and 30 to 50 years for interceptor sewers.

**Recent studies.** Two recent studies have addressed the problems associated with current practices in basing eligible reserve capacity on cost-effective analyses. The first is a study on interceptor sewers conducted for the Council on Environmental Quality. This study was critical of EPA's present practice in that it occasionally permits excessive reserve capacity for interceptors, which facilitates growth and its attendant secondary environmental impacts.

The second is an unpublished EPA study analyzing 68 treatment plants and interceptors. Recent construction projects which had received Federal grants were selected at random from around the country. Each project was evaluated to determine the amount of reserve capacity provided. The EPA study found that reserve capacity in 53 treatment plants provided for an average of 18 years of increased flow, and reserve capacity in 15 interceptors, for 47 years of increased flow. There are two partial explanations for the large amount of reserve capacity found in this small sample of interceptors. First, large economies-of-scale are realized in interceptor construction—for example, a 10 percent increase in capacity represents only a 3 to 5 percent increase in cost. Second, traditional design periods are very long, usually about 50 years.

**California experience.** In 1973, California instituted its own policies on reserve capacity. The State certifies, as eligible, the costs of treatment plant

capacity required to serve projected residential and commercial flows within 10 years of commencement of construction, but only industrial flows existing at the commencement of construction are eligible. For interceptors, outfalls, and sewer lines, the cost of capacity for 20 years of growth is allowed.

California's system does not limit the amount of capacity which the grantee may build, but simply limits the capacity the State will certify as eligible for construction grant funds. For every grant, the State Department of Finance and the State Water Quality Control Board determines the population projections to be used in calculating eligible reserve capacity.

This so-called "10/20" program was chosen by California because it did not have enough construction funds to provide grants for every eligible project. The State felt too much money was being used for reserve capacity to serve population growth, thus delaying the funding of needed project and inducing adverse environmental impacts. The plan was the subject of public hearings before its enactment.

One result of California's approach was an increase in the administrative task of determining the eligible portion of the total project cost. For projects funded in FY 1973 and 1974, the State allocated costs between eligible and ineligible portions on a straight-line, or pro rata basis. For FY 1975 projects, costs are separated using a marginal cost, or incremental cost analysis. The difference between the two types of allocation is that the incremental analysis reflects the actual costs of reserve capacity by taking into account economies-of-scale, while the pro rata system does not.

**Reserve Capacity Included in 1974 Needs Survey.** One of the reasons for considering the limitation of eligibility for reserve capacity is that it conserves Federal funds authorized for construction grants and enables more, if not all, of these funds to be used to correct the "backlog" of facilities needs. To address this point, the recently completed 1974 Needs Survey was examined to determine the amount of growth related reserve capacity included in future needs. In Category I, secondary treatment, growth related reserve capacity appears to represent about 20 percent of the \$12.6 billion needs reported in the 1974 Needs Survey. For Category II, advanced treatment, the 1974 Needs Survey reported needs of \$15.7 billion. At this time it is impossible to estimate what portion of this need is for growth, although the ratio of growth to backlog is probably rather small. It is also difficult to estimate what part of interceptor needs — Category IVB — is for growth, without making a case-by-case investigation. However, on the basis of a small random sample of interceptors, growth needs are estimated to represent from 30 to 50 percent of reported needs, which the 1974 survey set at \$17.9 billion. In summary, of the \$46.2 billion in needs reported for treatment plants and interceptors in the 1974 Needs Surveys, \$12

billion or more appears to represent needs to serve population growth.

#### ISSUES TO BE DISCUSSED

The public hearings will address at least the following questions on this issue of limiting eligibility for growth-related reserve capacity.

1. Does current practice lead to overdesign of treatment works? Studies suggest that current practices permit substantial capacity to serve population growth. If true, this results in secondary environmental impacts and monetary inefficiencies. The 75 percent Federal grant rate appears to introduce an incentive for overdesign.
2. What could be done to eliminate problems with the current program, short of a legislative change? Population projections could be coordinated on a statewide basis and limited to the lowest of the Census Bureau's projected fertility rates. EPA and the States could give greater emphasis to overseeing better cost effective analyses in facilities planning; however, this would require more manpower than now available and could lead to project delays.
3. What are the merits and demerits of prohibiting eligibility of growth-related reserve capacity? Would this alleviate overdesign and its attendant monetary inefficiencies and secondary environmental impacts? Would municipalities, particularly rapidly growing communities, be able to accommodate 100 percent funding of necessary, cost-effective growth-related reserve capacity? Would this lead to underdesign and create a backlog problem for the future?
4. What are the merits and demerits of limiting eligibility for growth-related reserve capacity to 10 years for treatment plants and 20 or 25 years for sewers? Would this be sufficient to eliminate over-design? Could this be efficiently and effectively administered? Can the California experience be achieved in other States?
5. Are there other alternatives?

**PAPER NO. 3—RESTRICTING THE TYPES OF PROJECTS ELIGIBLE FOR GRANT ASSISTANCE**

**Statement of issue.** This paper deals with the issue of whether Pub. L. 92-500 should be amended to restrict the types of projects eligible for construction grants funding. Pub. L. 92-500 authorizes funding of the following types of projects:

- I Secondary treatment plants
- II Tertiary treatment plants as needed to meet water quality standards
- IIIA Correction of sewer infiltration/inflow
- IIIB Major sewer rehabilitation
- IVA Collector sewers
- IVB Interceptor sewers
- V Correction of combined sewer overflows
- VI Treatment or control stormwaters

The above classification is the same as that used in the 1974 Needs Survey. The issue is whether any of these categories should be eliminated from eligibility.

The principal purpose to be achieved in limiting eligibilities is to reduce the Federal burden in financing the construction grants program. A secondary purpose is to limit Federal participation to those types of projects that are most essential to meet the water quality goals of Pub. L. 92-500 and to require that some projects be fully financed by local and State authorities where such projects are clearly within their responsi-

bilities and capabilities. A proposal to limit eligibilities to categories I, II and IVB is being considered; however, other combinations are also being evaluated.

**Background.** Many types of actions may be involved in efforts to reduce water pollution. Certain of these actions, such as installation of treatment plants and interceptor lines, involve large amounts of capital for construction of facilities. Other actions, relying little if at all on construction of facilities, involve the extent and timing of pollutant loadings to the actual treatment and collection system by which such methods as frequent street sweeping or direct reduction of wastewater generation through legal or pricing mechanisms.

Prior to Pub. L. 92-500, Federal financial support was limited to treatment plants and interceptors. Other facilities were considered the responsibility of local governments, although specific Federal and State programs provided assistance in some cases. These limitations encouraged local governments to favor the few eligible types of projects, such as large treatment plants, rather than to bear the full cost for more effective solutions such as correction of infiltration/inflow problems.

Pub. L. 92-500 permitted funding of many previously ineligible construction-oriented approaches to water pollution control, increasing the incentive for local governments to develop projects economically efficient with respect to all construction-oriented approaches. Pub. L. 92-500 did not provide assistance for operating and maintenance costs, for most management alternatives to construction facilities, or for most nonpoint source control measures such as sediment catchments. Therefore, although the current grant program may have fewer biases than its predecessor programs, it has not eliminated all of the biases in local governments' incentive.

Any restrictions in eligibilities might produce some of the same biases that the Amendments worked to eliminate. However, section 313 of Pub. L. 92-500 explicitly requires applications for construction grants to be accompanied by a demonstration that the proposed project is "over the life of such works, the most cost-efficient alternative." In theory, this compels a locality to select the least costly actions, whether management- or construction-oriented, whether eligible or not eligible for Federal financial assistance. In fact, cost-effectiveness analysis seldom generates irrefutable conclusions. Since the most cost-efficient solution may be one for which there is little State or Federal assistance, there is a clear incentive for local governments in their cost-effectiveness analyses to favor actions that are eligible for assistance. The areawide planning program may in the future provide greater reliability in determining cost-effective solutions than an individual facilities plan currently does. However, areawide planners, like facilities planners, may hesitate to produce a plan that identifies means which are ineligible for Federal cost-sharing as the most cost-effective.

Several arguments have been advanced for restricting existing eligibilities in some manner:

**Ensure that Federal funds provide greatest water quality benefits.** Effective use of Federal resources requires that the limited funds available be allocated to obtain the greatest water quality benefits relative to costs, taking into account local willingness and capacity to invest in facilities. Because of this, States, in conjunction with EPA, have developed a system of priorities for funding projects. In an effort to structure these priorities so that they reflect anticipated project benefits, projects have been ranked in large part according to the type of facility to be built. As a result, treatment plants and interceptors have high priority, while collector sewers, correction of wet weather overflows, and stormwater treatment and control generally have low priority. Congress, however, has allocated available funds among States partly according to total needs for all eligible facilities, including both low and high priority facilities. Relative needs for these facilities vary widely among States and EPA Regions. It will become increasingly difficult therefore to ensure on a national basis that high-priority projects are funded before low-priority projects, and thus ensure that maximum water quality benefits are being derived from Federal expenditures. A statutory elimination of certain eligibilities, this argument runs, would have three closely-related effects: (1) Legislate greater adherence throughout the nation to priorities, promoting maximum benefits; (2) simplify administration of the program by giving clearer statutory authority to established priorities; and (3) simplify Congressional allocation of funds among States in an equitable, efficient manner more closely in accord with established priorities by eliminating those facilities for which needs can be least reliably ascertained.

**Reduce Federal budgetary commitments.** In 1974, States estimated their eligible needs for all these facilities at \$356 billion, including \$235 billion for storm water treatment and/or control. Since Congress is unlikely ever to appropriate this amount, explicit restrictions would clarify the nature and extent of Federal commitment over the next few years and facilitate the budget-making process.

**Encourage State and local self-sufficiency.** Restrictions in eligibility would encourage State and local governments to assume increased responsibility both in determining environmental needs and financing pollution-control facilities. Greater self-sufficiency, in turn, would probably result in States and localities setting water quality goals that more accurately reflect their perceived benefits.

**Encourage wiser investment decisions.** Reduction in eligibility might discourage construction-oriented solutions for certain problems, such as stormwater runoff, that may better be handled by management techniques. Reduction in eligibility for facilities with a high propor-

tion of local benefits and for which there is adequate local willingness and ability to finance, such as collection sewers, would prevent the expenditure of Federal funds which could finance projects with higher water quality benefits. Similarly, elimination of eligibility for certain elements would reduce the tendency for localities to delay needed or desired investment in hopes of receiving a grant.

On the other hand, there are several arguments for retaining or even broadening current eligibilities.

**Encourage examination of broad options.** Among construction-oriented elements, broad eligibilities encourage selection of the most cost-effective system. Rather than focusing attention on one or two types of construction solutions, such as a larger treatment plant instead of less-costly correction of infiltration/inflow, or advanced treatment for sanitary wastes rather than treatment or control of stormwater runoff, all major construction approaches would be encouraged.

**Preserve administrative flexibility.** Facilities integral to an effective wastewater management system, such as collector sewers, can be supported by Federal funds when they are beyond local financial capability. By allowing such selective funding, broad eligibilities preserve program flexibility and allow EPA to overcome obstacles which might otherwise delay construction of high-priority facilities.

**Increase incentive to achieve the goals and requirements of the Act.** Pub. L. 92-500 set very high goals, including waters suitable for swimming by 1983 and the elimination of discharge of pollutants by 1985. Broad eligibilities—coupled with adequate resources—provide greater support to the efforts of local government to meet these goals.

**Prevent inequitable changes.** Some communities may have received financial assistance for facilities which a legislative amendment would make ineligible, thereby denying similar grants to other municipalities with equal qualifications.

**Considerations.** Any proposal must be judged, primarily by how it will affect attainment of the Act's objective "to restore and maintain the chemical, physical, and biological integrity of the Nation's waters." Along with the environmental impact, however, consideration must be given to economic impacts such as employment, inflation, and efficient allocation of resources, as well as to considerations such as ease and equity of administration. The basic questions which must be explored in evaluating alternative proposals are the following:

1. What would the net environmental impacts be of the major alternatives under consideration? Upon what specific premises should an evaluation of the environmental impact be based?

2. How would the various changes affect administration of the program? What are the major differences between administrative problems resulting from restricting, as opposed to eliminating, certain types of eligibilities? What sorts of restriction could most easily be enforced?

3. What changes in investment and employment in wastewater pollution control would result from adoption of any of the major alternatives? What changes in total employment in the entire economy? What are the probable impacts on inflation in costs for pollution control facilities and in costs of other goods and services?

In examining these basic questions, it may be useful to consider other closely related questions:

1. What impact do different eligibility structures have on the determination of need for a particular facility? A need may be perceived for a facility for a variety of reasons—a secondary treatment plant to meet the requirement of the Act, a stormwater treatment plant to allow high water quality standards to be achieved throughout the year, collector sewers to replace failing septic tanks, etc. Since all needed facilities cannot be built at once, a grant system ideally should seek to provide the greatest improvement in water quality.

Would restricted eligibilities facilitate or hinder the achievement of this objective? Are the differences in benefits accruing from different types of facilities sufficient to justify restriction by category? What problems are currently and would in the future be associated with accomplishing this objective if, in order to preserve flexibility, it is done administratively rather than by legislative amendment?

Eligibility for certain elements may lead a local agency to construct such a facility when in fact an equally effective management alternative to the problem is less expensive, in terms of all Federal, State, and local costs. It has been argued that this problem is especially evident in ameliorating the impact of urban stormwater runoff.

Do certain eligibilities in fact create this difficulty, and if so, how might it be alleviated?

2. Is there adequate local incentive to undertake needed investment in certain types of facilities, even in the absence of Federal financial assistance? Where a high proportion of the benefits of pollution abatement actions accrue to an individual locality, it would be expected that the locality would have adequate incentive to undertake investment without Federal assistance. But when Federal funds support such projects, (thereby substituting for local funds which would have been invested anyway), fewer Federal funds are available for projects with more nonlocal benefits thus less local incentive to invest. The result, would be less total investment in wastewater pollution control facilities.

How does the proportion of local benefits, and thus local incentive to undertake investment without financial assistance, vary among types of facilities?

The concept of benefits, of course, implies that localities receive positive gains from their actions. There is also the possibility that enforcement actions brought against localities for not complying with specific requirements of the Act would serve as a major incentive to undertake investment without assistance. This might raise serious questions of equity, of course, but does suggest one means of increasing local incentive to invest in the absence of Federal assistance.

How do, or might, enforceable provisions of the law affect incentive to construct different types of facilities?

3. Is there adequate local financial capability to undertake investment in different types of facilities? If there is a definite need for a facility, but inadequate local financial capability, it is unlikely to be constructed without financial assistance, even if there is considerable local incentive. As a result,

a grant program oriented toward financial assistance may be needed to ensure that appropriate levels of investment are attained. Financial constraints on local governments resulting from the current recession may be significantly reduced by the time any amendment would become effective, presumably after FY 1976. Other Federal grant programs, such as the community development block grant program of the Department of Housing and Urban Development, might provide local governments with funds needed for certain types of facilities even if eligibility under the Act were eliminated. In addition, different ways to finance different types of facilities—for example, special bonds for collector sewers—may facilitate financing when the local government has encountered difficulties financing other types of facilities.

Are there differences—such as cost or financing methods—among types of facilities eligible for assistance that would lead to different impacts on local financial capability if certain eligibilities were reduced or eliminated?

PAPER NO. 4—EXTENDING 1977 DATE FOR THE PUBLICLY OWNED PRETREATMENT WORKS TO MEET WATER QUALITY STANDARDS

**Statement of issue.** This paper deals with the issue of whether Pub. L. 92-500 should be amended to extend the date by which publicly owned treatment works are to achieve compliance with requirements of section 301 of the statute. Sections 301(b)(1)(B) and 301(b)(1)(C) of Pub. L. 92-500, require that publicly owned treatment works (POTW's) achieve effluent limitations based upon secondary treatment or a more stringent level of treatment, if necessary, to meet water quality standards. These effluent limitations are to be attained no later than July 1, 1977. The only exception is where grants to POTW's were approved before July 1, 1974. These POTW's are required to complete construction within four years of the construction grant approval date.

It is currently estimated that 50 percent or 9,000 municipalities serving 60 percent of the 1977 population will not be able to comply with the above requirements. This stems almost exclusively from the fact that municipalities have depended, with EPA acquiescence, on construction grants to assist them in constructing the necessary facilities to enable them to meet these requirements. This dependence has encountered two problems. First, the amount of construction grant funds thus far authorized—\$18 billion—is not sufficient to cover the 1977 needs which are estimated by the 1974 Needs Survey to be at least \$46 billion (based on categories I, II and IVB which are secondary treatment plants, tertiary treatment plants when required to meet water quality standards, and interceptor sewers, respectively). As a result, a part of the 9,000 municipalities have not received a grant to construct the facilities needed to comply with the 1977 requirement.

Second, a great many of the projects funded under the construction grants program cannot be feasibly completed by 1977 to enable compliance with the section 301 requirements. Because of a variety of problems and delays in re-

vising the construction grants program to incorporate the many new requirements of Pub. L. 92-500, because of the longer project planning and design periods required to meet these new requirements and because of other factors, only \$4.8 billion of the \$18 billion has been obligated. Consequently, only a small portion of the projects that will be constructed under the \$18 billion have been started and a majority of these have not yet reached construction stage. Moreover, the time period to bring a project to completion is typically 2 to 5 years and occasionally exceeds 5 years. Accordingly, even some of the projects initiated about the time of, or shortly after the passage of, Pub. L. 92-500 cannot be completed within the Section 301 time period.

**Alternatives.** Five principal alternative solutions to the problem of noncompliance have been identified. In cases where a proposed extension of secondary treatment requirements results in a violation of water quality standards, EPA is assuming that Congress would provide an exemption from compliance with water quality standards.

The five alternatives are:

1. Retain the 1977 date and enforce against violators.

2. Retain the 1977 date without enforcing against those dischargers that cannot realistically be expected to meet the deadline due solely to funding problems.

3. Seek statutory amendments that would maintain the 1977 date but would provide the EPA Administrator with discretion to grant compliance schedule extensions on an ad hoc basis, based upon actual time required with the expenditure of good faith efforts to build the necessary facilities.

4. Seek statutory amendments that would maintain the 1977 date but would provide the Administrator with discretion to grant compliance schedule extensions on an ad hoc basis based upon the availability of Federal funds.

5. Seek a statutory extension of the 1977 deadline to 1983 and require compliance regardless of Federal funding.

Alternative (1) implicitly denies any connection between the availability of construction grant funds and EPA's compliance/enforcement of municipal permits. This appears to be politically unrealistic, few if any communities are expected to finance their own POTW's and thereby jeopardize Federal support, whether confronted by an enforcement threat or not. Under most circumstances, the community would probably take the issue to court rather than attempt to raise its own funds. In fact, the State of Virginia, in anticipation of possible EPA enforcement activity, has challenged EPA's enforcement authority claiming "a Federal share" of the cost of compliance with Section 301 and thereby arguing that enforcement is viable only where funds have been made available in sufficient time to comply with the deadline. The United States District Court (Eastern District, Virginia) is expected to rule on this issue in approximately 60 days.

The policy supported by Alternative (1) has the added consequence of aggravating existing equity problems cre-

ated by limited funding capabilities and the inability to spread available funds among the needed facilities in the State since the statute requires that the Federal government pay 75 percent of the construction costs. This effectively prevents the Administrator from making grants in amounts less than 75 percent and thereby providing funding of all needed facilities at lesser levels of Federal participation.

Furthermore, the logic of taking enforcement action against a facility that is physically unable to meet 1977 requirements because of construction limitations can be questioned. However, the EPA does not feel constrained to take specific remedial action such as sewer moratoriums where appropriate.

On the other hand, the aggressive enforcement program supported by Alternative (1) might motivate reluctant communities to speed construction where possible to avoid severe penalties for violation of permits.

Alternative (2) reflects current EPA policy in part. This policy has been to issue five-year permits providing for full compliance with 1977 requirements to all publicly owned treatment works where no major construction is needed to achieve compliance with section 301, where construction scheduled for completion by the 1977 deadline is presently underway, or where the source is sufficiently high on the State's priority list for funding and the proposed construction schedule is such that compliance with the 1977 requirements is probable.

Short-term permits (expiring prior to the section 301 deadline) are issued to municipal facilities that cannot realistically be expected to meet required discharge limitations by the 1977 deadlines. These permits include effluent limitations established so as to require optimum operation and maintenance of existing facilities and completion of any modifications to facilities which could reasonably be undertaken with State and local monies or revenue sharing funds in the absence of a Federal construction grant.

Following this policy, EPA strictly monitors and enforces compliance schedules and requirements established in permits. As a result, EPA has not initiated enforcement action against municipalities whose violations of the statutory deadline can be shown to have resulted solely from the lack of Federal funds, and their discharge is in compliance with an issue permit.

The inherent weakness of this option lies in the potential loss of a very effective tool—permits and enforcement rather than grants—for achieving compliance with section 301 requirements. Furthermore, this option does not prevent possible citizen suits on the matter nor does it limit potential State enforcement activity. Twenty-two States have already received National Pollutant Discharge Elimination System (NPDES) program approval and thus have independent enforcement authority. Municipalities may thus be vulnerable to differing standards of compliance.

Alternative (3) enables EPA to grant extensions to municipalities based upon physical construction limitations that cannot, under any circumstances, be overcome, but without any full commitment to Federal funding support. Under this alternative EPA could still mandate construction without Federal funds, although it is unlikely to do so. By granting the Administrator discretion to extend compliance deadlines on a project-by-project basis, this alternative provides for a more uniform and aggressive enforcement policy than those possible under alternative (2). Facilities capable of meeting the 1977 deadline are required to do so, and strong enforcement action is taken when they fail. Facilities granted extensions are placed on specific compliance schedules subject to a vigorous monitoring program to alert the EPA Regional Offices to slippage. Enforcement action would then be taken as appropriate.

However, it may be difficult to limit the application of this alternative to municipal dischargers, since industrial dischargers who have also experienced construction delays could make similar arguments. This problem is aggravated by the dependence of some industrial dischargers upon the successful construction of municipal plants to complete their treatment requirements. Current EPA policy expects the industrial facility to satisfactorily treat its wastes until such time as it can hook up into a municipal system, even if such treatment might require construction of a treatment plant to be utilized for a very short time period.

Alternative (4) seeks Congressional agreement to provide 75 percent funding for the construction of facilities needed to comply with the 1977 deadline. This alternative links the availability of Federal funding with the enforcement provisions contained in section 309.

A significant problem in adopting this alternative is the fact that eligible construction costs, as now defined in the Act, would provide 75 percent funding for "eligible projects." Eligible projects may achieve effluent reductions far greater than required for the 1977 deadline. As the Needs Survey observed, the cost of eligible facilities under Pub. L. 92-500 is \$342 billion dollars, a significantly greater figure than that required for compliance with the 1977 deadline.

Thus, it becomes apparent that should alternative (4) be adopted, eligibility would need to be redefined in such a manner as to prevent the Federal share from being used to construct facilities more sophisticated than necessary to achieve the 1977 deadline. This alternative has significant Federal budgetary implications not found in other options. If the Federal government assumed responsibility for construction of all publicly owned treatment works required to provide secondary treatment, current Federal funding levels would probably be more than tripled.

Alternative (4) also carries the same compliance ramifications evident under Alternative (3), since responsiveness to

the problem of construction delays is implicit in this option.

Alternative (5), which changes the municipal compliance date to 1983, offers an across-the-board extension regardless of the problems of any given POTW. It could possibly jeopardize the entire NPDES program. Industrial facilities would insist on similar extensions, particularly those under great financial strain to comply with their effluent limitations. Water quality standards would be violated unless new regulations were written providing for some sort of exemption.

However, this alternative is somewhat responsive to the national economic situation. Furthermore, it allows for more flexibility in local decision making procedures. It is also unambiguous, requiring compliance regardless of Federal funding. Thus it eliminates the problem of administrative subjectivity as well as compliance uncertainty inherent under alternatives (2), (3), and (4).

Furthermore, alternative (5) would also accommodate the suggestion of an EPA task force to allow the postponement of construction of the municipal treatment works with an ocean discharge, pending environmental assessments of specific outfall sites to determine the most effective technology.

**Considerations.** EPA is interested in a public response to these alternatives. It is important that policy formulation reflect the relative priorities and tradeoffs of affected communities. Apart from the obvious question of which alternative is preferred, there are other considerations:

1. Should Pub. L. 92-500 be amended to permit prefinancing of POTW's subject to Federal reimbursement?
2. Is it fair to require industry to meet the 1977 deadline while extending it for municipalities?
3. Is it fair to make industrial requirements more stringent pending municipal compliance, as is the case with joint systems?
4. Should an outside limit be provided to the Administrator granting extensions, for example five years from date of amendment, or should the possible compliance deadlines be open-ended?
5. Will EPA lose credibility supporting an across-the-board extension for municipal compliance, especially in cases where it is unnecessary? Or are the current economic priorities such that such an extension is only reasonable?
6. How big a difference would these alternatives make on local funding or State financing?
7. Should EPA consider changing the definition of secondary treatment to allow for classifications according to size, age, equipment, and process employed? Extensions of the 1977 deadline might therefore be unnecessary, since the amended secondary treatment requirements could be responsive to many of the construction problems causing current compliance delays.
8. Would a two-year extension for compliance be preferable to the six-year extension promoted under Alternative (5)? Is this alternative unnecessarily lenient?
9. Until such a time when a solution to current compliance delays is adopted, should EPA issue letters of authorization to those POTW's that cannot achieve compliance with the 1977 deadline instead of issuing short-

term permits? Letters of authorization are administratively simpler than short-term permits.

#### PAPER NO. 5—DELEGATING A GREATER PORTION OF THE MANAGEMENT OF THE CONSTRUCTION GRANTS PROGRAM TO THE STATES

**A. Background.** With the recent release of the full \$18 billion in construction grant funds, it is important that all construction grant applications be processed as efficiently as possible, while maintaining financial and environmental integrity. One current proposal for improving the performance of the program is to delegate a greater number of functions and responsibilities directly to the States with EPA assuming more of an oversight role. If States were able to assume a greater degree of program management, it might be possible to expedite the flow of funds into necessary construction projects, thereby obtaining both environmental and economic benefits.

A bill, H.R. 2175, has been introduced which would permit the Administrator to delegate to the States the broad range of grant processing functions, including those that go beyond just the review and approval of documents. Included also is a provision to compensate the States directly out of State allotments for administrative costs which they incur—up to a maximum of 2 percent of a State's yearly allotment. Under the H.R. 2175, EPA activities would be largely confined to overall policy making and to auditing and monitoring the grant activities performed by the States. However, EPA would remain responsible for any Environmental Impact Statements necessary on individual projects.

Current procedures authorize States to certify that such key documents as construction plans and specification and operation and maintenance manuals fulfill all legal and administrative requirements. EPA can then approve them without further review.

The bill would authorize the State agency to certify that plans, specifications, and estimates for a proposed project meet the requirements of the Act, and that the proposed project conforms to applicable areawide and State plans, is entitled to priority, and relates directly to the needs to be served by such works, including sufficient reserve capacity. Finally, the State agency would be able to certify as to such matters as bidding procedures, cost sharing requirements, cost effectiveness, and user charge and industrial cost recovery requirements, as well as legal, institutional, managerial, and financial capabilities.

The proposed measure would also provide for State certification of the fulfillment of various requirements for facilities grants under Title II of the Pub. L. 92-500 is intended to (1) reduce duplication of efforts by the States and the Federal government, (2) avoid substantially enlarging the number of Federal personnel needed to carry out the provisions of the Act, and (3) enhance the policy expressed in Pub. L. 92-500 to

"recognize, preserve, and protect the primary responsibilities and rights of States" in the prevention, reduction, and elimination of pollution. EPA has had a continuing policy of delegating to the States, to the extent possible, responsibility for conducting functions related to the Act—provided that the quality of the State's performance will equal or exceed requirements for fulfilling these functions. The proposed amendment would allow the States, as they become ready, to assume responsibilities commensurate with their capabilities, and would, as well provide funds to reimburse them for the responsibilities assumed.

**B. Alternatives.** The general intent of the proposed legislation is to process grants more effectively and efficiently and to give more attention to activities and problems at the State level. Alternative course for making the processing of grants more effectively and efficiently tending all of the responsibilities in EPA or, (2) continuing the present mix of EPA/State grant activities, but improving the overall procedures. With greater delegation of responsibility to the States, some time will be necessary for the States to organize and acquire adequate staff.

**C. Considerations.** In considering this issue, the public may wish to discuss the following questions: (1) Exactly what functions in the review and approval of construction grant applications should be delegated, (2) should all parts of the construction grants process be delegated, (3) in addition to ordinary staffing problems, what difficulties may be encountered in State staffing when a Federal financial commitment is involved, (4) will the funding level suggested in the proposed bill be adequate, (5) in actual practice, will greater delegation of program responsibility to the States make the program more efficient without compromising environmental concerns, (6) how much time would be required for individual States to assume additional responsibilities, and (7) are there alternative funding schemes, either Federal or non-Federal.

#### H.R. 2175

##### A BILL

To amend title II of the Federal Water Pollution Control Act to provide for State certification:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title II of the Federal Water Pollution Control Act (33 U.S.C. 1281 et seq.) is amended by adding at the end thereof the following new section:

##### CERTIFICATION

Sec. 213. (a) The Administrator may discharge any of his responsibilities for actions, determinations, or approvals under sections 201(g) (2) and (3), 203 (a) and (d), 204 (a), (b) (1), and (b) (3), and 212 (2) (B) of this Act with respect to projects or proposed projects for treatment works by accepting a certification by the State water pollution control agency of its performance of such responsibilities.

(b) The Administrator shall not accept any certification provided for in subsection (a) of this section unless the Administrator determines that the State water pollution control agency has the authority, responsibility, and capability to take all of the actions, determinations, or approvals for which certification is submitted under subsection (a) of this section.

(c) If the Administrator determines after public hearings that a State water pollution control agency, with respect to any requirement, condition, or limitation for which he has accepted a certification under subsection (a), fails to meet the requirements of this Act, he may suspend his acceptance of certification as to such requirement, condition, or limitation with respect to any project, or with respect to all projects in such State, as he determines necessary, and during such suspension he shall be responsible for such requirement, condition, or limitation.

(d) (1) The Administrator is authorized to conduct interim and final inspections and audits, and to require such information, data, and reports as he may determine necessary to carry out this section.

(2) Nothing in this section shall affect or discharge any responsibility or obligation of the Administrator under any other Federal law, including the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(e) (1) The Administrator shall reserve an amount not to exceed 2 percent of the allotment made to each State for each fiscal year under section 205, after the date of enactment of this section. Sums so reserved shall be available for making grants to such State under paragraph (2) of this subsection for the same period as sums are available from such allotment under subsection (b) of section 205, and any such grant shall be available for obligation only during such period. Any grant made from sums reserved under this subsection which has not been obligated by the end of the period for which available shall be added to the amounts last allotted to such State under section 205, and shall be immediately available for obligation in the same manner and to the same extent as such last allotment.

(2) The Administrator is authorized to grant to any State exercising, or proposing to exercise certification authority under this section, from amounts reserved to such State under this subsection, the reasonable costs, as determined by the Administrator, of carrying out such authority.

(f) The Administrator shall promulgate such rules and regulations as may be necessary to carry out this section. The initial rules and regulations necessary to carry out this section shall be promulgated not later than the ninetieth day after date of enactment of this section.

[FR Doc. 75-13865 Filed 5-27-75; 8:45 am]

[FRL 378-2; OPP-33000/256]

#### RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

##### Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c) (1) (d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown

below. The labeling furnished by applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street, SW., Washington, D.C. 20460.

On or before July 28, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60 day period has expired. If no claims are received, within the 60 day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60 day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 28, 1975.

Dated: May 16, 1975.

JOHN B. RITCH, JR.,

Director,

Registration Division.

APPLICATIONS RECEIVED (OPP-33000/256)

EPA File Symbol 3862-LI. ABC Compounding Co., Inc., P.O. Box 932, Atlanta GA 30301. BROMA-KIL 125 WEED KILLER. Active Ingredients: Bromacil (5-bromo-3-sec-butyl-6-methyluracil) 1.25%. Method of Support: Application proceeds under 2(c) of interim policy. PM25

EPA File Symbol 10807-LN. Aero Mist, Inc., 990 Industrial Park Dr., Marietta GA 30062. MISTY HOSPITAL DISINFECTANT DEODORANT. Active Ingredients: Orthophenylphenol 0.177%; Para-tertiary-aminophenol 0.045%; Alcohol 53.508%. Method of Support: Application proceeds under 2(c) of interim policy. PM32

EPA File Symbol 4876-LI. AG Supply Co., Div. of Seedkem Inc., Industrial Dr., Hopkinsville KY 42240. CHLORDANE-8 TER-MITE CONTROL. Active Ingredients: Technical Chlordane 72%; Aromatic petroleum Derivative Solvent 21%. Method of Support: Application proceeds under 2(c) of interim policy. PM15

# RECEIPT OF APPLICATIONS FOR PESTICIDE REGISTRATION

## Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (38 FR 31862) its interim policy with respect to the administration of section 3(c) (1) (D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This policy provides that EPA will, upon receipt of every application for registration, publish in the FEDERAL REGISTER a notice containing the information shown below. The labeling furnished by the applicant will be available for examination at the Environmental Protection Agency, Room EB-31, East Tower, 401 M Street, SW, Washington DC 20460.

On or before July 28, 1975, any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after October 21, 1972, is being used to support an application described in this notice, (c) desires to assert a claim for compensation under section 3(c) (1) (D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data, must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Information Coordination Section, Technical Services Division (WH-569), Office of Pesticide Programs, 401 M Street, SW, Washington DC 20460. Every such claimant must

include, at a minimum, the information listed in the interim policy of November 19, 1973.

Applications submitted under 2(a) or 2(b) of the interim policy will be processed to completion in accordance with existing procedures. Applications submitted under 2(c) of the interim policy cannot be made final until the 60-day period has expired. If no claims are received within the 60-day period, the 2(c) application will be processed according to normal procedure. However, if claims are received within the 60-day period, the applicants against whom the claims are asserted will be advised of the alternatives available under the Act. No claims will be accepted for possible EPA adjudication which are received after July 28, 1975.

Dated: May 19, 1975.

DOUGLAS D. CAMPT,  
Acting Director,  
Registration Division.

## FEDERAL HOME LOAN BANK BOARD

[No. 75-444]

## DE NOVO BRANCHING IN HAMILTON COUNTY, OHIO

### Termination

MAY 19, 1975.

Notice is hereby given that the Federal Home Loan Bank Board has terminated the moratorium on de novo branching by Federal savings and loan associations in Hamilton County, Ohio, by the following resolution adopted by the Board on May 19, 1975:

Resolved that section III ("Hamilton County, Ohio") of the "Working Understanding between the Federal Home Loan Bank

Board and the Ohio Division of Building and Loan Associations for Coordination of Prerequisite Requirements and Administrative Treatment of Applications for New Facilities", approved by Board Resolution No. 74-1018, dated December 18, 1974, is hereby terminated with respect to Federal associations effective June 30, 1975 or on such earlier date as said Ohio Division may terminate said Section III with respect to Ohio-chartered associations; and after such termination the Board will accept branch office applications in Hamilton County by Federal associations.

Resolved further That the remainder of said Understanding is hereby reaffirmed.

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,  
Assistant Secretary.

## FEDERAL MARITIME COMMISSION

[Docket No. 75-18]

## PUERTO RICO MARITIME SHIPPING AUTHORITY

## Order of Investigation and Suspension of Reduced Rates From Florida to Puerto Rico

Effective May 25, 1975, the Puerto Rico Maritime Shipping Authority (hereinafter PRMSA) proposes to reduce rates on certain tariff items set forth in its tariff, FMC-F No. 1. PRMSA, currently serving the Continental U.S. ports of New York, Baltimore, Charleston, Jacksonville and New Orleans, would by these provisions reduce the above-noted rates applicable to Jacksonville, Florida and extend service to the Port of Miami, Florida, with the reduced rates applicable. The prospective service, to triangulate between San Juan, Jacksonville and Miami, would be facilitated by one of PRMSA's Roll-on/Roll-off (Ro/Ro) vessels that would otherwise be serving the Port of New York.

TMT Trailer Ferry, Inc. (hereinafter TMT), a barge carrier serving Jacksonville and Miami, and Puerto Rico, and the only carrier affording substantial competition to the recently consolidated service maintained by PRMSA, protested the proposed reduction in rates. TMT's protest alleges in substance, that: (1) The reduced rates are exclusive to Jacksonville and Miami and therefore correspondingly below the rates for service

rendered by PRMSA from the Ports of New York, Baltimore and New Orleans, and could result in an unlawful diversion of cargo to PRMSA's prospective service; (2) the reduced rates would be non-compensatory given PRMSA's currently unprofitable operation; (3) the reductions would be to levels identical with those rates on commodities vital to TMT, causing irreparable harm to TMT, and eventually resulting in monopolization of that trade by PRMSA, and (4) the elimination of the rate differential between TMT's rates and PRMSA's rates violates the principles stated by the Commission in Docket No. 1182, "Rates from Jacksonville, Florida to Puerto Rico," 10 FMC 376 (1967), where the Commission allowed a rate differential based on cost differences in the value of service.

The General Electric Company protested the proposed redeployment of the Ro/Ro vessel from New York to Florida, stating in substance that such would seriously impair its shipments and cause detriment to the economy of Puerto Rico.

PRMSA replied to the protests, disputing the allegations set forth, and averred in substance that: 1. It desired to provide an alternative source of transportation to shippers from Jacksonville and Miami, 2. Additional capacity south-bound was sorely needed, 3. Four of the proposed reductions were to levels previously charged by Sea-Land Service, Inc. when it served Puerto Rico from Jacksonville and Miami in competition with TMT, and 4. A regulated carrier has a right to initiate rates to meet competition provided the rates are compensatory and not lower than necessary to meet the competition.

Upon consideration of the above matter, the Commission is of the opinion that the proposed reductions should be made the subject of a public investigation and hearing to determine whether they are unjust, unreasonable or otherwise unlawful under sections 16, First and 18(a) of the Shipping Act, 1916, and/or sections 3 and 4 of the Intercoastal Shipping Act, 1933, and good cause appearing:

Therefore, it is ordered, That pursuant to the authority of section 22 of the Shipping Act, 1916, and sections 3 and 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted into the lawfulness of PRMSA's proposed reductions for the purpose of making such findings and orders as the facts and circumstances warrant. In the event that the tariff matter hereby placed under investigation is further changed, amended, or reissued such changes are hereby ordered to be made a part of this investigation.

It is further ordered, That pursuant to section 3, Intercoastal Shipping Act, 1933, the tariff items above-noted from the Puerto Rico Maritime Shipping Authority's Tariff FMC-F No. 1 are hereby suspended and the use thereof deferred to and including September 24, 1975, unless otherwise ordered by the Commission;

## NOTICES

It is further ordered, That there shall be filed immediately by PRMSA a consecutively numbered supplement to the aforesaid tariff which supplement shall bear no effective date, shall reproduce the portion of this order wherein the suspended matter is described and shall state that the aforesaid matter is suspended and may not be used until September 25, 1975, unless otherwise authorized by the Commission and that the rates and charges heretofore in effect and which were to be changed by the suspended matter shall remain in effect during the period of suspension, and neither the matter suspended nor the matter continued in effect as a result of suspension may be changed until this proceeding has been disposed of or until the period of suspension has expired, whichever comes first, unless otherwise ordered by the Commission:

It is further ordered, That pursuant to section 18(a) of the Shipping Act, 1916, and sections 3 and 4 of the Intercoastal Shipping Act, 1933, a determination shall be made as to whether the proposed reductions are just and reasonable;

It is further ordered, That pursuant to section 16 First of the Shipping Act, 1916, a determination shall be made as to whether PRMSA's proposed reductions are likely to result in undue or unreasonable preference or advantage to shippers using the ports of Jacksonville and Miami or undue or unreasonable prejudice or disadvantage to shippers using other Atlantic and Gulf Coast ports.

It is further ordered, That copies of this order shall be filed with the appropriate tariff schedules in the Bureau of Compliance of the Federal Maritime Commission;

It is further ordered, That pursuant to section 21 of the Shipping Act, 1916, the respondent shall submit schedules showing vessel utilization, on a voyage-by-voyage basis, between Charleston, South Carolina, Jacksonville and Miami, Florida on the one hand, and San Juan, Puerto Rico on the other hand. The report shall clearly show the number of container-trailer spaces and automobile spaces available for each port on each vessel on each voyage, and the number of these spaces utilized by revenue producing units both southbound and northbound. These reports shall be submitted to the Director, Bureau of Compliance not later than five normal working days after the completion of each vessel's voyage, after the commencement of the service extension to Miami;

It is further ordered, That PRMSA be named as Respondent in this proceeding and that TMT Trailer Ferry, Inc. and the General Electric Company be named as Complainants;

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hear-

ing shall commence not later than July 29, 1975;

It is further ordered, That (I) a copy of this order be forthwith served upon the respondent, complainants and upon the Commission's Bureau of Hearing Counsel and published in the Federal Register; and (II) the respondent, complainants and Hearing Counsel be duly served with notice of time and place of the hearing.

All persons (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding and desiring to intervene herein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with rule 45(1) of the Commission's rules of practice and procedure (46 CFR 502.72) with a copy to all parties to this proceeding.

By the Commission.

[SEAL] FRANCIS C. HURNEY,  
Secretary.

## FEDERAL POWER COMMISSION

[Docket No. E-8360]

## ALABAMA POWER CO.

## Revisions in Interconnection Agreement

MAY 20, 1975.

Take notice that Alabama Power Company (Applicant) on May 12, 1975 filed with the Federal Power Commission Revised Exhibit B to the Interconnection Agreement between Applicant and Alabama Electric Cooperative, Inc., which was accepted for filing by the Commission and designated as Applicant Rate Schedule FPC No. 133. Revised Exhibit B is stated to be submitted pursuant to Section 5.05 of said Interconnection Agreement and reflects agreement between the parties to the estimated maximum integrated peak hour demands as reflected therein. Applicant further filed in the form of Statement O, pursuant to § 35.13 of the Commission's regulations, a change in the fuel cost adjustment factor to be used under the Interconnection Agreement in the ensuing contract year. The application states, however, that the billing under the new fuel cost adjustment factor is subject to the decision of this Commission in Docket No. E-8360 now pending before this Commission for decision. That docket involves a controversy between Applicant and Alabama Electric Cooperative, Inc. regarding the use of a transmission loss multiplier in the calculation of the fuel cost adjustment factor.

A copy of this filing was served upon Alabama Electric Cooperative, Inc.

Any person desiring to be heard or to protest said application should file a petition to intervene with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 or 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 3, 1975. Protests will be considered by the

Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-9436]

## CENTRAL TELEPHONE AND UTILITIES CORP.

## Filing of Addendum to Contract

MAY 20, 1975.

Take notice that on May 8, 1975, Central Telephone and Utilities Corporation (CTU), tendered for filing an Addendum, dated April 1, 1975, to the contract of October 31, 1973, between Central Telephone and Utilities Corporation and the Victory Electric Cooperative Association, Inc.

The Addendum, agreed to between the parties, modifies in part Article II, Paragraph 2.4 of said Contract. The Contract remains in full force and effect except as to this modification.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 10, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

## CENTRAL TELEPHONE &amp; UTILITIES CORP.

## Addendum to Rate Contract

MAY 20, 1975.

Take notice that on March 24, 1975, Central Telephone & Utilities Corp. filed an Addendum to their contract with C.M.S. Electric Cooperative, Inc., dated October 19, 1973. The Addendum sets forth several revised delivery points and the appropriate descriptions thereof.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure

(18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. E-9445]

## CENTRAL VERMONT PUBLIC SERVICE CORP.

## Filing of Rate Schedule

MAY 20, 1975.

Take notice that on May 15, 1975 the Central Vermont Public Service Corporation (Central Vermont) tendered for filing the following rate schedule:

Purchase Agreement for the sale of sixty thousand kilowatts (60,000 KW) and related energy from certain Vermont gas turbines to the Central Maine Power Company, dated as of February 21, 1975.

Central Vermont states that service under this Agreement began at 11:59 p.m. on February 28, 1975 and terminated at 11:59 p.m. on April 30, 1975. Service to Central Maine under this rate schedule is stated to consist of the sale of 60,000 KW capacity and related energy for delivery as emergency reserve, and is to be provided on the basis of a capacity charge at \$69,000 per month. This capacity charge includes \$1.50 KW per year to cover the estimated cost of charges by Vermont Electric Power Company (Velco) to Central Vermont under other contracts between Central Vermont and Velco for the transmission of power by Velco. Central Vermont further states that the proposed rate schedule also includes a maintenance charge of one mill per KWH and an energy charge equal to fuel expense actually incurred to operate the gas turbines necessary to serve Central Maine.

Central Vermont requests a waiver of § 35.3 of the Commission's rules and regulations to allow an effective date of March 1, 1975, citing extensive contract negotiations with Central Maine, and no effect upon purchasers of Central Vermont's gas turbine power under other rate schedules if granted.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 3, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any

[Docket No. E-7631]

## CLEVELAND ELECTRIC ILLUMINATING CO.

## Filing of Interconnection Agreement

MAY 20, 1975.

Take notice that on April 28, 1975, Cleveland Electric Illuminating Company (CEI) filed with the Commission an interconnection agreement between CEI and the City of Cleveland, Ohio (City) pursuant to Opinion No. 644, issued January 11, 1973 (49 F.P.C. 118) in Docket Nos. E-7631, et al.

Specifically the agreement, dated April 17, 1975, provides for the installation and operation of a 138 kv synchronous interconnection for emergency service which is expected to become effective April 29, 1975. Due to the nature of the service to be rendered, CEI is presently unable to estimate the revenues from any emergency service.

Pursuant to § 35.11 of the Commission's regulations, CEI requests waiver of the notice requirement in order that the agreement may become effective upon the date the interconnection facilities become available to provide emergency service.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 6, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## COLORADO INTERSTATE GAS CO.

## Proposed Settlement Agreement

MAY 20, 1975.

Take notice that on May 12, 1975, Colorado Interstate Gas Company (CIG) filed with the Commission a proposed Stipulation and Agreement of Settlement in the above-captioned docket. CIG states that it, all intervenors, and the Commission Staff have agreed to the substance of this agreement, and that no person has expressed any opposition or disagreement with the proposed settlement.

CIG also states that copies of the proposed Settlement Agreement were mailed to each of its customers, all parties to the instant proceeding, and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 2, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

## Compliance Filing

MAY 20, 1974.

Take notice that on May 5, 1975, Columbia Gas Transmission Corporation (Columbia) tendered for filing certain revised tariff sheets, Third Revised Sheet No. 62A and Third Revised Sheet No. 62B, excluding the compensation features from the curtailment provisions of the General Terms and Conditions contained in its FPC Gas Tariff, Original Volume No. 1, to be effective May 1, 1975, in accordance with the Commission's order issued April 25, 1975, in the above-captioned proceeding.

Copies of the filing were served upon Columbia's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before May 28, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene in accordance with the Commission's rules. Persons that have previously filed a notice or petition for intervention in this proceeding need not file additional notices or petitions to become parties with respect to the instant filing. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[Docket No. CP74-104]  
**COLUMBIA GULF TRANSMISSION CO.**  
 Petition To Amend

MAY 20, 1975.

Take notice that on May 7, 1975, Columbia Gulf Transmission Company (Petitioner), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP74-104 a petition to amend the order of the Commission issued in the subject docket on January 31, 1974 (51 FPC 383), pursuant to section 7(c) of the Natural Gas Act, as implemented by § 157.7(g) of the regulations thereunder (18 CFR 157.7 (g)), by increasing the single project installation cost limitation from \$500,000 to \$714,558, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

By order issued January 31, 1974, Petitioner was granted a budget-type certificate authorizing construction, and permitting and approving the abandonment, for calendar year 1974, and operation of field gas compression and related facilities. Construction authorization was limited to a total cost of \$2,000,000 and a maximum of \$500,000 for any one project.

Applicant states that it constructed a compressor unit pursuant to such authorization and that the actual cost of such construction was \$714,558. Applicant explains that although it had originally estimated the cost of the compressor unit to be \$466,000, a change in location and inflation caused the cost overrun substantially as follows:

- (1) The cost of the compression package, installed, increased from \$391,000 to \$530,200, for an increase of \$139,200. This increase is said to have been caused by unanticipated increases in the cost of the unit itself and in associated marsh dredging costs and installation costs.
- (2) The cost of an electric generator package, installed, increased \$2,900, from \$75,000 to \$77,900.
- (3) For safety reasons the compression was not installed adjacent to an existing producer separation platform as originally planned but over 100 feet away from it. Petitioner states that this change of site necessitated construction of a separate boat landing, separators and sump, at a cost of \$20,600.
- (4) For the reason described in (3) above, elevated walkways were installed to connect the new unit with existing installations, at a cost of \$23,300.
- (5) Inspection, supervision and transportation costs increased \$21,500 along with the increased work done.
- (6) As a result of increased material costs, state and parish sales taxes increased \$20,500. Thus, total direct costs increased from \$466,000 to \$694,558, or \$228,000 (Items (1) through (6)).
- (7) Labor overheads associated with the increased construction increased \$20,558.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 9, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18

CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,  
 Secretary.

[Docket No. ID-1547]

**W. E. CORNELIUS**  
 Supplemental Application

MAY 20, 1975.

Take notice that on April 30, 1975, W. E. Cornelius (Applicant), filed a supplemental application with the Federal Power Commission, pursuant to section 305(b) of the Federal Power Act, seeking authority to hold the following position:

Director, Missouri Utilities Company, Public Utility

Missouri Utilities is engaged in the generation, purchase and sale of electric energy and in the purchase and sale of natural gas within portions of the State of Missouri. It also provides water service in Cape Girardeau, Missouri.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 5, 1975, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,  
 Secretary.

[Docket No. E-8947]

**DELMARVA POWER AND LIGHT CO.**  
 Extension of Procedural Dates

MAY 20, 1975.

On May 15, 1975, the Municipal Intervenor filed a motion to extend the procedural dates fixed by order issued March 14, 1975, as most recently modified by notice issued May 2, 1975, in the above-designated matter. The motion states that the parties have been notified and have no objection.

Upon consideration, notice is hereby given that the procedural dates in the above matter are modified as follows:

Service of Intervenor's Testimony, June 13, 1975.  
 Service of Company Rebuttal, June 27, 1975.  
 Hearing, July 7, 1975 (10 a.m., e.d.t.).

KENNETH F. PLUMB,  
 Secretary.

[Docket No. E-9381]

**IOWA POWER AND LIGHT CO.**  
 Cancellation

MAY 20, 1975.

Take notice that on April 7, 1975, Iowa Power and Light Company (Iowa Power) tendered for filing a notice of cancellation of a wholesale rate schedule for the Town of Imogene, Iowa, designated Iowa Power Rate Schedule FPC No. 10, as amended. Iowa Power states that effective March 27, 1975, it will acquire the electric distribution system within the Town of Imogene and will furnish electricity to the Town on a retail basis.

Iowa Power states that copies of the notice of cancellation have been mailed to the Town of Imogene, Iowa and the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Notice are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
 Secretary.

[Docket No. E-9441]

**LAKE SUPERIOR DISTRICT POWER CO.**  
 Filing of Superseding Wheeling Agreement

MAY 20, 1975.

Take notice that on May 5, 1975, Lake Superior District Power Company (LSDP) tendered for filing a contract to provide wheeling services for Dairyland Power Cooperative (DPC). LSDP concurrently filed a notice of termination of the previous contract. LSDP requests waiver of the Commission's 30 day advance filing requirement in order that an effective date of May 1, 1975 may be established. The contract is an interim agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and pro-

cedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 6, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
 Secretary.

 Secretary.

[FR Doc.75-13783 Filed 5-27-75; 8:45 am]

[Docket No. E-9429]

**OHIO POWER CO.**  
 Filing of Initial Rate Schedule

Take notice that on May 6, 1975, Ohio Power Company (Ohio Power), tendered for filing copies of an Agreement dated April 1, 1974, between American Municipal Power-Ohio, Inc. (AMP-Ohio), and Ohio Power Company, as supplemented by letter agreement dated April 24, 1975. The Agreement sets forth terms pursuant to which (1) Ohio Power proposes to render to AMP-Ohio, transmission service, and may render emergency service, short-term service and limited term service, for the benefit of Patrons of AMP-Ohio, and (2) AMP-Ohio may render emergency service, short-term service and limited term service to Ohio Power. The Company states the purposes of the AMP-Ohio Power Agreement are to enable AMP-Ohio to achieve for the benefit of the municipal electric systems in Ohio which are from time to time Patrons of AMP-Ohio benefits derived from economies of scale and the coordination of programs and operations of its Patrons, through the services provided under the AMP-Ohio Agreement.

The rate for transmission service rendered by Ohio Power to AMP-Ohio, is \$1.00/kw/month, resulting in a monthly charge, assuming a load factor of 70 per-

cent, of approximately 1.86 mills per kwh. The rate contained in the Agreement for emergency service on a reciprocal basis is 110 percent of out-of-pocket costs of the supplier or 17.5 mills per kwh. The rates relative to short-term service and limited term service on a reciprocal basis, the Company states, are substantially the same as those for such services in 1975 reflected in interconnection agreements between Ohio Power and other systems, and which, on March 24, 1975 in Docket No. E-9241, were accepted for filing by the Commission.

The Company states that the AMP-Ohio Power Agreement has an effective date contingent on the occurrence of the last of certain events specified in § 12.04 of said Agreement. The Company requests the Commission accept said Agreement as promptly as possible and fix as an effective date, one consistent with the provisions of § 12.04 of which the Commission will then be notified.

The Company further requests the Commission to find that good cause exists to waive any otherwise applicable requirements of Part 35 of its Regulations including, in particular, a requirement that rate schedules be filed not more than ninety days prior to the date on which electric service is to commence.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before May 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are available for public inspection at the Federal Power Commission.

KENNETH F. PLUMB,  
 Secretary.

[Docket No. E-9439]

**PUBLIC SERVICE CO. OF NEW HAMPSHIRE**

Filing of Proposed Transmission Contract

MAY 20, 1975.

Take notice that Public Service Company of New Hampshire (PSNH), on May 12, 1975, tendered for filing Transmission Contract dated April 15, 1975, between it and City of Holyoke, Massachusetts, Gas and Electric Department. This Contract, together with supporting materials, is submitted in accordance with Part 35 of the Commission's regulations.

The Contract provides for transmission of power from Seller, Vermont Electric Power Company, Inc. (VEPC) to Buyer, City of Holyoke Gas and Electric Depart-

ment. Transmission will cover a 10.8 mile distance from a point at the Vermont-New Hampshire state line to a point at the Massachusetts-New Hampshire state line. The Contract period is from May 1, 1975, through October 31, 1975.

PSNH states that 5,000 KW of power will be entitled monthly to Buyer at a charge of \$135.00 per month. No new facilities are needed to be installed or modified for this contract.

PSNH requests waiver of the normal 30 day notice requirement due to the late date it received notice of such transmission request, and the immediate needed capacity of the Buyer. Accordingly, PSNH further requests said Transmission Contract to become effective May 1, 1975.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 10, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP75-254]

**TEXAS EASTERN TRANSMISSION CORP.**  
 Proposed Changes in FPC Gas Tariff

MAY 20, 1975.

Take notice that Texas Eastern Transmission Corporation on May 2, 1975 tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 2. The proposed changes consist of an Amendment dated February 17, 1975 to Rate Schedule X-14, an exchange agreement with Transcontinental Gas Pipe Line Corporation (Transco) dated November 1, 1960 as amended on July 14, 1972.

Rate Schedule X-14 will be amended such that during the period from April 16, 1975 through November 15, 1975, Transco will deliver up to 60,000 Mcf of gas per day to Texas Eastern at presently authorized points of exchange in the Pennsylvania-New Jersey-New York area, and Texas Eastern will concurrently deliver equal quantities to Transco by delivering same to Texas Gas Transmission Corporation (Texas Gas) for the account of Transco at Lebanon, Ohio. The quantity of gas delivered to Texas Gas for the account of Transco will be balanced with the quantity of gas delivered to Texas Eastern by Transco on a Btu basis. The purpose of the exchange is to assist in effectuating a temporary underground storage ar-

range between Transco and Texas Gas.

The proposed effective date of this filing is April 21, 1975.

A copy of this filing was served upon Transcontinental Gas Pipe Line Corporation and Texas Gas Transmission Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. E-9437]

**VERMONT ELECTRIC POWER CO., INC.**  
**Notice of Filing of Agreement**

MAY 20, 1975.

Take notice that on May 12, 1975, Vermont Electric Power Company, Inc. (Velo) tendered for filing a purchase agreement for the sale of thirty thousand kilowatts (30,000 KW) and related energy from the Vermont Yankee Nuclear Electric Generating Unit in Vernon, Vermont, to the New Bedford Gas and Edison Light Company by the Vermont Electric Power Company, Inc., dated April 1, 1975.

Velo states that service to New Bedford under this rate schedule is being provided at the monthly rate of \$270,000/month. According to the Company, these charges, inclusive of all relevant capacity, maintenance, and net energy charges by Vermont Yankee, are the same as those reimbursed by Velo for capacity and energy under this rate schedule; and, therefore, there will be no change in the overall rate of return of Velo. The Company adds that no cost of service studies were prepared in connection with the derivation of the rate.

Velo is requesting waiver of the thirty day notice requirement prior to the effective date of service pursuant to § 35.3 of the regulations. Velo submits that good cause exists for the waiver of the notice requirement under § 35.11 and requests the date of May 1, 1975, as the effective date of this rate schedule.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure.

cedure. All such petitions or protests should be filed on or before May 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,  
Secretary.

[FR Doc. 75-13787 Filed 5-27-75; 8:45 am]

[Docket No. E-9438]

**VERMONT ELECTRIC POWER CO., INC.**  
**Filing of Agreement**

MAY 20, 1975.

Take notice that on May 12, 1975, Vermont Electric Power Company, Inc. (Velo) tendered for filing a purchase agreement for the sale of five thousand kilowatts (5,000 KW) and related energy from the Vermont Yankee Nuclear Electric Generating Unit in Vernon, Vermont, to the City of Holyoke, Massachusetts, Gas and Electric Department, by the Vermont Electric Power Company, Inc., dated April 1, 1975.

Velo states that service to Holyoke under this rate schedule is being provided at the monthly rate of \$45,000/month. According to the Company, these charges, inclusive of all relevant capacity, maintenance, and net energy charges by Vermont Yankee, are the same as those reimbursed by Velo for capacity and energy under this rate schedule; and, therefore, there will be no change in the overall rate of return of Velo. The Company adds that no cost of service studies were prepared in connection with the derivation of this rate.

Velo is requesting waiver of the thirty day notice requirement prior to the effective date of service pursuant to § 35.3 of the regulations. Velo submits that good cause exists for the waiver of the notice requirement under § 35.11, and requests the date of May 1, 1975, as the effective date of this rate schedule.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure. All such petitions or protests should be filed on or before May 30, 1975. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. CP75-331]

**UNITED GAS PIPE LINE CO.**

**Application**

MAY 20, 1975.

Take notice that on May 8, 1975, United Gas Pipe Line Company (Applicant), 1500 Southwest Tower, Houston, Texas 77002, filed in Docket No. CP75-331 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon in place approximately 5,187 feet of 6-inch pipeline located in sections 16 and 17, Township 8 North, Range 15 West, Covington County, Mississippi, serving Colonial Pipeline Company (Colonial), and to abandon and remove meter, regulating and appurtenant facilities, all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

Applicant states that it has discontinued gas service to Colonial's Collins, Mississippi, pump station as of November 18, 1974. Applicant further states that Colonial has no potential need for future emergency deliveries of gas. The application indicates that Colonial has converted its Collins station to use electric rather than gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 9, 1975, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,  
Secretary.

**REGULATORY REPORTS REVIEW**

**Receipt of Report Proposal**

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO on May 21, 1975. See 44 U.S.C. 3512 (c) & (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed report form are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed form, comments (in triplicate) must be received on or before June 16, 1975, and should be addressed to Mr. Monte Canfield, Jr., Director, Office of Special Programs, United States General Accounting Office, 425 I Street, NW., Washington, D.C. 20548.

Further information may be obtained from the Regulatory Reports Review Officer, 202-376-5425.

**FEDERAL ENERGY ADMINISTRATION**

Request for clearance of a new FEA Form P315-M-O entitled, "Monthly Survey of Propane Sales Volume to Ultimate Consumers". This form will be completed by all (approximately 250) refiners/importers and independent gas processing plant operators, pursuant to section 4(c) (2) (A), Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159), and sections 5 and 13, Federal Energy Administration Act of 1974 (Pub. L. 93-275). The average monthly compliance burden is estimated to be 16 manhours per respondent, but it could be as high as 160 manhours, depending on the size of the reporting firm.

**Availability of Draft Environmental Statement for Barnwell Fuel Receiving and Storage Station**

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Draft Environmental Statement prepared by the Commission's Office of Nuclear Material Safety and Safeguards related to the proposed issuance of a materials license to receive and store irradiated fuel and related materials in the Fuel Receiving and Storage Station at the Barnwell Nuclear Fuel Plant near Barnwell, South Carolina, is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C., and Office of the Barnwell County Board of Commissioners, P.O. Box 443, Barnwell, South Carolina 29812. The Draft Statement is also being made available at the State Clearinghouse, Division of Administration, 1205 Pendleton Street, 4th Floor, Columbia, South Carolina 29201 and at the Regional Clearinghouse, Lower Savannah Regional Planning and Development Commission, P.O. Box 850, Aiken, South Carolina 29801.

Requests for copies of the Draft Environmental Statement, identified as NUREG-75/026, should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Materials and Fuel Cycle Facility Licensing.

The Applicant's Environmental Report for the Barnwell Nuclear Fuel Plant, as supplemented, which includes consideration of the Fuel Receiving and Storage Station, is also available for public inspection at the above designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on November 27, 1971.

Pursuant to 10 CFR Part 51, interested persons may submit comments on the Draft Environmental Statement for the Commission's consideration. Federal and State agencies are being provided with copies of the Draft Environmental Statement (local agencies may obtain this document upon request). Comments are due by July 21, 1975. Comments by Federal, State, and local officials, or other persons received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, D.C., and the Local Public Document Room in Barnwell, South Carolina. Upon consideration of comments submitted with respect to the Draft Environmental Statement, the Commission's staff will prepare a Final

April 17, 1974 (39 FR 13783), the United States International Trade Commission on May 20, 1975, ordered a public hearing to be held July 22, 1975, in the U.S. International Trade Commission's Hearing Room, 8th and E Streets, NW., Washington, D.C. 20436, at 10:00 a.m., e.d.t., to determine whether the Commission should reopen and review its determination of January 10, 1974, in investigations Nos. AA1921-134 and 135 relating to Primary Lead Metal from Australia and Canada. All interested parties will be given an opportunity to show cause why the Commission should grant or deny the petition to reopen and review its determinations of January 10, 1974. Requests to appear at the public hearing should be received by the Secretary of the International Trade Commission, in writing, at its office in Washington, D.C., not later than noon, Thursday, July 17, 1975.

Issued: May 21, 1975.

By order of the Commission.

KENNETH R. MASON,  
Secretary.

**NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES**  
**MUSIC ADVISORY PANEL**  
**Meeting**

Due to unforeseen circumstances, the open meeting of the Music Panel of the National Endowment for the Arts to be held on May 29 and 30, 1975, and announced in the FEDERAL REGISTER of Monday, May 12, 1975, will be closed for purposes of application review during the May 30th portion of the meeting.

This session is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of January 10, 1973, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4) and (5)), will not be open to the public.

Further information with reference to this meeting can be obtained from Mrs. Luna Diamond, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-7144.

EDWARD M. WOLFE,  
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

Environmental Statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Environmental Statement from interested persons of the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Materials and Fuel Cycle Facility Licensing.

Dated at Bethesda, Md., this 19th day of May, 1975.

For the Nuclear Regulatory Commission.

PETER LOYSEN,  
Acting Chief, Fuel Cycle Li-  
censing Branch 2, Division of  
Materials and Fuel Cycle  
Facility Licensing.

[Docket No. 50-213]

#### CONNECTICUT YANKEE ATOMIC POWER CO.

##### Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 2 to Facility Operating License No. DPR-61 issued to Connecticut Yankee Atomic Power Company which revised Technical Specifications for operation of the Haddam Neck Plant, located in Middlesex County, Connecticut. The amendment is effective as of its date of issuance.

This amendment changes the containment integrated leakage rate tests of the Technical Specifications to conform to the requirements of 10 CFR Part 50, Appendix J, Type A tests.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Ch. I, which are set forth in the license amendment. Prior public notice of this amendment is not required since this amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated March 14, 1975, (2) Amendment No. 2 to License No. DPR-61, with Change No. 2, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Russell Library, 119 Broad Street, Middletown, Connecticut 06457.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Md., this 20th day of May 1975.

For the Nuclear Regulatory Commission.

ROBERT A. PURPLE,  
Chief, Operating Reactors  
Branch #1, Division of Re-  
actor Licensing.

[FR Doc.75-13793 Filed 5-27-75;8:45 am]

[Docket No. 50-341]

#### DETROIT EDISON CO. (ENRICO FERMI ATOMIC POWER PLANT, UNIT 2)

##### Receipt of Application for Facility Operating License; Availability of Applicant's Environmental Report; and Consideration of Issuance of Facility Operating License

Notice is hereby given that the Nuclear Regulatory Commission (the Commission) has received an application for facility operating license from the Detroit Edison Company (the applicant) to possess, use, and operate the Enrico Fermi Atomic Power Plant, Unit 2, a boiling water nuclear reactor (the facility), located on the applicant's site in Frenchtown Township, Monroe County, Michigan, at a steady-state power level of 3292 megawatts thermal.

The applicant has also filed an Environmental Report, Operating License Stage, in accordance with the National Environmental Policy Act of 1969 and the regulations of the Commission in 10 CFR Part 51. This report updates the discussion of environmental considerations relating to the proposed operation of the facility, as well as the results of the ongoing monitoring programs, which were previously discussed in the Environmental Report as amended, Construction Permit Stage, dated September, 1970. Both Environmental Reports are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161. The reports are also being made available at the State Clearinghouse, Division of Intergovernmental Relations, Bureau of Management and Budget, Lewis Cass Building, Lansing, Michigan 48913, and the Metropolitan Clearinghouse, South East Michigan Council of Governments, 810 Book Building, 1249 Washington Boulevard, Detroit, Michigan 48226.

After the Environmental Report, Operating License Stage, has been analyzed by the Commission's Director of Nuclear Reactor Regulation or his designee, a draft environmental statement will be prepared. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that any comments of Federal agencies and State and local officials will be made available when received. The draft environmental statement will focus on any

relevant conditions and/or considerations which were not addressed in, or which have changed since preparation of, the final environmental statement prepared in connection with the issuance of the construction permit. Upon consideration of comments submitted with respect to the draft environmental statement, the regulatory staff will prepare a final environmental statement, notice of the availability of which will be published in the FEDERAL REGISTER.

The Commission will consider the issuance of a facility operating license to The Detroit Edison Company which would authorize the applicant to possess, use, and operate the Enrico Fermi Atomic Power Plant, Unit 2, in accordance with the provisions of the license and the technical specifications appended thereto, upon: (1) The completion of a favorable safety evaluation on the application by the Office of Nuclear Reactor Regulations; (2) the completion of the environmental review required by the Commission's regulations in 10 CFR Part 51; (3) the receipt of a report on the applicant's application for a facility operating license by the Advisory Committee on Reactor Safeguards; and (4) a finding by the Commission that the application for the facility license, as amended, complies with the requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations in 10 CFR Ch. I. Construction of the facility was authorized by Construction Permit No. CPR-97, issued by the Commission on September 26, 1972. Construction of the facility is anticipated to be completed by April, 1979.

Prior to issuance of any operating license, the Commission will inspect the facility to determine whether it has been constructed in accordance with the application, as amended, and the provisions of the Construction Permit. In addition, the license will not be issued until the Commission has made the findings reflecting its review of the application under the Act, which will be set forth in the proposed license, and has concluded that the issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. Upon issuance of the license, the applicant will be required to execute an indemnity agreement as required by section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

The Commission has commenced the radiological safety review of the application. However, since the construction permit has been extended until April 1979, the Commission has postponed commencement of its environmental review so as to enable the Commission's Staff to utilize the information which will be more current when the facility is ready for operation. It is anticipated that the Commission's radiological safety and environmental review of the application will not be completed for approximately three years. Under these circumstances, it has been determined that the soonest practicable time for issuance of the

Notice of Opportunity for Hearing is about January 1976.

For further details, see the application for the facility operating license, dated April 4, 1975, and the applicant's Environmental Report, Operating License Stage, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161. As they become available, the following documents may be inspected at the above locations: (1) The safety evaluation report prepared by the Office of Nuclear Reactor Regulation; (2) the draft environmental statement; (3) the final environmental statement; (4) the report of the Advisory Committee on Reactor Safeguards on the application for facility operating licenses; (5) the proposed facility operating license; and (6) the technical specification which will be attached to the proposed facility operating license.

Copies of the proposed operating license and the ACRS report, when available, may be obtained by request to the Director, Division of Reactor Licensing, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Copies of the Division of Reactor Licensing's safety evaluation and final environmental statement, when available, may be obtained from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Bethesda, Md., this 21st day of May 1975.

For the Nuclear Regulatory Commission.

KARL KNIEL,  
Chief, Light Water Reactors,  
Branch 2-2, Division of Re-  
actor Licensing.

[FR Doc.75-13794 Filed 5-27-75;8:45 am]

[Docket No. 50-536]

#### GENERAL ELECTRIC TECHNICAL SERVICES CO.

##### Application for and Consideration of Issuance of Facility Export License

Please take notice that General Electric Technical Services Co., Inc. has submitted to the Nuclear Regulatory Commission an application for a license to authorize the export of a boiling water reactor with a thermal power level of 3012 megawatts to Kernkraftwerk Leibstadt AG, Zurich, Switzerland and that the issuance of such license is under consideration by the Nuclear Regulatory Commission.

No license authorizing the proposed reactor export will be issued until the Nuclear Regulatory Commission determines that such export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to section 123 of the Atomic Energy Act of 1954, as amended (the Act), nor until the Nuclear Regulatory Commission has found that:

(a) The application complies with the requirements of the Act, and the Com-

mission's regulations set forth in 10 CFR Ch. I, and

(b) The reactor proposed to be exported is a utilization facility as defined in said Act and regulations.

In its review of applications solely to authorize the export of production or utilization facilities, the Nuclear Regulatory Commission does not evaluate the health and safety characteristics of the facility to be exported.

Unless on or before June 12, 1975, a request for a hearing is filed with the Nuclear Regulatory Commission by the applicant, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of the Office of Nuclear Material Safety and Safeguards may, upon the determinations and findings noted above, cause to be issued to General Electric Technical Services Company a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in the notice, the Nuclear Regulatory Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

Dated at Bethesda, Md., this 9th day of May 1975.

For the Nuclear Regulatory Commission.

G. WAYNE KERR,  
Chief, Agreements & Exports  
Branch, Division of Materials  
and Fuel Cycle Facility Li-  
censing.

[Docket Nos. 50-461, 50-462]

#### ILLINOIS POWER CO. (CLINTON POWER STATION, UNITS 1 AND 2)

##### Hearing on Application for Construction Permits

Please take notice that in accordance with the "Notice of Hearing on Application for Construction Permits," published by the Atomic Energy Commission<sup>1</sup> in the FEDERAL REGISTER on December 7, 1973 (38 FR 33789), a public hearing will be held before an Atomic Safety and Licensing Board, pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection," and Part 2, "Rules of Practice," to consider the application filed under the Act by Illinois Power Company (the

<sup>1</sup> In accordance with the Energy Reorganization Act of 1974, Pub. L. 93-438, the Nuclear Regulatory Commission (NRC) was established on January 19, 1975. The NRC assumed the licensing and regulatory functions of the former Atomic Energy Commission.

Applicant) for construction permits for two boiling water nuclear reactors designated as the Clinton Power Station, Units 1 and 2, proposed to be located at Applicant's site in DeWitt County, approximately six miles east of Clinton, Illinois.

The public hearing in this proceeding shall be convened on Tuesday, June 17, 1975, at 1:30 p.m. local time, at the following location:

Clinton Junior High School Gymnasium  
401 North Center Street  
Clinton, Illinois 61727

Morning and afternoon sessions of the hearing also will be held at the above location on Wednesday, June 18, 1975, commencing at 10 a.m. and 1:30 p.m., respectively. The hearing will reconvene in Champaign, Illinois, for the remaining sessions, beginning on Thursday, June 19, 1975 at 10 a.m., at the following location:

Brundage Room  
Ramada Inn Convention Center  
1501 South Neil Street  
Champaign, Illinois 61820

Members of the public are invited to attend the hearing. Limited appearances by any persons wishing to state their views orally, or to file a written statement in this proceeding will be received at the commencement of the first day of hearing. In addition, for the convenience of members of the public who are unable to attend sessions during regular business hours of the day, the Board has scheduled an evening session from 7 to 9 p.m. on the first day of the hearing on June 17, 1975, at which time limited appearance statements also will be received.

Issued at Bethesda, Md., this 21st day of May 1975.

It is so ordered.

The Atomic Safety and Licensing Board.

ROBERT M. LAZO,  
Chairman.

[FR Doc.75-13838 Filed 5-27-75;8:45 am]

#### REGULATORY GUIDE

##### Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.96, "Design of Main Steam Isolation Valve Leakage Control Systems for Boiling Water Reactor Nuclear Power Plants," describes a basis acceptable to the NRC staff for implementing the criterion regarding the design of a leakage control system for the main steam isolation valves of boiling

water reactor nuclear power plants to ensure that total site radiological effects do not exceed Commission guidelines in the event of a postulated design-basis loss-of-coolant accident.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed (listed below) or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.96 will, however, be particularly useful in evaluating the need for an early revision if received by July 25, 1975.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Docketing and Service Section.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory Guides are not copyrighted and Commission approval is not required to reproduce them.

Other Division 1 Regulatory Guides currently being developed include the following:

Prevention of Fracture of Structural Discontinuities in Reactor Pressure Vessel.  
Protection Against Postulated Events and Accidents Outside of Containment.  
Fracture Toughness Requirements for Materials for Class 2 and 3 Components.  
Maintenance of Water Purity in PWR Secondary Systems.  
Criteria for Heatup and Cooldown Procedures.  
Effects of Residual Elements on Predicted Radiation Damage.  
Surveillance Testing and Inservice Inspection of Thermal Barrier and Steam Generator Materials in High-Temperature Gas-Cooled Reactors.  
Surveillance and Postirradiation Examination of Fuel Rods in Lead Assemblies.  
Design Load Combinations for Component Supports.  
Interim Guide on Tornado Missiles.  
Criteria for Plugging Steam Generator Tubes.  
Structural Design Criteria for Fuel Assemblies in Light-Water-Cooled Reactors.  
Overhead Crane Handling Systems for Nuclear Power Plants.  
Recommended Procedure for Resintering Test to Monitor Densification Stability of Production Fuel.  
Tornado Design Classification.  
Overpressure Protection of Low-Pressure Systems Connected to Reactor Coolant Pressure Boundary.  
Protective Coatings for Light-Water Reactor Containment Facilities.  
Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Equipment and Systems.  
Assumptions Used for Evaluating the Potential Radiological Consequences of a BWR Radioactive Offgas System Failure.  
Fire Protection Criteria for Nuclear Power Plants.  
Requirements for Auditing of Quality Assurance Programs for Nuclear Power Plants.

Quality Assurance Requirements for Control of Procurement of Equipment, Materials, and Services for Nuclear Power Plants.  
Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant Conditions During and Following an Accident.  
Quality Assurance Requirements for Lifting Equipment.  
Maintenance and Testing of Batteries.  
Qualification Test of Class IE Cables, Connections, and Field Splices for Nuclear Power Plants.  
Seismic Qualification of Class I Electric Equipment.  
Fuel Oil Systems for Standby Diesel Generators.

Quality Assurance Requirements for the Manufacture of Class IE Instrumentation and Electric Equipment for Nuclear Power Plants.  
Assumptions Used for Evaluating the Potential Radiological Consequences of a Liquid Radioactive Waste System Accident.  
Containment Isolation Provisions.  
Instrument Spans and Setpoints.  
Initial Startup Testing Program for Facility Shutdown from Outside the Control Room.  
Periodic Testing of Diesel Generators.  
Qualification of Inspection, Examination, and Testing Personnel for Nuclear Facilities.  
Quality Assurance Program Requirements for Nuclear Power Plant Fuels.  
Testing of Nuclear Air Cleaning Systems.  
Preoperational and Initial Startup Testing of Feedwater Systems for BWRs.  
Design Criteria for Overload Protection of Motor-Operated Valves.  
Probable Maximum Storm Surge Flooding on Lakes and Sea Shores.  
Protection of Nuclear Power Plants Against Industrial Sabotage.  
Emergency Planning for Nuclear Power Plants.  
Control Room Manning.  
Flood Protection for Nuclear Power Plants.  
Hydrologic Design Criteria for Water Control Structures and Constructed for Nuclear Power Plants.  
Spill Analysis—Dispersion and Dilution in Surface and Ground Water.

[Docket No. 50-533]

WESTINGHOUSE ELECTRIC CORP.  
Application for and Consideration of  
Issuance of Facility Export License

Please take notice that Westinghouse Electric Corporation has submitted to the Nuclear Regulatory Commission an application for a license to authorize the export of a pressurized water reactor with a thermal power level of 2783 megawatts to Statens Vattenfallsverk, Stockholm, Sweden and that the issuance of such license is under consideration by the Nuclear Regulatory Commission.

No license authorizing the proposed reactor export will be issued until the

Nuclear Regulatory Commission determines that such export is within the scope of and consistent with the terms of an applicable agreement for cooperation arranged pursuant to section 123 of the Atomic Energy Act of 1954, as amended (Act), nor until the Nuclear Regulatory Commission has found that:

(a) The application complies with the requirements of the Act, and the Commission's regulations set forth in 10 CFR Ch. I, and

(b) The reactor proposed to be exported is a utilization facility as defined in said Act and regulations.

In its review of applications solely to authorize the export of production or utilization facilities, the Nuclear Regulatory Commission does not evaluate the health and safety characteristics of the facility to be exported.

Unless on or before June 12, 1975, a request for a hearing is filed with the Nuclear Regulatory Commission by the applicant, or a petition for leave to intervene is filed by any person whose interest may be affected by the proceeding, the Director of the Office of Nuclear Material Safety and Safeguards may, upon the determinations and findings noted above, cause to be issued to Westinghouse Electric Corporation a facility export license and may cause to be published in the FEDERAL REGISTER a notice of issuance of the license. If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in the notice, the Nuclear Regulatory Commission will issue a notice of hearing or an appropriate order.

A copy of the application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street NW., Washington, D.C.

Dated at Bethesda, Md., this 9th day of May 1975.

For the Nuclear Regulatory Commission.

## OFFICE OF MANAGEMENT AND BUDGET

### CLEARANCE OF REPORTS

#### List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 22, 1975 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an

Indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

[Delegation of Authority No. 12-B; Rev. 1]

DEPUTY ASSOCIATE ADMINISTRATOR  
FOR INVESTMENT

Delegation of Authority Regarding  
Investment Activities

Delegation of Authority No. 12-B (38 FR 13787) is hereby revised to delete reference to audit and investigatory powers under section 310 of the Small Business Investment Act of 1958, as amended. Audit and investigatory functions have been transferred to the Office of the Assistant Administrator for Administration.

Delegation of Authority No. 12-B, Revision 1, is revised to read as follows:

I. Pursuant to the authority delegated to the Associate Administrator for Finance and Investment in Delegation of Authority No. 12, (Revision 1), (38 FR 13063), as amended (38 FR 16001, 38 FR 26509, 40 FR 8398, and 40 FR 18054), the following authority is hereby delegated:

A. Deputy Associate Administrator for Investment. To take any and all actions necessary to carry out the provisions of Titles I, II, and III (with the exception of section 310 of Title III) of the Small Business Investment Act of 1958, as amended, and of the regulations thereunder as amended from time to time, including without limitation all necessary action in connection with the servicing,

administration, collection, sale and liquidation of partially or fully disbursed loans, obligations and property (real, personal or mixed, tangible or intangible) held by or assigned to SBA and arising out of activities under said Act, and, in connection therewith, to accept or reject offers of settlement or of compromise for cash, credit, or property (real, personal, or mixed, tangible or intangible).

II. The authority delegated herein may not be redelegated.

III. The authority delegated herein may be exercised by any SBA employee officially designated as Acting Deputy Associate Administrator for Investment.

Effective date: May 28, 1975.

Dated: May 20, 1975.

EDWIN T. HOLLOWAY,  
Acting Associate Administrator  
for Finance and Investment.  
[FR Doc.75-13827 Filed 5-27-75; 8:45 am]

[Delegation of Authority No. 15-A; Amdt. 2]

DIRECTOR, OFFICE OF AUDITS AND INVESTIGATIONS

Delegation of Administrative, Financial and Investigation Activities

Delegation of Authority No. 15-A (37 FR 24716), as amended (38 FR 19294), is hereby further amended to delegate certain investigatory authority to the Director, Office of Audits and Investigations. Actions taken by the Director, Office of Audits and Investigations under the provisions of Section 310 of the Small Business Investment Act of 1958, as amended, and section 5(b)(11) of the Small Business Act, as amended, prior to the date hereof are hereby ratified.

Section C is therefore added to Delegation of Authority No. 15-A as follows:

C. Investigation Authority—1. Director, Office of Audits and Investigations. a. To exercise in the name of the Administrator the powers conferred on the Administration by section 310 of the Small Business Investment Act of 1958, as amended, and section 5(b)(11) of the Small Business Act, as amended.

Effective date: May 28, 1975.

Dated: March 20, 1975.

UNITED STATES RAILWAY ASSOCIATION

[Docket No. 75-17]

PENN CENTRAL TRANSPORTATION CO.

Abandonment of Portion of Norwalk Branch, Huron and Sandusky Counties, Ohio

Order. The Trustees of Penn Central Transportation Company, debtor, a railroad in reorganization under the Regional Rail Reorganization Act of 1973

(45 U.S.C. 701 et seq.), applied to the United States Railway Association for the authorization required by section 304(f) of that Act to abandon a portion of a line of railroad known as the Norwalk Branch, between milepost 250.7 near Bellevue and milepost 257.7 near Clyde, a distance of 7.0 miles in Huron and Sandusky Counties, Ohio.

Section 304(f) provides that a railroad in reorganization may not abandon a line of railroad "unless it is authorized to do so by the Association and unless no state or local or regional transportation authority reasonably opposes such action."

No state or local or regional transportation authority opposes this application. The Congress of Railway Unions and the Brotherhood of Locomotive Engineers request the imposition of labor protective conditions for any employees who may be affected by this abandonment. Abandonment of this line would not otherwise be inconsistent with the purposes of the Act.

Accordingly, the application will be granted on the condition that adversely affected employees receive, until the effective date of mandatory offers to "protected employees" under section 502(b) of the Act, the labor protection customarily imposed by the Interstate Commerce Commission, as in Chicago, B&Q R. Co., Abandonment, 257 I.C.C. 700.

This order shall be effective on June 17, 1975.

Dated this 21st day of May 1975.

[SEAL] EDWARD G. JORDAN,  
President, United States  
Railway Association.

#### DEPARTMENT OF LABOR

##### Office of Federal Contract Compliance AFFECTED CLASS AND BACK PAY GUIDELINES

###### Extension of Comment Period

On March 26, 1975, the Office of Federal Contract Compliance published proposed Affected Class and Back Pay Guidelines at 41 CFR Part 13311. The proposed Guidelines would amend 41 CFR Part 60-60, known as Revised Order 14, by clarifying the means of identifying an affected class, resolving affected class problems and setting forth the principles applicable in awarding back pay relief to identifiable victims of discrimination including affected class members.

Interested persons were invited to comment upon the proposal by submitting written data, views or arguments to the Department of Labor on or before April 25, 1975. That comment period has expired, and many persons have submitted requests asking for an extension of the time to comment. In consideration of these requests, the comment period is hereby extended until June 27, 1975.

Interested persons may submit their comments to Mr. Philip J. Davis, Director, Office of Federal Contract Compliance, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3402, Washington, D.C. 20210.

JOHN T. DUNLOP,  
Secretary of Labor.

BERNARD E. DELURY,  
Assistant Secretary for  
Employment Standards.

PHILIP J. DAVIS,  
Director, Office of Federal  
Contract Compliance.

##### Office of the Secretary ALLEN QUIMBY VENEER CO. Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-4: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 9, 1975 in response to a worker petition received on April 8, 1975 which was filed on behalf of workers formerly en-

gaged in the production of birch plywood doorskins at the Allen Quimby Veneer Co., Bingham, Maine, a Division of Columbia Plywood Corp., Portland, Oregon.

The notice of investigation was published in the FEDERAL REGISTER (40 FR 17089) on April 16, 1975. No public hearing was requested and none was held.

The information upon which the determination is made was obtained principally from officials of Allen Quimby Veneer Co., its major customers, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by such workers' firm or an appropriate subdivision thereof contributed importantly to such total or partial separation, or threat thereof, and to such decline in sales or production.

For purposes of paragraph (3), the term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Significant total or partial separations. All hourly workers and most salaried workers of the Allen Quimby Veneer Co. were separated in September-November 1974 when the company was phasing out production prior to closing.

Sales or production, or both, have decreased absolutely. Sales and production of birch plywood doorskins manufactured at the Allen Quimby Veneer Co. decreased absolutely in the second and third quarters of 1974. All production of birch plywood doorskins ceased in November 1974.

Increases of imports contributed importantly. Imports of articles like or directly competitive with the birch plywood doorskins produced at the Allen Quimby Veneer Co. increased as a percent of domestic consumption and production from 75 percent and 307 percent respectively in 1973 to 78 percent and 335 percent respectively in 1974. In the fourth quarter of 1974 the ratios of imports to consumption and imports to production were 83 percent and 500 percent respectively. Import levels of birch plywood doorskins declined from 126 million square feet in 1973 to 87 million square feet in 1974.

The evidence developed in the Department's investigation indicates that increased import competition was an important factor contributing to the closing of the Allen Quimby Veneer plant. In recent years imports held a dominant share of the domestic market for birch plywood doorskins and significantly influenced the prices which domestic producers could obtain for their products.

During 1974, as doorskin sales declined sharply due to cutbacks in housing construction, imports of birch plywood doorskins increased their share of the domestic market. Major customers of Allen Quimby Veneer stated that in the last 6 months of 1974 birch plywood doorskins from Japan, the largest supplier in the domestic market, were available at prices substantially below those of domestic producers. Allen Quimby Veneer could not meet the lower import prices without incurring substantial losses on its doorskin operations. In these circumstances Columbia Plywood Corp., the parent company of Allen Quimby Veneer, concluded that continued doorskin production would not be profitable and that the Allen Quimby Veneer plant should be closed.

**Conclusion.** After careful review of the facts obtained in the investigation, I conclude that increases of imports like and directly competitive with the birch plywood doorskins produced at the Allen Quimby Veneer Co. contributed importantly to the total or partial separation of the workers of that firm. Section 223 (b) (2) of the Trade Act of 1974 provides that a certification of eligibility to apply for worker adjustment assistance may not apply to any worker who was last separated from the firm or subdivision more than 6 months before the effective date of the new program (i.e. October 3, 1974). In accordance with this provision of the Act I make the following certification:

All hourly and salaried workers of the Allen Quimby Veneer Co., Bingham, Maine, a Division of Columbia Plywood Corp., Division of Columbia Corp., Portland, Oregon, who became totally or partially separated from employment on or after October 7, 1974, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of May 1975.

HERBERT N. BLACKMAN,  
Associate Deputy Under Secretary  
for Trade and Adjustment Policy.

[TA-W-28]

#### ROHR INDUSTRIES, INC.

#### Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On May 19, 1975 the Department of Labor received a petition filed under section 221(a) of the Trade Act of 1974 ("the Act") by the International Association of Machinists and Aerospace Workers on behalf of the workers and former workers of the Chula Vista, California plant of Rohr Industries, Inc., Chula Vista, California.

Accordingly, the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with door frame weldments for transit cars and detailed sheet metal parts and subassemblies for aircraft engine nacelles produced by the Chula Vista, California plant of Rohr Industries, Inc. or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number of proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing. *Provided*, Such request is filed in writing with the Acting Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 7, 1975.

The petition filed in this case is available for inspection at the Office of the Acting Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 19th day of May 1975.

MARVIN M. FOOKS,  
Acting Director, Office of  
Trade Adjustment Assistance.

#### INTERSTATE COMMERCE COMMISSION

[Notice 776]

#### ASSIGNMENT OF HEARINGS

MAY 22, 1975.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 139721, All World Travel, Inc., now assigned June 10, 1975 at Philadelphia, Pennsylvania is postponed indefinitely.

MC F-12443, Jerry Lipps, Inc.—Purchase—Pascagoula Drayage Company, Inc. and Jerry Lipps, Inc., now being assigned September 9, 1975 (4 days) at Jackson, Miss., in a hearing room to be later designated.  
MC 730 Sub 364, Pacific Intermountain Express Co., now being assigned September 9, 1975 (14 days) at Los Angeles, California; in a hearing room to be designated later.  
MC-F 12254, Economy Movers, Inc.—Control and Merger—Eckley Trucking and Leasing, Inc., and MC 5227 Sub 15, Economy Movers, Inc., now assigned July 14, 1975 at Omaha, Nebraska is cancelled, and transferred to Modified Procedure.

MC 124211 Sub 254, Hilt Truck Line, Inc., now being assigned July 14, 1975 (2 days), at Omaha, Nebraska; in a hearing room to be designated later.

#### BURLINGTON NORTHERN INC.

#### Abandonment Between Brisbin and Gardiner, Park County, Montana

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, that no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Park County, Mont., on or before June 6, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 15th day of May 1975.

By the Commission, Commissioner Tuggle.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

[AB 6 (Sub-No. 7)]

#### BURLINGTON NORTHERN INC.

#### ABANDONMENT BETWEEN BRISBIN AND GARDINER, PARK COUNTY, MONTANA

The Interstate Commerce Commission hereby gives notice that by order dated May 15, 1975, it has been determined that the proposed abandonment by the Burlington Northern Inc., of its line of railroad between Milepost 10.60 at Brisbin and Milepost 54.36 at Gardiner, a total distance of 43.75 mainline miles, plus

4.28 yard track miles, all in Park County, Mont., if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. § 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2) (C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because (1) the volume of traffic handled on the line has been low and is steadily declining, (2) U.S. Highway 89, which parallels the subject line, provides an adequate highway route, (3) any resultant diversion of traffic from rail to truck will not have a significant impact on air and water quality, and (4) there is the availability of applicant's rail service at Livingston, Mont. In addition, approval of the abandonment proceeding could allow private and public agencies the opportunity to offer to purchase all or part of the right-of-way property with its related materials and structures for rail service and public use.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-2086.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C. 20423, on or before June 23, 1975.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[AB 1 (Sub-No. 30)]

#### CHICAGO AND NORTH WESTERN TRANSPORTATION CO.

#### Abandonment Between Blue Earth and Elmore, in Fairbault County, Minnesota

MAY 16, 1975.

The Interstate Commerce Commission hereby gives notice that: 1. By order served April 14, 1975, applicant was required to publish a notice in the Fairbault County, Minn., that an environmental threshold assessment survey was made in the above-entitled proceeding and based on that assessment it was determined that the proceeding does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq. 2. No comments in opposition, of an

environmental nature, were received by the Commission in response to the April 14, 1975, order and subsequent notice. 3. This proceeding is now ready for further disposition within the Office of Hearings or the Office of Proceedings as appropriate.

#### CINCINNATI, NEW ORLEANS-TEXAS PACIFIC RAILWAY CO.

#### Abandonment Between Harriman and Dearmond in Roane and Morgan Counties, Tennessee

MAY 16, 1975.

The Interstate Commerce Commission hereby gives notice that: 1. By order served April 9, 1975, applicant was required to publish a notice in the Roane and Morgan Counties, Tenn., that an environmental threshold assessment survey was made in the above-entitled proceeding and based on that assessment it was determined that the proceeding does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq. 2. No comments in opposition, of an environmental nature, were received by the Commission in response to the April 9, 1975, order and subsequent notice. 3. This proceeding is now ready for further disposition within the Office of Hearings or the Office of Proceedings as appropriate.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.  
[FR Doc.75-13860 Filed 5-27-75; 8:45 am]

[Finance Docket No. 27628]

#### OREGON-WASHINGTON RAILROAD AND NAVIGATION CO.

#### Construction and Operation Near Hedges, Benton County, Washington

Upon consideration of the record in the above-entitled proceeding, and of a staff-prepared environmental threshold assessment survey which is available to the public upon request; and

It appearing, that no environmental impact statement need be issued in this proceeding because this proceeding does not represent a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321, et seq.; and good cause appearing therefor:

It is ordered, That applicant be, and it is hereby, directed to publish the appended notice in a newspaper of general circulation in Benton County, Wash., on or before June 6, 1975 and certify to the Commission that this has been accomplished.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D.C., and by forwarding a copy to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 15th day of May 1975.

By the Commission, Commissioner Tuggle.

[SEAL] JOSEPH M. HARRINGTON,  
Acting Secretary.

[Finance Docket No. 27628]

#### OREGON-WASHINGTON RAILROAD AND NAVIGATION CO. CONSTRUCTION AND OPERATION NEAR HEDGES, BENTON COUNTY, WASHINGTON

The Interstate Commerce Commission hereby gives notice that by order dated May 15, 1975, it has been determined that the proposed construction by the Oregon-Washington Railroad and Navigation Company of its line near Hedges, Benton County, Wash., a distance of 5,005 feet together with 1,000 feet of paralleling run around track, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. 4321, et seq., and that preparation of a detailed environmental impact statement will not be required under section 4332(2) (C) of the NEPA.

It was concluded, among other things, that the environmental impacts of the proposed action are considered insignificant because the industrial development accelerated by the subject action is consistent with land use plans for the area. The potential for increased traffic congestion and subsequent deterioration of air quality will be mitigated by the occurrence of switching operations after working hours. Energy resources will be minimally conserved as the construction would allow for less circuitous routing for rail traffic.

This determination was based upon the staff preparation and consideration of an environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202-343-2086.

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Washington, D.C., 20423, on or before June 23, 1975.

This negative environmental determination shall become final unless good and sufficient reason demonstrating why an environmental impact statement should be prepared for this action is submitted to the Commission by the above-specified date.

[I.C.C. Order No. P-3]

**SOUTHERN PACIFIC TRANSPORTATION CO.****Passenger Train Operation**

It appearing, that the National Railroad Passenger Corporation (Amtrak) has established through passenger train service between Chicago, Illinois, and Los Angeles, California; that the operation of these trains require the use of employees, tracks and other facilities of The Atchison, Topeka and Santa Fe Railway Company (ATSF); that a portion of ATSF's tracks between Barstow, California, and San Bernardino, California, are temporarily out of service due to a freight train derailment; that an alternate route is available between Barstow and Mojave, California, on the ATSF, thence via the Southern Pacific Transportation Company from Mojave to Los Angeles, California; that its use is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

**It is ordered, That:**

(a) Pursuant to the authority vested in me by order of the Commission served June 14, 1974; and of the authority vested in the Commission by section 402(c) of the Rail Passenger Service Act of 1970 (45 U.S.C. 562(c)), the Southern Pacific Transportation Company (SP) be, and it is hereby authorized to operate trains of the National Railroad Passenger Corporation (Amtrak) between a connection with The Atchison, Topeka and Santa Fe Railway Company (ATSF) at Mojave, California, and Los Angeles, California.

(b) In executing the provisions of this order, the common carriers involved shall proceed even though no agreements or arrangements now exist between them with reference to the compensation terms and conditions applicable to said transportation. The compensation terms and conditions shall be, during the time this order remains in force, those which are voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, the compensation terms and conditions shall be as hereafter fixed

by the Commission upon petition of any or all of the said carriers, in accordance with pertinent authority conferred upon it by the Interstate Commerce Act and by the Rail Passenger Service Act of 1970, as amended.

(c) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(d) *Effective date.* This order shall become effective at 6:00 p.m., PST, May 12, 1975.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., p.s.t., May 13, 1975, unless otherwise modified, changed, or suspended by order of this Commission.

It is further ordered, That this order shall be served upon Southern Pacific Transportation Company and upon the National Railroad Passenger Corporation (Amtrak), and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., May 12, 1975.

INTERSTATE COMMERCE  
COMMISSION,  
LEWIS R. TEEPLE,  
Agent.

**IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY****Elimination of Gateway Letter Notices**

MAY 22, 1975.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination Rules* (49 CFR Part 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before June 7, 1975. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 106603 (Sub-No. E4), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractors' materials*, restricted to building materials, as described by the Commission, from points in Indiana to those points in the Upper Peninsula of Michigan on and west of U.S. Highway

41. The purpose of this filing is to eliminate the gateway of Wilmington, Del.

No. MC 106603 (Sub-No. E5), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractors' materials*, restricted to building materials as described by the Commission, from those points in Indiana on and west of Interstate Highway 65 to those points in the Upper Peninsula on and east of U.S. Highway 41. The purpose of this filing is to eliminate the gateway of Wilmington, Ill.

No. MC 106603 (Sub-No. E6), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractors' materials*, restricted to roofing materials, from those points in Illinois south and west of a line beginning at the Illinois-Missouri State line, and extending along Interstate Highway 55/U.S. Highway 66 to junction U.S. Highway 36, thence along U.S. Highway 36 to the Illinois-Missouri State line to those points in the Upper Peninsula of Michigan on and north of U.S. Highway 2. The purpose of this filing is to eliminate the gateway of Whiting, Ind., and Wilmington, Ill.

No. MC 106603 (Sub-No. E7), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractors' materials*, restricted to roofing materials, from those points in Illinois bounded by a line beginning at the Illinois-Missouri State line and extending along U.S. Highway 36 to junction U.S. Highway 66/Interstate Highway 55, thence along Interstate Highway 55 to junction Interstate Highway 74, thence along Interstate Highway 74 to junction U.S. Highway 34, thence along U.S. Highway 34 to the Illinois-Iowa State line, to those points in the Upper Peninsula of Michigan on and east of U.S. Highway 41. The purpose of this filing is to eliminate the gateways of Whiting, Ind., and Wilmington, Ill.

No. MC 106603 (Sub-No. E8), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractor's materials*, restricted to building and roofing materials, from points in Indiana (except the plant site of the Bethlehem Steel Corporation, lo-

cated at Burns Harbor, Porter County, Ind.), to points in the St. Louis, Mo., commercial zone. The purpose of this filing is to eliminate the gateway of Vandalia, Ill.

No. MC 106603 (Sub-No. E9), filed May 10, 1974. Applicant: DART TRANSPORT LINES, INC., P.O. Box 8008, Grand Rapids, Mich. 49508. Applicant's representative: Martin Leavitt (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Building contractors' materials*, restricted to building and roofing materials, in truckloads, from those points in Ohio on and south of a line beginning at the Ohio-Kentucky State line and extending along Ohio Highway 73 to junction Ohio Highway 725, thence along Ohio Highway 725 to the Ohio-Indiana State line to those points in the Lower Peninsula bounded by a line beginning at the Michigan-Indiana State line and extending along Interstate Highway 94 to junction U.S. Highway 27, thence along U.S. Highway 27 to junction U.S. Highway 10, thence along U.S. Highway 27 to junction U.S. Highway 10, thence along U.S. Highway 10 to junction Interstate Highway 10, thence along Interstate Highway 10 to junction Michigan Highway 32. The purpose of this filing is to eliminate the gateway of Lockland, Ohio.

No. MC 106920 (Sub-No. E35), filed June 4, 1974. Applicant: RIGGS FOOD EXPRESS, INC., P.O. Box 26, New Bremen, Ohio 45869. Applicant's representative: E. Stephen Helsley, 666 Eleventh Street NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Milk, cream and buttermilk*, (except concentrated whole milk and concentrated skim milk), in bulk, in tank vehicles, from those points in Minnesota on and north of a line beginning at the Minnesota-North Dakota State line and extending along U.S. Highway 2 to junction U.S. Highway 71, thence along U.S. Highway 71 to the United States-Canada International Boundary line, to those points in Indiana on and south of a line beginning at the Indiana-Michigan State line and extending along Interstate Highway 69 to junction Indiana Highway 9, thence along Indiana Highway 9 to junction U.S. Highway 31, thence along U.S. Highway 31 to junction U.S. Highway 50, thence along U.S. Highway 50 to junction U.S. Highway 231, thence along U.S. Highway 231 to junction U.S. Highway 460, thence along U.S. Highway 460 to the Indiana-Illinois State line. The purpose of this filing is to eliminate the gateways of Darke, Mercer, and Auglaize Counties, Ohio.

No. MC 106920 (Sub-No. E95), filed June 3, 1974. Applicant: RIGGS FOOD EXPRESS, INC., P.O. Box 26, New Bremen, Ohio 45869. Applicant's representative: E. Stephen Helsley, 666 Eleventh Street, NW., Washington, D.C. 20001. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Com-

modities classified as *dairy products* under B in the appendix to the report in *Modification of Permits of Motor Contract Carriers of Packing-house Products*, 46 M.C.C. 23 and/or 48 M.C.C. 628, from those points in Wisconsin on and west of a line beginning at the Wisconsin-Illinois State line and extending along Wisconsin Highway 83 to junction Wisconsin Highway 60, thence along Wisconsin Highway 60 to junction U.S. Highway 41, thence along U.S. Highway 41 to junction Wisconsin Highway 74, thence along Wisconsin Highway 74 to Lake Michigan, to those points in Mississippi on and south of a line beginning at the Mississippi-Louisiana State line and extending along Mississippi Highway 35 to junction U.S. Highway 98, thence along U.S. Highway 98 to junction U.S. Highway 49, thence along U.S. Highway 49 to junction U.S. Highway 98, thence along U.S. Highway 98 to the Mississippi-Alabama State line. The purpose of this filing is to eliminate the gateways of Darke, Mercer, and Auglaize Counties, Ohio.

No. MC 107002 (Sub-No. E111), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Nitric acid, dry fertilizer, and fertilizer solutions*, in bulk, in tank or hopper-type vehicles, from the plant of Mississippi Chemical Corporation near Yazoo City, Miss., to points in Ohio. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E112), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from the site of the plant of Mississippi Chemical Corporation near Yazoo City, Miss., to points in Illinois. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E113), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Taylorsville, Miss., to points in Florida. The purpose of this filing is to eliminate the gateway of Mobile, Ala.

No. MC 107002 (Sub-No. E126), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a com-

mon carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from Barfield, Ark., and points within 10 miles thereof, to points in Georgia. The purpose of this filing is to eliminate the gateway of Collierville, Tenn.

No. MC 107002 (Sub-No. E127), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Barfield, Ark., and points within 10 miles thereof, to points in Florida. The purpose of this filing is to eliminate the gateway of Mobile, Ala.

No. MC 107002 (Sub-No. E128), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Indiana. The purpose of this filing is to eliminate the gateway of Decatur, Ala.

No. MC 107002 (Sub-No. E129), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Kansas, restricted against the transportation of liquid hydrogen, liquid oxygen, and liquid nitrogen when moving to missile storage or launching sites, missile test facilities or manufacturing plants producing liquid hydrogen, liquid oxygen, or liquid nitrogen. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E130), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Iowa, restricted against the transportation of liquid hydrogen, liquid oxygen, and liquid nitrogen when moving to missile storage or launching sites, missile test facilities or manufacturing plants producing liquid hydrogen, liquid oxygen, or liquid nitrogen. The purpose of this filing is to eliminate the gateway of Barfield, Ark., and points within 10 miles thereof.

No. MC 107002 (Sub-No. E131), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Kentucky. The purpose of this filing is to eliminate the gateway of Collierville, Tenn., and Decatur, Ala.

No. MC 107002 (Sub-No. E132), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Michigan. The purpose of this filing is to eliminate the gateway of Memphis, Tenn.

No. MC 107002 (Sub-No. E133), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in North Carolina. The purpose of this filing is to eliminate the gateway of Fox, Ala.

No. MC 107002 (Sub-No. E134), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except hydrogen peroxide, petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Ohio. The purpose of this filing is to eliminate the gateway of Memphis, Tenn.

No. MC 107002 (Sub-No. E135), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Oklahoma. The purpose of this filing is to eliminate the gateway of Collierville, Tenn.

No. MC 107002 (Sub-No. E136), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above).

Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Barfield, Ark., and points within 10 miles thereof, to points in Texas on, west, and south of a line beginning at the Oklahoma-Texas State line and extending along U.S. Highway 281 to junction U.S. Highway 876, to the Gulf of Mexico, restricted against (1) spent catalyst, liquid hydrogen, liquid oxygen, and liquid nitrogen, when moving to missile storage or launching sites, missile test facilities or manufacturing plants producing liquid hydrogen, liquid oxygen, or liquid nitrogen. The purpose of this filing is to eliminate the gateway of Arlington, Tenn.

No. MC 107002 (Sub-No. E137), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to South Carolina. The purpose of this filing is to eliminate the gateway of Fox, Ala.

No. MC 107002 (Sub-No. E138), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Carter, Greene, Hamblen, Hawkins, Johnson, Sullivan, Unicoi, and Washington Counties, Tenn. The purpose of this filing is to eliminate the gateway of Decatur, Ala.

No. MC 107002 (Sub-No. E139), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except arsenic acid, acetic acid, wood alcohol, hydrogen peroxide, petroleum products, plasticizers, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Texas, restricted against the transportation of creosote oil to points in that part of Texas on and west of U.S. Highway 75. The purpose of this filing is to eliminate the gateway of Memphis, Tenn.

No. MC 107002 (Sub-No. E140), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, and titanium dioxide), in

bulk, in tank vehicles, from Hamilton, Miss., to points in West Virginia. The purpose of this filing is to eliminate the gateway of the plant site of Monsanto Chemical Company in Anniston, Ala.

No. MC 107002 (Sub-No. E141), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid chemicals* (except petroleum products, plasticizers, hydrogen peroxide, and titanium dioxide), in bulk, in tank vehicles, from Hamilton, Miss., to points in Illinois. The purpose of this filing is to eliminate the gateway of Memphis, Tenn.

No. MC 107002 (Sub-No. E142), filed May 12, 1974. Applicant: MILLER TRANSPORTERS, P.O. Box 1123, Jackson, Miss. 39205. Applicant's representative: H. D. Miller, Jr. (same as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Dry chemicals* (except fertilizer and fertilizer ingredients), in bulk, in tank vehicles, from Memphis, Tenn., to points in Wisconsin.
